ASSOCIATION OF BRITISH UNIVERSITY WOMEN IN INDIA.

The Association of British University Women Its objects in India was established in 1913 are

(1) To facilitate intercommunication and co operation between women of any nationality who are members of the universities of the United Kingdom, resident in India

To provide a means of keeping in touch with the universities of the United Kingdom, by communication with the British Federa-tion of University Women, and otherwise as may seem expedient

(8) To act as an organisation which shall afford opportunity for the expression of united opinion and for concerted action by university

Membership is open only to those women who hold degrees in any university in the women United Kingdom, or hold Oxford or Cambridge Honours Certificates but Associate Membership is open to women who have studied at a British University for two years and each Members Branch may admit as Honorary women who have advanced the higher education and interests of women

The Association of British University Women has had several branches The address of the Honorary Secretary, Bombay is as follows -

Miss F Sullivan, MA, 19, Gowalia Tank Road, Bombay 7

The Delhiand Punjab Branches came into existence in 1918 The Calcutta and Bombay Branches have been influential and have repeatedly inter sened with good effect to educate public opinion with regard to subjects affecting women Branches have, for instance, made investigations on behalf of the Education Department, Government of India, the Calcutta University Commission, etc, and have supplied, through the International Federation of University Women, information on Secondary Education in India carried through an important exhibition of Food Roulets This branch, however, has not membership resident in places where no braintened for a resident of the carried through an important exhibition of Food Roulets This branch, however, has not membership resident in places where no braintened for a resident of the carried for a reside They have been Products This branch, however, has not functioned for a number of years

The Bombay Branch has done good work in connection with the formation of the Social Purity Committee and has, through a special sub committee, organised public meetings for women on subjects affecting their interests about which legislation was being or had been recently enacted

A valuable part of the work of the Association was the establishment of Women's Employment Bureaus in Calcutta and Bombay They were remarkably successful mto the employment Bureau established by the Women's Council

As a means of promoting friendships between women from various parts of the United King dom, with widely differing tastes and interestand spheres of life in India, and as an instrument for affording opportunities for usefulness to educated women, the Association of University Women has a useful function to perform

This Association is Federated to the "Fed eration of University Women in India, and thus forms one of the Units of the India. Federation

Federation of University Women in Indi

The Federation of University Women in Ind unites various Associations of University Wom throughout the country, its object being to protect friendship and understanding among University Women of all races resident in India at the country that the to further their common interests It is affiliat to the International Federation of University Women which has a membership of over 60,00 representing thirty-three nations and whi seeks by scholarships, exchange of teache group discussions and conferences to unite common action and understanding the Unit sity women of the world

The Federation in India is controlled by Central Committee at present located

The Church.

provided chaplains for its servants lains of the present establishment are maintained for ministration to the Government's British born servants, civil and military They are chosen by the Indian Chaplaincies Board sitting in London, are appointed by the Secretary of State, are posted to Dioceses by the Governor-General in consultation with the Metropolitan, and within their Dioceses are posted to stations by the Provincial Governor on the recommendation of the diocesan bishop. Their pay and allowances are wholly met by Government spiritual matters they are subject to the supervision and jurisdiction of their bishop, and while Government servants, civil and military are their primary charge, they are the parish priests of the chaplaineres to which they are appointed and are responsible for the care of all members of the church in their parish except in so far as Indian Members of the Church are cared for by missionaries or Indian clergy Besides providing chaplains the Government of India, again following the practice of the East India Company, has provided or assisted in the provision of churches and their maintenance, and also of cemeteries Where numbers do not warrant the provision of an Establishment chaplain Government has assisted in the provision of clergy by grants-in-iid, and when from time to time the number of Establishment chaplains has been reduced special grants-in aid have been granted Lstablishment and all grants-in aid are subject to revision and are in fact revised from time to time The latest retrenchment, carried out in 1940, reduced the number of chaplains by twelve, and savings effected, along with those under other heads, amounted to Rs 187,276

The great influx of British troops caused by the war has necessitated the provision of additional religious ministrations. This need was met by the organisation in 1942 of an Indian Army Chaplains Service. It provides ministrations for Indian Christian as well as British Christian troops

(The Ecclesinstical establishment includes besides Anglican chaplains, Church of Scotland, 1 ree Church, and Roman Catholic chaplains, for ministrations to members of those communions, and churches and grants in aid are provided or given on the same principles as for Anglicans)

The special interests of those parishioners whose domicile is England in the continued use, should they so desire, of the services of the Inglish Prayer Book which the Church of India is now free to alter at its discretion, are safeguarded by certain of the canons, and these Interests together with other matters concerning the undertakings and relation of the Government of India to its chaplains and the Church are provided for b, a set of Statutory Rules drawn up under the Indian Church Act Member of the Church of England or any of the bran has of the Anglican Communion are, while resident in India, full members of the Church resticut in India, full members of the Church of India, and are a most important part of the do not appear to have attempted to spread the India. Church their numbers still in some Christian faith in India. The Portuguese may therefore be regarded as the first missionaries of the distriction of the Church as a viole the number of India, and from their arrival at Gos the India is the Church as a viole the number of India, and from their arrival at Gos the Pranciscans and Dominicans who accompanied their distriction of the India, and Indian clerky numbered 350 with great activity into the work of evangelism in 1923, and Indian clerky 716. I want later The formation of the Society of Jesus led to one for the Indian arrival at the formation of the Society of Jesus led to one for the Indian arrival at Gos the Indian clerky. There are no racial of its first members, the famous St. Francis

The chap- distinctions whatever in the Church Indian clergy frequently preach or celebrate for European congregations, and in a few instances are in permanent charge of European parishes. The Indian laity though usually preferring services in their own languages are everywhere free to attend English churches and to be enrolled, if they wish, as parishioners

> The education of European children, and more particularly the children of the Domiciled and Anglo-Indian community, has from early days been a concern of the Church In addition to day schools it has established over 70 board ing schools for boys and girls, many of them in hill The provincial Governments assist stations these schools with grants in aid both for building and current expenditure, just as they do all other schools, according to the rules of the education codes. The schools are inspected by Government inspectors. Indian boys and girls are admitted to these schools, but the number that may be taken is limited to a percentage fixed by the local Government An appeal issued by the Archbishop of Canterbury in 1938 for the endowment of these schools had produced by June, 1939, just under £30,700 The fund is known as The Anglo Indian Schools Fund and is still open for the receipt of donations. Indianisation of Government services, especially of the railways, customs and post and telegraph departments has severely hit the Domiciled and Anglo-Indian community, and the ability of parents to pay fees is steadily decreasing. Hence The the urgent need for increased endowments existing endowments of all the schools yield an income of less than £1 per child per annum

(The Church of India is not the only com munity responsible for European education in India The Roman Catholics, the Church of Scotland and the various free churches provide schools for their children, and receive similar assistance from Government)

The Government of India Act of 1935, section 83, provides for the continuance of government grants to European schools at a total figure in each province not less than the average figure for the ten years preceding 1933, unless the whole grant of a government to education is reduced, when the grant to European education may be reduced in proportion And, as a result of the recommendations of a sub-committee of the Round Table Conference, provincial boards for Anglo-Indian and European Education have been set up, and also an Inter-Provincial Board, to consider and advise Governments on matters connected with the schools

Missions

In Malabar, on the south west coast of India, there have been Christians certainly from the 6th century, probably from the 4th century and possibly from the 1st century A D They are called "Syrian" Christians oning to their connection with the Church in Syria They

Tayl r being sent to Go wh re he arri ed training institutions 217 indu trial schools in 1541 Under his leadership the pre ching in 1941 Under his leadership the pre ching of Christianity was arried on with great earnest-hees The missionary work of the Rom n I thole Church thus begun has been continue i and at the present day the number of Indian numbers of that Church is given as 113 659 (Censu 1931) to which may be dded 654 939 Syrian Christians attached to the R man Church The number of independent Syrian Christians

(C nsus 1031) is given as 525 607 Protestant missions did not begin till the 18th rrocetant missions did not begin the telefron-fentury, and as missionaries were not allowed to establish the mselves in the Comp ny a territories they worked from Panish trritory and in Indian States These missionaries were Litherans but as stated above were in the iter part of the 18th Century assisted with funds from England Famous men among th m were Ziegenbalg Kiernander Schultze and Christian Friedrick Schwarz By the end of the 18th Century it is believed that there were in 18th Century it is believed that there were its South India about 30 000 Lutheran converts In 1800 the famous Baptist trio Carey Maxim and Water House Baptist trio Carey Maxim and Water House India in 193) Men of humble origin and education one was a cobler one a ragged school teacher and no a printer they display of great abit in the second of the s for the training of ci il and military officers

The 19th Century saw a great increase in missionary effort of every sort This was du to the opening if the Company's trito ies to to the opening f the Company's tribo less to miston ries by the Gor nument of India Act of 1813 a d it was nly after that d to that Anglican (Church of Engi nd) mistonary Societies took up work in India namely the Church Mis lonary Society and the Society fo the Propag tion of the Gospel, by sending as mission ries ordained clergy of the Church of Eagl ad those hitherto sub idised o s at by the SPOK (see above) being Lutherans The first mission ries to rrive after the passing of the Act were American Congreg tionalists The London Mis ionary Society were also early in the field and Presbyterians from America and Scoti and soon followed In the course of the e ntury India became cove ed by a network of missi as engaged not only in ev ngelism but in education I work in a hools and colleges i medical work a d in ind at les Among famou names of missionary education lists ar those of Dr Duff of Calcutta and Dr Wilson in Bomb y In the education of women mis ions m y fairly claim to hav taken the lead Th total numbe of mi lo ary societies from Europe and America working in India is now o er 150 For con ulta tion and common cti n there is a N tional tion and common cti n there is a N tional Christi n Connell with headquarters at Nagpur first org bised i 1014 and in co ne ti n with this there are 10 Provi clai Christian Councils

THE ROMAN CATHOLIC CHURCH.

The Catholic community is composed of the following elementa -

- converted by the Apostle St Thomas They were brought under alleglines to the Pope by the Portugue o in 1589 and placed first under Jesuit bishop; and then under Carmelite Vicur-Apostolic They are at present ruled by an Archbishop and three suffragan Bishops of their own Syriac rite
- (2) Converts of the Portuguese missionaries from 1500 and onwards, starting from Goa and working in the south of the peninsula and up the west coast, Coylon, Bengal, etc.
- (3) European immigrants at all times, in cluding British troops
- (4) Modern converts from Hinduism and Animism in recent mission centres
- (5) Recent converts from the Jacobite com munity in Malabar, of which 3 Bishops, 71 priests and some 28,000 laits have been received into the Cutholic Church

The Portuguese mission enterprise, starting after 1500, continued for about 200 years, after which it began to decline Io meet this decline fresh missionaries were sent out by the Congregation de propaganda side, till by the middle of the 10th century the whole country was divided out among them except such portions as were occupied by the Goa clergy Hence arose a conflict of jurisdiction in many parts between the Portuguese clergy of the "Padroado" or royal patronage, and the propaganda clergy This conflict was set at rest by the Concordat of 1886 (amended) by the Agreement of 1928, abolishing "double jurisdiction') At the same time the whole

country was placed under a regular hierarchy will heafter sutrequent adjustments now stands as follows -

(1) The 'Syrian' Christians of the Melabor Stands as ionova — Const, traditionally said to have been Under the Sacrel Congregation of Extraordi nary Feelesiastical Affairs -

The archbishopric of Gos and Damaun throlig ome extension into British t critory) with suffragan bishopries at Cochin

Churches -

The archbishopric of Frnakulam, with suffragan bishopries of Changanacherry, kottayam and Trichur

The archbishopric of Trivandrum, with suffra gin bi hopric of Tiruvella

Under the Stered Congregation of Propaganda Tide -

The archbishoptic of tera with suffruen bishoprics of All thab id, Afmer and Lucknow and the Presecture, Aposton of Indore and Thui

The archbishopric of Bombas with suffragen bishouries of Poons, Mantalore, Collect Tuticorin Trichinopoly. Missions of Karachi and Ahmedabad

The archbishopric of Calcutta, with suffragan bishoprics of Runchi, Dacca, Chittagong Krishnagar, Dinajpur, Patna and Shillong and the Prefecture Apostolic of Sikkim

The archbishopric of Madras, with suffragan bishoprics of Nellore, Hyderahad, Vizara patam Nagpur, Bezwada Cuttack and cuntur, the Prefecture Apostolic of Jubbul pore, and the Mission of Bellary

The archbishopric of Pondicherry (French), M1 401e, with suffragan bishoprics of Combitore Kumbakonam, Salem, Malicca and Bangalore

The archbishopric of Delhi and Siml with suffragan by hoprics of Lahore and Mul

The archbishopric of Verapoly with suff bishoprics of Q 1 lon Kottar Triva id T

Secretary-Rev D D Rajamani, Palamcottah

tion about the Society's work in both the fields Headquarters Palamcottah

Homes and Institutions for Lepers and of their untainted children, working in 20 countries but largely in India, Burma, China and countries in Africa Its work in India is carried on through co operation with 30 Missionary Societies In India and Burma alone the Mission

now has 32 Asylums of its own with upwards of 7 200 inmates and is aiding or has some connec tion with work for lepers at 22 other places in India Altogether in India and Burma over nearly 10,000 lepers are being helped The Mission also provides for the segregation of the healthy children of lepers from their diseased parents More than 900 children are

thus being saved from becoming lepers An important feature of the work of the Mission is the measure of successful medical treatment whereby early cases, both adults

and children are now benefiting Most of the Mission's income is derived from voluntary contributions Some funds are raised in India and Burma but the bulk of the money expended by the Mission in India and Burma is

received from Britain, although the provincial Governments give regular maintenance grants There is an Indian Auxiliary of the Mission to Lepers of which Mrs R G Crse, The Hon'ble Lady Hope, Lady Lewis and Lady Twynum are Vice Presidents Hon Treasurer — William McIntyre, c/o Macneill & Co, 2, Fairlie Place, Calcutta

Codification Before the tr nef r of India to the Crown the law was in a state of great confusion. Sir

ledd is the creation of statutory energing made for it either at Westminster or by ite authorities in India to whom the nec as ry law giving functions have from time to time been described.

be the tathets and the Rogith common law large relative relative to the tathets are the relative to the relative terms of the relative rel tion in reasing importance will attach here fter to the periodical examination and re islon of the Statute Book and the Government of I di hope that th Committee will take its place as a permanent feature of the legislative machinery of the country

European British Subjects

the law was in a state of grate sound to state the law was in a state of grate sound to state the large Camaningham described it as hope is me for all classes or train di tinctions of proleasily unwieldy entangled and contusing in the large state of the larg Whilst the substantive criminal faw is the law of British India is contained in the state of write the question of jurisdictio over Lucopean Codes. One of the most enminent lawyers who subjects in such way as to remove from the reason to India Bit James Stephen id the India In

with offences, and it left their position as ex-ceptional as before The general disqualifical jurisdiction in any dispute beta tion of native judges and magnetrates remains, more of the following parties, the but if a native of India be appointed to the post of district magnetrate or sessions judge, his powers in regard to jurisdiction over European involves any question (of law British subjects are the same as those of an which the existence or extent Englishman holding the same office provision however is subject to the condition the Court's jurisdiction over dis that every European British subject brought state is a party. In the exercifor trial before the district magistrate or sessions jurisdiction the Court can pro judge has the right, however trivial be the declaratory judgment. The Cc charge, to claim to be tried by a jury of which with appellate jurisdiction over not less than half the number shall be Euro-decree or final order of a Highpeans or Americans Whilst this charge India, if the High Court certification was made in the powers of district magistrates, involves a substantial question the law in regard to other magistrates remained interpretation of the Governmen unaltered "

After a discussion on this subject in the in Council either with or withou Legislative Assembly in September 1921, The Tederal Legislature is empor the following motion was adopted —"That in the appellate jurisdiction of the order to remove all racial distinctions between so as to extend to certain civil Indians and Europeans in the matter of their large stakes An appeal also lie trial and punishment for offences, a committee Court from a High Court in a I trial and punishment for offences, a committee be appointed to consider what amendments should be made in the provisions of the Code wrongly decided concerning the of Criminal Procedure, 1898, which differentiate between Indians and European British subjects and Europeans who are not legislative authority vested in the Reither subjects in original trials and respect to the restant of the Reithers and Europeans who are not legislative authority vested in the British subjects in criminal trials and proceed ings and to report on the best methods of giving effect to their proposals. As a result of the of the Act in relation to the adirecommendations of the Recial Distinctions the State of a law of the Federa Committee the law on the subject was further. An appeal may be brought to modified, and by the Criminal Law Amendment Act XII of 1923 in place of the old Chapter its original jurisdiction in any XXXIII (sections 443-463) the new Chapter concerns the interpretation of the XXXIII (sections 443-449) with certain supple mentary provisions were substituted. This of the executive or legislative at has in some measure reduced the differences in the Federation by virtue of an between the trials of Europeans and of Indians under the Code Since 1836 no distinction of race has been recognised in the civil courts throughout India.

The Federal Court

A Federal Court is, according to the Joint Parliamentary Committee's Report, a necessary element of any Federal Constitution It is at once the guardian and interpreter of the Consti tution, and arbiter of the disputes between the Federal Units The Government of India Act 1935 accordingly provides (sections 200-218) that there shall be a Federal Court consisting of a Chief Justice of India and such number of other judges as His Majesty may deem necessary but the number of puisne judges shall not exceed six, unless and until an address is submitted by the Federal Legislature for an increase judge of the Federal Court is to be appointed by His Majesty by warrant under the Royal Sign Manual He shall hold office until he attains the age of 65 years, but is liable to be removed from office on the ground of misbeha-tiour or of bodily or mental infirmity, provided that the Judicial Committee of the Privy Council on a reference reports that the judge ought on any such ground to be removed The Federal Court shall be a Court of Record, and shall sit at Delhi or such other place or places as the Chief Justice may with the approval of Governor-General from time to time appoint

This depends Certain restrictions : or any Order in Council made t direct appeal in such a case lies virtue of the Instrument of Access or arising under Agreement made Council from a decision of the Fe Order in Council made thereunder Accession, or under an agreemer Part VI of the Act An appeal brought to the Privy Council when is granted either by the Federal Privy Council All authorities, civ throughout the Federation are en All in aid of the Federal Court the Federal Court shall be in language, and judgment must be open court in accordance with t the majority of the judges

The Federal Court was establish menced to function from 1st Octol Court in the first instance Chief Justice and two puisne judg Justice receives a salary of Rs 7, of the puisne judges Rs 5,500 p

Sir Maurice Gwyer, K.C., was be the first Chief Justice of I Shah Mahomed Sulaiman and Mr to be judges of the Federal Court

Sir Maurice Gwyer K C, retired Sir Srinivasa Vardachariar acted as from 25 4-43 to 7 6 43 when Sir I the present Chief Justice was ap other two colleagues are Justices and Zafrulla Khan

The functions of the Federal Co be affected in any way by the a emergency powers by the Gov under section 45 of the Act in case the Constitutional machinery

Bigh Courts

High Courts of Judicature were consti-tuted by the Indian High Courts Act of 1861 for Beng I Bombay and Madras and I t riortle United Provinces and the Punjab sup reedi the old supreme and Sudder Courts More recently High Courts have been con tituted for Patn and Rangoon as well The Judg s are appointed by the Crown they hold office during the pleasure of the Sov reign at least one third of their number are barristers one third are recruited from the judicial branch of the Indian Civil ervice the rem inlng places being avail ble for per on who have held ter tain Judicial Offices in India or lawyers quilded in Indi Civilian judges has now been abolished by Gov rament of India Act 193 T isl by ju is the rule in original criminal cases befo High tourts but ju les ar ne er employed in civil suits in Indi

For other parts of India High Courts have been formed under other ame The chief difference being that they derive their authority from the G vernment of India not from P it me t In Sindh N W P Province and th Central Pro I ces and Be ar the p inc pal I g I tribun l is known as the Court of the Judicial stroum is known as the Court of the Judicial Commissioner Quite reently th Secret ry of State for India h s approved the propos I for the establishm nt of a High Court in the Centr I Provinces nd Berar and Sindh and a High Court hus si ce Janu ry 1936 be n establi hed at N gpur

The High Courts ex rel e super ision over it the subordinate court Returns are regul re

explan tions as well as from the cases that Courts by the Insoftency Act of 1906 come bet re them in appe I to keep themselv s to some extent quaint d with the manner). Cotomers are appointed only for t in whi h the courts gen rally are di chargi g their duties

Lower Courts

The Code of Crimi | Procedure provides for the constitution of laterior estimatal courts styled courts of session and coarts of magistrates. Every profice outside the Presi dancy town, is di idel date for session and a session division has a court of ses in and a local division has a court of ses in and a local division has a court of ses in and a local division has a court of ses in and a local division has a court of ses in and a local division has a court of ses in and a local division has a court of ses in and a local division has a court of ses in and a local division has a court of ses in and a local division has a court of ses in and a local division has a court of ses in and a local division has a court of ses in and a local division has a court of ses in and a local division has a court of ses in and a local division has a court of ses in and a local division has a court of ses in and a local division has a loc

deal with ma isterial cases and benches of Ju t ces of the Peace or honorary magistrates dispose of the less important cases

before courts of sessi n are either Trial Trial before courts of sessin are chiler with sessors or juries. As s ors as it but do not bind the judg by their opinions on jurnes the opinion of the majority prevails if accepted by the presiding Judge. The Indian law llows con iderable I titude of appeal But there is no Court of Ciri mai Appeal and as the Judicial Committee of the Privy Council as the Judgent Committee of the Phys Council
has repeatedly disclaimed all Jurisdiction as a
Court f Orimin I Appe I there is no adequate
machinery for appeal or r visio available to
persons convicted of serious and even capital offences and sente ced by the High Courts n their original or appellate Crimin 1 Jurisdict ons The pr rogati e of mercy is exercised by the Governor General in Council and the Local Go erum at concerned without prejudice to the superior power of the Crown

The constitution and just dicti n of the inferior civil courts varies Broadly speaking one district and sessions judge is appointed for each district as D strict Judge he pr ides in its principal ci il court of original jurisdiction his functi ns as Sessions Judge have been de scribed For the e po ts members of the Indian Civil Service are mainly selected though som appointments re made from the Provincial Ser ice Next come the Subordin te Judges Ser ice Next come the Subordin to Judges and Munsiffs the extent of whose origin l infladiction varies in different parts of India establi hed at N spur.

The High Courts are the Courts of ppc | Judge are aims Invariably presided over by from the superior courts in the districts crimi | Indians | There are in addition a number of ball and civil, and their decisions are fund | Courts of Small Lourse with jurisdiction to try except in class show interface appear less to His bounds units and to the 500 in the trouble by Maje vi to Council and its hearth by the Judicial it was where the Chartered High Countil have been depended in Eagl and original juri dict in Small Cause Courts have Committee of the Privy Council in Eagl and original juri dict in Small Cause Courts dis The High Courts ex rele super Ision over 11 pose of money usits up to Rs 000 As In.

> Coroners are appointed only for the Pr si d ney Towns of Calcutt and Bomb v El e where their duties are discharged by the ordi hary staff of magistrates and police officer qualded by jurors

who are admitted to practise on the appellate appointed under Section 55 of the Gove side of the chartered High Courts and in the of India Act 1935 The Provincial Gover Courts subordinate to the High Courts (At-have usually their own Legal Rememb torneys are required to qualify before admission to practise in much the same way as in England The rule that a solicitor must instruct counsel prevails only on the original side of the Bombav and Calcutta High Courts Pleaders practise in the subordinate courts in accordance with rules framed by the High Courts The Bar Councils Act of 1926 arms at abolishing the various grades of practitioners, and under it each of the High Courts maintains a roll of advocates entitled to practise within its jurisdiction

Law Officers.

The Government of India has its own Law College in the Legal Member of Council All Government measures are drafted in this department after their substance is decided department after their substance is decided upon by the administrative departments confecer of the Council the principal law officer of the Government of India is the Advocate General of India who is appointed by the Governor General under section 16 of the Government of India Act 1935 At Bombay and Calcutta the Government of India have also confecer own solicitors. Each of the Provincial that the Governments has its own Advocate General either of the Judiciary or the State

have usually their own Legal Rememb and professional lawyers as Gove Advocates and Assistant Government Adv

Sheriffs are attached to the High C Calcutta, Madras and Bombay The appointed by Government, selected from officials of standing, the detailed work done by deputy sheriffs, who are offi Court

Law Reports.

The Indian Law Reports are now puin seven series—Calcutta, Madras, B Patna, Lahore and Allahabad, Go the authority of the under General-in-Council They contain cut termined by the High Court and by the J Committee on appeal from the particula

THE INDIAN POLICE

Origins --Cornwallis was the first Indian administrator to take the burden of policing the administrator to take in nutrien of policing the country off the remindars and to place it on Government. He ordered the District Judges of Bengal in 193 to open a Thans (Police Station) for every 400 square miles of their jurisdiction and to appoint stipendiary Thana dars (Police Station Officers) and subordinates

In Madras in 1816 Sir Thomas Munro took a perintendence of police out of the hands of the edentary judges and placed it in the hands of the peripatetic Collector who had the indigenous viil ge police system already under his control In this way the Revenue Department controlled the police of the districts and still to some extent does so especially in Bombay Province

In Khandesh from 18 6 36 Outram of Mutiny fame howed how a whole time military commandant could turn incorri ible marau ders into excellent police, a d Sir George Clerk Go ernor of Bombay in 1848 applied th le son by appointing full time European Superin tendents of Poli e 1 many Districts

Madras had a torture scandal in 1853 which showed that 3 Collectors had no time for re police superinte dence in 1859 the prin iple of cult time European superintendence was introduced in a Madras Act of the tye rand the control of the Collector was removed

The Mutiny led to general police overh ul a d retr nehment a d the Madras Act was mainly followed in Indi A t V of 1851 An Act for the Regul ti n of Police which still governs poll working everywhre in I dia except Madras and Bomb y whi h have its own Police art (IV of 1890) own Police Act (IV of 1890)

Working -St ictly speaking th re is no India Police With th ex ption of the dvisory staff of th Intelligenc Bureau attached dvisory staff of th Intelligence Dureau statehed to the Home Department in Government of I dish a not a i give police offer relief event of the Home Act is posterior and the policy of the Act is posterior and the policy of the Local Government oncerned and in the own subject to the case i control of the Governor Gen at The cold in minor the Correlation of the Government of the Governor Gen at The cold in minor the Correlation of the Governor Gen at Correlation of the Mandanana and Nicobar I lands and Panth Fiplod and in other c att lys administered areas is dimid tered by the Off Commission oncerned or the head of the dministration oncerned the Correlation of the Correl the Central Government

Within the Local Government area the police are enrolled nd org nised in District, force at the head of each of which is a District. Superintendent of Police with powers of enlistment and dismiss 1 of constabulary

The D S P is subject to du I control The force he c mmands is bject to the general ontrol of the DI t ict Maristrate for the enforce-

and fliciency of the force is govern d by a dep rimental hierarchy of Deputy Inspector (eneral of Police and Inspector G neral of Police G nerally ape king ti D\$1 ts (entral of Police and Inspector i neral or Police G nerally spe king it DSI to to correspo d with his Di tri t M gi.t at n judi lal and magi terial topics and with lis d part ental chiefs on internal workin of the

The C I B—The Curzon Police Commission of 190 3 modernised police working by providing for the direct nilstment and training of I lucated Indians as Police Station Officers and by creating specialised police ag n i s ur der each Local Government for the inv stigation of specialist nd profes ional crim These agencies are known as Criminal Investigation Departments and work under

Investigation Departments and work under a Deputy inspector Ge all They collate information about crime cell; the Come Ge site information about crime cell; the Come Ge site it ramingation is into several jurifications at they centrol the workin of uch set niting police de loopments as the Fl yer I fint identification Bureaux There is also as Central Intelligence Bureaux under the Hom D partme t of the G vernment of Indi which e liets inf mation from all provincial Criminal In estigation Departments and works critimal in estigation Departments and works for I ter provincial il is n I thas it branches at various e ntres throughout Briti b I dl a d at Quetta in B luchist n The H ad of the Eureau kn wn as the Direct r Intelligence Bureau al o act s Advisor to the Home D p rim nt of the Central Government in polic matter

Headquarters and Armed Police -At the clief town of each District tie D S P has his office and al o l is Headquarter Police Lines and parade ground This is the main centre for cumulation and distributin to th centre for cumulation and distributi n to the Police Stations and Outposts of the District of clothing arms ammuniti and accounters is all ears the Stores and the Armoury Here also constabul ry recruits end it to by the D S P are taught delli deporture t and dutie and are tured out to full vacancia. The H ad quiter Lines also c stain in two lundred out of the properties reasures in the District and also provil p isoner of treasure sort Actu lly they form a small and mobil local army equipped with muskets (si gle locating) and bayo ets. The m st highly train d section of them contrough a m sket y course and are arm d with the section of the s mounted a d armed poli e

Thanas and Thanadars -Almost through out India the popul r terms for Police Station a d P lice Stati n Officer are Thana and Thanadar It is at the Police Station that th public ar m st in touch with the police and the police with the public Whether it b in a large city or i a moin sil hamlet the Thana i The force he of subject to the control isting city of a most an namest up ranact. The force he of subject to the control isting of the control of the Dit ist Mentstrate for the minor- and its representation of the minimum ment of law and the maint names of order or against a person r persons unknown in the District But the departmental who kind idealing with u he callers the Thansdar who like police of all ranks, is supposed to be always on duty, is chiefly guided by the Fourteenth Chapter of the Code of Criminal Procedure, and the Second Schedule at the end of that Code This schedule shows nearly all penal offences and states whether or not they are "cognisable by the police" The fourteenth Chapter lays down that a cognisable complaint must then and there be recorded, visited, and investigated A non cognisable complaint is metely noted in a separate book and the complainant is told to go to court

Police Prosecutors—The complainant in a cognisable case not only has his complaint recorded but investigated without payment of fee. If the Thanadar succeeds in establishing a prima facie case against the accused, the prosecution in court is conducted free of charge by a police prosecutor, who is a police officer Personal inspection and supervision are the common means for the District Superintendent of Police to know whether his subordinates are doing their work properly

Out-Posts -When the Police Commission of 1860 devised the plan of police that still holds field, they laid down two criteria of the One was one policeman numbers required per square mile, the other was one per thousand of population. In towns it is well enough to of population. In towns it is well enough to have the available police concentrated at the police station But in the mofussil the Thana is very often fifty miles distant from portions of its jurisdiction. It is in such cases profitable to detach a portion of the police station strength under a head constable to man an outpost where complaints can be received and investigation begun without the injured party having to undertake a long journey to the distant Thana The secret of good mojussil police working in normal times is dispersion. A single policeman, however junior, represents the rule of law and is an agent of Government

The Chain of Promotion—A constable may aspire to become a Police Station Officer or higher officer. The directly recruited candidate who comes in through the Police Training School as a Thanadar is, it is understood, a graduate and may quite often rise to be an Inspector or a Deputy Superintendent, or exceptionally a Superintendent. The direct Deputy, an office reserved for Indians, has a good chance of becoming Superintendent, and perhaps Deputy Inspector General. The direct Assistant Superintendent, whether from England, or from India, is sure of a Superintendentship, and has chances of D I G after 25 years' service. The period of service for all ranks for full pension is thirty years, and if an officer dies in the process of earning full pension his pension dies with him. Members of the Police Force are eligible for the award of the King's Police Medal and the Indian Police Medal for long and meritorious services and for conspicuous acts of gallantry

Presidency Police—In the Presidency Towns there is unified police control for the Police Commissioner is responsible for both law and order and for departmental training and efficiency

The Commissioner of Police of a Presidency Town is not the subordinate of the Provincial-Inspector General of Police and he deals direct with Government, just as the Presidency Magistrates deal directly with the High Court The Criminal Procedure Code of India is modified in the Presidency Towns by special police Acts which prescribe police procedure Justice in criminal cases in Presidency Towns is some what rough and ready, not only from this cause, but also because Presidency Magistrates can give upto six months or Rs 200 fine summarily, i.e., without formal record of proceedings, and if only whipping or fine up to Rs 200 is inflicted there need be not even any statement of reasons for the conviction

STATISTICS OF POLICE WORK

The undestrability of a tacking under in the face unit the differences in the conditions portained to statistical results as a rest of the under which the pole work and it may be metric of policy work was a point upon added they can at the best illeated by make considerable areas was laid by the limp frietly the taree of arcress with with in Indian Police Committion whose certainty to the the process of the conditions of the contract of the c Takes believe the series of a land by the lamp effectly the egree of a received by this product believe to committee who return it to be the place earny out that import not be risk by to result from the prevail net it believe the strength of the control that the advancement o an off or would the advancement o an off or would be result of constitutes both to cates and by persons arrected and a low ratio of crime the objection as after the control of the cates and by persons arrected and a low ratio of crime the objection as a low so and the strength areas but the polity, and of the else differences between the cannot properly be used as a bat of control of the cates without their the cannot properly be used as a bat of control of the cates of the crime.

JAHS

penas servicus rigorous imprisonment (which may include short periods of solitary confine ment) and simple imprisonment. Accom-modation has also to be provided in the julis for civil and under trial prisoners

Since the introduction with effect from the 1st April 1937 of the Government of India Act the administration of J ila i a provincial matter and the power of legislation in respect of prison ments the Contral Government exercising only concurrent legi lative Powers with the Irovin cial Governm nts in the matter of the transfer of prisopers and accused persons from one unit

to nother

The origin of all jail improvements in India and origin of all jan improvements in India in recent years was the Jail Commission of 1888 The report of the Commission which consisted of only two members both officials servi g und r the Go rnment of I dis is extremely long and reviews the whole question of jail organisation and administration in the minutest d tall In most matte a the Com mission recommendations have been accept ed and adopted by Pro 1 cial Governments but i various matters mainly of a mi or character their proposal have eith r bee rei cted rei cted ab initio as manifed to local conditions aban doned as unwork b! after careful reerim nt or scoepted in principle but postponed for the

present as Impossible The most imports t of all the recomme da tions of the Commission the o e that might in fact be described as the corner stone of their fact be described as the corner stone of their riport is that ther should be in each Fresi ducey three class a of 1 Us in the first place large control lails for convicts sentenced place is the control laid of the condition of the condity, district in the beadquaters of districts and thidly subsidiary jails and lo k ups fr under trial prisoners and convicts between the condition of the convicts of the control of the convicts of the control of the control of the control of the convicts of the control of the cont

The condu t of converse to particular proportions of the conduction of the conductio of thes post being a strong inducem at to good

The Jails Committee —The obvious advisa bility of proceeding along certain general lines as convict officers

Jall administration in India is regulated of uniform application led to the appoint general by the Prisons Act of 1804 and by ment of a Jalla Committee which conducted makes the under he yet by the Covernment of India the first comprehensit, survey of Indian prison and the Irottneial Governments. The punish administration witch had been made for thirty ments authorsed by the Indian Pen I Code for years. Extress was Jalla morning and increasing convicted offenders include transportation upon the occurrency increasing penal serviced ringous mythosoment (witch bestuding Jall accommodation of recruiting a existing fall accommodation of recruiting a better class of warders of providing educa tion for prisoners and of det louing prison industries so as to meet the n eds of the con suming Departmens of Government Other important recommendations included the sepa ration of civil from criminal offenders mation of that from criminal ovenders the adoption of the E glish system of release on il case in the ca of suclescents and the cre tion of children's courts. The Committee found that the reformative side of the Indian system needed particular attention. They system needed particular attention They recommended the segregation of habituals from ordin ry pri oners the provision of a parate accommodation for prisoners under trial itic institution of the star-class system and the abolition of certain practices which are liable to harden or degrade the prison population

Employment of Prisoners—The work on which convicts are employed is mostly eartied on within the jail walls but era mural employment on a large scale is some time llowed as for example when a large number of convicts were employed in excavating the Jhelum Canal in the Puniah Within th walls prisoners are employed on jail service and repairs and in worksh ps. The main principle if id down with reg rd to jail manufactures is ind down with reg hi to an instituteurs is that the work mut be penal and industrial The industries are on a large scale multiarious empl yment being condemned while care is taken that the jall sh ill not compete with local traders As far as possible industries are adapted to the requirements of the consuming adapted to the requirements of the consuming public departments and printing tent-making and the manuf cture of clothing are among the commonest employments Schooling I con fined to juveniles the experiment of teaching adults has been tried but literary instruction is unsuitable for the class of persons who fill

an Indian tail

magatrace. In tax unner the open tenseuring the nears of remain primorers and the horizontal neighbors and incides in large central pials a Deputy Support In The latter which was apparently much pear tendent to supervise the jall manufactures that of in Dombay was described by the Commis and in all central and district, lais one or more slot as indicting a quality corner Punish subordinate medical officers. The executive ments are now seek dul dang granded into major ments are now sen dul dand graded into major tail consi ts of lilors and warders and co vi t and minor. The most difficult of lil land praded into major petty officers are employed in all entral and bloms is the internal maintenance of order district jail the prospect of promotion to one among the warders we combine of order order to the control of among the prison is for which purpose paid warders and convict warders at employed With this is bound up the question of a special class of well behaved prisoners for employment

ful offenders"-1 e, those below the age of 15 operation The Bombay Children Act has been -the law provides alternatives to imprisonment, and it is strictly enjoined that boys shall not be names, addresses or other details of children or sent to jail when they can be dealt with other wise. The alternatives are detention in a reformatory school for a period of from three to neven years, but not beyond the age of 18, discharge after admonition, delivery to the license and to raise the minimum term of parent or guardian on the latter executing a detention in the Borstal School from 2 to 3 years bond to be responsible for the good behaviour of the culprit, and whipping by way of school discipline These are but general principles which have been variously given effect to by various Provincial Governments

The question of the treatment of 'young adult' prisoners has in recent years received

much attention

Children's Acts and Borstal Schools Acts for the special treatment of juvenile offenders have been passed by several Provincial Legislatures

The Madras Children Act, passed in 1920, is the earliest and has been largely followed in the other provinces. It classifies as "children" boys and girls under the age of 14 and as " young persons those between the ages of 14 and 16 It enacts that a child or young person convicted of any offence, may as an alternative to the usual punishments of fine, whipping or imprisonment be discharged after due admonition, committed to the care of a parent, guardian or relative, or of a person named by the court, or sent to an Industrial School set up or certified under the Act It further enacts that no offender under the age of 16 may be sentenced to transportation, nor under 14 to imprisonment Offenders between the ages of 14 and 16 may be sentenced to imprisonment in very special circumstances Provision is made for the committal to an Industrial School or to the care of a suitable person of neglected, ill treated or uncontrollable children under the age of 14 The Act empowers the Government of the Province to establish juvenile courts consisting of a stipendiary magistrate and one or two Honorary Magistrates who shall, where possible, be women and directs that, where such courts have not been established, young offenders shall be tried in a different room or at a different time from those at which the ordinary sittings are held

The Bengal Act provides for the committal to an Industrial School of children under 14 found begging or destitute and of children living in immoral surroundings It further provides for the punishment of cruelty to children, of causing and abetting the seduction or prostitution of guls under 16, and of accepting articles in pawn

from a child

The Bombay and Central Provinces Acts, which are practically identical, go further and provide for the punishment of persons found drunk in a public place when in charge of a child under 7, or giving intoxicating liquor or drugs to a child under 14, or meeting a child to gamble They also empower police officers to confiscate tobacco in possession of cilparen The Bombay Act has blen extended through-

out the province with satisfactory results and it will not now be necessary to send any children to

prison except in very exceptional cases

Juvenile Prisoners - As regards "youth-| Society is in existence which offers active coamended mainly to prohibit the publication of young persons involved in offences, to provide for a system of true probation as distinct from supervision, to empower the Chief Inspector of Certified Schools to release youthful offenders on

These provisions of the Bombay Act which relate to youthful offenders, the maintenance and treatment of persons sent to certified schools or committed to the care of relatives or other fit persons and the establishment of industrial schools and juvenile courts were applied to the

province of Sind in March, 1936

The Factories Act in Bombry was amended in 1940 so as to abolish the employment of child labour in Factories

The Bombay Children Act with some modifications has been extended to the Delhi Province The operation of the Bengal Act which was passed in 1922 is at present confined to the town,

port and suburbs of Calcutta, Howish and to certain portions of the District of the 24-A Central Children Court has been established in Calcutta, which has jurisdiction over the whole area to which the Act has been

extended

The Governments of Madras, Bombay, UP, Punjab and the Central Provinces have also enactedProbation of Offenders Act which allow of the release of young offenders on parole under Similar legislation is under Probation Officers contemplation in Assam

The provisions of the Borstal Schools Act are practically the same in the provinces where such

Acts have been enacted

In provinces where there is no Borstal Schools Act juvenile offenders are sent to the reformatory schools established under the Reformatory Schools Act, or confined in juvenile or ordinary jails, but are not allowed to mix with adult prisoners In the Punjab a Reclamation Department has been established the main function of which is the working of the Punjab Good Conduct which is the working of the Language Act, 1926
Prisoners Probational Release Act, 1926
Officers of the Department visit jails for the selection of prisoners on probation release The probationers are usually sent to special farms

Reformatory Schools —These schools have

been administered since 1899 by the Edu cation department, and the authorities are directed to improve the industrial education of the inmates, to help the boys to obtain employment on leaving school, and as far as possible

to keep a watch on their careers
The N-W F P (Adolescent) Prisoners Release
on Probation Act, 1940 (Governor's Act II of
1940) was introduced in 1940 in the North West Frontier Province whereby adolescent prisoners after completion of Ird of their sentence are released and handed over to their guardians who are required to look after their conduct and welfare and generally to act in loco parentis

Commission of Enquiry, 1919—A committee was appointed to investigate the whole system of prison administration in India with special reference to recent legislation and ex Its report There are several certified schools estab perience in Western countries Its report lished under the Bombay Act and there are published in 1921, was summarised in the anumber of other institutions which co-operate Indian Year Book, 1922 (pages 670 671) A with different juvenile courts A Children's Aid number of reforms were advocated but, owing

to fina cial stringen w it has not yet been was reached possible to introduce some of the more im

portant of them

Fines and Short Sentences -Those sec-tions of the Indian Penal Code under which imprisonment must be awarded when a convic tion occurs, should be amended so as to give discretion to the court Sentences of Imprisonment for I sa than twenty-cisht days

should be problisted The Indeterminate Sentences -The sentence of every long term prisoner should be

brought under rev sion as soon as the prisoner brought under rev sion as soon as the prisoner has a reed half the sentence in the case of the non habitual and two-thirds of the sentence in the case I tie habitual remission earned being counted in ea h ca.e. The revision should

be carried out by a Revising Board composed I the In pector General of Irisons the Ses sions Judge and a non official In all cases the release of a prisoner on parole should be mad subject to conditions breach of which would e der him liable to be remanded to undergo the fell original sentence The duty of seeing that a prisoner fulfils the conditions on which he was released should not be imposed upon the police or terester anoma not be imposed upon the points of upon the filling headman but apecial officers to be termed purole officers should be appointed for the purpose. These parole officers should possess a good standard of education though not necessarily a university degree and should both protect and advise the released prisoner and

report breaches of the conditions of relea e Transportation and the Andamans -The futur of the Denal settleme t of Lort Blair

It was then decided that hence forth only those convicts should normally be sent to the Andamans who voluntered a comthat the old restrictions on life in the settle ment should be sensibly relaxed that convies should be encouraged to settle on the lang that in certain conditions they should be entil d to rele e to obtain occupancy rights o er the land which they had cultivated and that the importation of wives and families should be The object of the chang s an noure and to promote the development of a free colons of to promote the development of a free colony of persons who would after the terms of their s atences had expled make the Andama s thir p rm aent home The Islands have inc been occupied ly the Japanese

Criminal Tribes —The first essent; 1 of success in dealing with the criminal tribes is the provisio of a reasonabl degree of economic provisio of a reasonant degree of economic comfort for the pc ple It is therefore of paramount importance to locate settlements where sufficient work at remunerativ rates is avail Large numbers of fresh settl r chanle ne er be sent to a s them nt without first as certaining whether th re is work for them Commitment to settlements should as far possible be by gangs not by individuals. It private agency for the control of settlements

Political Offenders—Much controversy rag s round the classification and sp clain te timent of with a rae popul rily known as political offenders Governm in do ot a cept in to offence are distinguit hable as political r non politic i but, h ve adopted system of classificati in dividing convicts into it? cl s as adur of the penal settleme t of 1 of Biari in tourned are distinguinance as was contiau liy under the consideration of the in po politic i but he va dopted Gov rument of India f om the time of the dissistant in dividing convicts into the Jalis Commission r port but it was not till 1926 that a definite decisi n life ad the character of the offe ce ac ording to their standa d of livin in civil

pass has been granted in respect of any excisable goods or where such amount of excisable goods are exempt on the ground that they are carried for consumption by the crew or passengers or animals on board any vessel

I or contravention of s 24, power is given for stoppage of the vessel, search and arrest and for confiscation of the vessel and cargo

S 30 gives to the Central Government power to exempt the carriage of any excisable goods from the operation of \$ 24

Sections 31 and 32 enact special provisions relating to salt S 31 recognises the special and perminent rights of manufacturing salt and provides that the proprietor of a private salt factory to whom a sanad has been granted for a permanent and special right to manufacture or excivate silt, shall on application, be entitled to a licence and the renewal thereof from year to year for carrying on the manufacture of salt

S 32 entitles every proprietor of an existing private salt work other than a private salt factory to a license and the renewal thereof every year for the purpose of his salt work

S 33 gives to a Collector of Central Excise powers of confiscation of any thing and levy of penalties on persons without any limit subject to an appeal to the Central Board of Revenue A limited power of confiscation of goods not exceeding Rs 500 in value and imposition of penalty not exceeding Rs 250 is also given to an Assistant Collector of Central Excise

S 34 empowers the Excise officer to give an option of fine instead of confiscation of goods

S 36 gives power to the Central Government to reverse or modify any decision or order passed under the Act or the rules made by any Central Excise officer or by the Central Board of Revenue

S 37 empowers the Central Government to make rules to carry into effect the purposes of this Act and in particular for the assessment and collection of duties of excise, for the prohi bition of the production or manufacture of excisable goods, the bringing of excisable goods into British India and for regulating the removal of excisable goods

S 40 enacts that no suit shall lie against the central Government or against any officer of the Crown in respect of any order passed in good faith or any act in good faith done or ordered to be done under this Act and that in any event no such suit shall lie after the expiration of six months from the date of the act or order complained of

Under the First Schedule the excise duty on Kerosene is fixed at the same rate at which Customs duty is leviable under the Indian Tariff Act 1934, on matches in boxes of varying sizes at the rates ranging from ten annas per gross of boxes to rupees four per gross of boxes, on mechanical lighters at rupees three per lighter, on motor spirit at fifteen annas per imperial gallon, on salt at the rate fixed by the Indian Tinancial Act 1943 and at the rate fixed annually by Act of the Control Torolaters. by Act of the Central Legislature, on silver at the rate of three annas and seven and one fifth punishes per ounce Troy, on steel ingots at four vision

•

S 24 prohibits transport by sea of excisable rupees per ton, on sugar other than Khandsari goods except in a vessel of the burden of three or Palmyra at three rupees per cwt, on hundred tons and upwards, unless a permit or Khandsari sugar at eight annas per cwt and no excise duty on Palmyra sugar, on tobicco of different kinds and for different uses at the rates ranging from one inna to one rupee and twelve annas per pound, on tyres at ten per cent ad valorem and on vegetable product at five rupees per cut

This Act repeals the whole of the following Acts The Transport of Salt Act 1879, the Indian Salt Act 1882, The Madras Salt Act 1889, the Bombay Salt Act 1890, The Indian Salt duties Act, 1908, The Motor Spirit (Duties Act) 1917, The Indian Finance Act 1922, The Silver (Excise Duty) Act 1930, The Indian Finance (Symplementery and Extending) Act. The Silver (Excise Duty) Act 1930, The indian Finance (Supplementary and Extending) Act 1931, The Sugar (Excise Duty) Act 1934, the Matches (Excise Duty) Act 1934, The Mechanical Lighters (Excise Duty) Act 1934, The Sind Salt Law Amendment Act 1938 The Tyres (Excise Duty) Act 1943, The Vegetable Product (Excise Duty) Act 1943

2—The Coffee Market Expansion (Amendment) Act, 1944 —Under sub section (1) of s 16 of the Coffee Market Expansion Act, 1942, the Central Government has the power to fix the wholesale and retail prices at which coffee shall be sold in the Indian market and sub section (2) provides that no registered owner or licensed curer or dealer shall sell coffee at a price or prices higher than the price or prices fixed by the Central Government A registered owner or licensed a licensed curer who sells coffee at a higher price or prices in contravention of the above provision can be punished under s 36 (1) but this section does not include the dealer. This Act therefore defines a dealer as meaning a person carrying on the business of selling coffee, whether wholesale or by retail and the word "dealer" is added in s 36 (1) after the words "any licensed curer" so that a dealer can also be punished

3—The Coal Mines Safety (Stowing) Amendment Act, 1944 —This Act is intended to remedy certain defects disclosed in the working of the Coal Mines Safety (Stowing) Act, 1939

The Coal Mines Stowing Board is called upon in an emergency to take protective measures in the working of mines, eg, when a mine is abandoned or its owner is not in a position to Specific provision had take protective measures Act Hence a new been lacking in the section 10A is inserted in the Act of 1939 which empowers the Board where it is necessary or desirable to execute or cause to be executed such protective measures including stowing as may be required in furtherance of the objects of the Act. For this purpose the Board is given the right for itself and all persons employed in the execution of any work under this section to enter upon any property in which the work is to be done and to do therein all things necessary It further for the execution of the work prohibits any person from obstructing or inter fering with the execution of the work or from removing or tampering with any plant or machinery or any stowing or other material used in the execution of the work and provides for punishment for contravening the above pro-

6—Th Trnfr fPrperty (Am ndm t) At. 1944.—Thi Act i intend d to m k speil p ovi ions for the simme t of pol c of m in insurance Then tur of mari insuran controt is uch as to requi the minimurance polici shold be ass gnable insurance polici In the United Lingdom assignability after loss of m rine i sura ce policie afte loss is pla b youd do bt by s 50 or the M rine In an At In th absence of a simil pro islon pro islon in India it is doubtful wh the the Courts i B itlsh Indi wo ld h ld that they are so as ign able Henc th amendment of the Tr n fer

of Prop rty Act became neces ry By this at a new section 1304 i add d to the Tra fr of Property Act 188 p oid g that a policy of main insurance my b transf red by a ig m nt unles it contais te ms expr ly prohibiting from nt nd my be as i ned eithe before or fir los It my be ssioned by endors m at the eon or i oth r ustomary ma er Where how ver the insured p ron has parted with r! st his interest in the subject matter insur d and has not b f o or t the time of so doing expressly or impliedly agre d to assion the policy any subsequent assignment of the policy is inoper ti e but vithout aff ting the assignment of a policy fter loss

Further this 4ct alt rs s 1 5 of the Act of 188 by omitting from it all r f renc to marine in ura ce policy so as to make it cle r that the in ura ce poncy so as to mass a cre r that the rules and pri ipi governi ga marin insurane policy a quit differ at f om those gov rai g a fi e in ur a e poli y in th matter of assi, a ment A new 135A is inserted for a f nm at recently be not troduced by the Mith Badd ment A new 133A is inserted for a 1 nm in America to alrol the unpreced aired boom in transport aired the unpreced aired boom in transport and the superced aired boom in transport and transport and transport and the second of the second aired the preceding of the second aired to the rights and remedies of the insured person, notification. The 1ct further cures some minor but where the insurer pays for a partial io-s, he defects in sections 15, 28, 31, 126, 215, and 216 acquires no title to the subject matter insured of the Act of 1924 or such part of it as may remain but he is there upon subrogated to all rights and remedies of the insured person as from the time of the casualty causing the loss

This Act further enacts that the provision that a mere right to sue cannot be transferred, in clause (e) of s 6 of the Transfer of Property Act, 1882, thall not in any way affect the provisions in the new sections 130A and 185A

The Insurance (Amendment) Act, 1944—Section 46 of the Insurance Act, 1938, provides that the holder of a policy of insurance issued in respect of insurance business transacted in British India shall be entitled to receive payment in British India of any sum secured thereby and to sue for any relief in respect of the policy in any court in British India according to the law in force in British India

It was found that the application of this section to policies of marine insurance seriously interfered with the normal business of marine insurers in as much as marine insurance contracts are international in scope and are effected mostly for the benefit of the consignees abroad who have the option of stipulating the place where the contracts are intended to be carried out

This Act therefore adds a provise to s 46 that "nothing in this section shall apply to a policy of marine insurance"

Under s 48 (2) of the Insurance Act, 1938, employees and agents of insurance companies are eligible for appointment as policy-holders directors. This is destructive of the object of s 48 because a policy-holder who is an employee or agent cannot be expected to safeguard the interests of policy-holders where those interests conflict with those of the shareholders

This Act therefore amends a 48 by disqualifying such persons from becoming policy holders directors. After sub sec (2) of a 48 a new sub sec (2A) is added whereby it is provided that a person shall be ineligible for election as a director under sub sec (1) of any company if he is a director, officer, employee or legal or technical adviser of that company or of any other insurer or is an insurance agent or employer of insurance agents and shall cease to be a director under sub-sec (1) if after election he acquires any disqualification specified above or no longer holds the qualifications required by this sub section

applicable to marine insurance business as being after consulting the Coconnut Committee, may more suitable than Form "E'

The Cantonments (Amendment) Act, 1944.— This Act amends s 3 of the Cantonments Act, 1924, by adding a new sub section (4) to it

make against the assignor of the policy. It also to such extent or subject to such modifications provides that where the insurer pays for a total or that any authority constituted under any loss, he becomes entitled to take over the interest such enactment shall, exercise authority only of the insured person and is subrogated to all the to such extent as may be specified in the

The Indian Merchant Shipping (Amendment) Act, 1944—The first proviso to a 209A of the Indian Merchant Shipping Act, 1923, relieves shipping companies of the liability to mike payments for the return journey of pilerims as provided in a 2001 in the event of war disturbance and at present this liability is practically suspended

This Act amends & 200A, subsec (1), by inecrting therein that the sum of rupee one is to be paid by a shipping company for each day for the return journey of a deck pligrim and a sum of rupees three for each day is to be paid in respect of a cabin class pilgrim

As however the liability is at present suspended owing to war, this Act will come into force when normal conditions are re established on such date as the Central Government may appoint

The Indian Cocoanut Committee Act, 1944.— Even before the outbreak of the present war the supply of cocoanuts and cocoanut products from indigenous sources was in sufficient to meet India's growing requirements and a large balance had to be imported Owing to enemy occupation of some of the world's coconnut growing countries, an increase in the production of principal coconnut growing immediate cocoanuts in India became necessary for the purpose of meeting India's increased demand for cocoanut products

I or this purpose and with a view to speed up the productions this Act has been enacted to establish an Indian Central Coconnut Committee, on all-India organisation on lines of the Indian Central Cotton Committee and similar bodies concerned with coffee and lac, with an independent source of income for the improvement and development of the growing marketing and manufacture of the cocoanut in India and for promoting and safeguarding the interests of all branches of its production and manufacture from the producer to the consumer

An exception has been made in respect of coir and coir manufactured goods which are excluded from the purview of the Committee in deference to the wishes of the Government of Travancore the largest producer of these commodities. commodities

This Act extends to the whole of British India S 3 of the Act provides that there shall be The Act provides for meeting any temporary levied and collected as a cess, on all copra embarrassment caused by the changes introduced consumed in any mill in British India, a duty in the Act of 1938 This Act also amends the of excise at such rate not exceeding four annas Third Schedule by making Form 'F" per cwt as the Central Government

S 4 provides for the constitution of a Committee which is to receive and expend the proceeds of the duty collected under this Act providing that the Central Government may by The Committee shall consist of the Vice Chairman, notification, direct that in any place declared a cantonment under sub sec '1) the provisions of any enactment relating to local self-govern ment other than this Act shall have effect only oil industry, three persons representing the The Committee shall consist of the Vice Chairman, Imperial Council of Agricultural Research, nine

- The I duan Income tax (Am dment) Act 1944.—The main object of this Act is to provide fo advan a payments of tax on I come whi h is not liable to deduction of tax at ource under section 18 of the Indian Income tar Act 19 The income mainly affected is income from nd f om bu iness prof sslon or The other povision of the Act are designed to corr ct certain defects in the main Act or to give relief to the tax payer
- S 2 amends 2 7 of the Act of 19 2 by omitting certain words from Explanation 2 to sub sec (1)

of sec 7 so as to preven payments from un recognised Provident Funds fr m escaring tax tl ercon

5 3 amends s 14 (1) of the Act of 19 providing that an a sessee who receit a a st or of me cy as a member of a joint Hinda family but which sum does not form part of the i c me of the joint family is not exempt from a yment of tax th reon. The exemption given under s 1f(1) is in respect of money receive tas forming part of the income of the family

5 4 introduces a new sub sec (A) to s 1 of the Act of 19 with a vi w to put a stop to a tax e asion device which mainly takes if form of a one very policy. This am adment follows the Unit d kin dom law

inserts a new section 184 in Act of 19 pro iding for advance payment of tax

This section enacts that the incon tax officer Ann section enact that the incon tax oncer may on or after th lat thrill in ny final lal year by order in writin require n ass se to pay quarterly : on 18th June 15 Sep ember 1 th December and 18th Varch one quarter amount of the incom t x and siper tax payable in respect of his total income of the latest pr vious year if su h total i come exceeded six ti us nd rupees An option is given t the a sessee to pay tax quarterly either on his 1 st a sessed income or on his own estimate. The s ction The s ction income or on his own estimate The sciton provides for paym at of interest at per annum by Government on ad ance payment while penal interest at 6 per annum will be payable by the assess whr the adv repayment on his own estimate fails stort of 60 per cent of tr tax payable on recult reassessment It is at 0 provided that if an assessment It is at 0 provided that if an assessment at the above the desired provided that if an assessment at the above the order of the second of th of s 46 will then apply

B 6 amends 6 4 of he Act of 19 by addin a proviso Under 2 14 () profits which accru and arise in Indian State are exempt from tax while corresponding losses can be against British Indi n income or carried forwa d under a 24 The new provise provides that such losses can only be set off or carried forward against correspondi g exempt profits

8 7 amends sub-sec (1) of a f of the Act of 19 by bringing sub-sec (1) into lite with sub-sec (3) in connection with an asse sun at in the per of discontinuants on businesses assessed under the 1918 Act

S 8 amends s 29 by including in the notice of demand the penal i terest under the povisions of the news 18A above

8s 9 and 10 introduc am adments in sections Bs B and 10 introduc Am ndments in sections 30 and 31 of the Act of 10 for giving a right of appeal against a refu i or a c n liation of registration under a 23 (4) a d aiso in the case of a person denying his liability to d duct tax under the provisions of s 18 (33) (33) and (3C)

9 11 amends s 83 by giving to the Appellat Tribunal the power given to the Appellate Assistant Commissioner by s 31 (4) to a tho 1 the in ome tax officer to amend any as e ment mad on any partner of a firm or member of a association

B 12 amends s 47 with a view to provide for the recovery of penal interest imposed by the new section 18A above

S 13 amends s 56 with a view to prevent the proviso to sub sections (3) & (4) of s 25 from providing for washing facilities in all factories being nullified by the provision in s 56 that the total income for the purposes of super tax shall be the total income as assessed for the purposes of income tax

S 14 amends the Schedule to the Act of 1922 The first amendment gives an increase in the amounts allowable to Life Insurance Companies for management expenses under the proviso to rule 2

The second amendment is in rule 3 providing that only income tax and not super tax shall not be paid on the interest on tax free securities It also secures the inclusion of the interest in the

The third amendment is in rule 5 which provides that profits on the realisation of securities are excluded by the provisions of rule 5 (11) from 'gross external incomings' This amendment extends this provision so as to exclude also profits on the realisation of other assets

The Delhi Muslim Wakfs (Amendment) Act, 1944—This Act is intended to clear difficulties arising from the ambiguity in the true interpretation of the Delhi Musiim Walis Act, 1943

Section ? (1) of the Act of 1943 defines "wakf" as meaning the permanent dedication of any property moveable or immovable, etc. This property moveable or immovable, etc. This Act amends sec 2(1) by adding that such property includes mosque, idgah, imambara, dargah, khankah, maqbara, rauza, grave, graveyard, orphanage, madrassa or any other religious or charitable institution

This Act also amends sub sec 2 of s 25 of the Act of 1943 by the addition therein of the words 'all the assets and movable or imor properties, buildings, articles, instruments, movable property houses, premises, articles, instruments, machinery, furniture, books, accounts, deeds, exhibits, relies, and other public properties under the supervision control and management of all the above said committees and the said Anjuman Moryyed ul Islam shall vest in the Majlis after its establishment"

The Protective Duties Continuation Act, 1944 -The protective duties on sugar, wood paper, cotton and silk manufacturers. pulp, gold and silver thread and wire and iron and steel manufactures which were extended for a period of two years with effect from 1st April 1942 by the Protective Duties Continuation Act, 1942, expired on 31st March 1944 to the present unsettled conditions this Act extends the existing protective duties for a period of two years more, 20, upto 31st March 1946. The Act also extends the existing duty on wheat and wheat-flour for a further period of two years

The Factories (Amendment) Act, 1944—This Act is intended to remedy certain defects and meet some difficulties in the working of the Factories Act, 1934

It amends s 9 of the Act of 1934 by adding in sub sec (1) a suitable clause requiring more comprehensive particulars to be sent before commencement of work in a factory

It also amends s 19 of the Act of 1934 by without the restriction which was originally in the Act of 1934

It also amends s 23 by making it clear that the rules providing for "means of escape" as precautions against fire, which have been made by Provincial Governments, should continue to

Under the provisions of sections 45 and 54 of the Act of 1934, no woman or child shall be allowed to work in a factory except between the hours of 6 a m and 7 p m and the limiting hours can be varied by a Provincial Government to cover a span of 13 hours between 5 a m to 7 30 p.m. This Act amends sections 45 and 54 so is to extend by an hour the limiting hours in the evening from 7-30 pm to 8 30 pm for the duration of the war

The Indian Patents and Designs (Temporary Amendment) Act, 1944—This Act aims at enlarging the rights of Government Depart ments to use inventions and designs as has been done in the United Kingdom by sec 2 of the United Kingdom Patents and Designs Act, 1942 For this purpose s 21 of the Indian Patents and Designs Act of 1911 is amended Section 21 as existing provides that Government Departments may use or exercise an invention for the services of the Crown on terms to be agreed or failing agreement, settled by the Court

By this Act sub-section (3A) is addded to s 21, and empowers officers or authorities administering any department of the service of His Majesty under sub sec (2) or sub sec (3) to make, use, exercise or vent an invention upon such terms as are mentioned in sub sec (2) or (3) for any purpose which appears to any such officer or authority necessary or expedient for the efficient prosecution of the war or for maintaining supplies and services essential to the life of the community and the terms of any such agreement or licence as is mentioned in sub sec (2) shall be inoperative

This Act is operative only during the period of the war and for six months after the cessation of the present hostilities

The Coffee Market Expansion (Second Amendment) Act, 1944.—Under sub sec (1) of sec 32 of the Coffee Market Expansion Act, 1942, all sums realised by sales of coffee from the Pool by the Indian Coffee Board have to be credited to the Pool Fund There is however no provision in the Act to provide for transfer to the General Fund any excess in the Pool Fund after the requirements of the clauses of sub sec (2) of sec 32 of the Act have been met sub sec (2) of sec 32 of the Act have been met

This Act therefore makes the necessary amendment in sec 32 by inserting a proviso for transfer of any excess to the General Fund The amount so transferred will be applied for promoting agricultural and technological research in the interest of the coffee industry in India

The Delhi Joint Water and Sewage Board (Amendment) Act—In connection with proposals for extending the drinking water supply system in Delhi certain questions have arisen regarding the interpretation of the Delhi Joint Water and Sewage Board Act, 1926 The view has been taken that the phrase "urban area of the City of Delhi" in the preamble n in jurisd cuto of it four continuation in the bless it in mails in it is mention in in directly of it seconds it in all in formity a let in the fourth of area out its the jurisdiction of the fit series of the bases of the three tends in spleed its assault fit it its two or to expert the off of the board he beer supply series it it just of the forth of the forth of the forth of the fit is the fit of the forth of the fit is the fit is the supplementations of the fit is the fit is the supplementation of the fit is the fit is the fit is the fit is the fit is the fit of the fit of the fit is sews of m Lijokri

The tree nt Act reorderises the polition in the two particular cases a ntioned also and extends the jurisdiction for the property makes an am niment in the long title as the state of the state titte at 11 presurble of the Act of 1926 by ut thath th presented by the Act of 1921 by the fight.

Labour in India.

A HISTORICAL SURVEY OF THE GROWTH OF THE LABOUR PROBLEM.

India is and always has been a predominantly agricultural country and over sixty five preent of her working population are dependent on the soil for their principal me are of livelihood Agriculture by itself, however does not always afford, either to the agriculturist or to the agricultural labourer, the wherewith all for keeping body and soul together. It is necessary, therefore, for both the smaller cultivators and the agricultural labourers to migrate frequently to the towns and cities in search of additional work in order to keep the wolf from the door, but, the migration is generally always of a temporary character, and the agriculturists contact with his land is seldom, if ever, permanently broken

Up to almost the end of the nineteenth century there was no State control over condi-tions of employment in any industry in India I'mployers were free to do what they liked with the result that Indian labour was exploited to the fullest extent possible Hours of labour were inordinately excessive, rates of wages unduly low and other conditions of employment as bad as they possibly could be. There was as bad as they possibly could be There was no regulation of the age at which children could be employed, there were no periodical or weekly holidays, and there was no legislation to safe guard factory workers from injury through accident caused by entanglement with unfenced machinery in motion. With the growth of factors organisation in India and the rapid development of her industries, the minds of certain men, notably the late Mr Sorabjee Shapurjee Bengali of E, however, began to be awakened to the existence of evils which by the standards of to day would be considered intolerable, and unceasing efforts at securing some improvement in conditions of work in factories resulted, not withstanding strenuous and universal opposition at the time from all employers, in the passing of the first Indian Factories Act of 1881 This Act gave a limited measure of protection to children, firstly, by prohibiting their employment in factories if they were under seven years of age and also in two separate factories on the same day, secondly, by restricting their hours of employment to nine per day, and thirdly, by requiring that they should be granted four holidays in a month and also rest intervals in accordance with rules to be framed by local governments The Act contained no restrictions in connection with the employment of adult labour but provision was made for the fencing of such parts of machinery as would be dangerous if left unfenced and for the reporting of accidents Owing to an almost complete lack of adequate inspection, the 1881 Act became a dead letter in most provinces Most days were usually working days and, if they were holidays, they had to be used for cleaning There were no proper intervals for rest or meals Both women and children were worked for excessively long hours. Northetten in most face cessively long hours Ventilation in most fac tories was extremely bad and sanitation left much to be desired

A lactorica Commission was appointed in 1590 and on the basis of its recommendations, a new Lactorics Act was passed in 1591. The qualification for registration was the employment of 50 y others as against 100 in the 1891 Act and local Governments were empowered to notify concerns employing as few as twenty. The main features of this Act were (1) a compulsory rest interval of half an hour, (2) a weekly holiday, (3) non employment of a child under nine and a 7 hour day for children between nine and fourteen, (4) a 11 hour day for women with a 14 hour interval if they were required to work for the permissible maximum hours, and (5) p m and 5 a m.

Apart from the mars meetings of workmen which were organised in the eightles by humanitarian social reformers for the purpose of memorialising Government for improvement of conditions of work in factories, Indian factory labour was almost up to the beginning of the twentieth century, a silent and unorganised factor in the huge industrial organisation that was rapidly coming into being in India Trade unionism was non existent and there was no channel through which the Indian workman could ventilate his grievances and ask for their redreer. The strike as a weapon of defence against oppressive conditions was almost unknown and such industrial disputes as did occursoon terminated in favour of the employer owing to the unfettered power which he enjoyed of replacing all men who downed tools with blackleg labour

The last decade of the nineteenth century saw the advent of two new factors in the field of industrial labour in India which were destined, for the time being at any rate, to worsen conditions in Indian factories. The first was the introduction of electricity for purposes of factory lighting and the second was the widespread epidemic of plague. By 1900, the majority of the cotton textile mills in Bombay City and almost all the jute mills in Bombay City and almost all the jute mills in Bengal were lit by electricity, and by the end of that year the ravages of the great epidemic of plague which first broke out in Bombay City in 1896 and soon spread all over the country, resulted in the reduction of the labour force in most centres to a third to a half of its normal strength. The immediate effect of these two events was a considerable increase in working hours. Many of the larger textile mills resorted to day and night working and evidence is not wanting that some mills worked their operatives continuously for stretches of fifteen to twenty hours per day. In Bombay City there were actually auctions for labourers at street corners. The weaker of both the cotton and the jute mills, however, began to be alarmed at the competition from the mills which worked day and night and many of the millowners were not unwilling that Government should step in and prohibit night working altogether.

more widespre d nd concerted characterlispute which resulted in a general all round into force with effect from the 1st of July 191 improvement in wages

There was no further ad ance in factors legisla ti n in India for twenty year afte 1891 The period 1891 1911 wone of the ng ng condition in the e facto res increased from 316 818 to 91 944 over the same period. The result of the sear ity of labour was to increase the interact of the employer. In making condition that the condition of the search of ed xcessive by tho who wo k d

Conditions of work in factories in India during the period wer inquired into by the F eer Smith Committee whi h was appoitted in 1906 a d by the F cto y Labour Commission which was appointed by the Home Gov rame tin 1907 The Commission endorsed the abu sand the val na of the 1881 and 1891 Act in conn cti n with the employm t of child n and were unanimo ly of opinion that's m limit ti n in he rs f work of opinion that's m limit it in nors s tweet was es it I but the majo ty were oppo d to any direct limitation. A f r s w men s hours were co cerned they proposed the the statutory maximum hould be i creased from 11 to 12. It is notew rity that o ly on member (Dr. Nair) re ommended a limitation in the hours of adult. re commended a limitation in the hours of adult male workers to twelve p r day and a c nifunation (the 11 hour day fo women with less power to local 60 eram at so to grant exempt as A new F ctories Bill w s 1 t oduced in the Gover or Ge crul a Legistal e Council in J 1, 1000 in drafting the Bill the Go erament of the first of th

The reages caused by the plague were how was reduced. This was done in order to limit over not emitted when the form good eff ets the spr adorer. Children a hours in textile The heavy mortality e used by it had the med factor is were reduced to it per day and more the ranks of agricultural workers and the stringent measures were provided fo inspectio inequality between the demand for and the land certification. A compulso y rest interval supply of labour nature liy 1 d to a mark d of half an hour in the middle of the d y.w. supply of the line agricultural wages. The provided for all operatives except to those between the twentieth century hence aw the 1 ployed in continuous poses if cories A at an kend ge of a sen e of cl. s con cloud number of provisions was made for the health mess mong indu trial workmen. They were is a daskety of the operatives and see all chang. cer raug to numbt to the old conditions on design die military and see all chang where milerer milerer strict to force them on design die military conditions on design die military condition to effect and littless upon their workmen they were met by were into port eld but at the same tim wid opposition. E riy successes led to digutes of powers were obtained to the same tim wid more widespread and conditions.

THE ADVENT OF THE GREAT WAR AND ITS AFTERMATH.

iti tion and th re was an immedi te ex

pansion in e ery sphere of her industrial cti ity N w factories been t spring up everywhere There was wo k for everybody who want d it a d more employers wer clamouring for exemption and relaxations of the existing t tutory restrictions in h urs of w k Indian Labour still un g nised ws ho eve no longer th t dumb and in ril ul te p rt of f ctory plants which it u d to be if mor f ctory plants which it u d to be

t nons work for longer h u s was demanded f it it was equally insiste t in demanding higher wages and bette onditions of employ m t in return As the War progres d price so red and with every jump in prices there were d m nds i creases in w ges and for the grant of a or de mes allowan es—d m ds which w re not always granted without strikes were not always granted without strates Line ploy is wee howev r m king phe omen I profits and rath r th n llow p oductio to s fir the demands made on them by thei labo r wee gradgingly conceded Ex est e labo r w re grudgingly conceded Ex e si e hours of wo k however still continued to be the feature in all branches of indu try and conditions inside the f ctori had worsened Owing to th influx of large bodies of p rsons into the towns hou ing becam hopel say inadequate ud rents soared to h ights which forced se ral local Goy ernments to pass legislation to control them.

The successful em rgence of th I di f llow d the proposal m d by Dr. Nairl Empires a dits Allies f win the biar of 101:130 mether than by them in cliff it the commission of the control of Empire a d its Allies f om the War of 1914 18

factories and for the exploitation of nineral desire to improve conditions in their own resources were flowed. Heatic building activity countries." In order to establish universal was evident everywhere and this was naturally followed by heavy demands for all types and hinds of labour. The Utopi in hope, which most to questions affecting labour which were to men had built upon were, however, destined to evaporate into thin air sooner than the vortice of special and upon timediand. The order to propose that he were the International Labour bloomers but also pessimists could have imagined. Two entirely unioneseen factors intervened to blast these hopes. The first was the worldwide epidemic of influenza which broke out in the year following the end of the War and which was responsible for then which was to be controlled by a Governing a total death roll of over eight million person in Body consisting of members representing Govern India alone. The second was that prices instead ments, employers and labour from all countries of falling, rose more sharply than ever before - of chief industrial importance, and from other of falling, rose more shurply than ever before due, in a large measure, to the unprecedented depreciation in the currencies of most Europasn countries

Similar to the chance which Indian Indus trialists had secured at the outbreak of the war j was the one which Indian labour secured at the end of it. The great influenza epidemic had left large gaps in the ranks of available labour especially as the age groups between 20 and 40 had suffered most heavily. A situation very similar to that which followed the great plague of the inhetics was created, but, on this occasion, there were no auctions of mill workers ed and were, in many cases, paid Wages, in the more organised industries, however, lagged far behind the rapid rise in prices and real wages were not enough to maintain the pre war standard of life of the workers The beginning of the year 1919 therefore saw the outbreak of industrial strife on a scale previously unknown Although sporadic strikes had occurred prior to and during the war, strikes on any organised scale upto then were rare and the employers were not giving anything away unless they were absolutely forced to do so Prices, however, continued to rise and it was becoming extremely difficult for the workers to meet even their most necessary expenditure on relating to a number of subjects including the the existing rates of wages

The post war boom was short lived Demo bilisation and the closing of munition factories Rising swelled the ranks of the unemployed the representation inflation hamstringed the reorganisation of industry and stocks of all kinds of manufactured articles began to accumulate Production had consequently to be eased off and duction had consequently to be eased off and the trail was laid not only for a reduction in employers. The Conference therefore agreed to employers the conference therefore agreed to employers. swelled the ranks of the unemployed factured articles began to accumulate Pro-would be duction had consequently to be eased off and country an the trail was laid not only for a reduction in employers hours of work but also for reforms of a world granta spec wide and far-reaching character which were it was decided that a beginning should be made to be introduced in all countries as the result by the introduction of a 60 hour week in factories of the formation of the International Labour subject to the Indian Factories Act Organisation

THE INFLUENCE OF THE INIERNATIONAL LABOUR **ORGANISATION**

brought into being the International Tabour, Organisation which was entrusted with the task of securing, as far as practicable, the observance of these principles. The duties of this organisa countries by rotation, were to collect all possible information regarding conditions of employ ment in all countries and to present reports of such enquiries to the International Labour Conference which was to meet periodically Lach subject was to be discussed at first at one and later at two sessions After a first pre liminary discussion, the views of various Member States were to be invited on tentative proposels The International Labour Office would then re examine these proposals in the light of the a mai Report with a Draft Convention or Re commendation to the next Conference for a commendation to the next Conference for a final discussion and decision. It was laid down try wide expansion in transport services labour that it would be obligatory on all Member standing this, fancy rates of wages were demand ed and were, in many cases, paid Wages to deal a the countries to deal a the criticisms and opinions received and submit for a Member State to adopt a Recommenda

> The First Session of the International Labour Conference met at Washington on the 20th October 1919 India, as an original member of the League of Nations, was among the 39 countries represented. The Indian delegates were Sir Louis Kershaw and Sir Atul Chatterjee representing the Government of India, Sir Alexander Murray representing Indian employers and Mr N M Joshi representing Indian labour. The Conference was asked to consider proposals cight hour day, unemployment, night work of women and young persons, employment of children, maternity benefits and industrial diseases. The Washington Conference adopted the Hours Convention, but as far as India was con cerned, her delegates were able to impress the grant a special relaxation in the case of India and

EVENTS I FADING UP TO THE PASSING OF 1HL FACTORIFS ACT. 1922.

The winter of 1919 20 saw the recrudescence of The Preamble to Part XIII of the Treaty industrial strife of a greater intensity than that it Versailles refers to the fact that "the failure of the year before. The principal cause again it any nation to adopt humane conditions is was the fact that cash wages were lagging far in obstacle in the way of other nations which behind the continued rise in prices and that real of a ten hour d y broke the b ck of all opposi-tion to reduced hours of wo k in Indian f ctories and an easy pa sa e for the necessary legislation

Prior to 1920 there was little co-ordination between the Centre nd the Provinces in matters connected with I bour and the e were no pro vincial or All India enquiries into wages or conditions of employment in industrial establish ments Official effort at mediation in indu tri I di putes was practically unknown and the policy of Gov rament in this matter was to settle all di putes between the matter was to settle all di putes between themselv s The ricipation of India in International Conf ences and the increasing intere t taken by tle Indian public in que tions connected with ladish public in que tions connected water 1 bour m le it nee ry both for the Govern ment of India and the Governments of the more industri lised provinces not only to con ider the question of the rep escatation of labour in Bureau in the year 19 0 and the Governments of Bengal and Madras created special appoint ments of Commissioners of Labour in the same year The Labour Bure u of the Government of India publi hed a series of builetins on certain phases of factory wo k but before its utility could be establi hed the office was abolished in M rch 10 3 on the recommendation of tie Ind! n Retrenchment Committee The le. d and h Actrenoment Committee 100 is of the matter of the creation of a proper and stable d p riment of Governm nt with inv sil. NEW LABOUR LAWS

Up to the end of the year 10 the only important law rel ting to labour in Indi was th t regulating th conditions of employment i factories The infl ence of the Intern tional Labo r Organisation was howe er soon felt nd industrial strife w s mo cover on the 1 crease Little attempt had so far I een made for the peaceful and amicable settlem nt of for the peaceful and amicable settlem in of trade disputes. Su h attempts a wer made we hampered by the absence of reliable and accur te data regarding wages de of ditions of employment. The Bombay Labour Office conducted an inquiry into wages in cotton textile mills in the Province of Eombay in 10 1 and anoth r inquiry into family b idgets of indu t isl the question of the rep escutation of about any word en in Hombay Unty in the sum of the central and provincial legislatures but and the state of th ppo nted an Industrial Disputes Committee in 19 under the chairman hip of Sir Stanley Reed MP th n Editor in Chief of the Times of to c nsider and report on the practi Ind bility or oth rwise of creati g machinery for the preventi n and early settlement of trade disputes This Committee submitted a com p hensi e report on the subject of indu.trial strife and made variou r comm nd tion to the prev ntion of di putes and their settlement when they ares Among its main recommenda tions w one for the tit g up of an J dustrial C art The Go erament of Bomb y d wu pellin on the subject a d this w s introd c d in th local Legislative Council in the witer of 10 3 '4 This Dilli was subsequently withdrawn on the Governm to d Indi Oramiating promise the covernm of the Council of the covernm of the covernm of the covernm of the covernm of the covernm of the covernm of the covernm of the covernm of the covernm of the covernm of the covernm of the covernm of the covernm of the covernm of the covernment of the c when they ares Among its main recommenda It w s not until 19 9 that the Trade Disp tes Act was placed n the Statute Book Much dway had howev r been made in the mean while in the frami g of new labour laws Among th more important of these were the Workin n

EFFECTS OF THE POST-WAR DEPRESSION.

A period of acute depression set in in all industries towards the end of the year 1922 The cost of living index compiled by the Bombry Labour Office showed that prices had risen steadily for two years after the end of the war The annual average of the monthly index numbers for the year 1920 (1911=100) was 183, for 1921 this average fell to 173 and for 1922 in 1921 than in 1914. The Ahmedabad Mill owners' Association, thereupon, made the first organised post war move in India for wholesale reductions in wages A cut of 20 per cent was announced with effect from 1st April 1923 The strike of the Ahmedabad cotton mill workers which followed was by far the largest and the most disastrous that had ever occurred in that and resulted in a total time loss of nearly two and a half million man days. A compromise was eventually arrived at by the terms of which wages were to be reduced by 15g per cent instead of by 20 per cent Labour received a rude shock and it was felt that the turning of the tide had set in

Cotton textile millowners in Bombay had met demands for higher wages between 1917 and 1920 partly by the grant of dearness of food allowances and partly by the payment of an annual bonus of one month's pay dependant on profits. In 1924, the Millowners' Association, Bombay, decided that the profits for 1923 would not justify the payment of the bonus. The workers of all mills in the city struck work. The Government of Bombay appointed a Committee of Enquiry under the Chairmanship of Sir Norman Macleod, Chief Justice of the Bombay High Court. The Committee's report was entirely against the workers. The Bonus Dispute Strike in Bombay in 1924 was by far was entirely against the workers The Bonus Dispute Strike in Bombay in 1924 was by far the worst that had ever occurred in the country until that year and resulted in a time loss of nearly eight million working days

The depression which set in in 1922 continued for several years. In the year 1925, however, the Government of India came to the rescue of the Cotton Textile Industry and the workers employed in it by abolishing the excise duty of 3½ per cent, which had been levied on cotton manufactures in India for many years past In that year, millowners in Bombay announced a cut of 12½ per cent in wages This announce a cut of 121 per cent in wages. This announce ment was followed by a general strike which lasted for over two months and which resulted

illiteracy and inadequate organisation, they were able to take concerted action and to offer a stubborn resistance against any attack on their wages"

As compared with the period which has just been reviewed, the years 1926 and 1927 were one of relative culm and peace in Indian industries Labour, with a singular unity of purpose, had conducted many hard battles for the mainten ance of the standard of life which it had secured but it had paid dearly for the victories it had won owing to the wages it had lost during periods of protracted stoppages of work caused by strikes The two years 1926 and 1927 were spent in a quiet consolidation of their respective positions both by the employers and the employed and also by Government who had completed a heavy programme of labour legislation The time lost through industrial disputes during these two years amounted to just a little over three million man days as against a loss of five millions in 1923, 8 7 millions in 1924 and 12 6 millions in 1925

disastrous that had ever occurred in that I The year 1928 witnessed the outbreak of It involved nearly 45,000 workpeople industrial strife of an intensity which has been exulted in a total time loss of nearly two in India at any time before or after that million man days. A compromise that year Two causes were directly responsible ventually arrived at by the terms of which for this The Indian Triff Bord (Cotton Textile Industry) constituted by the Government of India in 1926 had made a number of recommendations aiming at a more efficient conduct and management of cotton textile mills in India A group of these recommendations concerned the introduction, by the mills, of "rationalised" methods of work by which is meant the asking of workers to mind more muchines The second was the formation of The Workers' and Persants' Party the members of which secured appointments on the executives The main of many trade unions in the country object of this group was to foment widespread discontent with the existing structure of society and this they did by preaching revolutionary doctrines of class hatred, the uprooting of capitalism and the smashing of stable govern ments The industrial strike was the chief weapon in their armoury Following the recom weapon in their armoury Following the recommendations of the Tariff Board, Messrs E D Sassoon & Co, Ltd, who at that time owned eleven large cotton mills in the City of Bombay, introduced certain measures of rationalisation in their Manchester Mills This was at once met by a prolonged strike in that mill Early in the year 1928, 2 few other groups of mills announced their intention of securing greater efficiency. This was the opportunity which the Communists were waiting for and they took it by the forelock. The strike of cotton textile mill operatives of 1928. in Bombay City was the most disastrous that had yet taken place in India All the mills in the City were affected and there was complete stop page of work for over six months The time loss lasted for over two months and which resulted in a time loss of nearly eleven million working days. Both sides were adamnt but the Millowners had given an undertaking to Government to drop the proposal for a wage cut if the excise duty was abolished. The strike, therefore, ended as soon as the Viceroy's Special Ordinance announcing the suspension of the excise duty was published at the end of November 1925. This strike 'was a great victory for the workers and showed that, in spite of their ment assuring the parties put up different sets of demands. The time loss to the industry amounted to twenty two and a half million man days. Both parties put up different sets of demands. The millowners, proposed a cut of 7½ per cent in the wages of weavers and drew up a set of, standing orders for the enforcement of discipline A Joint Strike Committee prepared a list of Seventeen Demands. Various discussions were held but to no avail. Finally, the Joint Strike Committee agreed to call off the strike on Government assuring the parties put up different sets of demands. The millowners, proposed a cut of 7½ per cent in the wages of the enforcement of discipline A Joint Committee prepared a list of Seventeen Demands. Various discussions were held but to no avail. SUBVERSIVE LABOUR PROPAGANDA.

seven million working days. The Government of Bombay appointed a Court of Inquiry under the new Trade Disputes Act with Mr Justice Pearson as its Chairman. The Court came to the conclusion that all the blame in connexion with this strike rested with the Bombay Girnl Kamgar Union.

We have, so far, in this brief historical survey of the growth of the labour problem in India, occasionally reterred to the activities of certain labour leaders, str he committees and unions We deliberately refinined from amplifying these casual references because we are dealing with the subject of 'Trade Unionism in India' in another Chapter We may, however, in order to complete the chronicle of the important events of the year 1929, refer briefly here to the split brought about in the Trade Union Congress as the result of the subversive propaganda of the Leftists Voting in the Annual Sessions of the Congress was on the basis of the membership of the As a result of the affiliation affiliated Unions of certain communist organizations, the Communists had secured a majority vote at the Tenth Session of the Congress held at Nagpur Resolutions were accordingly in that verr passed for the boycott of the Royal Commission on Indian Labour and the International Labour Conference, for the affiliation of the Congress to the League against Imperialism and for the appointment of the Workers' Welfare League, of the Congress in Great Britain This led to the bierkaway of the moderate elements in the Congress who set up a new central trade union organization under the name of The Indian Trades Union Federation

Another important event which occurred in the world of Indian Labour during the year 1929 was the strike of the employees of the B B & C I Railway's Loco and Carriage Workshop at Dohad The rulway administration had transferred a number of operatives from their big workshops in Bombay to the new workshop which they had built at Dohad and had given them certain allowances on reduced lates of pay. The men demanded a continuation of the old rates plus Dohad allowances and failing a restoration of the cut they struck work. After the strike had proceeded for some weeks, the Government of India appointed a Board of Conciliation under the Trade Disputes Act and this Board upheld the workmen's claims. Mention should also be made of the initiative taken by the Government of Bombay in that year by passing the first piece of provincial labour legislation—The Bombay Maternity Benefits Act

Statistics of industrial disputes in India have been maintained only since the year 1921. The tremendous dislocation which the subversive propaganda carried on by the communist elements in the trade union movement was responsible for in Indian industries during the two years. 1928 and 1929 can best be judged by the fact that the industrial strife of these two years alone was responsible for a total time loss of 43.8 million man days as against the loss of 40.4 million man days in the seven years from 1921 to 1927 and the loss of 16.9 million man-days in the seven years from 1920. After the

The Government of Inquiry under with Mr Justice thoroughly discredited Except for Court came to the n connexion with organised by the communists in centifications of a comparatively minor character who organised by the communists in centifications which had not been affected and 1929, there were no general strikes particular magnitude in any centre of it for the next four years

No event of any particular signification importance occurred in the world of Labour during the three years between and 1933 Both Capital and Labour set representatives annually to the Interr Labour Conferences held at Geneva Conventions and the Recommendations at these Conferences and the recommen made by the Royal Commission on Labour were subjected to careful scruti examination by the Central and the Pre Governments in close consultation wi associations of the employers and the em After the bitter struggles of 1928 and employers were not only anxious to allow ing dogs to lie as far as wages were cor but many of them, in anticipation of the tion which they knew was coming, endea to improve conditions of employment w possible The cost or living was filling wages, expressed in terms of purchasing were rising. The beginning of the year however, saw the intensification of a der which had set in a year or so before continued fall in prices, the purchasing of the agriculturist had worsened and consequence, stocks of manufactured on the hands of the industrialists were a lating in spite of the introduction of 'ra methods of work wherever possible and loss accounts were showing adverse by Employers now felt that the only after left to them were to close down, to re short time working or to reduce wages mills had already resorted to short time working or to reduce the short time was a short time with the short time was the short time was a short time was the short and many cotton mills and other factori been compelled to close down

CONCERTED ATTACK ON WARATES.

The first beginning at reducing wa organized industry was mide in cotton mills in Bombay. The Millowners Assoc Bombay, give a free hand to its Membe in the matter. Many mills closed down few months and reopened with offers of reates of wages. There was little night wand there was a considerable volume employment. Workers had no option accept employment on the reduced. Other mills taking advantage of the situation was response two years of the stating advantage of the situation was some mills imposed another within the space of a few months. Employers in other industries all over India also began to be alarmed at the turn things taking. Many representations and men

were s bmitted to Government but no Pro in there was much le sin lustrial strife in the cotton of I Government cept Bomly took and mill industry in Joombay City than ther I dection in the mattr In Mar 1934 tre been prior to the Lycar Co exampted of Bon bay instructed its Labor 7 Office to in titute a Departm t | Inq iry it to INSIII UTION BY THE GOVERNMENT the extent to which wages had been red c | INSIII UTION BY THE GOVERNMENT drig they r 1933 34 in the varies cut s f he otton textile indu try in the 1 so in ca d lso to ascertain thee t nt of un my loy in at pre lactoascertain thee tentotum minosum nives within in the industry Loom yant Shoi jur affin nives and the produce of the since of the si ills was called off imulta eo ly Tie results

LABOUR UNDER PROVINCIAL AUTONOMY.

With the advent of the new reforms under the Government of India Act, 1935, full provincial autonomy was established in all Provinces in India with effect from the 1st April 1937 Indian National Congress contested most and won the majority of the seats for the Legislative Assemblies in the Provinces of Madras, Bombay, the United Provinces, Bihar, the Central Provinces and Orissa The Libour Policy of the Irdan National Congress, as set out in its election manifesto is "to secure to the industrial workers a decent standard of living, hours of work and conditions of labour in conformity as far as the economic conditions in the country permit, with international standards, suitable machinery for the settlement of disputes between employers and workmen, protection against the economic consequences of old age, sickness and unemployment, and the right of workers to form unions and to strive for the protection of their interests" The earlier resolution of Congress on fundamental rights, generally states in addition, that "the State shall safeguard the interests of industrial workers" and makes special reference to women workers and children Congress Ministries, for reasons set out elsewhere in this volume, accepted office in July 1937 but resigned in all Provinces in November 1939 owing to the alleged failure of the British Government in defining clearly the war aims of Great Britain with special reference to India Whilst the Congress was in power its Labour Policy was amplified by responsible Ministers in various Provinces either by the issue of Press Notices or by statements made in public speeches For example, in addressing a meeting of the representatives of the workers on the 19th February 1938, the Honourable the Minister for Finance in the Central Provinces declared that 'the Congress Policy in regard to labour will be uniform in all Congress Provinces and it will be the conditions of the Congress Provinces and it will be the aim of the Congress to secure vou your rights without any struggle as far as possible." The most comprehensive statement with regard to this policy was contained in a press note issued by the Government of Bombay in August 1937 from which certain of the more important passages were reproduced at pages 521 and 522 of the 1940 41 Edition of this publication

In Bengal, where a popular Ministry was formed with representatives from the Proja, the Muslim League, the Independent Hindu and the Independent Muslim parties, the policy of the Government with regard to labour was contained in a statement made by the Honourable Minister in charge of the Department of Commerce and Labour to representatives of the Press in September 1937 He stated that some of the important items which the Government of Bengal were considering for the amelioration of labour were the establishment of industrial tribunals, employment exchanges, decasualisation of labour, schemes for health insurance, adequate housing, regulation of employment in shops, conciliation of debts, penalising of illegalgratification and the institution of enquiries into conditions of living by means of collecting family budgets with a view to ascertaining whether it

would be possible to introduce minimum wage fixing machinery and schemes of unemployment insurance

We have during the course of this historical survey made an endeavour to mark the outstand ing milestones in the development of the growing consciousness of their rights among the tolling masses of the country. This development was never so rapid as that which took place during the years immediately following the advent of Provincial Autonomy The Governments of Bombay, Bihar, the Central Provinces and Berar and the United Provinces appointed Committees of Inquiry to examine existing levels wages and conditions of employment, and to make recommendations In Bompay and in the C P these enquiries were to relate to labour employed in cotton textile mills In the United Provinces and in Bihar, labour in all industries was covered Government of Madras, following a pro-longed strike of cotton mill workers in Coim batore, appointed a Court of Inquiry under the Indian Trade Disputes Act Fortunately for labour all these various enquiries were conducted during a period when the textile industries in India were, after a fairly prolonged period of depression, showing signs of revival owing mainly to the Sino Japanese war Prices of The margins between costs of produc of 1937 tion and selling prices had widened to the advantage of industry and it was consequently possible for employers to accept the recom mendations made by various Committees and Courts of Inquiry and Boards of Conciliation for increases in wages and for certain improvements These acceptances in conditions of work These acceptances were, however, not made by employers entirely of their own free will In some cases the Govern ments concerned issued resolutions and notifications accepting such of the recommendations made by the Committees which they concurred in and recommending their adoption by the employers It was obvious that non acceptance of the recommendations made would be followed by legislative coercion if necessary

During the year 1938 the Government of Bombay put through the Bombay Legislative Assembly after a record debate of nearly 150 hours going at a 22 days than Bombay Indus hours going over 33 days, their Bombay Industrial Disputes Act They also issued to the various interests concerned for opinion draft proposals for the conditions to be fulfilled for the recognition by employers of unions of their workers, for the grant of holidays with pay during periods of sickness, and for the regulation of hours of work, rest periods and the grant of holidays in commercial offices, shops, hotels, theatres, cinemas, etc As far as the last is concerned, the Bombay Shops and Establishments Act was passed on the 31st October 1930 1939

There was a spate of activity for legislative measures for the amelioration of labour

which have happy
Labour since the
the next chapter

D R Gadgil and S A Brelvi, Associate Members—Sir Sorabli Saklatvala and Mr Sakarlal Balabhai representing employers and Messrs Khandubhai K Desai and R A Khodgilar representing workers' interests, Secretary—Mr S R Deshpande, M B E, Assistant Commissioner of Labour The Committee published an Interim Report in February, 1938 This Report mainly recommended an immediate increase of about 12½ per cent in the wages of all cotton mill operatives in the Province of Bombay Government published the Report with a Resolution stating that the Committee's recommendations were entitled to the weight and authority of an award of a Coult of Arbitration and as such should be accepted both by employers and labour—All cotton mills in the Province by the employers and labour—All cotton mills in the Province of Bombay Resolution stating that the Committee's recommendations were entitled to the weight and authority of an award of a Coult of Arbitration and as such should be accepted both by employers and labour—All cotton mills in the Province.

The Bihar Labour Inquiry Committee —This Committee was appointed in March 1938 to inquire into the conditions of labour in industry in the Province and to make recommendations, for their improvement Chairman—Mr Rajen dra Prasad, Deputy Chairman—Mr R R R Bakhale, Members—Professors Abdul Bari and S K Saran, Dr R K Mukerjee, and Messis M P Gandhi, Jagat Narain Lal, H P Chandra and G M Hayman This Committee's Report which runs into nearly 300 pages and contains over 150 recommendations was submitted to Government in June 1940 and was published in August during the same year

With the exception of the Central Provinces and the Bihar Reports, the Reports of the two other Committees dealt with above were sub mitted to Government after the resignation of the Congress Governments by whom they were appointed. The more important of the recommendations made by these Committees cover a wide field of social legislation which can only be put through by popular Governments and which cannot be made the subject-matter of Governor's Acts. All the Governments concerned have, however, taken administrative action in connexion with such of the recommendations as could be given effect to either by the issue of departmental orders or by circulation to the interests concerned. Quite a number of the interests concerned. Quite a number of the recommendations made by all these Committee have been taken up for consideration by the Central Government in consultation with Conferences of Labour Ministers with a view to the passing of uniform Central legislation applicable to all Provinces. The questions so far discussed and those on which action has been initiated will be dealt with under the heading of "Conferences of Labour Ministers"

We shall deal with the more important matters which have happened in the world of Indian Labour since the outbreak of the present War in the part chapter

SECOND WORLD WAR-ITS EFFECTS AND REPERCUSSIONS

The objects which Dr. Ambedkar has detriness allowances to enable them to maintain been aiming at cannot be described better than the standard of life which they had at the in his own words which we take from the opening speech which he delivered as Chairman of the Second Tripartite Conference

"Ever since the basis of social life was changed from status to contract insecurity of life has become a social problem and its solution has occupied the thoughts of all those who believe in the betterment of human life. There has been in enormous energy spent in enunciating the rights of min and the different sorts of freedom which must be regarded as his inclien-All this of course is very good, What I wish to say is that there able birth right very cheering will be very little security unless and until, to use the words of the Report of the Economic Group of the Pacific Relations Conference, these rights are translated into terms which the common man can understand, namely peace, a house, adequate clothing, education, good health, and above all the right to walk with dignity on the world's great boulevards without the fear of a

The quinquennium 1940 1945 has seen an expansion in Indian industries which not even the most optimistic of persons would have ever dreamt of as even possible before the War started To day (July 1945) India and her workmen are producing commodities, articles and munitions of War which, five years ago, were the special prerogative of the highly industrialised countries of the West There has occurred an unparalleled rise in employment Women have come into industry, commerce and trade in increasing numbers. There have been bitter struggles and disputes between employers and labour for bigger wages, for higher rates of dearness allowances, for greater participation in War profits These would be too numerous in character to deal with here Many of these disputes were solved without actual stoppages of work by referring them to Courts of Inquiry and Boards of Conciliation created under the Trade Disputes Acts and to Adjudicators appointed under Rule 81A of the Defence of India Rules Quite 2 number were, however, solved only after bitter and prolonged strikes Among the more recent and prolonged strikes Among the more recent of these big strikes was that of the cotton mill workers in Nagpur and other textile centres of the Central Provinces and Berar who downed tools for nearly three months in connexion with their main demands for a 40 per cent increase in wages and for a bonus equivalent to three months' wages. The latter was secured before resumption of work. We regret want of space will not permit us to deal even briefly with others

DEMANDS FOR DEARNESS ALLOWANCES.

One of the earliest repercussions of the War was the panic it caused in the commodity markets in India Prices of all foodstuffs and con-sumable commodities shot up and, as far as Labour was concerned, the authorities were at once faced with two major problems of prime pre war standard of life. During the earlier importance (1) the devising of measures to stages of price control, prices varied within check profiteering by controlling prices, and check profiteering by controlling prices, and controlling prices and for Bombay City with prices in 1922 24 as the

the standard of life which they had at the commencement of the War With regard to prices, the Government of India had taken power under sub rule (2) of Rule 81 of the Defence of India Rules both to make provision "for controlling the prices at which articles or things of any description whatsoever may be sold "and to delegate these powers to Provincial Governments n ell Almost all Provinces Controllers of Prices at Headquarters and empowered Revenue Officers in charge of Districts to act as local controllers in respect of the areas within their jurisdiction Advisory Boards or Price Control Committees were set up to help these authorities. A considerable amount of good and effective work was done when these price control schemes were first initiated because the immediate problem then was to prevent the exploitation of the bona fide consumers at the hands of both the profiters and the hoarders. The great defect of the system, however, was that each local price controlling authority took independent action without any Provincial or Central co ordination of policy As time wore on, therefore, and the laws of demand and supply began to assert themselves in relation to world markets and the difficulties of securing tonnage for both export and import of con sumable commodities, the work of effectively controlling prices began to grow more and more difficult. The original measures of control ranged over a wide field of commodities. The number of articles under control had, however to be gradually reduced as different sets of economic forces began to assert themselves in The work relation to particular commodities of the Controllers of Prices began to be mainly confined to a close study of the diverse economic factors that were in play with relation to particular articles and to the periodic issue of lists of fair prices at which certain controllable commodities could be sold. A detailed description of the measures adopted when the Prices Control'scheme was first launched was given at pages 535 to 537 of the 1941 42 Edition of this publication and it is not necessary to traverse the same purely historical background over gain here. Consequent, however, on the introduction of rationing in Bombay City with of the Controllers of Prices began to be mainly introduction of rationing in Bombay City with effect from May 1944 and its extension to other towns and areas, most Provincial Governments in India have set up large establishments to deal with questions connected with food supply Control has been extended over a wide field of commodities and everything possible is being done to keep down prices

A recent development has been the appoint A recent development has been the appoint ment, by the Government of India, of Controller Generals of Civil Supplies These Officers, with their large staffs of Inspectors, control almost all imported manufactured articles many of which cannot be purchased without securing permits from the authorities concerned and all of which are sold at controlled prices

One of the most vexed questions in Indian industry since the advent of the second World War has been the mintenance of the workers'

appeared that the limit of 10, to 1231 ild down tion the Bomber ters Co. Itd., has also adopted by the Ranguel ir Lorid of Conciliation for the silding with a degree a allowance but the prement by cotton mill in Bombay of a flat rate of dearness allowance of two annas for each day a though amounts paid are somewhat less than of dearness allowance of two annas for each day a though amounts and the Millowners' Association, work would soon be parted. The Government bombay of Bombay took up the que tion of the revision. of the rate of dearness allowance hitherto paid by the member mills of the Millowners' As ocial in India are those that obtained in cotton Bombas, with the As ociation and as a textile mills in Ahmedabad. In an earlier paraceult of the discussions which followed the graph we have stated that in awarding an addition of the discussions which followed the care of allowance. It is a second to the control of the area of the control of the contro varying with fluctuations in the cost of living of one point over the figure of the official cost of living lindex between 124 and 14. The allowance was living, index for Ahmedahad for the month of to be at Rs. 18.0 for 25 worling days rising by successive stages of four annas and three anna for each rise of one point in the index to Rs. 9 for 26 working days upon the lader stage of the astrology of the extent of 66 for per cent of the astrology of the astrolog for 26 working days when the index stood at 143 The Government of Bombay issued a compre hensive Press Note on the subject in August 1911 in the course of which they expressed the fervent. These were started but great difficulties were hope that employers in all other industries in experienced in connexion with their running Bombay would fall into line with the Millowners Association Bombly, and pay diarness allow of the Industrial Court. In alea, however, of ances to their workers accordingly. Between the continued improvement in the condition August 1941 and the time we go to Press for this of the cotton textile industry in Industrial august. Ldition (Tuly 1915) the Millowners' Association, Ahmedabad Textile Labour Association, success bomory, revised their sliding scale of dear-fully pressed a demand on the Ahmedabad ness allowances on several occusions, the list Millowners' Association in the middle of the year revision according for the pressure of th bomory, revised their shaing scale of deal large processions, the last ness allowances on several occasions, the last Millowners' Association in the middle of the year revision covering fluctuations in the index 1941 for the uncompensated balance of 33 33 between 204 and 223 for which dearness allow ances ranging from 23 8 0 to Rs. 28 per month of 26 working days were payable. The cost of the two Associations reached a further agreement of 26 working days were payable. The cost of the two Associations reached a further agreement of 26 working days were payable. ances ranging from 23 8 0 to Rs 28 per month of 26 working days were payable. The cost of living index for Bombay City for the month of April 1913, however exceeded the limit of 223 and stood at 225 The Millowners' Association decided not to issue any further extensions of its sliding scale but to announce the amount of dearness allowance payable as against the cost dearness allowance parable as against the cost of living index for any particular month as soon observe that on the basis of this agreement the ons the official figure for the index for that month is available. In accordance with this decision the dearness allowance for cotton mill workers in May 1945, was announced at Rs 28 11 0 for each mention that the highest peak in the dearness allowances paid to cotton mill workers allowances paid to cotton mill workers in Bomb 13 City was reached in September 1944, when the index for the cost of living for that the profit when the index for the cost of living for that the profit of the industry had been City reached 250 against which an amount of making capacity of the industry had been 1944. Rs 34 6 0 for 26 working days will large employers in the City of Bombay such a General Motors (India) Ltd, Messrs Lever Brothers (India) Ltd, the Bombay Garage, the Soonderdas Saw Mills, Messrs Godrey and Boyce Manufacturing Co, Ltd, and a host of others are paying dearness allowances a host of others are paying dearness allowances of the articles of that submission the dearness of the Millowners Association, Bombay As allowances awarded by the Industrial Court allowances awarded by the Industrial Court were to be paid up to the end of the European war involving England and for a period of three months therafter if prices continued to three months therafter if prices continued to three months therafter of Germany on the beautiful of dearness almedabid Millowners. City reached 250 against which an amount of Rs 34 6 0 for 26 working days was paid Most large employers in the City of Bomb is such as of the Millowners Association, Bombry As the result of adjudication proceedings in a recent dispute between the Bombay Electric Supply & Tramways Co, Ltd, and its employees the adjudicator (Mr E M Nanaatty) awarded the Bombry Millowners' scale of dearness allowances to the employees of this company supply & Tramways Co, Ltd, and its employees the adjudicator (Mr E M Nanatty) awarded the Bombly Millowners' scale of dearness allowances to the employees of this company as well A group of large engineering firms in Bombay such as Messrs Richardson and Cruddas, the Mazgaon Dock of Messrs Mackinnon Mackenvie & Co, Messrs Alcock Ashdown & Co, Ltd, and a few others have laid down a sliding scale of dearness allowances based on

official cost of living index for working class, an increase of one per cent, over earnings in Bombay City touched 12L for the month of from existing least rates of pay for every manufactural that the for prices to rise still further and it is limited. The Silk and Art Silk Mills Associations of the silk mills and the silk Mills Association of the silk and Art Silk Mills Associations.

The highest rates of dearness allowances paid the actual rise in the cost of living at any particular date. Part of the balance was to be made up by opening a number of cost price grain shops and the Scheme was abandoned with the consent of the Industrial Court In view, however, of on the 12th August 1941 by virtue of which the on the 12th August 1941 by virtue of which the dearness allowance for any particular month would be increased by 45 per cent with retrospective effect from July 1941. This agreement was ratified by the Industrial Court in an award dated 15th September 1941. It is of interest to observe that on the basis of this agreement the dearness allowance for cotton mill workers in Ahmedabad for the month of October 1943, allowance payable to cotton mill workers in Ahmtdabad on the ground that the profit making capacity of the industry had been considerably worsened during the year 1943 was reported by the Court The original award

The Central Government has power to declare any factory which is engaged in the production of munitions or other war supplies or in work which is likely to issist the efficient prosecution of the war to be a factory engaged on work of national importance and on the declaration of a factory as such it becomes a "notified factory"

The Ordinance gives powers to the Central Government to constitute for such areas and in such places as it thinks fit National Service Labour Tribunals to exercise such functions as have been assigned to them by the Ordinance Each Tribunal is to consist of a Chairman and not less than two other members all of whom must be servants of the Crown at has the right to associate with itself in its deliberations such other persons as it thinks fit Every notified factory has the right to apply to a Tribunal or to the Central Government for technical personnel An important function of a Tribunal personnel An important function of a Tribunal personnel An import int function of a Tribunal is, therefore, to find the necessary personnel for such notified factory. With this object in view, National Service Labour Tribunals have been given power to ascertain particulars of the technical personnel employed in all industrial undertakings, the suitability of such personnel for employment in national service and the capacity of the undertaking to release such or in a technical post under the Crown can be capacity of the undertaking to release such or in a technical post under the Crown can be capacity of the undertaking to release such or in a technical post under the Crown can be capacity of the undertaking to release such or in a technical post under the Crown can be capacity of the undertaking to release such or in a technical post under the Crown can be capacity of the undertaking to release such or in a technical post under the Crown can be capacity of the undertaking to release such or in a technical post under the crown can be capacity of the undertaking to release such or in a technical post under the crown can be capacity of the undertaking to release such or in a technical post under the crown can be capacity of the undertaking to release such or in a technical post under the crown can be capacity of the undertaking to release such or in a technical post under the crown can be capacity of the undertaking to release such or in a technical personnel to the crown can be capacity of the undertaking to release such or in a technical personnel to the crown can be capacity of the undertaking to release such or in the crown can be capacity of the undertaking to release such or in the crown can be capacity of the undertaking to release such or in a technical personnel to the crown can be capacity of the undertaking to release such or in a technical personnel to the crown can be capacity of the undertaking to release such or in a technical personnel to the crown can be capacity or in the crown can be capacity or in the crown can be capacity or in the crown capacity of the undertaking to release such or in a technical post under the Crown tall or any part thereof for such employment. In order to enable the Tribunals to dis charge these functions they have been given previously obtained the permission in writing

the worler during each various leaguest of the craim of the worler during each various leaguest of the worler during each various leaguest of the worler during each various leaguest of trade of the worler during each various leaguest of trade of trade of the worler during the land of land of the land of the land of land discharge or dismiss any technical personnel by giving 15 days notice of such intention to the Irlbunal

Once a notified factor, applies to a Tribunal or to the Central Government for technical per connel it is obligatory for such concern to take into employment such personnel as may be sent to it and on such terms and conditions is the Tribunal or the Central Government my direct Appeals against the decisions of a Tribunal lie with the Central Government

No person employed in any industrial establishment which is either a notified factory or a factory which has sought the protection of the National Service Labour Tribunal against the Codus of technical personnel under Section 13 of the Ordinance who is despited under one of the the Ordinance who is classified under one of the capa itles included in the Schedule annexed to the Ordinance can leave his employment unless he has previously obtained the permission in writing of the Tribunal Correspondingly, no employer in any industrial undertaking can discharge diames or release on person so discharge, dismiss or release any person so classified unless he has given 15 days notice of such intention to the Tribunal

Whereas a Tribunal can control the engage discharged from or leave his employment unless

clothins, and medical attendance. Men sont and rath Scheme and to advise how overson are entitled to inexpitationallowenes by adjusted to meet the prisent day and being it authorized. Promorlous depend on in lestry and (2) to advise Governu chicknes. A scheme his recently been adapted to ensit trainers to y be utilized for to ensit technical personal directed to the top to all up radial, so that skilled and his improvement in the national personal directed to the up to all up radial, so that skilled and his improvement in the national personal directed to take in more can be rate is d for non important to the the home one axe in the area dilled men are unable to months' national personal who have completed 12. I work in the near inlied to the influence of the home when the near in their families to place of to be who are in complete carries of training to the area illowed setual radial recently of the area illowed setual radial radial reconstruction with and both. and back

At the earlier states of the scheme efficiency has to one extent socialism for the levels of six industry. This is need. Recent policy has to desire the entitled to entration on the improvement of training and representatives of the production of a better article in some set in the Ordinary factors and the shift numbers. Penalty trade texting panels contration on the improvement of training and the production of a least matter the production of a letter article in some nat smaller numbers. Pecular trude testin, panels have not been formed at most he adquirter industry and to senior Chairmen centres. With a view to impro in, the train variously Services Labour Aribunal. centres. With a view to impro in, the train ing stimilities of instructors classes for instructors have also been started in all training centres. Hindust mill being timelit with the object to universally training in this language throughout the country Recruitment of a better type of trainer is being effected by requiring e indidates seeking admission to training centre to pass intelligence tests on the lines of the psychology tests given in other countries. I measure adopted to improve the physical standard of the trainers is to give sharl oil at the rate of two terspoonfuls a day to under developed men. A total quantity of 15 000 lbs of this oil was bought from the Government of Madras for this purpose. In order to enable trainces who have not passed the prescribed trade tests qualifying for industrial employment. it the date of conclusion of hostilities, the Government of India have decided to continue their technical training scheme on a diminishing baris for a period of 18 months after the War Trilnees will continue to receive free instruction shilled worlers which a nation or a wind the usual stipends and concessions. A nations of the New Instrument Mechanics Training Centre was started at Handupur near Bangalore with 275 sents in the year 1914 for truining boys in the manufacture of precision tools which at concessions with the manufacture of precision tools which at concessions with the first property of the production of tanks, in the field of the production one time was considered unsuitable for India The tride is open to voung men who have reached Matriculation Standard and are between the ages of 171 and 30 They are trained under the guidance of a British expert Trainees get a scholarship of Rs 59 4 0 per month with free food, lodging and clothes

The Technical Training Scheme has demonstrated that, with intensive training semi-shilled men can be trained for all industries and that the standard of such men, after from six to eight months' training, is at least up to, if not above, the standard reached under ordinary peace time apprenticeship schemes of two to three years duration. The Government of India felt that if the training imparted under the Technical Truning Scheme is supplemented by further binssed' training, the final product would be more acceptable to imployers With a view to adjust the scheme to the wartime needs of civil industry they decided to set up an Advisory British Minister of Labour, made a scheme twhose functions are (1) to review the existing methods and syllabuses of training

Manner in which the Exchanges are operating -Workmen wishing to register themselves at an exempted from this duty employment exchange are asked by the exchange | for which this fund will be utilised are defined in staff to supply such particulars about themselves as age, technical education and experience, willingness to serve away from their homes, etc. This information is recorded on specially designed envelopes, within which is placed any other correspondence which may later develop in regard to the individual's placement On registration, each workman is given an identity card containing his registered number, address, identification marks, signature or thumb To make identification impression and trade easier, the identity card may also bear a photograph Employers may notify vicancies to the exchange in person, by telephone, or on a specially prepared form which may be obtained from the exchange manager It is not incumbent on employers to supply all the information as in the application form, but evidently, the more de tailed are the particulars supplied, the easier it will be for the exchange staff to submit the right Particulars about vacancies type of personnel are also recorded on envelopes, and these as well as the envelopes containing information about workmen in need of employment are maintained on the card index system Each envelope forms a complete record in itself When a vacancy is a complete record in itself When a vacancy is notified, the exchange staff goes through its records and selects the most suitable person or persons and directs them to interview the employer Persons so directed are supplied with introduction cards to be presented to the employer at the time of interview A duplicate of this card is sent simultaneously to the employer The form sent to the employer has space in which the employer is requested to state whether the candidates appeared for interview, whether they were taken into employment and if so on, what wages, and if rejected, the reason therefor When an exchange finds that it cannot fill a vacancy locally or place a certain workman, it will notify the fact with full particulars of the vacancy or workman to the Central Exchange, Simla, for circulation to other exchanges Detailed information is not available regarding the members of registrations at and placements from all the Employment Exchanges which have so far been opened in India but it is of interest to note that these figures for the Exchange in Bombay amounted to 6,337 and 3,521 respectwelv since the Exchange was opened early in 1944 up to the 31st May, 1945

CREATION OF A STATUTORY COAL MINES LABOUR WFI FARE FUND.

With a view to meet expenditure incurred in connection with measures which in the opinion of the Government of India are necessary or expedient to promote the welfare of labour employed in the coal mining industry, the Government of India, under the powers conferred by Section 72 of the Government of India Act, promulgated the Coal Mines Labour Welfare Mallick, representing the Indian Mine Managers, Association, Mr W M Burch, nominee of the National Association of Colliery Managers, Wesses H Ghosal and P Bhattasali of the Welfare Managers, Mrssali of the Mrssali of the Managers, Mrssali of the Mrssali of by Section 72 of the Government of India Act,
-promulgated the Coal Mines Labour Welfare
Fund Ordinance, 1944, on the 31st January 1944
By virtue of Section 4 of this Ordinance, a Coal Mines Labour Welfare Fund has been created which will derive its revenue from a cess or a

Specified classes of coal or soft coke may be exempted from this duty

The principal objects the Ordinance These are (1) the improvement of standards of living, including housing and nutrition, the amelioration of social conditions and the provision of recreational facilities for the benefit of the labour employed in the coal mining industry, (2) the provision of transport to and from work, (3) the provision of improve-ment of educational facilities, (4) the provision of improvement of supplies of water, and (5) the improvement of public health and sanitation, the prevention of disease, the provision of medical facilities and the improvement of existing medical facilities The Ordinance makes provision for the appointment of an Advisory Committee consisting of Government Officers and equal numbers of members representing colliery owners and workers employed in the coal mining industry of whom one has to be a woman and it contemplates the appointment of Welfare Administrators, Inspectors and other officers to supervise or carry out the activities financed from the fund. The func activities financed from the fund The functions of the Advisory Committee are to advise the Central Govt on all matters which the Ordinance requires Government to consult it and on any other matters arising out of the administration of the Ordinance and the fund Both the cost of administration of the fund and the salaries and allowances of the Officers appointed in connection therewith are to be defrayed from the fund itself

The Rules framed under the Coal Mines Labour Welfare Fund Ordinance were published in the Gazette of India dated the 15th October, 1944 These make provision for the composition of the Advisory Committee, the collection of the excise duty or cess levied under the Ordinance and its administration The members of the Advisory Committee are as follows Mr H C Prior, Secretary to the Government of India in the Department of Labour, Chairman, Mr V K B Pillai, Coal Mines Labour Welfare Commissioner, Vice Chairman, Mr P C Young, Coal Commissioner Mr W H Kirby, Chief Inspector of Mines, Mr R S Nimbkar, Labour Welfare Adviser to the Government of India, Mr A Hughes, Labour Commissioner with the Government of Bengal, Mr A G Bunn, Additional Deputy Commissioner, Dhanbad, Sardar Bahadur Ishar Singh, Labour Commissioner with the Government of the Central Provinces and Berar, Messrs J Latimer and S F Tarlton, nominees of the Indian Mining Association, Mr M N Mukerjee, nominee of the Indian Mining Federation, Mr R D Rothore, President, Indian Colliery Owners Association, Mr Boothroyd, nominee of the C P & Berar Mining Association, Mr Mono Gopal Sen Gupta, representing other Colliery Owners, Mr S N Mallick, representing the Indian Mine Managers Association Mr W M Burch nominee of the its administration The members of the Advisory Committee are as follows Mr H C Prior, Indian Federation of Labour, Messrs Nirpada Mukherjee and Chapal Bhattacharva of the Trade Union Congress, Kulada Bibi, a woman World of the Congress of the C duty of excise at such rate, not less than one worker of 45 years of age who has been employed anna nor more than four annas per ton as may for the last 30 years as a coal cutter and Mr from time to time be fixed by the Central Gov ernment by notification in the Official Gazette Barari Jalgera Colliery in the Central Provinces

WAR INJURIES (COMPENSATION INSURANCE) SCHEME.

A War Injuries (Compensation Insurance) Scheme was enacted by the Central Government under the War Industries (Compensation Insur ance) Act, 1943, which was brought into force on the 16th November 1943 The objects of this Act is to impose an obligation on the employer Act is to impose an obligation on the employer tions of service, grain shops, housing, medical to pay compensation in respect of war injuries to workmen covered by the Essential Services on scales of wages and dearness allowance. The (Maintenance) Ordinance, 1941, factory workers, mine workers, workmen employed in the major ports, and to workers employed on any estate where cinchona, coffee, rubber or tea is grown The amount of compensation is roughly the difference between the amount paid by Govern ment under the War Injuries Scheme and the amount which would have been payable under the Workmen's Compensation Act if the war PAYMENT OF FAMILY ALLOTMENTS injury had given a right to compensation there There is no limit as regards the monthly salary of the workman as in the Workmen's Com-pensation Act Insurance has been made com pulsory for every employer covered by the Act who has to take out a policy of insurance from the Central Government on payment of an advance premium at the rate of annas four per Rs 100, subject to a minimum of Rs 8, on the wage bill for the quarter ended 31st December 1943 if the employer was an employer for one appointment quarter before the 1st January 1944, otherwise for any subsequent quarter during which he became an emp oyer for the first time, provided the quarterly wage bill has exceeded Rs 1,500 All the premia received from the employer go to make the War Injuries Compensation Insurance Fund from which all payments of compensation, The fund cannot be utilized to etc, will be met pay compensation to Crown employees as the Crown is not required to pay insurance premia in respect of its employees The same machinery in respect of its employees as administers the War Injuries Scheme is to be utilized for the purpose of the War Injuries Compensation Insurance Scheme

UNSKILLED LABOUR SUPPLY COMMILIES.

During the earlier stages of the War the supply of unskilled labour had been satisfactory requiring no measures for its control or allotment the end of the year 1942, however, there were indications that the problem of supply of such labour was assuming importance in a few areas The Government of India therefore decided to set up both Provincial and Regional Labour Supply Committees for areas where serious shortages were being experienced or were likely to be inticipated and a beginning was made by the setting up of such a Committee at Jubbulpore where the needs of the Central Government establishments predominate

Government establishments predominate

Committees have no statutory powers

They are ordinarily, under the chairmanship of the Chairmen of the National Service Labour Tribunals of the Provinces in which they are establishments are to be

Their recommendations are to be

The trade dispute with which such body of persons employed and prevention of a Produced in the provincial in any place of employment is likely to take part in, or is taking a part in, a hartal, then, without prejudice to any other proceedings which may be taken in respect of such hartal, the Provincial articles in respect of such hartal, the Provincial articles in respect of such hartal, the Provincial articles in respect of such hartal, the Provincial articles in respect of such hartal, the Provincial articles in respect of such hartal, the provincial articles in respect of such hartal, the provincial articles in respect of such hartal, the provincial articles in respect of such hartal, the provincial articles in respect of such hartal, the provincial articles in the provincial a followed by the local undertakings of the Central be taken in respect of such hartal, the Provincial Government—any differences to be decided by Government may by order in writing require that Government at headquarters The functions of Unskilled Labour Supply Committee and place of Committee and place of the committ that Government at headquarters The func-tions of Unskilled Labour Supply Committees such place of employment to take, within such are as follows (1) to co ordinate the recruitment time as may be specified to secure that the hartal

of unskilled labour for all Government undertakings in the area, (2) to arrange a priority of utilization of any other recruited labour and of existing labour forces in accordance with any priority orders that may be received from competent authorities, (3) to advise on any measures necessary to secure adequate unskilled labour, force, including all amenities and condi-Committee appointed for the Province of Bombay is under the chairmanship of Sir Charles Bristow, Kt, OIE, IUS, Adviser to His Excellency the Governor of Bombay and the Regional Committee for Bombay City is under the Chairmanship of Mr H L Butler, Commissioner of Police, Bombay

A scheme was sanctioned early in 1942 enabling Government servants in "threatened" areas to arrange for a regular monthly remittance of a portion of their salaries (not exceeding 50 per cent) to their families living away from them The scheme has now been extended to all daily rated labourers in Central Government under takings whose employment is expected to list for at least 12 months from the date of first

PREVENTION OF HARTALS.

We refer elsewhere in this publication to the widespread disturbances which occurred in India in August 1942 following the arrest of Mr M K Gandhi and the leaders of the Indian National Congress as a result of the All India Congress Committee deciding, at its historic Session of 6th/8th August in Bombay, to empower Mr Gandhi to launch 2 Civil Disobedience These disturbances Movement in this country included hartals or stoppiges of work for pro longed periods in many industrial units in several centres in India All the cotton textile mills in Ahmedabad remained totally closed for A number of other factories nearly four months and large engineering workshops in Bombay, Cawnpore, Nagpur and in many other places were also affected and essential War production was considerably interfered with In order to prevent a repetition of similar trouble in the future. the Government of India, by a notification dated the 17th April 1943, have amended the Defence of India Rules by adding a new rule—Rule 56A for the Prevention of Hartals in Places of Employment

'Hartal' has been defined as any concerted cessation of work or refusal to work by a body of persons employed in any place of employment, except a cessation or refusal in furtherance of a

h li not take place or the case may be shall transf r of a l rg number of work rs fron one cea. There has been an increasing tendency in most Provinces in India during recent years especially in Bombay, to take advantage of Section 5 of the Factories Act, 1934, by notifying all factories employing ten or more persons as "factories" for the purposes of the Act In this connection it is of interest to record that Dr K N Katju, Ex-Minister for Industries in the United Provinces conducted a detailed the United Provinces conducted a detailed inquiry into alleged sweated labour in small factories for a period of over two years. He found that in over 300 factories employing 4,000 workers labour was sweated, there were no fixed hours of work and health and sanitary conditions were deplorable The Government of the United Provinces thereupon took immediate action by

- Age and Sex Groups -Factory operatives are divided into four age and sex groups (1) adult males, (2) adult females, (3) children of both seves, i.e., persons over 12 and under 15 years of age, and (4) 'adolescents defined as persons of both sexes who are over the age of 15 years and under the age of 17 years but who have not been certified as fit for employment as adults Such adolescents as have not been so certified are to be deemed to be children
- (c) Hours of Work -The maximum limits of eleven hours per day and sixty hours per week laid down by the 1922 Act for both adult males and females are permitted only in the case of sea-sonal factories The maximum hours permitted for perennial factories have been reduced to ten per day and 54 per week subject to the proviso that persons employed on work necessitating con-tinuous production for technical reasons and per sons whose work is required for the manufacture or supply of articles of prime necessity which must be made or supplied every day may be employed for not more than 56 hours in any one week The maximum hours of work permitted for both uncertified adolescents and children have been limited to five per day both in seasonal and in perennial factories
- (d) Spreadover—By "spreadover" is meant the limitation of the period of consecutive hours during which the daily limits of hours of work may be availed of by the owner or occupier of a factory. This principle was introduced in factory legislation for the first time in 1934. The spreadover in the case of adults is limited to thirteen consecutive hours and in the case of children to seven and a half continuous hours, but the continuous period of eleven free hours in every twenty-four hours in the case of adults and of sixteen and a half free hours in the case of children must include the hours between 7 pm and 6 am for both women and children. The effect of the Amending Act of 1944 on this question has been dealt with below. The power to grant exemptions in the case of women where technical reasons require that work should be done at night, e.g., in the fish curing industry, continues to be allowed. during which the daily limits of hours of work may be availed of by the owner or occupier of a factory This principle was introduced in factory legislation for the first time in 1934

- (e) Artificial Cooling and Humidification Power has been given to Provincial Govern ments to authorise Factory Inspectors to call upon managers of factories to carry out specific measures for increasing the cooling power of the air if they are of opinion that it is at times insufficient to secure operatives against danger to health or serious discomfort, provided, however, that the cooling power can be appreciably increased without involving an amount of expense which would be unreason able under the circumstances
- (f) Welfare —Provision is made for four matters in connection with workers welfare (1) for the maintenance of a suitable and Provinces thereupon took immediate action by declaring all such factories as employed 10 or more persons as factories for the purposes of the Act. The Second Conference of Labour Ministers held in January 1941 decided that the Factories Act should be so amended as to make registration of all factories employing 10 or more persons compulsory but this recommendation has not yet been given effect to

 (b) Age and Sex Groups—Factory operatives

 (1) for the maintenance of a suitable and sufficient supply of water for washing for the use of persons employed in processes involving contact with obnoxious or poisonous substances, (2) for adequate shelter for rest in factories employing more than 150 persons, (3) for the reservation of suitable rooms for the use of children of women employed in factories employing more than fifty women, and (4) for the maintenance of adequate first aid appliances
 - (g) Rest Internals and Holidays The provisions of the 1911 and the 1922 Acts with regard to rest'intervals and the weekly holiday were maintained subject only to verbal modifications of a minor character
 - (h) Hollays with Pay—The Factories (Amendment) Act, 1945 which comes into force with effect from the 1st January 1946 provides for compensatory holidays and holidays with pay In cases where, as a result of the passing of an order or the making of a rule exempting a factory or the workers therein from the provisions of the Act relating to a compulsory weekly holiday, a worker is deprived of any of such holidays, he must be allowed, as soon as circumstances permit compensatory holidays circumstances permit, compensatory holidays of equal number to the holidays so lost. The provisions with regard to holidays with pay will enforce, in all perennial factories an annual pand holiday of 10 days for adults and 14 days. will enforce, in all perennial factories an almost paid holiday of 10 days for adults and 14 days for children. These holidays can be accumulated over a period of two years. Half of the wages payable for these holidays are to be paid before the worker proceeds on leave and the balance on his return. A more liberal provision will on his return A more liberal provision will not be affected by this law and factories providing benefits substantially similar to those laid down in the amending Act can be exempted
 - from its provisions

of the overtime worked less any overtime in factory or class of factoric shall reach a certain respect of which he is entitled to extr pay stand rd. This h s been done to rem ly def c under the preeding sentence to pay at ther te it the lichting arising from on or the other of the under the preceding sentence to pay at the I te of one and a quarter times his ordinary r te of

(f) Certificates of Funess for Children -Provincial G vernment have be given powers Provincial G vernment have be given powers to make rules prescribt if the degree of fitnes to be att i ed by children and it is a been been it id down no child failing to attain it can be certified for employment in a factory Similarly adolese ts annot work a adults unless certifi d fit to work as an a lit! If by re not oc tilled they re c naide d th y re

(k) Security of Facto y Structur s - Fact ry inspectors have been gi en powers to c ll up n m gers to carry out such test s m y be neces ary to determine the stre gth or q ality fa y specified parts of the struct re of factories if they are of opinion that on count of a y def ct or inadequacy in the constr ction of any f ctory the factory or any part th reof is d ngerous to human life or safety P o inci i-Governments are f rther empowered to make r les for th furni hing by factories of certifi eat s of stability

(1) Ex mptions - A f equent cas of com-plaint ag i at the older Factory Acts was the they e ve l cal Gove nments ry wide power to e empt certain class s of workmen f om all or any of the re trictive provisions of the Act The new Act limits the powers and pres ribes further that no exemptio s are t be graded in r spect f the pro 1 in s f speador r prohibition of night work and the limitation of weekly hours for women and persons under the g of sixteen ; ars

The Facto is (Amendment) At 1944 ws passed to remedy certain defects and mt ome difficulti si th administr tio of the main Act Washing fell its we e req fred to be povided only in places where w b. r c m in contex with input is o obnoxious and in the context with input in the context with a context of the context with a context of the

THE PAYMENT OF WAGES ACT.

Perhaps the most advanced and difficult piece of social legislation attempted in India is the Payment of Wages Act which was passed by the Central Legislature early in 1936 and amended In a minor particular by an Amending Act in 1937 A detailed note on the history of this piece of legislation will be found at pages 503 and 504 of the 1938-39 Edition of this publication The more important provisions of this Act which were brought into operation with effect from the 20th May 1937 are as follows

- (a) Scope of Application —The Act in the first instance applies to factories and railways but Provincial Governments are empowered extend it to tramway or motor omnibus services, docks, wharves or jetties, inland steamer vessels, mines, quarries or oil fields, plantations, and any other class of workshops or establishments in which articles are produced, adapted or manufactured with a view to their use, transport or sale.
- Wages Wages' for purposes of the Act means all remuneration, capable of being expressed in terms of money, which would, if the terms of the contract of employment, express or implied, were fulfilled, be payable, whether conditionally upon the regular attendance, good work or conduct or other behaviour of the person employed, or otherwise, to a person employed in respect of his employment or of work done in such employment, and includes any bonus or other additional remuneration of the nature aforesaid which would be so payable and any sum payable to such person by reason of the termination of his employment but does not travelling allowances, employees' ınclude contributions to provident funds, gratuities process of manufacture and to hand over the

Many industrial establishments, especially cotton textile mills in India, grant good attend ance and efficiency bonuses in addition to wages These bonuses operate as fines in cases where the standards for earning them are not attained The Government of India, while framing the Act, included such bonuses within the ambit of "wages' but the definition of this term as far as bonuses are concerned has been widely interpreted The Government of Bombry held that existing good attendance and efficiency bonuses wherever they obtained must be paid without conditions and notified all factories accordingly As a test case, the Arvind Mills in Ahmedabad were pro secuted in the City Magistrate's Court for nonpayment of these bonuses in cases where the conditions for earning them were not fulfilled The Magistrate held that bonuses were wages and directed that the deductions made should be refunded to the workers. The matter was taken into appeal in the Court of the Assistant Judge, Ahmedabad, where the decision of the Magis trate was upheld The Mills thereupon filed a further appeal in the High Court, Bombay, which reversed the Ahmedabad judgments and held that all bonuses must be earned The Govern-Central Legislative Assembly to amend this Act with a view to clarifying the position of 'bonuses' The employee filed an application against the

- (c) Wage Periods -No wage period is to exceed one month and all wages are to be paid in coin and/or currency notes
- (d) Time of Payment—The wages of all persons employed in concerns employing less than one thousand persons are to be paid before the expiry of the seventh day after the last day of the wage period in respect of which the wages are payable and in establishments employing more than one thousand persons before the expiry of the tenth day. Where employment is terminated by the employer, all due wages are required to be paid before the expiry of the second working day following that on which the employment is terminated
- (c) Permissible Deductions Deductions from wages are permitted only in respect of fines, absence from duty, dunage to or loss of goods expressly entrusted to an employed person for custody, housing accommodation supplied by an employer, for recovery of advances or for adjustment of over-payments of wages, for income-tax, for contributions to or repayment of advances from provident funds, for schemes of postal insurance, for dues to co operative societies and Deductions on orders made by courts of law are also permitted in respect of such amenities and services supplied by the employer as the Governor General in Council or a Provincial Government may, by general or special order, authorise The Central Government promul authorise gated a Payment of Wages Amendment Ordi nance in 1940 amending the Act to enable deductions being made from wages with written autho risation of the employed person for investment in any War Savings Scheme approved by a Pro vincial Government - The Act does not permit an employer to make deductions from wages in respect of the value of material damaged in the payable on discharge, or the value of any housing same to the employee concerned Such a system recommodation or services rendered to the was widely prevalent in certain centres of the worker by his employer Ahmedabad where it was estimated that a total sum of nearly fifteen lakins of rupees was deduct ed annually from the wages of about 25,000 weavers in respect of weaving fines and the value of damaged cloth handed over to them
 - (f) Fines —No fines are to be imposed on children, i.e., persons below the age of fifteen years. No fines can be imposed save in res pect of such acts or omissions as have been exhibited in notices which have received the approval of the Provincial Government or of an authority which a Provincial Government may prescribe in the matter and unless the person who is fined has been given an opportunity of showing cause against the fine. The total amount of fines which may be imposed on any person during any wage period is not to exceed half in anna in the rupee of wages for that wage period and no fine can be recovered in instalments or after the expury of 60 days from the day on which it was imposed All fines are to be recorded in prescribed registers and all realisations from fines are to be expended on objects beneficial to the workers Provincial Governments have been empowered to make rules in connection with most of these matters

Effects on Industry

A compulsory system of workmen's compensation enhances the cost of production but not to any appreciable extent. In the case of coal mines, the increase in cost has been estimated to be not more than annus four per ton of coal (Fidepara 39 of the Report of the Indian Coal Committee, 1925) However, the owners of many of the smaller coal mines were compelled to close down their mines but this was due mainly to the severe depression with which the industry was then faced In the Punjab, the proprictors of the coal mines in the Jhelum District were reported to be not satisfied with the privileges enjoyed by the miners under the Act as some of them had to pry as compensation on a single accident more than they could earn during An unexpected increase in the number of serious and fit il accidents may undoubtedly make a big hole in the profits of a concern but the remedy for this lies in accident insurance There can, however, be no denying the fact that the introduction of workmen's compensation has helped considerably to improve the standard of safety in the country Tacilities for accident insurance are now being provided by a number of leading insurance companies in the country and the most important or these are the Claims Bureaux in Calcutta and Madras The Calcutta Claims Bureau which represents many of the leading insurance companies operating in India deals with a large number of claims and offers valuable co operation to the authorities in settling compensation claims. This Bureau continued to render its valuable co operation in the prompt settlement of claims. In Bombay, insurance companies are now concerned with half the number of cases that come up before the Commissioner Insurance companies as a rule contest only cases involving questions of law or principle and are of benefit to all concerned

Association, Ltd., Bombay, is an organisation of employers one of whose objects is the mutual insurance of members against liability to pay compensation or damages to workmen employed by them or thele dependants for injuries or accidents, fatal or otherwise, arising out of or In the course of employment

The Government of India has now announced that it is their intention to provide for Workmen's Compensation in one comprehensive scheme which will cover sickness insurance, maternity benefits and compensation for accidents

MATERNITY BENEFITS I.FGISLATION.

A Bill introduced by Mr N M Joshi in the Central Legislative Assembly in 1924 to provide for the payment of maternity benefits to women employed in certain industries was thrown out. The Government of Bombry, however, took up the question a few years later and the Bombay Maternity Benefits Act was passed in 1929. This was substantially amended by an Amending Act, passed in 1925. A similar Act was passed nees in 1931 These were Act passed in 1935 in the Central Provinces in 1931 the first Acts of their kind in India Since then, Maternity Benefit Acts have also been passed in the Provinces of Madras, Bengal, Sind, Assam, Punjab, and the United Provinces and in Armer Manager and In Armer Manager and In Armer Manager and In Armer Manager and In Armer Manager and In Armer Manager and In Armer Manager and In Armer Manager and In Armer Manager and In Armer Manager and In Armer Manager and In Armer Manager and Inches and In In the year and in Ajmer-Merwara and Delhi 1941, the Bengal Legislature passed a second Maternity Benefit Act for women employed in tea plantations under the title of The Bengal Maternity Benefit (Tea Estates) Act 1941
Except for the Assum Maternity Benefits Act, which care transport in both Act which covers women employed in both factories and on plantations and the last Act all the other Maternity Benefit Acts are applicable to women employed in factories. The subject of outcomes the honofite of such The subject of extending the benefits of such legislation to women employed in Mines was In these provinces insurance is widely resorted discussed at the Second Conference of Labour to by the employers especially in the textile industry. The Millowners' Mutual Insurance of those discussions the Central Legislature

THE INDIAN TRADE UNIONS ACT

The origin of the passing of a Trade Unions Act in India wanthe historing Chingh m Mill Corol 100 in which the Midron High Court granted an int rim i ju ction gainst the Strike Com mittee of the Madras L bour Union fe biddl g them to indice riain work s to break thei contracts of mployment by ef ing t return to work Trade Union I aders found that thy were liable to pre-ceution and imprisonment to were induce to proceeding and impresonment to be a fide u on activities and it w it it it to some legitation for the protection of trade unio s we nessary in March 19 1 M
Y M Joshi then General Sec etary of the All Indi Trade U ion Co gr ss cees (1 ly mov d r s lutio in the Centr I Legislative A sembly

linion must be workers and also to prevent oue;

application of the union itself, or if the Registrar By virtue of Setion 115 of The Insurance Act, is sitisfied that the certificate has been obtained 10.8 incurance business carried on by a trade by fraud or mistake or that the union has ceased union is not subject to the provisions of that to exist or has vilfully and after notice contravened any provision of the Act, or if it has allowed any rule which is inconsistent with the Act to continue in force or his rescinded any rule which is required by the let Any union aggreeved by the refusal of a Pegistrar to recister it or by the cancellation of its registration may prefer an appeal to a judge appointed by the Provincial Government for the purpose, and, in the event of the dismissi of such an appeal, the aggriesed parts has the right of a further appeal to the High Court

Obligations Urions —The general funds of registered trade unions cannot be spent on objects other than those specified in Section 15 of the Act nor on political objects. But the Act makes provision for the creation of a separate political fund, subscription to which may be collected from such members as voluntarily desire to contribute to All registered unions are required to submit annually to the Registrar duly audited state ments of accounts in prescribed forms together with changes in officers and the executive and a copy of the rules corrected up to date Notices of all changes in the rules or of the registered name or the registered address of the office of the union, of amalgamations with other unions or of dissolution must be submitted to the Registrar in prescribed forms within prescribed periods of their occurrence Fallure to carry out these obligations may result either in the cancel lation of a union a registration or by the imposi tion of r fine tion of r fine. The Act further requires that the rules of every registered union should make adequate provision for the inspection of books of accounts and lists of members by the officers and members of the union The Govt Madras have recently tightened up their regulations in connexion with the maintenance, by registered amons of their registers Among other things, all unions will now be required to maintain files of vouchers and machinenumbered subscription receipt books

Rights and Privileges of Registered Trade Unions -The Act confers on registered unions the right to corporate existence and of perpetual succession with power to acquire and hold both movable and immovable property and to enter into contracts. A registered trade union is immune from prosecution for criminal conspiracy in respect of an agreement, unless it is one to commit an offence, made between its members for the furtherance of a trade dispute or for restraint of trade and from any leg il difficulties arising therefrom It also enjoys mmunity from civil suits in certain cases

ndividual person from being an Officer of mose Indian Trade Union: Act to earry on any form han one Union

The resistration of a union may be cancelled or any oblission to recure professional advice withdrawn at any time by the Resistrar on the last to the neumannel soundness of such business. Helistered unions are empowered under the The result therefore has been that certain Act unions are undertaking unso and schemes of insurance now braned by the Act especially that form of it which is carried on on the basis of the dividing principle. With a view to protect the interests of members of trade unions s ho are and might be the sections of importares, the Government of India, in September 1940, issued a circular letter to all Provincial Govern ments inviting opinions as to the application of the Incurance Act, with such modifications ourt 13 might be necessary, to insurance business Imposed on Registered Trade carried on by Tride Unions

One of the most yeard questions in connexion with trade unions in India is that of their recondition by the employers. We are dealing with this gurstion more fulls in the Chapter on Trude Unionism in India Many Bills nimed at compelling employers to recognize unions of their workers have been introduced by private members in Provincial Legislatures but these falled to carry the support of the Governments concerned. The subject was discussed at the Second Session of the Labour Ministers Confer ence and, as a result of the decisions then reached the Government of India drafted a Bill int nded to add a New Chapter dealing with the Recognition of Trade Unions and Rights and Liabilities of Recognised Trade Unions to the This was circulated Indian Trade Unions Act to ill Provincial Governments for opinion after consultation with the interests concerned In the light of the criticisms received, the Government of India drafted a new Bill on the subject and this was introduced in the Central Legislative issembly by the Hon ble the Labour Member on the 13th Assember 1943 on a motion for circulation of the Bill for eliciting public This Bill seeks to compel an employer opinion to recognise a tride union which fulfils certain prescribed conditions and is approved by a Board of Recognition (where one has been set under those up), non recognition stances being made an offence punishable by law On critical examination, the Bill has been found to be so full of insurmountable difficulties that it is very doubtful if the Government of India will proceed with it in the form in which it was introduced in the Legislative Assembly

As far as statistics of registrations are con corned, tables showing the numbers of registered unions on all the provincial registers in British India at the end of each financial year together with the membership and income of those which furnished returns have been incorporated in this section in some previous issues of this publica The administration of the Indian Trade Unions Act is entirely on a provincial basis and each Provincial Government is required to properly a Registrar of Trade Unions A union is to be registered in the province in which its head office is situated and if this is transferred to another province, the registration transferred to another province, the registration publication of annual reports on the administration but to be transferred to that province tion of Labour Laws for the duration of the War

trade dispute within the frade or industry in Defence of India Rules a ould also be exercisable which the striker; or employer locking out are by the Provincial Covernments subject to engaged or which is designed or calculated to errain qualifications inflict severe and general hardship upon the community and thereby to compel any Government in British India, the Icderal Rollway Authority or the Grown Representative to take or abstain from taking one particular course of Adjudicators appointed in connection with action is illeral Persons furthering fliegal strikes or lock outs are liable to punishment while those refusing to take part in them are protected from trade union discibilities to which they might otherwise be subjected

Rule 81A of the Defence of India Rules.

This was promulated by the Government of India in January 1942 and has been amended on several occasions since it was first pro oul hated. The text of this Ordinance as amended up to the ofth November, 1944 his been published at pages 240 to 246 of the December 1944 issue of the Leibour Gazete (Bombas). The object of Rule 814 of the Defence of India Rules is the avoidance of strikes and It empowers the Central Government to make, by special or general order, provi ion for (a) prohibiting, subject to the provisions of the order a strike or lock out in connection with any trade dispute, (b) requiring employers or workmen to observe for such period as may be specified in the order such terms and conditions of employment as may be determined in accord ance with the orders, (c) referring any trade dispute for conciliation or adjudication in the manner provided in the order, and (d) enforcing for such period as may be specified in the order all or any of the decisions of the authority to which a tride dispute his been referred for adjudication, provided that no order made under (b) shall require an employer to observe terms and conditions of employment less favour able to the workmen than those existing in the undertaking at any time within three months preceding the date of the orders. A recent A recent amendment made in December, 1913 requires the authority making an Order referring any particular dispute for adjudication to specify, as far as may be practicable, the matters upon which adjudication is necessary or desir The Central Govt is empowered to able amend or vary such matters or to postpone specification pending a preliminary enquiry

By virtue of the above Rule, the Government of India issued a General Order on 6th March 1942 preventing any person in any undertaking (defined as any undertaking by way of trade or business) from going on strike in connection with any trade dispute without having given to his employer, within one month before striking, not less than fourteen days' previous notice in writing of his intention to do so. This order also lays down that where any trade dispute has been referred to a Gourt of Inquiry or a Board of Concillation under the Trade Disputes Act, 1929 or for conciliation or adjudication under an order made under Rule 814, no person employed in any undertaking concerned in the dispute shall go on strike until the expiry of two months after the conclusion of the proceedings upon such reference. The Central Government,

Provincial Governments have made Most extensive use of the power conferred on them b. Rule 81A of the Defence of India Rules in referring trade disputes to adjudication dispute in the Province of Rombas have be n judges of the Rombay High Court or gentle men of equal standing ruch as Mr. Ilma Latificarr, our, 105 (Redd) or Mr E Nanasatts, 105 (Rtd) In the Provinces of Beneal and Sind, the Commissioners of I about have been appointed. The awards of Adjudi externioner a while range of subjects recording wate rate and conditions of employment. It is t of possible for us to catalogue all the disputes which have been referred to adjudication since the promulgation of Rule 411 of the Defence of India Rules but we may mention that regular information on the subject is published in the Indian Labour Gazette

Essential Services (Maintenance) Ordinance, 1911.

This Ordinance has been dealt with in the Chapter on "Second World War-Its Effects and Repercussions. Its main object is to present workers in certain essential services which have been 'declared' by Government to be such from leaving their employment this Ordinance however, a worker who disobers any lawful order given to him in the course of his employment is liable to be punished. An order not to strike work would be a lawful order Section 6 of this Ordinance further empowers the Central Government or, with the previous sanction of the Central Government, a Pro vincial Government to make rules "regulating or empowering a specified authority to regulate the wages and other conditions of service of persons or of any class of persons engaged in any employment or class of employment, in any concern which has been "declared" as an essential service under this Ordinance As for as is known, Bengal is the only Province in India which has framed Rules empowering the Labour Commissioner, Bengal to issue directions regulat ing the wages and other conditions of service of persons coming within the scope of the Ordinance subject to certain conditions

Bombay Industrial Disputes Act, 1938

This Act is perhaps the most advanced and outstanding piece of Labour Legislation ever attempted in India Put in a nutshell, the object of the Act is to make all strikes and lock-outs illegal until such time as the procedure provided for in the Act for conclination and arbitration is exhausted All industrial matters relating to wages, conditions of employers or privileges, rights or duties of employers or majoress or the model to a conditions employees, or the mode, terms and conditions of employment or non employment are divided into two schedules All matters which regulate the relations between employers and employees such as rules of conduct or standing orders for operatives are listed under Schedule I Matters by virtue of two notifications dated 12th March connected with wages, hours of work, conditions and 20th May 1942, have directed that the of employment, etc, with regard to changes powers conferred on it by Rule 81A of the in which employers are required to give notice

power to modify the e schedules (Se tion)

St d g O de s — Every employer in an industry to which the Act is made applicable is r quired to submit with! a period of two r quires to submit with a period of two months from the date of the application of the Act to that industry a d ft of the Standing Orders which he p oposes to dopt for gov raf g the relations betwee him a d his employees. The Commissi ner of Labour is to settl trial Court (Sections 6 & 27)

Conciliators The Commissioner of Labour is Conciliators The Commissioner of Labour is to be the ex-off to Chi f Conciliator for the purposes f the Act (Section 21) Po Islon ha also been made for the app intment of Boards of Con litatio con isti of independent chairm n and memb is represe ting employers nd empl yees to be selected by Gover ment fr m panels formed for the purpos (S ction 3)

Laoom in inaia,

ssion) agree to submit any present or future lustrial dispute or any clustes of such disputes arbitration of any person whether such altrator is named in the agreement or not to the Industrial Court All submissions are

be registered with the Registrar (Section 43) the absence of an agreement to the contrary. imissions are irrevocable but are terminable giving six months' notice (Section 11) is conciliation proceedings provided for under a Act are barred in cases where the represen-live of employees is a registered union which

a party to a submission (Section 16) t contains various provisions with regard to a duties of the Industrial Court, procedure fore the Court, execution of orders as to costs d the parties on whom orders or awards

the Industrial Court will be binding Compulsory Arbitration on Certain Disputes ider the Act as originally presed, industrial

sputes could be referred to the arbitration either the Industrial Court or of any other person only ien an employer entered into an agreement th a Union registered under this Act to do so centres or industries where there are no distered unions or even where there is a regis red union but the parties cannot agree to fer a dispute to arbitration, arbitration in

i industrial dispute is not possible. In order

make arbitration compulsory in cortain ses, the Governor of Bomby promulgated to Bomby Industrial Disputes (Amendment) et, 1941, on the 29th May 1941, by Airtue of high power is given to the Provincial Governant to refer any dispute for the arbitration of the ent to refer any dispute to the arbitration of the idustrial Court if it is satisfied that the conti nance of any dispute is likely to cause serious prolonged hardship to a large section of the minunity, or seriously affect an Industry and ie prospects and scope for employment in it,

cause a serious outbreak of disorder or a reach of the public peace. The Amending Act as been applied to all the industries in the rovince of Bombay to which the main Act ad been applied

Illegal Strikes and Loci outs —A strike or a ock out will be illegal if it is declared, com nenced or continued (a) in cases where it relates o any industrial matter mentioned in Schedule I sefore the Standing Orders relating to such natter and submitted to the Commissioner of abour are settled by him or by the Industrial court, as the case may be, or before the expiry it six months from the date on which such pitanding Orders come into operation, (b) without giving notice in accordance with the prosisions of Section 28, (c) only for the reason that the employer has not carried out the provisions of Section 28, (c) only for the reason that the employer has not carried out the provisions of any Standing Order or has made an illegal

the Act connected with the registration of of such proceedings. (f) in cases a here a subone and it has also to decide appeals from
alsions of the Commissioner of Latour in conlinvially revoled, or in contravention of the
stion with the Standing Orders (Section 53)

Arbitration—Any employer and a registered
ion may be a written agreement (called a subssion) agree to submit any present or future distance will be illegal if this commenced at any dispute vill be illegal if it is commenced at any time after the expire of two months after the completion of such proceedings (Sections 62 & The determination of the question of 63) whether any strike or lock out is illegal rests with the Industrial Court

Illegal Change -No employer can make any change in any industrial matter in regard to thich a standing order has been settled under Section 26 or which I, mentioned in Schedule II before a notice in respect of such change has been given and the procedure laid down under the Act has been come through. No employer can also make any change in contravention of the terms of a registered agreement a settlement or an award Any change made in contravention of these provisions is illeral. Applications for the declaration of any changes as illegal are to be made to the Industrial Court (Section 73)

Penalties - I arlous penalties are provided for breicher of the Act (Sections 65 & 66) and for instly ting or inciting others to tale part in an illeral strile or lock out (Section 67) Penalties are also provided for the making of illegal changes (Section 69), for disclosing confidential information (Section 68), for obstructing persons from carrying out duties imposed by the Act (Section 70), and for victimisation of employees for trade union activities or for participating in any of the proceedings under the Act (Section 64)

Miscellaneous —Important provisions of a miscellaneous character relate to the binding character of and the periods for which agree ments are to remain in force (Sections 76 and 77), installation of Courts (Section 79), etc. In cases jurisdiction of Courts (Section 70), etc. In cases in which a representative union is a party to any agreement, settlement, submission or award, the Provincial Government is empowered, after consulting the Industrial Court if it deems it neces surv to do so, to extend the agreement, etc., to all employees in the industry concerned [Section 76 (2)]

Officers and Arcas -In addition to the Con cilintors and the Industrial Court, the Act makes provision for the appointment of a Registrar of Unions for the whole Province (Section 4) and for the appointment of Labour Officers (Section 22) The powers and duties of the Labour Officer are defined in Section 25 "Local area" means any area notified as such by the Local

Government Application of the Act —The Government of Bombay decided to apply the Act, in the first instance to the Cotton Textile Industry in the whole of the Province of Bombay It was ap plied to this Industry in three stages (1) Those, parts of the Act relating to the settlement of the nange, (d) in cases where notice of change has been given and where no agreement in regard to such change is arrived at before the statement of the case is received by the Registrar, (e) in the case is received by the Registrar, (e) in the case where conciliation proceedings in regard tration were applied from 1st August 1939, and to the industrial dispute to which the strike (3) The provisions relating to the settlement of the strike industrial dispute to which the strike (3) The provisions relating to the settlement of the strike industrial to suppointment of the strike industrial dispute to which the strike (3) The provisions relating to the settlement of the striking industrial dispute to which the strike (3) The provisions relating to the settlement of the striking industrial dispute to which the strike (3) The provisions relating to the settlement of the striking industrial dispute to which the strike (3) The provisions relating to the appointment of the striking industrial dispute to which the strike (3) The provisions relating to the settlement of the striking industrial dispute to which the strike (3) The provisions relating to illegal strikes and relating to the appointment of the striking industrial dispute to which the strike (3) The provisions relating to the appointment of the striking industrial dispute to which the strike (4) the strike (4) the strike officers were brought into the strike officers were brought into the strike officers were brought into the strike officers and the appointment of the strike officers and the appointment of the strike officers and the appointment of the strike officers and the appointment of the strike officers and the appointment of the strike officers and the appointment of the strike officers and the appointment of the strike officers and the appointment of the strike officers and the appointment of the strike officers and the appointment of the strike officers and the appointment of the strike officers and the appointment of the strike officers and the appointme

were brought into operation from oth August (are applicable. By an Amen ing Act re. ed in 1939. THE TEA DISTRICTS EMIGRANT LABOUR ACT 1932.

One f the earlist picers of labour legislation in Irdia was the Assam Labour and in ratin Act of 1901 which was designed maily t regul to the recruitm at and engag rest of regul to the recruitm at and engage and of ind tired labour for the tea pl natations in that pr vince. O ing to liter conditions it hd not been possible for many y are sail ject pluntation workers to penal contract and all outshesy rail attempt h. I be a made and all ougg set as attempt h. 1 be n made to improve it e law by amen ment of the main Act in 1908 191 and 19 and by th 1 su of rul sand; guistions these proved to be abortise and flecti and their wonth sulj of became extrem by co fused. The whol question w subjected to a there of xamin tion by the Gove ament of India and the I rovi clai Govern ments in 19 3 S and by the Roy I Commi sio on Indian Labour in 19 9 30 Fh Commi sion recommended that the existing in it in should be replaced by a new en etment which should p ovide () that no assisted emigrasts from controlled areas should be forwarded to the controlled areas should be forwanded to the Assam tea g rdens except through depo-maintained either by the tea indu try or t suitable groups of employers and up noved by the Provincial Gov rement (b)th till Go era you to I all should have power to in louis regard g to it bearenges mit in the till Lado Gut II.

EMPLOYMENT OF CHILDREN'S

ACT, 1938

The Governme t of India passed an Act In should be aboil hed ground in a contract to the central Legislature in 19 8 for in pretion of the employment of child an wise have not and that the C ant II r all ould be employed on a contract of the manufacture of the contract Legislature in 19 8 for in pretion of the employment of child an wise have not and that the C ant II r all ould be employed on medical with the transport of pass and in other contract to the contract contract of the c should be aboli hed and that in its

pent should have power to reintroduce in any han by means of licensed gerden gradura and icensed recruiters. The Government of India for the regulation of hours of work and conditions in plemented these recommendations in the lead Districts I migrant Labour Act, 1932 which is thinnents was Bomby where the Leislative was brought into effect from the 1st October 1839.

Assembly passed the Bomby Shops and Labour Act, on the 30th October 1839. LD33

which are not justified. Provincial Governments, Into four with effect from 1st March 1941, the are empowered, subject to the control of the Leman Shops and Establishment act from 1st Government of India, to impose control over the April 1941 and the Sind Arc from 20th Accember forwarding of assisted emigrants (chapter III) 1941. The que tion of framing fentral legislation or over both their recruitment and their for for the great of a weel is holiday to shop workers warding as occasion may dietate (chapters III) in those Provinces which have no legislation and IV). No license is required for recruiters on this subject was discussed at the Second but the forwarding of recruits to As am must be be sion of the Labour Ministers Conference made through the prescribed routes where arrangements for feeding, rest and medical reatment have been made and by authorised forwarding agents. It is made unlawful to assist persons under 16 to migrate unless they are accompanied by their parents or guardian. A married woman who is living with her husband may only be assisted to emigrate with the consent of the husband I uli effect was given to the Royal Commissions recommendations regarding repatriation (sections 7 to 11) and it is further provided that where an employer falls to make all the necessary arrange ments for the repatriation of a worker within fifteen days from the date on which a right of repatriation arises to an emigrant labourer, the Controller may direct the employer to despatch such labourer and his family or to pay him such compensation as may be prescribed within such period as the Controller may fix (sections 13 and 15) Section 3 of the Act makes provision for the appointment of a Controller of Linigrant Labour with some stiff and possibly one or more Deputs Controllers for supervising the general adminis tration of the system which the Act seeks to establish. The charges for this establishment are to be met from an annual cess called the Emi grants Labour Cess which is to be levied at such rate not exceeding Rs 9 per emigrant as the Central Government may determine for each year of levy The cess is collected by the Con troller by the sale of certificates of emigration Every assisted emigrant has to be provided by the employing interest on whose behalf he was recruited with such a certificate All particulars about the emigrant together with a running record of the details of his employment in Assam are given on it Failure to provide a certific ite is punishable with a fine which may extend to Rs 500 The rate of cess was reduced by the Government of India from Rs, 5 to Rs 3 from 1st October 1938 It was subsequently ruised to Rs 4 for the year commencing 1st October 1939 India from the year commencing 1st October 1930 India from the commencing 1st October 1930 India from the commence of the property of the 1039 which rate continues for the current year The provisions of this Act were intended, in the first instance, to apply only to emigration for work on tea plantations in eight specified districts in Assam, but power is retained to extend its application to other industries and to other districts in Assam if necessary

SHOPS IFGISLATION IN INDIA

I stablishment: Act on the 30th October 1939 Three other Proximes in India-Bengal, the The first object of this act is to make it possi. Punjab and Sind—enacted similar laws during ble, on the one hand, to exercise all the control the verified. The Punjab Act was extensively over the recruitment and forwarding of as isted amended by airt to of the Punjab Trade I manistrants to the Assam tea gardens as may be placed (Amandment). Act, 1943. The Sindustified and required by the interests of actual Act was amended in 1944. The Bombay actual potential emicrants, and, on the other as brought into effect from 15th November and, to ensure that no restrictions are imposed 1940. The Punjab Trade Luplove 3 Act came whichever not intitled. Particulated the content of the trade of the large and the latest and latest and the latest and latest an and the Conference decided that such legislation was nece ary. The Government of India drew up 1 Bill on the subject and this was passed by the Central Legislature with the title of the Weekly Holldays Act, 1942, early in that year The option for the application of this Act in any Province which has no Shops' Legislation rests with the Government of that Province

We shall first proceed to describe The Bombay Shops and I stiblishments Act in some detail and we shall then give a brief outline of the manner in which the Bongal, the Punjab and the Sind Acts differ from the Bombay prototype The Bomb iv Act deals with three main types of establishments shops, commercial establishments and restaurants, eating houses, theatres and other places of amusement or entertainment

Application of the Bombay Act -This Act covers commercial establishments, shops, theatres or any other places of public amusement or entertainment, restaurants or eating houses Government Offices and Offices of Local Author ities, clubs and residential hotels, or fairs for the sale of work for charitable or other purposes from which no profit is derived, hospitals, nursing homes and dispensaries, stalls and refreshment rooms at what we and docks, chemists' and druggists shops as are approved by the Provincial Government by a general or special order, and persons exclusively employed in the collection, delivery or conveyemployed in the collection, delivery or convey-ance of goods are excluded from the operation of the Act The Act does not apply to persons occurring positions of management or employed occupying positions of management or employed in a confidential capacity, persons whose work is inherently intermittent such as that of travellers converses and carefulars. travellers, canvassers, watchmen and caretakers, and persons evolusively engaged in preparatory or complementary work, such as clearing or forwarding clerks or messengers

Shops —Section 7 of the Act prescribes the maximum hours of work of persons employed in shops at 91 per day This is half an hour longer that 91 per day This is half an hour longer than 100 persons that 100 pers in shops at 91 per day This is half an hou longer than the ordinary factory day Every person employed in a shop is to be given at least person employed in a shop is to be given at least person employed in a shop is to be given at least and no one day in a week as a holiday with pay and no person can be employed for more than five continuous hours unless he has had an interval of rest for at least half an hour The Act makes

ried at 9 pm t any shop may a such shop during the qu rter immediat is follows g su h hour ser has been given to the Provincial Govern ment to grant exempti as in the case of certai types of shops such as chemists and druggists sh ps etc In o d however that compulsory closur may n t affect ad ersely the inte ests of shop keepers it is necessary to p ev nt street trading fite the shop losing hour and provision has the efore been made to pre ent my p rson from carryl g on the le of my goods it r 9 from carryl go that to or my goods it ry pm i radjacent to a tret o p bile pl ce This does not he ver apply to the sale of newspapers. The maximum pr d over has been fixed at 1 hours a d y but in o de to cov r the case of hops which deal in pe ishable goods and who e busi t pe fods are es ly in the morning nd late t ni ht provi ion h s b en made for the extension of the spread over to 14 hours pro ided s cl shops close for not less than three hours between the opening and the

closing time Comm all Establine to —4s far as these are oncerned there a d s h naw ek or are oncerned there a d s h naw ek or are oncerned there a d s h naw ek or are oncerned there a d s h naw ek or and the same applies to the varil us xchanges lere settlement d ys fir ng ic rise to shonormal working hours It was there to a conside ed that it would not be ad isable to fix the daily limit of hours in the case of such to his the daily nimit of hours in the case or score, establishments and the Act therefor p oyld s that the total number of hour that can be worked 1 any one in inthehold be restricted to S T ki g 6 as the numbe of w rking days in any o mouth this w rks out at an cays in any o month this w rks out at an av rag of 8 hours per day. No overtime i permitted in the ca of shop but in onner is establishments overtime to the e tent of 120 hours per y ar is p rmitted so as to en ble b nks and othe 1 ge stablishment to deal with the pressure of work lavole d in the p.e. paration ! b lance sheets sto k taking et The provision i r holidays is on the same ba is s in shops but the periods of wo k and intervise of rest of persons empl yed in commercial e tab lishm nts re so arranged that thy shall issum his re so arranged that it y shall not tog the people of er more than 12 hours in a day. or limiting the spread over es the other Acta do

is far as hours of vors are concerned, the combay Act places a daily limit in respect of tops and places of amusement, and a monthly mit in respect of commercial establishments n contradictinction to this, the Sind Act pre-ribes a maximum or 51 hours per week for ersons employed in commercial establishments, to Bengal Act 50 hours a vel for shops and the

ommercial establishment. The Ronal set oes not place any limitations on hours of ork—daily, weekly or monthly—in commercial establishments but places a maximum limit feen hours per day for work in shops and in laces of amusement. The Punjib Act propulses a maximum laces of amusement. The Punjib Act propulses a maximum laces of amusement. cribes a uniform ten hour day as them eximum

overed by it The Punjab Act endeavours to restrict dual mployment by providing that the hours worked 3 in individual employee with two or more mployers should all be taken into account for urposes of recording. Whereas payment for vertime beyond the permissible daily hours to be made at a time and a quarter in Bombay sengal and Sind, the Punjab Act requires yertime in excess of dails hours to be paid for

hat may be worked in any establishment

While the Bombay, Punjab and Sind Acts provide that all the employees covered by these being a Act goes much further and prescribes hat all employees should get one and a half province, in the Province of Bihar, in British holdays in each week. The Bengal and the Province, in the Province of Bihar, in British Baluchistan and in Ajmer Merwira during the year 1013.

The Sind and the Bombay Act have placed the duty of enforcement of these acts on the lets should get one hollday every week, the

t double rates

As far as employment of children is concerned he Bombay and the Sind Acts provide that 10 child below the age of twelve vears shall be employed in any establishment covered by the Act. The Bengal Act has no provisions with egard to the non-employment of children whereas the Punjab Act prescribes a minimum age limit of fourteen yars. The Punjab Act also prohibits the employment of any young person in any shop or commercial establishment to which the Act applies before 8 and or after 7 pm Hours of work are not to exceed seven per day or 42 per week and no young person is to be asked to work for more than 3.

hours at one stretch without an interval for rest Whereas the Bombay and the Sind Acts make no provision for the prompt payment of wages, the Bengal Act prescribes that all wages must be paid within ten days of the end of the period for which they are due and the Punjab Act prescribes a fortnight for this

inter months of November to Lebruary the 11 days privilegeleave with full pay after every osing hour is altered to 0 pm by Government twelve months continuous employment with otification. The Punjab is the only Profince which provides for opining hours— tight to accumulate up to 28 days and, in addition, casual leave on half pay for ten days in a Punjab Act, therefore makes no provided or or days for six months' continuous ar limiting the spread of the other total documents. employment

> I'do provisions which are to be found in the Punjab Act but not to the Bombay, Beneal and Simi Acta decervo special mention (1) no employer ma fine any employee to en extent greater than three pier in the rupee of his monthly wiges and (2) One month's notice or one month a pay in lieu of notice to be given by the employer for termination of service

The Central Weekly Holldays Act is a very simple measure as compared with the four Provincial prototy per which we have dealt with As its title implies it is morely confined rbore to miking providon for the crint of a weekly holidas in certain clesses of establishments I very shop must remain entirely closed on one dir of the necl. All persons employed otherwere then in a confidential capacity or in a no ition of marriement in my shop, restaurant or theatre must be allowed a holiday of one whole day in each week. Provincial Govern ments are empoyered, if they so desire, to close shops for an additional half day in the week or to permit employees in theatres and restaurants to enjoy an addition il half day holiday in ever-week. No deduction or abatement is to be made from wages in respect of any holidar that may be granted under this Act. No provision is made in the Central Act for employees in hanks and offices The Act contains the usual provisions for inspection, penalties, rule making power and enforcement. The Weekly Holidays

Local Authorities, whereas the Bengal and the Punjab Acts leave enforcement with the Provincial Governments. It has been estimated that the Bombay Act applies to slate to seventy thousand concerns in Bombay City alone. The Hombay Mulatically, the appended one Chief Bombay Municipality has appointed one Chief Inspector (G. R. Pradhan, Ph.D.) and five senior and eleven junior Inspectors for the inspection work in the Municipal limits of the City. The Government of India have published an excellent review on the parting of Shors. an excellent review on the working of Shops Legislation in India at pages 203 to 301 of the March 1945 issue of the Indian Labour Gazette

THE INDUSTRIAL STATISTICS ACT, 1942

The collection of statistics regarding wages, conditions of employment and other matters relating to industry in India had hitherto been effected through the goodwill and voluntary effort of the industrial units concerned. This method was not restrict the second through the second throu method was not considered satisfactory matter of fact the Government of Bombay had introduced a Bill for the Collection of Statistics in the local Legislative Council as early as in 1924 but that Bill was dropped owing to the strong opposition and a strong opposition of the strong opposition and the strong o The Bombay Act makes no provision for leave with pay all the three other Acts do Sind—15 days' leave with pay during every year of service to lapse if not availed of within two months at the end of the year, Bengal—lagainst the adoption of such a measure Practi

1st, he said, avoid strikes and lockouts at | Standing Labour Committee composed of the sts and we must handle all problems of industrial and development ithy and foresight

of the most important recommendations by the Royal Commission on Labour in in its report which was published in 1931 or the setting up of an Industrial Council dia on the lines of tripartite representation overnments, Employers and Employees s not possible for the Government of India e effect to this recommendation for many is but at the flurd Conference of Labour ers, Sir Firoz Khan Noon said that it was e consideration of the Conference whether ie future it would not be healthier to op the practice of having joint meetings plovers, workmen and representatives of nments. The Reports of the Proceedings three Conterences of Labour Ministers been published is Bulletins of Indian tries and Labour and copies are obtainable The Manager, Government Publications, Delhi

olishment of a Tripartite Conference

: Government of India give quick effect to roposal made by the Hon'ble Sir Firoz Noon at the Third Conference of Labour sers for greater collaboration between sers, workers and Governments and they ned a Plenary Conterence of all these sts to meet in New Delhi on 7th August to decide upon the following matters -

The desir ibility of establishing a Labour rence as a permanent organization to meet st once a year.

The desirability of instituting a Standing ory Committee of this Conference which I meet whenever Government thought it sary to invite them to meet and to advise inment on matters placed before it, and

Defining in general terms the procedure ie constitution of these bodies

e Conference decided that a collaborative inery composed of the representitives of rnments, employers and workers in India d be established forthwith for the consideraof all questions relating to the conditions of r and resolved that the constitution of the ry Conference should be as follows man—The Hon'ble the Labour Member of fovernment of India, Members—(1) Three sentatives of the Government of India ding one representative to represent Minor inistrations, (2) Eleven representatives of inces, (3) Six representatives of industrilly rtant States, (4) Two representatives of the iber of Princes to represent other States, Eleven representatives of employers to be nated by Government, four each in agree with the Employers Federation of India the All India Organization of Industrial loyers respectively and the remaining three oyees interests. It also decided that a details of the scheme here

following members should be constituted (1) Two representatives of the Government of India of whom one—the Hon'ble the Labour Member—would be the Chairman, (2) One re presentative each of the Governments of Bengal, Bomb is and the United Provinces to be selected by the Governments of these Provinces, (3) Three representatives of the remaining Provinces, one each to represent (a) Madris and the Central Provinces and Berar, (b) Assam, Bihar and Orissa and (c) Punjab, Sind and the North West I rontier Provinces to be selected by agree ment between the Governments of these Pro vinces preferably by a system of rotation, (4) Three representatives of Indian States including one representing the Chamber of Princes, and (5) Tive representatives each of Employers and Employees, four from each group being nominated by the Government of India in agree ment with the two leading All-India Associations of Limployers and the two main Associations of Employees, the fifth Member in each group being nominated by the Hon'ble The Labour Member The second and the third sessions of the Tripar tite Labour Conference were held at new Delhi on the 6th and 7th September, 1943 and on the 27th and 28th October, 1944, respectively

The main function of the Standing Labour Committee is to consider and examine such questions as might be referred to it by the Plenary Conference or by the Central Govern ment tiking also into account suggestions made by Provincial Governments, States, the Chamber ot Princes and representative organizations of Employers and Workers The Committee 18 competent to report to the Plenary Conference on matters referred to it by that body and to advise the Central Government on matters referred to it by the Government of India The Plenary Conference also acts in an advisory capacity Whereas the Plenary Conference is to meet at least once in every year, the Standing Labour Committee is to meet as often as it might be convened by the Central Government for the consideration of questions that may be before it By the time we went to Press for this issue (July 1945) six meetings of the Standing Labour Committee were held—four at New Delhi on the 30th November and 1st December 1942, on the 25th January, 1943, on the 27th June, 1944 and on the 17th March, 1945, respectively, one of Rombey on the 7th and respectively, one at Bombry, on the 7th and 8th May, 1943 and another at Lucknow on the 25th and 26th January, 1944

The agenda and proceedings of the Standard Tabour Com and proceedings of the Standing Labour Com mittee have covered a wide range of subjects which want of space prevents us from dealing with here Mention may, however, be made that the only item discussed at the 6th meeting of the Standing Labour Committee was the note prepared by Messrs M Stack and R Rao of the International Labour Office on Professor Adarkar's Report on Health Insurance for Industrial Workers in India This note has been published at pages 329 to 339 of the April 1945 issue of the Indian Labour Cazette The note recommends the adoption of one comprehensive scheme of sickness and workmens present other classes of employers, and (6) 1945 Issue of the Indian Labour Cazette The en representatives of employees to be nated by Government, four each in agree with the All-India Trade Union Congress compensation insurance and maternity benefits to the Indian Labour Cazette The energy of the Indian Labour Cazette The Indian Labour Cazette The Indian Labour Cazette The Indian Labour Cazette The Indian Labour Cazette The Indian Labour Cazette The Indian Labour Cazette The Indian Labour Cazette The Indian Labour Cazet the Indian Federation of Labour respectively for workers in all perennial factories in India the remaining three to represent other Want of space prevents us from giving full

n industries must vary widely They do. nly as between industry and industry but is between centre and centre, and unit and in the same centre in any one industry only reliable and satisfactory data in action with wage rates and earnings of trial workers in India are those contained ie reports of enquiries conducted by the ur Office of the Government of Bombay the Province of Bombay The Governof India made an attempt to institute a al wage census in India in 1921-but the sitv for retrenchment at the time led to abandonment of the project and to day or no definite information regarding of wages is available for any province de the Province of Bombay Such inforon as there is relates to agricultural labour s contained in a series of reports of quin mal censuses conducted in certain provinces agricultural wages and in the reports of its of Inquiry appointed under the Indian c Disputes Act or in the reports of Proal Committees appointed by certain Pro al Governments to enquire into wages and itions of employment of workers in the in textile industry. Some of the annual Some of the annual ry administration reports published by rovincial Governments in India used to conremarks about prevalent wagerates but these ed only to certain units and they could by teans be considered as being the dominant at any one time for any particular industry trea The annual Mines' administration ts also contained figures for daily earnings ertain main occupations in representative s in the Provinces in which mines are situa out these were also open to the same object

lack of accurate and reliable stins of wages in India has been adversely nented upon and regretted by almost perennial factories in Corumi sion and Committee appointed cotton mill operatives c country since the beginning of the century notable by the Royal Commission on Indian our whose work was considerably hampered

yould be of interest to observe that certain | India in connexion with the devising of schemes of Social Security are engaged in collecting country wide data regarding wages and earnings in all industries

> The blame for the lack of information about wages in India cannot lie entirely at the doors of the Central and Provincial Governments The collection of satisfactory wage statistics is always an exceedingly difficult matter and more particularly so in India where conditions vary so markedly and widely Moreover, as will be seen from the observations which follow under the heading of "Pay Periods" there are wide variations in the periods and methods of wage payment The situation is further complicated by the fact that the nomenclature adopted for de signating occupations also varies widely between district and district and concern and concern in the same district owing to the use of a host of vernacular and arbitrary terms and of nick-Even in concerns which use standard English occupational terms, the position is rendered more difficult owing to the existence of the gradings which have been referred to above. The necessary preliminaries to the contract of t duct of any satisfactory enquiry into wages in India, therefore, must be (1) the establishment of a uniformity of method, (2) the standardisation of occupational terms (as pointed out above, this is now being attempted) and (3) the thorough education and instruction of the clerical staffs of the units to be covered in the proper use of the standardised designations and in the accurate The existence filling up of the required returns of wide variations in rates and conditions, moreover, makes it advisable to cover as many as possible if not all the units in the industry under survey in order that results which are not biassed one way or the other may be secured In view of what has been stated it is obvious that no Government in India can undertake a comprehensive enquiry into industrial wages unless it has at its disposal an adequate and thoroughly trained and experienced staff for the purpose

Since its establishment in 1921, the Labour Office of the Government of Bombay has con ducted five enquiries in the years 1921, 1923, 1926 1933 and 1937 into the wages of cotton textile mill workers in the Province of Bombay an enquiry into agricultural wages covering a period of twenty-three years from 1900 to 1922, an enquiry into the wages of peons in Govern ment and commercial offices in 1922, enquiries into the wages of all municipal employees in the Province of the Commercial complexes in the Province in 1924, of clerical employers in Railway and Commercial offices in Bombay City in 1925, of printing press workers in Bombay City in 1929, of workers employed in the building trade in Bombay City in 1935, and of all em ployees in the retail trade in various important towns in the Province in the same year 1934 the Labour Office conducted a general wage census covering all workers in all working perennial factories in the Province including cotton mill operatives The second part of this census covering seasonal factories was conducted The results of the in the winter of 1935 36 The results of the special enquiry which that Office conducted into on on the subject. The Labour Investigation for the Bombas Textile Labour Inquiry Com-Committee appointed by the Government of mittee have been published in the Committee's

PAY PERIODS.

There is a complete absence of uniformity as regards the periods for which payments of wages are made in the various branches of Industry in India In scarcely any industry is there a single period of payment. Different systems are found in establishments belonging to the same industry and in the same district, and within the same establishment different classes of workers are often paid for different pay periods If generalisations may be attempted, the jute industry in Bengal, coal mines, tea plantations, seasonal factories, oil milis, rice and flour mills and certain classes and groups of workers in Government establishments such as the Security Printing Press at Nasik pay wages for periods of Payments on a fortnightly basis range between payments for haplas or wage periods of and two looms fourteen and sixteen days for weavers and spinners respectively in the cotton mills in Ahme dabad to bimonthly payments for periods from the 1st to the 15th and from the 16th to the end of the mouth in textile mills in Broach and various other centres in India The month is the accepted wage period for the railways (includ ing railway workshops), cotton textile mills in Bombay, Sholapur and several other centres, engineering workshops, dockvards, printing presses and for the persons employed in the mechanical and maintenance departments of almost all concerns which pay wages to process operatives weekly or fortnightly. Wages are calculated on both the monthly and the fort Wages are nightly bases in sugar mills and tanneries In the Tata Iron and Steel Works at Tatanagar where over 50,000 workers are employed wages are paid weekly to men on daily rates The and monthly to those on monthly rates most general system of payment in the case of casual labour is that of daily payment Super-visory and clerical staffs in all industrial estab lishments are paid on a monthly basis

The question of shortening the wage period universally in India by law to a week or a fortnight has been considered by the Government of India, in consultation with the Provincial Govern ments and interested persons and bodies, on three different occasions within the last twenty Attempts were also made to amend the Payment of Wnges Act in such a way as to achieve this object. The proposals, however, fell through owing mainly to the opposition of the monthly paid, workmen who appeared to prefer the system of monthly to fortnightly or neekly payments Their argument was that if rents and bills were to be settled monthly they would be in difficulties if they had frittered away their weekly earnings

HOURS OF WORK.

The existing restrictions in hours of work in factories and mines subject to the Indian Tactories and Mines Acta have been described in the sections dealing with those Acts Speak limited to 10 per day and 54 per week and in seasonal factories to 11 per day and 60 per week The veckly hours of work in Indian mines vary widely and ringe from 38 to 51 hours per week. The cotton textile industry in almost all centres normally works a uniform 9 hour day except in a few concerns which work a 97 or 10 hour day from Mondays to Fridays and a 54 hour or 4 hour day on Saturdays A recent develop ment in the cotton textile industry is to work shifts on the basis of what is known as The Relay By this system a unit does not stop work during the noon recess and continues working throughout a whole shift, different batches of workers being given rest intervals by turns and the remainder being asked to do double substitute work for the time being Messrs E D Sassoon & Co, Ltd, in certain of their cotton mills in Bombay City, have been working three shifts of seven hours each for the last seven or eight years, but conditions in these mills are highly rationalised that is to say, more machines are allotted to each worker siders being asked to mind two sides and weavers normal of one side six looms as against the As far as the Jute Mill industry is concerned, the Indian Jute Mills Association entered into an agreement intended to protect and defend the trade of the Indian Jute Mills which came into force on the 15th March 1939 for a period of five years in the first instance and which was renewed in the year 1944. The hours of work were to be ordinarily limited to forth first were to be ordinarily limited. If 75 per cent of the to forty-five per week signatories voted for reduction, the hours of work might be reduced to a minimum limit of 40 hours per week and if 51 per cent of the signatories voted for an increase the hours might be raised to a maximum limit of 54 which might be exceeded only under extraordinary circumstances such as a cycle of prosperity or war Under these conditions mills with 270 looms were entitled Under these to work up to 72 hours per week If one unit in a "group of mills," ie, under the same management, did not work the full complement If one unit of hours allowable, it was permitted to transfer the unutilised number of hours of work to the other unit under the same management Throughout the year 1944, jute mills have been permitted to work 54 or 72 hours per week according to their loomage strength as is provided for in the principal working Time Agreement Coal has, however, governed the actual ability to work these hours and the supply of coal was particularly poor during the latter half of the year, affecting single shift steam driven mills much more than others

All the dockyards, many of the larger engineering and almost all the railway workshops work a 48 hour week but the daily hours vary according to the conditions. cording to the number of hours worked on a short The hours in many of the mechanic Saturday shops of textile mills and in the larger non engi neering factories are usually half an hour to an hour less than those for process workers and ap proximate more closely to those in large engineeting plants. Factories engaged in the pro- [Governor ise et al manual and a designation of metalware however work in full the limitation of hour of work and of gr ut declared and the state of the state of a periodical rest to certain classe of railway act salaw of all and sugar mills. Almost all ser not lunder then we powers the Railway season lactories work a uniform 10 hour d y is runts. Hours of Lunployment Rules 1931 for all the days in the week except on the come were promulated and put into effect. RECRUITMENT

of a recruiting agent, a Sardar, a Mulladam or a jobber As a result, however, of the recom (Oon), who has had a large experience of mendations made on the subject by various Committees—notably the Royal Commission to fill it on Indian Labour and the Bombay Textile Labour Inquiry Committee which have con demned this method of recruitment owing to the abuses which have come to be associated with it—many of the larger and more progressive concerns have appointed Labour Officers who are directly responsible for all new recruitment The old method is, however, still largely prevalent in the majority of the industrial concerns in the for the last fifteen years Early in 1926, the country

There are various forms in which a recruiting agent is remunerated. He may be a salaried employee with a commission for every recruit he brings in, or he may receive a lump sum payment for each recruit or a gang of recruits, or he may be paid a recurring sum for each man he places in employment as long as that man continues in employment Whatever be the method by which an employer remunerates the recruiting agent, it is fairly well known that the agent keeps a continuous hold and grip on the recruit he places in employment and extracts from him recurring sums of money whilst he continues in that employment under pain of his losing his 10b

The evils in connection with recruitment were most marked in the case of casual or substitute labour The Millowners Association, Bombay, have tackled the problem by establishing what is known as the "Badh Control System" The daily number of absentees in a cotton mill in Bombav are averaged and an additional per centage is added Each mill issues badle or substitute cards to this number of workers Daily casual vacancies are filled only from such card holders and whenever there is a permanent vacancy it is filled from these card holders The evil influence of the jobber is thus eliminated The system has been highly commended by the Textile Labour Inquiry Committee and the Textile Labour Inquiry Committee and the Government of Bombay have recommended its adoption by all mills in the other centres of the cotton textile industry of the Province

No reference to the appointment of Labour Officers in industrial concerns in India would be complete without mentioning the lead given in this matter by the Millowners Association, Bombry, and the excellent work done by its own Labour Officer, Mr R G Gokhale The Association, through Mr Gokhale, conducts special classes for the training of Mill Labour Officers and actively supervises and controls the work done by all such Officers where they have been appointed through the Association Following the example of the Millowners' Association, Bombay, the University of Calcutta, in co operation with the Indian Jute Mills Association, has recently inaugurated a special course of social work for giving suitable training to labour welfare officers engaged in jute mills The course covers both theoretical training and intensive practical work in the field, ie, the jute mills themselves. The Indore Christian College has also recently started a course for the training of Labour Officers

appointed a large number of Labour Officers, concerned are working

workshops, was effected through the medium in 1914 and they have been successful in pro

MEASURES FOR ENFORCING DISCIPLINE.

The measures adopted by industrial em ployers in India for enforcing discipline have engaged the carnest attention of both the Central and the Provincial Governments in this country Government of India instituted a country wide inquiry into the extent of the deductions made by employers from the wages of their workpeople in respect of fines and other matters subject was partly examined by the Bombay Strike Enquiry Committee (Fawcett Committee) in 1928 29 and again more fully by the Royal Commission on Indian Labour in 1929 30 and both these bodies made a series of most important The Payment recommendations in the matter of Wages Act was passed in 1936 in order to implement these recommendations

The two matters with regard to the discipline of their workmen which Indian industrial em ployers complain of most are the large extent labour turnover and the high degree high labour That both absenteeism turnover and high absenteelsm are to found in several Indian industries cannot be denied, but, few, if any, employers have taken the trouble to examine the root causes for them The investigations conducted by the Labour Office of the Government of Bombay go to show that both labour turnover and absenteeism are highest in concerns and industries in which wages are lowest and where conditions of employment are least attractive and that they are lowest in concerns and industries in which wages are comparatively high and where other conditions of For example, the employment are attractive Bombay Labour Office compiles monthly figures of percentage absenteelsm in cotton textile mills in Bombay, Ahmedabad and Sholapur Textile wages are highest in Ahmedabad and lowest in Sholapur The annual averages of percentage absenteeism in these three centres for the year 1944 were Ahmedabad 5 70, Bombay 11 35, and Sholapur 15 34-figures which tell their own story Low wages and adverse conditions must necessarily tend to weak health, incapacity for sustained effort and to the growth of a desire for change in order to improve one's These are problems which the new autono mous provinces in India and Indian industrial employers will have to try and remedy instead of devising methods of enforcing good attendance and continuity of employment by the infliction of monetary penalties and other forms of punishment

Under the Payment of Wages Act, every employer is required to draw up lists specifying the acts or omissions for which fines will be inflicted. These lists have to be approved training of Labour Officers

by most municipalities is the Tata electricity generating and iting plants, the Bombay Electric Supply amways Company, Ltd , and the Burma orporation, to mention only a few of many, contributory schemes for the benefit of jority of their workmen Several others chemes for their supervisory and clerical shments but not for their workmen The isual amount of deduction from pay is eifth of the monthly pay but the amount uted by employers varies from 50 per 100 per cent of the amount put in by The rate of interest may be fixed may fluctuate with the rate at which ment or the employer borrows money vident fund rules make provision for loans cribers from the balances standing at the of their accounts in respect of their own ptions, and for the compulsory repayment Subscribers are entitled to se loans w their own subscriptions at any time on ent or on relinquishing their posts but the it of that share of a contributory pro fund account which represents the em subscriptions depends on the putting in fied periods of qualifying service-periods how considerable variation

Government of India have drawn up f Model Rules for Provident Funds for ial employees in India These Rules onsidered at the Fourth Meeting of the ig Labour Committee of the Tripartite nce held at Lucknow in January, 1944 ntral Government hope to release these Rules for publication in the near future

Sharing -Profit sharing had so far nknown in India but some go ahead s are adopting this in their plants ta Iron and Steel Company has adopted ie which provides that when the amount the shareholders as dividend exceeds ore during a financial year, every employee d been in the continuous employ of the ly throughout the year is to receive a ore paid as dividend

erative Societies —The co operative move erv fair percentage of concerns employing more workers have co operative credit for their employees Almost all railway in India have co operative banks and banks in addition to credit societies l information on the whole subject is le in the different annual administration of Registrars of Co operative Societies various provinces

Grain and Cloth Shops -Employers' nd cloth shops were very common in uring the period of the first world war, the the subsequent fall in prices, the y of these shops disappeared Truck on in England was primarily aimed at and for employers to repo ers' shops (known as "Tommy Shops') frequently than in the past

for permanent workmen in the factories. Payment of Wages Act, 1936, prohibits employe Most of the from making deductions from wages or fro public utility companies and corporations receiving payments from their employers i purchases from employers' shops Most Pi vincial Governments in India had, however notified cheap grain and cloth shops as "ame ities" in respect of purchases from which en ployers may make deductions from wages all such cases both the qualities of the articl sold in such shops and the prices charged them are controlled by a 'prescribed authority who is generally the Chief Inspector of Factoric As a result of the outbreak of the Second Wor War, all Provincial Governments in Ind have not only notified cheap grain at cloth shops as "amenities" for the purposes the Payment of Wages Act but have open such shops of their own and have also encourage employers to do likewise The articles sold ! these shops are bought at wholesale prices ar are sold without any profit except for a sma addition to cover working expenses of the shop The only statistics available with regard to grain shops established by employers in India for th benefit of their employees are those containe in the excellent Annual Reviews published b The Millowners' Association, Bombay, of th Labour Situation in the Bombay Cotton Mi Industry With the introduction of Ration ing of certain food grains in Bombay i May, 1943 and with the extension of rationin to other cities and areas in India, arrangement have been made between Government Ration ing Departments and large employers of labou for the establishment of Government controller grain shops in hundreds of industrial plants ii Sales from these shops are largely the country on credit, recoveries being effected from pry Today (July, 1945) it may be safely asserted that almost every large employer and labour employing organization in India has provided a cheap grain shop for its workers

Loans and Advances — Speaking generally most industrial concerns in India do not grant loans to their workers except during periods of an acute shortage of labour when recruiting agents are empowered to liquidate debts in order to attract the required workers to join industry But, all workers who subscribe to provident fund onth's pay, plus an additional half a But, all workers who subscribe to provident that pay for every 25 lakhs in excess of schemes in such concerns as have them or who are members of co operative credit societies can secure loans on easy terms both as to interest and to repayment A few concerns, however, ts made very rapid progress in industrial have set apart special funds for the purpose hments all over India during recent years, Advances—applying the term to the small representation of the small representation of the small representation of the small representation of the small representation of the small representation of the small representation of the small representation of the small representation of the purpose have set apart special funds for the purpose ha sums of money advanced against earned wageson the other hand, are more widely prevalent The Payment of Wages Act empowers Provincial Governments to frame rules for the regulation of these advances but no interest on such advances is now permitted

INDUSTRIAL SAFETY.

As in other countries, the industrial progress of India has been accompanied by an alarming increase in the number of industrial accidents The explanation generally offered for the increase is that the Workmen's Compensation Act is operating as an inducement both for workpeople and for employers to report accidents more frequently than in the past But, the increase e at which was compulsory and where in the number of serious accidents suggests that cally high prices were charged. The the problem is a more serious one, and, that in

spite of the statutory requirement will factory namely if tall crious (if a diffense which and unless owners and farmatense god in the loading i prevent a person returning to work for 1 d ya and unloading i fahiphan is comply within the or more) at 1 minor are to be reper to 1 to the matter of the 1 d ya of danger unner methery or in prector of sert is a not one to the tent of the state of the 1 d ya of the state of the 1 d ya of the state of nd the o gani tion of speci l lantern lectures instein lectures and the organi to not specify a fety first committees in the line with any the property of the Millowners Association Bombay has done a condictable amount of good with first ending than at the connection with S fty First in conjuction with the line property of the Billian will be sufficient to the sum of the second conjuction with the line sufficient suffination sufficient sufficient sufficient sufficient sufficient suf As oriation it h a posted attracti safety first As ordation it h s posted attract safety fursy posters i ii ctton mill in Bombay City. lng, or where it is necessary for special reasons in hand. The company grants long to provide quarters for certain classes of terms to its employees for building he staff near to their work. These principles leased to them. In 1923, the En appear to be generally followed by private companies and concerns as well especially by coal mine owners in Bihar and Oris, a supercase growers and by teap planters in term. All the growers and by teap planters in term. All the collectes in the Pharia coalfield are amply and the specialty such a collecte where each worker companies. efficiently equipped with approved types of rent a cottage for himself. Two si houses whose design, construction, ventilation each measuring 33 \squares 36' and 53' \rangle 45' and general amenities are controlled by the and not more than one third of Tharia Mines Board of Hestin Livery house in allowed to be built upon. Two types the controlled by the the collicids has to be licersed and licenses are not granted unless the standards are complied with If I thourers are found in occupation of unlicensed houses the management is liable to unlicensed houses the management is liable to prosecution. In Assam, all residential employees on tea estates are provided with rent free quarters in barracks or 'lines' as they are the unit of the houses are provided on the larger plots. Its on all the houses are provided own flushed lattings and vater type quarters. These are regularly inspected by the Mills have been sold to the work. Those are regularly inspected by the Mills have been sold to the work criled district and sub-divisional officers and every the coat by easy instalments covers endeavour is made to maintain as high a degree of 5 to 7 years while some have been of sanitation as is possible. Almost all sugar them. Many houses have been by of sanitation as is possible. Almost all sugar them. Henry houses have been by factories provide housing for their employers workers themselves on plots of land because the factories are located near large to them with moneys advanced to the sugarcane plantations. Large slum clearance terms. A large number of houses programmes have been drawn up by Municipulities and Improvement Trusts in almost all in the middle of the Settlement the larger towns and cities in India and much has been provided with good roads, a useful work has been done in the last called and playgrounds which are equ years by acquisition and demolition

The pioneer work in the field of industrial housing has been done by the railways which have spent nearly 50 crores of rupees to date in providing adequate residential quarters for different classes of their employees, and by the Government of Bombay who have built 207 chawls with nearly 17,000 tenements for industrial labour in Bombay City The latter is a part of a gigantic scheme launched in 1920 by the late Lord Lloyd, then Governor of Bombay, for the construction of 625 chawle having 50,000 tenements in all The rents of the tenements in these chawls vary from Rs 5 The chawls are situated at to Rs 8 per month Naigaum, Worh, Sewrl and at DeLisle Road The Municipalities of Calcutta, Romba, Cawnpore, Madras and Karachi, the Calcutta and Bombay Port Trusts and the Improvement Trust in Bombay have done much to house their own labour and also to supply low rented tenements for other classes of industrial workers Perhaps the most magnificent schemes of industrial housing conceived in India by private employers are those launched by the Tata Iron and Steel Company Ltd at Jamshedpur and by the Empress Mills under the agency of Messrs Tata Sons Limited at Nagpur The Tita Iron Tata Sons Limited at Nagpur The Tita Iron and Steel Company has laid out the town of Jamshedpur on Garden City lines, and had, up to June, 1945 constructed 8,428 houses of up to Tune, 1945 constructed 8,428 houses of different types for its employees, and his now a which sources are normally polluted further extensive programme of housing conditions created by the war are removed. The Litines are seldom provided, and plans provide for the building of 5,000 quarters during the next five years. The capital cost of town buildings put up by the Company up to 31st March 1945 was about Rs 143 lakhs. The Company has furnished all quarters carrying a rent of Rs 15 a month and above with electric lights and fans and the work to take powers to control such labout electrification of the lowest rented quarters is and sanitation in areas outside mui

own gardens and a big garden has bee swings, shoots, etc., for children the jute mills in Bengal and cotte Bombay City and other centres has housing for fair percentages of staffs but the majority of textile India are not housed by their emp

It is of interest to observe that t ment of India, following the recon made by the Royal Commission on In in the matter, amended the Land Act in such a way as to enable owner trial concerns to require land for the workers' dwellings

Lpidemics of cholera which invari large numbers of deaths have been originate in congregations of labourer in canal areas in connection with th Lahourers etc, of sugar cane ditions in these areas including the sugar factories are incompatible w sugar inctories are incompatible we sanitation. The temporary huts oft of brush wood, thatch or bambo without any plinth, and with no wother means of ventilation except opening which serves as a door' huts no person can stand uprig no adequate provision is made for drinking water. Too frequently, it is from the negress, pulls or irrigation. from the nearest nulla or irrigation or stagnant pool of percolation wat which sources are normally polluted and animal excreta and by man

INDUSTRIAL HEALTH

Such statistics of health and mortality as are collected and published in India relate to the whole community and no statistics are compiled separately for industrial workers alone. In the absence of such data it is not possible to generalise about these matters The problems associated with health are always difficult, they are much more so in a country like India where the solution of the problems associated with physical health and social environment is complicated by the evils of ignorance and poverty to which is commonly added a fatalistic outlook arising, it may be, from the low standard of living which has been the experience of so many generations past Climatic conditions, highly insanitary housing conditions and the illiteracy of the people also contribute to re curring outbreaks of such deadly tropical diseases as cholera and small-pox in epidemic The wide spread prevalence of malaria in certain congested areas of the Provinces of Bengal, Bombay and Vadras is responsible for a considerable undermining of the health and the vitality of the poorer classes who cannot afford to sleep under mosquito nets, and although the more advanced municipalities are doing all they can to combat the disease by filling up wells and surface-treating small ponds and pools of stagment water, mularia still continues to take a big toll of human life Bern bern and tuberculosis in Bihar and Orissa, hala azar among the jute workers in Bengal, ank vlostomiasis in South India and tuberculosis in the Punjab are some of the many diseases which are widely prevalent in certain tracts,

The muintenance of the good health of town and city populations is in the hands of the municipalities and although all provincial Governments appoint health officers for groups of districts to supervise and co ordinate the work of the municipalities, the interference and control of Governments in these matters is of a somewhat nominal character But wherever control is possible, Government have done much to make for an improvement in sanitary and hygienic conditions For example, following the recommendations of the Royal Commission on Indian Labour in the matter, several provisions for the maintenance of the good health of factory workers have been incorporated in the Indian Factories Act, 1934 These include the muntenance of cleanliness in accordance with rules to be framed by local Governments with regard to lime or colour washing, painting, deodorising and disinfecting, the provision of proper standards of ventilation and the adoption of adequate measures to prevent the inhalation of gas, dust and other impurities generated in the course of work, the installation of apparatus for cooling the air in factories in which the humidity of the air is artificially increased,

the standards of cubic feet of space to be provided for each worker, the provision of suitable and sufficient lighting, the provision of adequate supplies and sources of water both for drinking and for washing, and for the muntenance of sufficient latrine accommodation separately for male and female workers Remarkable progress has been recorded during the last five years with regard to the installation of air conditioning and cooling plants progress in this direction hitherto confined mostly to spinning weaving sheds but since 1939 ex and weaving pansions have been made in other departments as well by installing large hoods and trunks harnessed to powerful exhaust fans, to enable the steam to be drawn away from sizing cylinders Attempts are also being made to reduce dirt to a minimum and many cotton mills have installed special plants to carry the dust away

As in most things connected with the welfare of labour, Indian railways are in the forefront in the matter of the provision made for medical aid and relief All railways maintain fully equipped hospitals with qualified surgeons, physicians and nursing staffs at suitable centres in addition to fully equipped dispensaries in charge of qualified medical officers at all places where there are sufficient numbers of workers to As all the industrial workers of justify them Government have free access to Government hospitals and dispensaries, the provision of separate medical establishments attached to large Government establishments has not been considered necessary in the case of concerns under the control of the Provincial Governments but the Government of India have provided adequate medical facilities in most of their own establish ments such as His Majesty's Indian Naval Dockyard and their various Ordnance and Several of the larger Ammunition Fictories municipalities and public bodies such as the Port Trusts also maintain their own hospitals and dis pensaries for the benefit of their workers Following the lead of Government and public and local bodies in the matter, almost all the large labour employing establishments in India-cotton and jute mills, mines, engineering work shops, ter plantations, etc —muntain fulls equipped dispensaries in charge of whole or partiame qualified medical officers. The Tata Iron and Steel Company conducts a large hospital with special surgical, maternity and syngrological parts in addition to su denon gynecological wards in addition to six dispen saries and two first aid stations at Jam-hedpur both for its own employees and for the public All employees of the Company and their families receive free treatment

Now that Germany has been totally defeated and victory for Great Britain and her Allies in the Second World War seems certain all the Allied countries for the last year or two, have been giving considerable thought and attention to all kinds of schemes of post war reconstruction Various Commissions and Com mittees to deal with different sets of problems have been appointed. Indit has not larged behind. A drive to improve health could tions must necessarily be in the forefront of the programme districted. any programme directed towards improving the stindard of living in the port war period If dissipation of financial resources and ad the prohibition of overcrowding by laying down ministrative effort is to be avoided, plans for

and experienced Welfare Officers specially to other Governments, employers and welfa trained for the job All this is, however, but a drop in the ocean and the vast majority of employers in India have no welfare schemes of any kind at all It is obviously not possible for us to give even the briefest outline of the different schemes that are in existence in India within the compass of a work such as this

Welfare work for labour employed in Indian industries has, since the advent of Provincial Autonomy, been taken over by Government Proneering work in this direction was done by that great and zealous friend of Indian Labour-Mr Gulzari Lai Nanda, since 1921 the Secretary of the Textile Labour Association, Ahmedabad and Parliamentary Secretary for Labour to the Prime Minister in the Congress Ministry in the Province of Bombay He knew that employers as a whole were doing little or nothing for the welfare of labour and that no amount of persursion would yield, tangible results knew that legislation to enforce welfare measures would not create that personal enthusiasm which is so vital for the success of any welfare scheme that might be launched. He persuaded his Cabinet to set aside a sum of Rs. 1,20,000 in the budget estimates for the year 1938 39 for industrial welfare and he then started looking for a benevolent person or persons who would donate the necessary buildings and he purpose He found such a Ramnath Podar, Managing eguipment for the purpose \mathbf{Mr} person in Director of the Toyo Podar Mill in Bombay who contributed a sum of Rs 15,000 for the building of a recreation centre at DeLisle Road in Bombay The lead given in the matter by Bombay has been successively taken up by the Governments of the United Provinces, Bengal, Sind, the Central Provinces and Berar and Bihar Central Government too have recognised the value of Governmental effort in the field of Labour Welfare and in May 1942 they appointed R S Nimbkar, the prominent Labour Leader of Bombay who for many years was the Secretary of the Girni Kamgar Union (Red Flag), Bombay, as Central Adviser on Labour Welfare to the Government of India Assistant Labour Welfare Advisers have also been appointed by the Government of India in different Provinces Acting under the advice of Mr Nimbhar, the Government of India have launched wide schemes of Labour Welfare in all Government Ordnance, Ammunition and War factories and these schemes have been placed in charge of expert Welfare Officers

The total sum provided by the Government of Bombay for Industrial Welfare" in the Budget Estimates for the current financial year (1945 46) amounts to nearly two and a half lakhs of rupees The other Provincial Govern ments who have gone in for this type of work are not spending as much but still their activities In this direction are showing a tangible widen ing year by year. For example the funds allotted by the Government of the United Provinces for its Labour Welfare Scheme for the year. 1945 46 amount to Rs 1,57,600 It is not neces sary for the purposes of this note to give an account of the manner in which Government activities in this direction have grown during We are however, giving a fairly recent vearfull account of the scheme as it stands in the Pro-

workers who might like to know as to what being and what can be done in this field

Government Welfare Centres in the Province Bombay are divided into four types "A "B", "C" and "D" according to the ty and the extent of the activities provided and t times at which they are open The scope of t times at which they are open. The scope of t work in the "A" type centres is of a ve comprehensive character and covers almost : forms of outdoor and indoor recreational activ ties, periodic cinema and dramatic performanc and bhajan parties, the running of library and reading rooms, the organization of debate magic lanterns and other lectures and mai types of educational classes, the provision nursery schools, medical aid and advice maternity and health, radios and add a gran etc These centres are open from 8 30 11 in the mornings and from 5 to 9-30 in the evenings for men and boys and from 1-to 5 the afternoons for women and girls but the afternoons for women and girls but the nursery school section supervised by a full tin lady teacher is open at each "A" type cent from 9 30 a m to 5 p m - The "C" type cent are open from 7-30 to 10 30 a m and from 6 p m for mon and has and liferage, and seven 9 p m for men and boys and literacy and sewn classes and indoor games for women are co-ducted from 1 to 4 pm. Boys under 16 year of age are debarred from attending at any of the centres after 7 pm The activities in the "C type centres minly and reading rooms only cover outdoor recreation. The Muncipality of Bombay City at the disposal of Government for this purpose. ment for this purpose -

An "A" type centre was erected at DeLis Road out of the contribution of Rs 15,000 give to Government by Mr Ramnath Podar and th started functioning in March 1939 Twandational full fledged "A" type centres were started at Worli and Naigam with effect from 1st June 1940 At the moment of writin (June 1945) there are three "A" type centres Bombay and one in Ahmedabad One is in the process of completion at Shelanur. There are process of completion at Sholpur There are eight "C' type centres in Bombay, four a Ahmedabad, five at Sholpur and one at Hub and there are four "D" type centres in Bombay. Plans for Post War Planning and Reconstruction in the Province of Bombay provide for 3" B type and 6 more" C" type centres for Bombay one additional "A" type and six more "by you centres for Bombay one additional "A" type and six more "by you centres for Almodalus and six more "by you centres" for Almodalus and six more "by you centres" for Almodalus and six more "by you centres" for Almodalus and six more "by you centres" for Almodalus and six more "by your centres" for Almodalus and six more "by your centres" for Almodalus and six more "by your centres" for Almodalus and six more "by your centres" for Almodalus and six more "by your centres" for almost your centres of the six more "by your centres" for almost your centres of the six more "by your centres" for almost your centres of the six more "by your centres" for almost your centres of the six more "by your centres" for almost your centres for almos type centres for Ahmedabid one additiona 'A'' type and 3 more 'C' type centres for Sholapur and the establishment of one "B' Sholapur and the establishment of one "B' Rreach type centre each at Viramgaum, Broach Surat, Julguon, Nadiad, Amulner, Dhulin Barsi and Hubli

The Industrial Welfare Scheme of the Govern ment of Bombay also covers an Industria Training Workshop at Ahmedabad which wa established to impart instruction in elementar, engineering work to apprentices. The primar, engineering work to apprentices aim of the workshop is to afford help in solving the problem of industrial unemployment. It is also intended to raise the standard of si ill and efficiency of operatives in the cotton textilindustry. A sum of Rs 65,000 was carmarked in the budget estimates for the year 1941 4: from the Development Fund for the nurchase of Vince of Bombay today for purposes of guidance from the Development Fund for the purchase of

machinery for the workshop at Abmedal ad for construction latter til na in the existing. A st A typ centres and for starting circulatin lit rarie Storeys have been put up at the three at type cuttes in Bombay and these have so teen spilled with water taps and show r bat's Circui tin libraric have be n established in Bombay Ahmedsbad Sho apur and Hubit. COST OF LIVING AND STANDARD OF LIFE

monthly made of the second of

index. The method of compilation of the index City of Bangalore in 1942. The Government number for the cereals sub-groups was readjusted of Madras compiles nine series in all one for with effect from the index for the month ending little with effect from the index for the month ending little with the average prices for the series in an one for the little with five and so the series in an one for the series for low paid employees to difficulties in securing continuity of prices for the particular qualities included in the little with the average prices for the treatment of the little with the average prices for the treatment of the little with the average prices for the treatment of the little with the average prices for the treatment of the little with the average prices for the treatment of the little with the average prices for the treatment of the little with the average prices for the treatment of the little with the average prices for the treatment of the little with the average prices for the little with the average prices for the little with the average prices for the little with the average prices for the little with the average prices for the little with the average prices for the little with the average prices for the little with the littl the index The annual averages of the index numbers in the new series for the years 1934 numbers in the new series for the jens, 1934 to 1944 were as follows 1934 (six months)—99 1935—100, 1936—101, 1937—106, 1938—106, 1939—106, 1910—121, 1941—122, 1942—157 1943—229 and 1944—136 As this is the most important cost of living index series compiled in India we are reproducing in the table below the monthly movement of the index since January 1940

Bombay Cost of Living Index (1933-34-100)

Month *	1910	1941	1942	1013	1911	1045
January February March April May June July August September October November December	114 112 110 110 111 113 114 112 113 113 115	117 119 119 121 122 122 126 131 129 125 126 129	137 135 137 138 142 152 168 170 172 178 188	203 205 208 225 227 232 235 236 235 248 247	238 230 226 226 231 235 236 241 250 230 230 231 250	236 229 229 225 226 230

* The figures for June 1943 and onwards are for the calendar month Prior to that

In addition to the cost of living index series which the Labour Office of the Government of Bombay compiles for working classes in Bombay City, it also compiles similar cost of living index series for three other centres in the Province of Bombay Province of Bombay (1) Ahmedabad, (2) Sholapur, and (3) Jalgaon Those for Ahmedabad and Sholapur are published regularly in the Labour Gazette along with that for Bombay City The average prices for the year ended July 1927 have been adopted as the basis for the Ahmedabad series while the one for Sholapur is based on the average prices for the year ended Finuary 1928 Details regarding the scope and the method of compilation of the Ahmedabad and Sholapur series have been published in the issues of the Labour Gazette for January 1930 and for February 1931 respectively. The introduction of prices control and rationing have neces sitated changes in the compilation of the group index figures for cereals and pulses in a similar way to that adopted for the cost of living index figure for Bombay

Other Provinces in India which compile cost of living index series for working classes are Madras, the Central Provinces and Berar, the United Provinces, Bihar, the Punjab and Orissa My sore was the first Indian State to start the centres in India with a view to compilation of a cost of Living Index for the and revising old cost of living indexes

with the average prices for the twelve months from July 1935 to June 1936 as base The Government of the Central Provinces and Berar compiles two series for Nagpur and Jubbulpore with prices in January 1927 as base and six other series for Mofussil textile centres in the Province Since April 1942 the base period for the indexes for Nagpur and Jubbulpore has been changed to August 1939 In the United Transcriptor the United Provinces, one series with August 1030 as the base is compiled for working classes in Camppore and five other series with prices at 31st July 1939 equal to 100 are specially compiled for low paid Government employees at Lucknow, Benarcs, Bareilly, Meerut and Gorakh pur The Government of Bihar compiles cost of flying index numbers with the average cost of living for the five years ending December 1914 as the base for the following six centres in the Pro vince Patna, Muzassarpur, Monghvr, Jamshedpur, Jharia and Ranchi Average prices for five years are also the base for cost of living indexes for Lahore, Sialkot, Multan, Ludhiana and Roh tak in the Punjab but the base period in the Pun jab is the quinquennium ending December 1935 The Government of Orissa compiles a cost of living series for its headquarters town of Cuttack on the same method and base as those adopted by the Government of Bihar and another with average prices during the year 1939 40 as base, for Berhampur

In view of the varying base periods adopted by different Provinces for their cost of living Prior to that series and also by the same Province for the they are for the month ending on the 15th series for different centres in that Province, we in each month do not think that it would be desirable to reproduce the cost of living index figures for a number of centres in one table. It is obviously not possible for us, with the space at our disposal, to give separate tables for every cost of living series compiled in India in the same way as we have done for Bombay It will be noticed that the general averages for the old and the new series for Bombay Company. series for Bombay City for the two years 1935 and 1936 are very similar (1935—old 101, new 100, 1936—old 102, new 101) The general trend in prices is fairly uniform all over India and we are included to the flowers. and we are inclined to the view that the figures for Bombay may, for all practical purposes, be regarded as fairly continuous from 1914 to 1944 with 1914 as the base for the whole of India

Under a recent scheme adopted in 1912, it is the intention of the Government of India to centralise all the work hitherto done by the various Provinces in India in compiling cost of living indexes under the control of a Central Director of Cost of Living Indexes with his headquarters at Simla Mr S R Deshpande, MEE, BLitt (O\01), who was for many years Assistant Commissioner of Labour in the Bombay Labour Office was appointed to this post with effect from May 1042 Mr Deshpande post with effect from May 1942 is at present engaged in carrying out a number

The Government of India have had under con | sideration certain other pieces of legislation which were also designed to improve the lot of the industrial worker Following the recommen dations of the Labour Commission, the Govern ment of India have amended the Civil Pro cedure Code with a view to exempting salaries below a defined limit from attachment Another recommendation of the Labour Com mission was that at least so far as industrial workers in receipt of wages or salary amount ing to less than Rs 100 per month are concern ed, arrest and imprisonment for debt should be abolished except when the debtor has been proved to be both able and unwilling to pay The Government of India after consulting the provincial Governments decided toundertakelegislation on the recommendation on an experimental scale restricted to the province of Delhi in the first of instance A third recommendation of the Whit lost

ley Commission was made with a view to protein workers from harassment for debts After consulting public opinion and the views of th various Provincial Governments on this question the Government of India came to the conclusio that Central legislation on the subject was ne called for The Government of Bengal, at th suggestion of the Government of India, passe a Workmen's Protection Actin 1934 which make besetting of industrial establishments for th purpose of collecting debts a criminal and cogni: Some other provinces are als able offence contemplating similar legislation Money lenders' Bill introduced by a non officia member in the Bombay Legislative Council i March 1934 was an effort in this direction unfortunately, the motion for the reference of the Bill to a Select Committee w

GROWTH OF THE TRADE UNION MOVEMENT IN INDIA

memorialising Government for improvements in factory law and which soon became moribund after the passing of the 1891 Act, (2) the Amalgamated Society of Railway Servants of India and Burma formed in 1897 by Anglo Indians and Domiciled Europeans employed on railways, more as a friendly society than a combination for securing concessions, (3) a Printers' Union started in Calcutta in 1905, and (4) the Bombay Postal Union which was formed in 1907 The Kamgar Hitwardhak Sabha, Bombay, which came into existence in 1910, was a body of social workers who were interested in questions connected with the general welfare of labour and was an association rather for the workers than of the workers Apart from the cases cited, the trade union movement, as this is known in the West, did not begin in India till almost after the end of the first World War

The decade following the end of that War witnessed rapid developments in the field of trade unionism in India, but it must be regretfully admitted that even today organised association of the workers in the country is far below the stage of development which it has reached in Great Britain and in many other countries of the world The reason for this can be put in a nutshell lack of a will to organize as far as the workers are concerned and the absence of efficient leadership Some labour leaders were men who had the good and welfare of labour genuinely at heart But quite a few went into the movement merely for the oppor-tunities which it would give them for coming into the limelight Whereas the former went about affairs with a measure of considered moderation, the latter were mere propagandists and mischiefsible and preposterous demands in the hope that by doing so they would transport Indian followed by the creation of both provincial at

The earliest known trade unions in India were (1) the Bombay Millhands' Association, a loose organisation formed in 1890 for the purpose of some of the more intelligent of the worlers and the contract of the worlers are the contract of the worlers and the contract of the worlers are the contract of the world are the contract of the world are the contract of the world are the contract of the world are the contract of the world are the contract of the world are the contract of the world are the contract of the world are the contract of the world are the contract of the world are the contract of the world are the contract of the world are the contract of the world first constituted themselves into strike con Many of these committees secured considerable measure of success in so far i mittees concessions in wage rates were concerned, bu whereas most of them fell into a state of maintic on the conclusion of a dispute, a good few of then emboldened with the success they had met wit set themselves to the task of creating permaner associations or trade unions of the worker These were the beginnings of the trade unic movement in India, and within a period of five vears (1919 to 1923) scores of unions were forme in all parts of the country As there are I official records to show the names of and the memberships claimed by these earlier bodde nothing definite can be stated with regard eith to their number or to their total membership but it can be safely asserted that the movement had made a fair penetration on the railways, postal and telegraph departments, among seame and in the textile industry in Ahmedabad Cit and in some other centres

The pressing need for a co ordination of the activities of the individual unions was recognisat a very early stage of the movement and bo central and provincial federations were forme A central organisation at the apex was al necessary because only such a body could ma recommendations with regard to the person of the labour representation on Indian deleg tions to the Annual Sessions of the Internation Labour Conference Thus, the All India Tra-Union Congress was formed in 1920 on national basis The Central Labour Boar Bombay, and the Bengal Trades Union Feder tien were formed in 1922 The All Ind Railwaymen a Federal All Indiana Railwaymen s Federation, co ordinating unious of railwaymen on an industrial basis, w

The communists made a successful attempt in 1929 either to capture or to break the All India Trade Union Congress They affiliated the Trade Union Congress They affiliated the Bombay Girni Kamgar Union with a membership of 51,000 and the GIP Rall rat Worker. Union with a membership of 41,000 to that bods during the year and with the antistance of the voting strength which there to o unlong together with some of their other unions save them, they captured both the Congress and its I xecutive Committee at the Touth Session of the Congress which was held in Augpur in that year Recolu tions were adopted favouring the adiliation of the Congress to international communist organica tions and for the boxcott of the Royal Commision on Indian Labour the International Labour Conference and the Round Table Conferences on Indian Reforms Moderate trade unionists under the leadership of Mr A M Joshithercupon seceded from the Congress and formed a new organisation called the Indian Trades Union Lederation The All India Railwaymens Federation which was till then affiliated to the Trade Union Congress left that body in 1929 and remained outside till 1935

At the eleventh session of the All India Trade Union Congress held at Calcutta in July 1931, a further split occurred in its ranks and the extreme left wing under the leadership of organisation Messrs S V Deshpande and B T Randiy, agreement 2 extreme left wing under the leadership of organisation. The principal terms Messrs S V Deshpande and B T Randixt approved by the execution Congress By this time, however, trude to the both these bodies were that the unionism in India was at a three bowever, trude representation on the joint General unionism in India was at a three leadership of organisation. The principal terms both these bodies were that the representation on the joint General unionism in India was at a three leadership of organisation. The principal terms broke away to form the All-India Red Trade unionism in India was at a thoroughly low cbb of and none of the three national organications speak on behalf of Indian labour, but, as the Congress had already decided to boycott Union I ederation in tole The Congress had already decided to boycott Union I ederation in tole The Congress had already decided to boycott Union I ederation in tole The Congress had already decided to boycott Union I ederation in tole The Congress had already decided to boycott Union I ederation in tole The Congress had already decided to boycott Union I ederation in tole The Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already decided to boycott Union I ederation to the Congress had already Government of India accepted the Indian Trades Union Federation as the body competent to relating to general strikes and affiliat recommend delegater for the International international bodies should be decided to be a support of the competent of the compet

With a view to bring about unity in the ranks of Indian labour, a committee called the Trade Union Unity Committee was appointed at a representative conference held in Bombay on the 10th May 1931 under the auspices of the Union Congress held at Bombay on the Delivery of the Delivery of the Union Congress held at Bombay on the Congress held Committee found that three different and distinct sections of labour were in existence in India—
(1) the communist group, (2) the liberal group, and (3) the rest—and that the gulf which divided the communists from the other sections was not bridgeable The Committee, therefore recommended a platform of unity for the remaining sections of labour in India It was proposed to sections of labour in India It was proposed to organise and unite all unions which accepted this 'platform of unity' under a new federation to be called the National Rederation of Tabana to be called the National Federation of Labour At a joint meeting between the General Council of the Indian Trades Union Federation and the Provisional Committee of the National Federa-tion of Labour held at Calcutta in April 1933, the two federations were amalgamated on the basis of the platform of unity as shally evalved the control of the platform of unity as shally evalved the control of the platform of unity as shally evalved the control of the control organisation.

be recognised as the central organ worling classes in India. In the lebruary of the same year an agreemented between the representative In lie Trade Union Congress and Trades Union Februation by virtue Joint Committee of the two organ to be formed with a view to explori blittles of common action with the t the affillated unions of both in which an effort towards commo agreed matters was made was the entered into between the National of Labour and the All India Congre Party for foint action on specific p economic issues. At the end of the the Antional Trades Union Federa membership of 83,000 with 62 affiliant the All India Trade Union Con membership of 46 000 with 98 affilial It is interesting, however, to note that unions of Ahmedabad which draw,th tion from Mr. Gaudbi have throughou aloof from both three bodies

At a special joint session of the Trude Union Congress and the Trade Union Tederation held at on the 17th April 1938, it was d combine these two bodies into on the new combined Congress be fifty fifty-44 members fi accept the constitution of the Nation Union I ederation in toto The Council was to act for the combine the one three fourth's majority If this scheme well, the task of unification should be further and the two bodies merged in The Provisional Affiliation entered into at and 29th September 1940

This very same Session, honever, was sible for yet another split in the Congres Session adopted a resolution of neutre connexion with the War Effort but elements headed by Dr Aftab All Presi The Sermen's Union at Calcutta desi support the War Effort The Trade Congress while adhering to the princi neutrality, however, gave a free hand to: their affiliated members as desired to s the War Effort This attitude of luke war basis of the platform of unity as finally evolved by at-Law, formed a new central organisation the Trade Union Unity Conference but subject to office at Delti. Mr. Jamnadas M. Melt. was Groceth of Trade Unions in the Province of prointed its President and M. M. Roy its C. eral Secretary. A Convenient a cremployme t of indige work is the fith S co d World W r found the intern ti I Labou Office pepared to S Con ention conc raing penal a ctions; cot it us this work and to carry ut its onstitute bre ches f contracts of employment by it is obligations. So fr bak as F bru ry its nones were in Body had decided to apploin.

an Emergency Committee with a tripartite and the question of "Methods of Collaboration representative character from its membership which could meet more rapidly in times of crisis. The Committee set forth two important principles flist, that the ILO must continue to function as effectively and as completely as possible in case of war, and, second that the continued existence of the Organization as an instrument of co operation between Govern ments, employers and workers would be of unusual importance in such circumstances

The Twenty Sixth Session of the International Labour Conference fixed to begin on 3rd June 1940 had to be postponed sine die on account of the War Several Committee Meetings had also to be cancelled By July 1940, Swiss territory was almost completely surrounded by German Occupation Forces and it became increasingly difficult to envisage the continuance in Geneva of an international organization which depended for its effectiveness upon regular communications with its States Members It became necessary, therefore, to establish a working centre outside Geneva and to transfer to it the staff required in order to carry out the obligations of the Organization to its members In August 1940, the Government of Canada officially indicated its willingness for the temporary transfer to the Dominion of the personnel necessary to maintain the essential services of the Organization Montreal was chosen as the most suitable and convenient site for its location and the McGill University very generously agreed to provide the necessary office accommodation and library facilities The transfer from Geneva to Montreal necessitated drastic administrative changes and reduction in personnel The work of collection and distribution of information regarding labour and social conditions throughout the world is now being continued from Montreal and plans have been made for carrying on unimpaired, as far as conditions permit, all the manifold activities of the Organization from that centre

In furtherance of this programme, a Conference of the International Labour Organisation was held at New York from 27th October to 5th November 1941 and on 6th November 1941 at the White House, Washington Technically the Conference was not a Session of the International Labour Conference and it, therefore, had no powers to adopt Convertions and Recommendations in the manner provided for in the Constitution of the International Libour Organization but ample evidence of the value of its work is furnished by the influence evercised by its debates and by the action taken by various Governments to implement the more important of the resolutions which it adopted this Conference has a particular importance attaching to it as the first general international meeting held in the world since the outbreak of the War Thirty-four States Members of the Organization were represented, twenty-two of them by delegations including representatives of Governments, employers and workers Major played by the International Labour Organization of the Peace at the C R Attlee, Deputy Prime Minister, represented the Government of Great Britain while the Government of India was represented by Sir Shanmukham Chetty and Mr H S Malik, I O S The agendar consisted of two items (1) consideration of the report submitted by the Director of the International Labour Office under the title of The I L O and Reconstruction, and 2) many organization will have an essential The ILO and Reconstruction' and 2) peace

between Public Authorities, Workers' Organiza tions and Employers' Organizations"

Some twelve Resolutions were adopted by the onference. The most important of these was that on post-war emergency and reconstruction measures The resolution requested the Govern ing Body of the ILO (a) to call the attention of Governments to the desirability of associating the International Labour Office with the planning and application of measures of reconstruction and to ask that the International Labour Organization should be represented in any peace or reconstruction conference which may be held after the end of the War, (b) to suggest to Governments that they should, if they had not already done so, set up representative agencies for the study of the social and economic need of the post war world and that such agencies should consult with the appropriate organs of the ILO, (c) to set up from its own membership small tripartite committee, instructed to study and prepare both measures of reconstruction and emergency measures to deal with unemployment, in co-operation, where necessary, with govern mental, inter governmental and private agencies, (d) to make full use of the existing organs of the I LO and set up such new agencies as may be needed in order to meet the responsibilities implied in the Resolution (e) to direct the programme of the ILO to fulfil the purposes of the Resolution the Resolution, and (f) to report on the subject matter of the Resolution to the next and sub sequent meetings of the International Labour Conference so that the ILO should be in a nearlier to support to the position to give authoritative expression to the social objectives confided to it in the rebuilding of a peaceful world upon the basis of improved labour standards, economic advancement and social security. A second resolution endorsed the social and economic principles of the Atlantic Charter and urged that the fullest use be made of the machinery and experience of the ILO in giving effect to these principles Another resolution provided for the continuation of the work of the World Textile Conference held by the ILO in 1937 and requested the Director to begin immediately the preparation of a definite scheme for the establishment, under the egis of the I LO, of a World Textile Office, based on the tripartite principle, to be responsible for the international organization of measures to secure prosperity and social justice in the textile in dustry. The leading resolution on Government employer-worker collaboration declared that real collaboration is possible only 'within the framework of democratic political institutions which guarantee the freedom of association of which guarantee the freedom of association of workers and employers "and if in law and in fact the right of industrial organizations to represent workers and employers is recognised by the State

In addressing the Conference on the part to be played by the International Labour Organization in the winning of the War and of the peace at the concluding Session held at White House, the late President Roosevelt said "In the planning of such international action the International Labour Organization, with the name of labour of labour Your organization will have an essential

health education and well being of all peoples. The principles in the Charter are stated as fully applicable to all peoples everywhere and their progressive application to depend in peoples as well as to those who have already attained self-government is declared a matter of concern to the whole enabled world.

India and the International Labour Office India has played a notable part in the International Labour Organisation from its inception Its contribution to the funds of the organisation' is among the largest As one of the eight coun tries of chief industrial importance it occupies a permanent seat on the Governing Body of the International Labour Office In 1927 the Inter national Labour Conference elected an Indian-Sir Atul Chatterjee-as its President, and in 1932 Deputs Director, maintains its activities he was elected by the Governing Body as its pured and continues to function from it Chairman. Others who have represented the at New Delhi

they have also been elected to the Gov Body on different occasions An appr number of Indians who have been con with the International Labour Organizat one was or another are at the present time minent in public life in India

The Indi in Branch of the Internation if 1 Office of which Dr P P Pillai, Ph D, Director and Mr K L Metthew

GOVERNMENT ADMINISTRATION OF LABOUR **OUESTIONS.**

Prior to the year 1920 there was little co | Government could not provide him with adordination between the Centre and College of a Labour Commissioner in matters connected with I abour It would not be wrong to say that prior to that year Provincial Governments in India took little staff. The Government of Madras app a Labour matters. The particular and this officer has now been supplied when Provincial Governments in India took little a Labour Commissioner in the year 1920. Officer's duties were, however, primarily of the control cipation by India in the First Session of the Officer's duties were, however, primarily International Labour Conference held at Washington in 1919 and the increasing interest taken operations for the betterment of the con by the Indian public in questions connected with labour made it necessary, however, both for the Government of India and the Governments of the more industrialised Provinces not only to consider the question of the representation of labour in the Central and provincial legislatures but also to allorate to special departments or offices the administration of labour questions The Government of India established a Labour Bureau in the year 1920 which instituted inquiries into certain phases of factory work and published some reports in a series known as "Bulletins of Indian Industries and Labour" Before the utility of the Central Labour Bureau could be established it was abolished in March 1923 on the recommendation of the Indian Retrenchment Committee The Department of Labour of the Central Government had, however, endeavoured to carry on as much as possible of the work initiated by that Bureau but owing to its limitations in staff and personnel it was not in a position to initiate and conduct all India in quiries into wages and conditions of employment in Indian Industries Since the advent of the War and the creation of the Tripartite Labour Conference the Department of Labour of the Government of India has considerably expanded its staff and it now deals with a much wider range of subjects than it did before the War

The Government of Bengal, in 1920, invested a Deputy Secretary in the Commerce Department with the additional work of a Labour Intelligence Officer whose duty would be to keep a record of industrial disputes in the Province as well as of labour organizations It was intended that this officer should conduct special inquiries from time to time as circumstances required but owing to financial stringency, the Provincial arise

of the Depressed Classes in the Province special regard to provision of water s assignment of lands, acquisition of house education through special schools and the of assistance in the form of scholarship boarding grants and to the administration Criminal Tribes Settlements He was a watch and study the conditions of labour, I ularly industrial labour, throughout the vince and to keep Government informe periodical reports of its movements and te cles and of the existence of any disputes be employers and employed The duty of se labour disputes through negotiation and ciliation has only been placed upon him c recent years

The lead in the matter of the creation proper and stable department of Govern with investigators and an adequate state staff to deal with all questions connected labour was taken by the late Lord Lloyd, Governor of Bombay, who created a L Office for the Bombay Presidency in In the Government resolution announcing establishment of this office the following declared to be its functions -

- "(1) Labour Statistics and Intelliger These relate to the conditions under which le works and include information relating to cost of living, wages, hours of labour, fi budgets, strikes and lock-outs, and si matters,
- " (2) Industrial Disputes -As exper and knowledge are gained and the activit the Labour Office develop it will promot settlement of industrial disputes when

the Labour Office of the Government of Bombay regularly compiles for Bombay, Ahmedabad and Sholapur, wholesale prices index numbers for Bombay, retail food prices for five unportant centres in the Province, statistics of industrial disputes and workmen's compensation, full information regarding all industrial disputes in India, statistics of absenteelsm with notes on the employment situation in five important industrial centres and information regarding prosecutions under the Inctories Act Since 1939, when the Bomby Industrial Disputes Act, 1938, was first applied to the cotton textile industry in the Province, the full proceedings of the Industrial Court and the reports on settlements reached in conciliation under the Act have been regularly reproduced in this publication. The "Labour Gazette" also gives, once in every six months, complete information with regard to all how a trade vilence with tion with regard to all known trade unions in the Province The only Province in India, which maintains a first class and up to date library or books and periodicals on all kinds of matters connected with Labour is Bombay

THE CENTRAL GOVERNMENT

The work of the Labour Department of the Government of India has increased considerably since the outbreak of the present war Apart from purely labour matters, i.e., legislation affecting conditions of employment, regulation of factory conditions, etc., it has wide responsibilities. sibilities in regard to other subjects, eq mines, electricity, irrigation the Central Public Works Department, Air Raid Precautions in factories, This Department administers and controls all matters in connexion with the work of the National Service Labour Tribunals, the Technical Training Scheme, the Bevin Training Scheme, the Civil Pioneer Force and the of Employment Exchanges The late The latter are, however, as yet in an embryonic stage. The Labour Department has continued active co operation with organised employers and labour through its Tripartite Conferences and Standing Labour Committee A Labour Inves tigation Committee has been set up as a means of acquiring information preliminary to the consideration of further development in Social Services A Special Officer (B P Adarkar) has been appointed to investigate problems of Health Insurance In accordance with one of the recommendations of the Rau Railway Court of Inquiry, the Labour Dept opened a new Branch for conducting family budget inquiries in important railway centres all over India and for commiling cost of living index number series for these centres The work of this Branch will be to co ordinate and eventually centralise the compilation of all cost of living index number series which are being compiled by the different series which are being compiled by the different Provincial Governments at present Mr S R Deshpande, MBE, B Litt (Ovon), who since 1924 was Assistant Commissioner of Labour with the Government of Bombay, has been appointed Director of Cost of Laving Indexes in connexion with the work of this new Branch with effect from May 1942 Mr Deshpande's head-quarters are at Simla In the same month the for the whole of the Province at an estimated

and labour conditions in the outside world Government of India appointed Mr R S Nimb Its contents include statistics and discussions kar, a prominent Labour Leader from Bombay, regarding the cost of living index series which as a Central Adviser on Labour Welfare Mr kar, a prominent Labour Leader from Bombay, 15 a Central Adviser on Labour Welfare Mr Nimbhar sappointment is, at present, limited for the duration of the War 'It is quite probable however, that it will be made permanent Mr Nimbhar is attached to the Headquarters of the Libour Department at New Delhi Dr T D Jack Professor of Leonomics in the University of Aberdeen who joined the Ministry of Labour, London, on the outbreak of the War, was appointed a Labour Adviser to the Government of India in December 1942 On Dr Jack relinquishing his appointment in 1943, the Government of India secured the services of Mr B L Witers, a Senior Official of the British Ministry of Labour as Labour Adviser to Government but this Officer died in Simla in September, 1944 The present executive staff of the Department is is follows

Member in Charge The Honourable Dr B R AMBEDIAL, W 1, Ph D, D Sc (Lond), Bar at-Law

OTHER PROVINCES

In Assam the main question connected with labour is that concerning the recruitment of labour for ten plantations from other provinces As inter-provincial migration is a central subject, the Provincial Government are not very actively interested in the special consideration of other Notwithstanding this how labour questions ever, the Government of Assam have obtained the approval of the Government of India and the vote of the Legislature for appointing the Controller of Emigrant Labour as part-time Labour Commissioner with a whole-time Assis tant In Assam A & R PILLAI is the present Controller of Emigrant Labour and Com missioner of Labour He is also the Registrar The present whole of Trade Unions in Assam time Asst Commi of Labour is KUNUD CHAN DRA DATEA The only important event of interest that his occurred in the field of labour in Assim during 1943 44 is the creation of the Workmen's Compensation Deposit Scheme Labour conditions in Orissa and the North West Frontier Province are not considered such as to Justify the appointment of Labour Commissioners In Orissa, the Director of Development (H L4L, I CS) is the Labour Commissioner and the Revenue Commissioner (R P WARD, I CS) is the Registrar of Trade Unions In the North West Frontier Province, the Secretary to Government in the Legislative Department has been entrusted with the work of industrial und labour disputes and MALIK KHUDA BAKSH KHAN BA, LLB is the Registrar of Trade Unions In Ajmer-Merwara, the Entra Officer, Ajmer-Merwara, is Registrar of Trade Unions

Agmer Merwara constitutes quite an important industrial irea with its cotton Mills and rulway workshops So far, however, there has not been any administrative machinery to look into the various problems of labour in that area. The Central Government have, therefore, recently, decided to form an organisation with a Labour Officer at its head to look after the welfare and various other problems relating to labour in Almer

INDIAN STAILS

The rapid industrialisation witnessed in India especially since the advent of the Second World War in 1939 has not been confined to British India alone but has also extended to the Indian States as well After the end of the First World War, there was a slight tendency for industry in British India to migrate to the States owing to the absence of labour laws and restrictive conditions of work but most of the progressive States such as Hyderabad, Baroda, Mysore, Gwalior, Indore, Travancore, Cochin, etc., have endeavoured during recent years, to bring their conditions and the Laws. labour legislation into line with the Labour Laws in British India with the result that industrial workers in these States are now assured of conditions very similar to those obtaining in British The participation by some States in the three Conferences of Labour Ministers convened by the Government of India in the years 1941, 1942 and 1943 and their representation in the Tripartite Labour Conference and in the Stand ing Labour Committee created in 1942 have given as a result of disputes between masters and men

and the levelling up of conditions of work in the States with those obtaining in British India Mysore shows the most notable advance in recent years in the field of labour legislation and some of the measures adopted in the last year or two in that Stite show an advance even as compared We conclude this chapter with British India by giving below a few interesting details regard ing the extent of industrialisation and the mea sures adopted in the administration of matters connected with labour in a few States which have supplied the necessary information on the subject

MYSORE

Prior to 1941, Mysore had a Factories Act, a Mines Act, a Workmen's Compensation Act and a Maternity Benefit Act Labour problems in Mysore have, however, been brought into con siderable prominence as a result of rapid indus In addition to trialisation in the last few years 28 new plants, 25 large industrial concerns of which 17 were State aided and eight State owned were established in the State during the decade ending 1941 The total number of large indus trial undertakings stood at 330 by the end of 1943 and these gave employment to an average of nearly 86,000 workers. An amendment made to the Mysore Pactories Act in 1942 extends the scope of the Act to all factories employing ten or more persons instead of 20 as before thus bringing almost all factories in the State within its purview The Mysore Workmen's Compen sation Act was considerably liberalised and the operation of the Mysore Maternity Benefit Act was extended to women employed in mines in the same very. The Code of Civil Procedure was also amended in such a way as to ensure the exemption of the wages of workers from attachment

The most advanced piece of labour legislation in India States today is the Mysore Labour (Emergency) Act enacted in 1941 and placed permanently on the Statute Book in January 1942 This Act creates machinery for the peace ful and speedy settlement of industrial disputes and seeks generally to promote the welfare of labour Among its many provisions are those relating to the setting up of a Department of Labour with a Commissioner and three Assistant Commissioners of Labour and a Court of Indus trial Arbitration the framing by the Commis sioner of Labour, of Standing Orders for work men, and the conferring of the rights of associa tion on all labour employed in the State Court of Industrial Arbitration, consisting of a Judge of the High Court as its Chairman and two independent members decides industrial disputes referred to it by Government or by agreement between the parties and decides appeals from the Orders of the Commissioner of Labour regarding Standing Orders The creation of rival unions of workers is avoided by prescribing a single Association each for industrial undertakings employing not less than 100 persons and by con ferring Statutory recognition on each Association immediately it is registered. By the beginning of June 1944, 52 unions with a total membership of 31,260 workers in 74 industrial undertaking covered by the Act were registered in order that membership that the interfered with that war production might not be interfered with an added impetus to planned industrialisation Under the guidance of the Asst Commissioners

BARODA.

The total number of registered factories in the Barodi State on the 31st July, 1944 was 170 of which 80 were perennial and 90 sersonal fine total number of persons employed in all factories employing more than 20 persons was 11,771 Baroda was one of the flist states in India to enret a Mines Act. The Baioda Mines Act, 1908 contains provisions in regard to health Act, 1908 contains provisions in regard to health and safety of workmen employed in the Mines As far as other Labour Laws are concerned the Government of H H The Maharija Gullwar of Baroda has adopted, with certain changes to suit local conditions, the Indian Factories Act, 1934, the Workmen's Compensation Act 1923, the Trade Disputes Act, 1929, the Trade Unions Act, 1926, the Payment of Wages Act, 1936, and the Bombay Maternity Benefit Act, 1929 (Inder the Baroda Factories Act, the manning Under the Buroda Factories Act, the ma limum permissible weekly hours of work are 60 for perennial factories and 66 for seasonal factories as against 54 and 60 respectively in the Indian Act The Buroda Act makes no provision for weekly holidays but it provides for at least 52 holidays in a vear and a minimum of four holidays in a month is obligatory Sections 78 and 79 of the Indian Act have been omitted The Workmen's Compensation Act and the Rules framed thereunder have been adopted in toto In the Baroda Maternity Benefits Act, the benefit is to be at the rate of six annas a day as against 8 annas a day as in the Bombay Act Sections 6(3) and 18A (relating to the appoint ment of Conciliators) have been omitted from the application of the Tride Disputes Act, 1929 The Baroda Tride Unions Act has important variations from the British India Act on which it has been modelled, (1) No Associations or Unions of Government Servants, whatever be their objects, are permitted, (2) the forming, by Unions, of political funds is not recognised, (3) the proportion of persons connected with an industry which is covered by a Union to outsiders on its executive has been fixed at 665 and 331 per cent respectively and (4) Section 30 of the British Indian Act has been omitted Under the Baroda Payment of Wages Act, all wages have to be paid before the express of the tenth day following the period for which they fall due In the application of Rule 81A of the Defence of India Rules, the period of notice required for the declaration of a strike or a lock out is six weeks

A Labour Officer whose main duty was to endeavour to bring about settlements in labour disputes was appointed in the year 1938 addition to conciliation work he is entrusted, as Special Registrar of Co operative Societies for Workers, with the work of organising co opera-tive Societies and other welfare Schemes with the help of employers In the year 1943, the Government of Baroda State instituted an inquiry into the general financial condition of the cotton mills in the State and the conditions of labour employed in them with special reference

Societies By the end of February, 1945 twenty such Societies with a membership of 24,301 workers had been established in the State The total amount of savings as at the same date amounted to Rs 20,19,962 The personnel of the Government of Baroda dealing with administrative matters connected with Labour is as follows

Director of Labour and Registrar of Trade Unions G V BHATT, M \ (London)

Labour Officer, Inspector of Factories under the Payment of Wages Act and Special Registrar of Co operative Societies for Labour B S DESAI, B AG

Inspector of Factories D B ARTE

INDORE.

In October 1943, Indore was the fifth largest centre of the cotton textile industry in India with seven mills having 213,446 spindles and 6,301 looms The total number of factories on the register on 1st October 1944 was 485 of which 322 were perennial and 163 seasonal These gave employment to 30,297 workers in all of whom 26,377 were employed in cotton mills Labour legislation in Indore is almost parallel to that in British India and includes Factories, Workmen's Compensation, Trade Disputes, Payment of Wages, Trade Unions' and Maternity Benefit Acts The Indore Trade Disputes Act provides for the appointment of Courts of Inquiry and Boards of Conciliation to deal with disputes and also for a Labour Officer to secure the maintenance of harmonious relations between Standardisa the workers and their employers tion of wages have been secured in cotton textile mills and labour has been decasualised by the Introduction of the Badh Control System on the lines adopted by the Millowners' Association, Bombry Safety Committees to prevent accidents in factories have also been established MUMIAZIM-I-KHAS BAHADUR CAPT H C DHANDA, B A (Ovon), Barrister at Law, Commerce Member, Holkar State, is the Minister in charge of Libour, RAI RATAN V N SHERLE RAP, L M E A M Tech I is Registrar of Trade Unions and Inspector of Factories and R S Datl, B A, LL B is the Government Labour Officer Officer

COCHIN

Unlike Mysore, Baroda and Indore, the large industrial population of Cochin State is organised The number of concerns on on a cottage basis the Factory Register at the end of the last official year (18th August 1944) was 103 employ ing 12,806 persons Today Cochin State has all the labour laws which have been enacted in Indore with a Dock Labourers' Act in addition Recent additions include an Employment of Children Act and the Employee's Lability Act The administration of labour matters is generally in the hands of the Director of Industries and to recruitment, wages, hours of work, labour welfare and efficiency
With a view that the increased earnings accruing to industrial workers in the State as a result of war conditions might not be frittered the Workman Commerced in Industrial of Trade Unions and Concillator, under the Trade Disputes Act (V K AOHUTA MENON, MA, B Com) The Factories Act and result of war conditions might not be frittered the Workman Commerced in Industrial Trade Unions and Concillator, under the Trade Disputes Act (V K AOHUTA MENON, MA, B Com) The Factories Act and result of war conditions might not be frittered the Workman Commerced in Industrial Trade Unions and Commissioner, the Registrar of Trade Unions and Commissioner, and the Industrial Trade Unions and Commissioner, the Registrar of Trade Unions and Concillator, under the Trade Disputes Act (V K AOHUTA MENON, MA, B Com) The Factories Act and result of war conditions might not be frittered. result of war conditions might not be frittered the Workmen's Compensation Act are, however, away in drink etc. the Baroda Government decided to start to operative Thrift Societies for the workers. The Government have guaran tred the security of all deposits made in such respectively.

CIVIL AVIATION

Lloyd du ing his Governorship of Bombay (1918 Lioyd du ing his Governorship of Bombay (1918) pro ided in addition to routes it v reed before 230. The first air service was org mated by the lie war adjust vertices from Pest was to Madraw Governme t of India between Kar chi and track the properties of the prope collected and its contin ance as a purely comm r clai concern was not ad ocated

The general thit de of the Gov rament of India for some time after this was that as no air services in the wolld had yet be n run without a Government subsidy and as India had no mon y available for s ch a p rpos a general development of ir services in India must await more prope out times. The pessure of external condities in a proven of the property of the property of the province of th and D tch air services across I dia as well as the institution of a regular weekly ervice between the institution of a regular we say ervice between England and Karschi and the gene al increase f civil viation in all parts of the world and of sists of flyers of different nations to India timulated both Governme tand publi opinion India had becom a party to the International Al Con nti n and u d r this she w moral bl gation to p o id gro nd f cilities for t ie craft from ther

The problem of int rnal ir services was freshly tak n up by th Government of India in the Departm t of Indu tries and Labour when Sir Bhupendranath Mit a was m mbe of Gov rn ment for that portfolio

planes had already been purchased for the service | service and they were sold, one of them being retained for the use of Their Excellencies the Earl and Countess of Willingdon, who had newly arrived in first class mails to Empire participating countries India on the appointment of the Earl to be were conveyed by air On the empire system of The machine continued in Their Viceroy Excellencies' service until 1984, when a new upto date aeroplane was purchased for their use and their old one was retained for the use of senior Government officials

Efforts to attain the desired result were revived successfully in 1933 Arrangements were made with the British Government and British Airways, Ltd, for the extension of the London Karachi air service across India from Karachi to Singapore, as a link in the England Australia air rervice A private company called The Indian Trans Continental Airways, Ltd, was formed with a rupee capital and a majority of Indian Directors, in which British Airways, Ltd, held 51% of the shares, Indian National Airways, Ltd 25 per cent and the Government of India 24 per cent This Company then operated jointly with British Airways, a weekly service from with British Airways a weekly service from Karachi to Singapore, where it connected with Qantas Empire Airways' weekly service from Singapore to Australia

Indian National Airways, Ltd was established largely through the efforts of Mr R E Grant Govan, CBE, to participate as a shareholder in Indian Trans Continental Airways, and to develop feeder and other internal air services in North India They opened a bi weekly service between Calcutta and Rangoon and a daily service between Dacca and Calcutta with prospects of extension to Assam Under prospects of extension to Assam Under a ten year contract with the Government of India they also instituted a weekly service from Lahore to Karachi, to link with British Air ways London-Karachi services The Rangoon and Dacca services from Calcutta were abandoned in 1935, owing to lack of public support

Before all these developments, however, the first move had taken place in Western India Through the enterprise of Tata Sons Ltd , under a ten year contract with the Government of India, a feeder service was started in 1932 between Karachi, Bombay and Madras, connect-ing at Karachi with the London-Karachi service From the beginning of 1935, British Airways London-Karachi service, and with it the Trans India service to Calcutta and the feeder services, Karachi Lahore and Karachi Bombay-Madras, were operated twice weekly The second trans-India service was extended to Australia in 1936

Empire Air Mail Scheme — The initiative in this development was taken by His Majesty's Government In September 1936 an agreement was reached with the Government of India and the Government of India simultaneously negotiated with the Government of Ceylon for the extension of the Karachi-Madras service to Colombo The new services were inaugurated on the 28th February 1938, with four services a week The freeach way from London to Calcutta quency of the two feeder air mail services in India, viz. Karachi-Madras Colombo and Karachi Lahore was simultaneously increased to four, each service maintuning connection with the easterly and westerly flights of the main trunk tralia)

The frequency was increased to five when the services in the Australian section were augmented at the end of July, 1938, and all were conveyed by air On the empire system of air services, Imperial Airways and its associated companies, including Indian Trans Continental Airways, Ltd, flew a total distance of approximately 7,000,000 miles in 1938 as against imately 4,300,000 in 1937 and the total load carried rose from 6,315,400 to 12,392,000 ton miles In the early months of 1939, 550 tons of mail consisting of 50 000,000 letters were carried each letter travelling on an average 4,750 miles

The Empire Air Mail scheme was suspended in September, 1939, on the outbreak of the War with Germany, but a restricted service was main tained until Tune, 1940, when, on Italy's entry into the war, air mails to the Umted Kingdom were totally suspended In December 1940, the possibilities of introducing a direct air link between Britain and Durban were investigated and a 'short circuiting' route was inspected by Major J R McCrindle, Deputy Director General of the British Overseas Airways Air Service to Lngl ind was renewed in August 1945

Service -This India-England Airgraph new service was inaugurated on February 2, 1942 The airgraphs were photographed at Bombay on a miniature film measuring about half an inch square The films were sent through out by air from India to the United Kingdom where a photograph facsimile, measuring about five inches by four inches, of the original letter, was made from the film and delivered to the addressee by the British Post Office enclosed in a The rate of postage originally fixed at fourteen annas was reduced to eight annas on March 2. The airgraph service was dis continued in Tuly 1945

services —In 1937 Internal air Tata Sous, Ltd, established a service between Bombay and Delhi, calling at Indore, Bhopal and Gwalior This service operated twice weekly during the fair season It was, however, Besides this Tata Sons suspended in 1943 Bombay -Trivandrum their have extended service to Trichinopoly where it connects with one of the four main services to Colombo This service is also operated seasonally during the fine weather months. Surcharged air mails fine weather' months are carried on both services

The Air Services of India Ltd, Bombay inaugurated in November, 1937, an air service from Bombay to Bhavnagar, Rajkot, Tamnagar and Porbandar in the Kathiawar States The was terminated in 1940 The twice service was terminated in 1940. The twice weekly Bombay/Poona/Kolhapur Line was also terminated due to War in 1940

The Indian National Airways run two services viz, Delhi Lahore-Karachi and Karachi Calcutta via Lahore and Delhi, the former once a week, the latter twice a week, in each direction

The K L M were operating once a week between Lydda (Palestine) and Sydney (Australia) They have now suspended their services

across India in view of the international situation | 1 great success After the entry of Italy into the war, Lydia, in amateur competitor and was regarded as having Palestine, became the westbound terminus of contributed in an important degree to general

the service

During the period of the war Messrs Tata Sons Ltd under the title of Tata Air Lines and Indian National Airways Ltd entered into an agreement with the Government of India for the operation of various internal air routes for the benefit of the War Department. The entire capacity on these services, was placed at the disposal of the War Department who met the entire cost of operations from Defence cetimates Civilian traffic was carried only when space be came available after meeting the demands of the military traffic

Institute -Since Aeronautical Technical Aeronautical Technical Institute—SINCE 1937 the Air Services of India, Limited, run the Aeronautical Technical Institute at Jammagar which has provision for training a limited number of students as ground Engineers according to the course prescribed for 'A' and 'C' hierones and also for 'B' and 'D' hierones issued by the Government of India

Indian Air Races —The first Indian Air-race was flown over a Delhi-Agra-Jhansi Lucknow-Agra-Delhi course in February 1932, and was very successful There was a similar race over approximately the same course in February 1933, when the entries were good and included two competitors who specially came out from Eng-land for the contest and the event was again completely successful

There was no race in 1934 One was programmed for December 1934, to be flown from Calcutta to Bombay with a halt for one night at Cawnpore Six months' notice was given and substantial cash prizes, in addition to the Viceroy's Challenge Trophy, were offered, but only six entries were received. The Aero Club Committee in their announcement to this effect said that in their opinion the pro gramme was too ambitious for the class or competitors who had hitherto entered, most of whom could not afford to fly to the start, race over 1,200 miles and then fly home They added, "Air racing, like every other form of racing, costs money and can only be encouraged by the patronage of wealthy sports men and in India this has been the exception rather than the rule up to now. The only funds regularly available for the purpose are the interest on one lakh of rupees given by Sir V Sassoon to form an Irwin Flying Fund Sir V Sassoon to form an Irwin Flying Fund and a day's halt at Singapore, only 14 day for flying sport prizes. The fund is held by a were spent on the round journey. The sal Trust the members of which are the Director return trip by bout takes about one month of Civil Aviation and the Chairman of the Aero

It was won by an Indian air mindedness in India

All-India Air Rally—On the 5th and 6th December 1938, an All-India Rally was held at Karachi on the occasion of opening of the newly constructed Air Port Building His Excellency the Governor of Sind performed the opening ceremony and gave away the prizes to the Winners

All flying clubs in India affiliated to the Aero Club of India and Burma participated The Viceroy a Cup given for the best aggregate results obtained by one of the competing clubs was won by the Karachi Aero Club The Sir Victor Sassoon Challenge Trophy given for the best all round progress during the year was awarded to the Karachi Aero Club

International Flights —In 1938 there were 21 international flights to, from or across India by non Indian Aircraft and one flight to India by an Indian Aircraft

Two Royal Air Force aeroplanes succeeded in fiving non-stop from Ismailia (Lgypt) to Darwin (Australia), a distance of 7,126 miles which was flown in just over 48 hours at an average speed of 149 miles per hour. A third machine landed owing to lack of fuel only a few hundred miles short of its destination. hundred miles short of its destination flights were aided by the aeronautical wireless and meteorological services in India

A non stop flight in an Arado light aeroplane from Benghazi (Tripoli) to Gaya was made at the beginning of January 1939 by the German The origin of these two races was the offer by Their Excellencies the Viceroy (the Earl of Willingdon) and the Countess of Willingdon, of a Challenge Trophy for such a race

The origin of these two races was the offer by at the beginning of January 1939 by the German The Willingdon) and the Countess of Willingdon, of a Challenge Trophy for such a race

The origin of these two races was the offer by at the beginning of January 1939 by the German The William of January 1939 by the German T ly met his death in an accident to the aeroplane at Madras

> Two French military aeroplanes crossed India in January, 1939, on their way to Indo China

> Record flights were made in March, 1938, by Flying Officer A. E. Clouston and Mr. V. Ricketts from England to New Zealand and back, and in April 1938 by Mr. H. F. Broadbent from Austra lia to England

Flying by Private Owners While no flights by Indian private owners were note worthy from a record-breaking point of view, three of them deserve mention A private owner in a two seater Hornet Moth flew with a passenger from Calcutta to Batavia and back Inclusive of two days sight-seeing in Batavia and a days halt at Singapore, only 14 days were spent on the round journey The same

Club

The second flight was from Lahore to Srinagar and back. The pilot claimed to be the first private owner to take a single engined aeroplane into Kashmir. In order to get above the clouds Entries were received not only from different parts of India but from abroad. The race was to fly as high as 19,000 feet.

Aviaiion

The installation of new wireless equipment is ferred with the upper Air Office to Delhi still in progress both on the Trans India route and the South India route and the process of improvement will be carried several steps fur-ther by the programme of new works sanctioned When it is completed it is expected that the full development of the present wircless pro gramme will be reached and a sufficient number of operators will have been trained to provide the full hours of watch demanded A 24 hour on the Trans-India route, but for the present I stations except at Kaiachi, the short and medium wave installations at the aerodromes will not usually be manned for more than 18 hours daily

On the South India route the acronautical wireless service between Karachi and Bombiy, on the standard wation wave length of 900 metres, is regularly used by Tata's aircraft relieve congestion at Karachi it is intended to adopt a wave length of 850 metres for the South India route as soon as a second medium wave transmitter and receiver have been installed there

South of Bomby, a wireless service for avia tion is at present operated on the shipping wave length of 600 metres of Madras and Colombo pending the completion of aeron utical stations it these places. Tata's aircraft operating on this section of the route are not at present equipped with wireless and the traffic consists of point to point messages

In August 1939, Tata Air Lines erected their own wireless station at Bhuj rerodrome. This station gives advance information regarding weather conditions for the Bhuj Karachi and Bhui Ahmedabad sections and also intimates the pilot in advance the condition of the Bhui landing ground during the monsoon

Wireless communication facilities are also given from this station to British Airway's flying boats when operating on the Karachi Jai/Raj Samand route

Meteorological Services—I urther improvements were effected by the India Meteorological Department in the Meteorological arrange New double flight pilot ments for aviation Samund and Gwalior to meet the requirements of the flying boat service. The pilot balloon and current weather observatory at Gwadur was transferred to Jiwan, the pilot balloon and current weather observatory at Gwadur was transferred to Jiwan, the pilot balloon and current, weather observatory at Gwadur was transferred to Jiwan, the pilot balloon and current weather observatories at Allahabad and Alipore (Calcutta) were moved to the aerodromes, and a temporary observer was posted at the seaplane base at Calcutta for the issue of special reports, particularly regarding visibility for the benefit of the flying boat service On the Karachi Colombo route, the observatories at Bhui, Nalegaon and Hyderabad (Begumpet) began taking regular afternoon pilot balloon observations and arrangements were made for an additional pilot balloon ascent at Ahmedabad in the early morning The observatory at Bangalore also commenced an additional daily pilot balloon observation in the afternoon

A new aviation section has been set up at the Upper Air Office, Agra, which will be later trans | tails of aerodromes and landing grounds, wire-

aviation section will be responsible for the orga nisation of the meteorological service on air routes, and, when transferred to Delhi, will maintain haison with the Civil Aviation Depart

The international codes have been adopted for all current weather reports, including reports of dangerous phenomena and improvement thereof New editions of the pamphlet on meteorological organisation for airmen and of the Aviation Weather Codes (Pocket Card) were issued

On the Trans India air route, the routine arringements for the issue of forecasts upper wind and current weather reports by W/T to all main aerodromes and to aircraft in flight were continued Airmen are able to refer to the latest report on Weather Notice Boards at acrodromes or to get reports by W/T while in the air at routine times and at other times on requisition On other routes weather reports are prepared by the Meteorological Office to suit the time table and needs of the air services

Arrangements have been made for the routine distribution of pilot balloon and current weather reports along the Larachi Colombo route and the system is working satisfactorily

Legislation, Rules, etc.—The Indian Air craft Act, 1934, was further amended by the Indian Aircraft (Amendment) Act, 1938 The latter empowers the Central Government to take measures for the sanitary control of air navigation in emergencies

The Indian Public Health (Aircraft) Rules are based on the International Samtary Con vention for Air Navigation, with modifications to suit conditions in India

International Commission for Air Navigation -India was represented at the 26th Session of the International Commission for Air Naviga tion held at The Hague during Mayand June 1938, by Mr J A Shillidy, 081, 108 (retd)

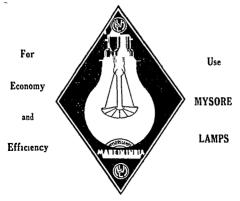

Aeronautical Maps - The preparation of a series of aeronautical maps for India on the scale of 1/1,000,000 has been undertaken by the Survey of India Hitherto, there have been two series of general maps on this scale, namely the "Carte Internationale" series and the India and Adjacent Countries" series In order to facilitate the work of keeping the maps up to date, it has been decided to concentrate in future on one series only The "Carte Inter-nationale" has been selected and this will be the basis of the new aeronautical maps essential first step the map sheets are being com pletely revised and reprinted in turn sheet is completed a special edition will be prepared on which will be surprinted air information conforming so far as possible with the re-commendations for the International Local Aeronautical Map of Annexe F of the International Convention

The Aeronautical information comprises de

THE SUEZ CANAL.

Opened formally in 1869, the Suez Canal commercial interests. Incidentally, nearly 60 constitutes an artificial waterway about 105 per cent of the total tonnage passing through miles long, linking. Port Said on the Mediter, the Canal is British. The enterprise is managed ranean with Suez on the Red Sea The Canal in I gapt shortens the route from England to Calcutta and Bomby by 3,660 and 4,500 miles respectively, also, of course, substantially reducing the distance to Australia Using the Canal, the distance to Australia Using the Canal, the Mediterranean fleet could reach the Singapore Canal Company in regard to the deepening base in less than three weeks. The alternative route round the Cape lengthens Britain's lines of communications by about 4,000 miles

Control and Finance

The Suez Canal is controlled by a company, the market opoil n property, valued in it £120,000,000, (before the war) passes to the Lgyptian Government when the concession expires on November 17, 1968 the This is of course in default of other arrange ments The British Government owns 44 per cent of the shares, thanks to Disrael's celebrated coup in 1875 when for £4,000,000 he bought the majority of the bankrupt Khedive The shares before the war were valued at £84,000,000 and the profits amounted to about £3,500,000 a year Most of the tuaranteed by an international Convention of remaining shares are held in France, but 29th October, 1888. The provisions of the not by the French Government, which Convention are that subject only the convention are that subject only the convention are that subject only the convention are that subject only the convention are that subject only the convention are that subject only the convention are that subject only the convention that the convention are that subject only the convention that the convent does not own a share 21 Frenchmen, 10 Britishers, a Dutchman and self defence and to action to injure the safet an Egyptian Only three of the British directory of the canal there can be no restriction represent the British Government, the remaining seven represent British shipping and use of the Canal

Development

feet 2 inches The declared policy of Canal Company in regard to the deepening the Canal is to offer a slightly great depth of water than that available It is claimed that, with th ports east of Suez exception of Sydney, there is no Laster port which at low tide has a greater depth water than that now provided in the Can throughout the full length of nearly 100 mile Today, the Canal is on an average, 45 feet det and 70 vards broad. It can be traversed | Just under thirteen hours. About 15 ship can pass in the 21 hours. One ship has, howeve still to tie up to let a second pass, though the is plenty of room for both. The biggest vess yet to navigate "The Cut" was of 27,000 ton

Neutrality.

Absolute neutrality is the law of the Company that The Board comprises exercise of the right of the legitimat

Travel in India.

only to the wealthy, the lessured and those who had friends in the country. The cost of the journey was very high, the methods of transportation were very slow, and the faci lities for travel were so indifferent that he was a bold man who consigned himself to the mer-cles of the country without a sherf of letters Nowadays travel in India is of introduction casy and is no more expensive than travel in other countries. The Indian railways provide facilities on the trunk lines which eliminate—at any rate reduce—changes to a minimum and the Indian Hotels have improved very considerably in the last few years

The traveller to India has a choice of many ports by which he may enter To the majority of visitors from Europe and the West, Bombay provides their first glimpse of India, while others enter by Calcutta, Madras and Karachi and via Colombo

Owing to its geographical position Bombay is known as the Gateway of India through which for more than a century, the import and export trade of India has largely passed Ash-purple against the dawn, the spurs of the Western Ghats, thrones of mystery, stand sentinel about the inner sanctuary of Bombay Harbour Among and above these mountain heights Wellington fought the battles which earned for his early military greatness Every school boy knows the stories of the Mahratta campaigns and the bright anecdotes of Rapput and wild waste

Lifty years also, a tour in India was possible courage and chivairy, but Rajputs and Mahrat years are not all that India has They are not journey was very high, the methods of this yest sub continent. One of the greatest the present t attractions of India for the visitor is the great diversity to be found in every respect, mode of living, dress, food, language and religion In fact a traveller can never get bored You will find life in its most up to date form and next to it the customs and habits of a nation which have not changed for hundreds of years Life will surge past you in a picturesque procession. You will hear a medley of strange sounds—the tinkle of the temple bells, the throb of the drum, the chant of the 'muczzin' announcing that God is Almighty and Mohammed is he Prophet and the song of the Pandit consisting of character sketch of 'Rama' or 'Krishn' The tropical sup blazing like a ball of molten. The tropical sun blazing like a ball of molten gold in a turquoise sky, the silver moon saling across the purple vault of heaven will awaken in you feelings which you have never known If the visitor seeks variety and pictures queness, there is no region in all the world so full of vivid colour, of populous cities, of buildings designed by master architects, of bygone days, of diverse races, of absorbing subjects for study and observation such as the customs, religions, philosophy and art of one of the oldest civilisations

To the true lover of nature, the botanist and the naturalist, India can offer every charm in forest, mountain, valley, cultivated plain,

To the sportsman it can furnish sport such and wander awhile ab ut the g rdens where as few sountries can give th tiger in the you will find exquast glimps so I snowy forest the great masheer in many livers the structures so light and grateful that they seem will sipe in the lineds th tong will do rest on a of biosyant cupol and climbin duck the finkin pl, and many another kind campanille. Here is grander as well as beauty Jungle life in its ench with cally still calls The Tal Mahal I owever is only one of the visitor to the Sund Bans (the Fretty many interesting sights of Agar and its So t

The Taj Mahal lowever is only one of the many interesting sights of Agra and its Fo t Itmad ud Daulah Tomb Akb. rs Tomb 5 mile from Agr and Fatchpur Sikri the s ugges in zen i Tothe mountainec the Him hay offer the hin the mountaine the world and some of the few farmous peaks which are still under indeed the few farmous peaks which are still under indeed the few farmous peaks which are still under indeed the few farmous and mount five est still recorded titled to the still the few farmous peaks which are not not totall the few farmous peaks which are still the few

for by the G I I Rellway route y u will supply be meetin as: the skill f the Mochail and the meeting of the state of the s

in which are introduced verses from the Konar i In the main courtyard stands the famous pillar of solid wrought iron devoid of rust and dating back to about 400 A D Visitors to Delhi should not miss seeing the Kutab for it is unique in India

New Delhi, the eighth city of Delhi, is worthy to rank with its seven predecessors, Kutab, Siri, Tughlakabad, Jahanabad, Firozabad, Purana Qila and Shahjahanabad, the presentday Delhi Here you find an example of town planning carried out by some of the leading architects and engineers in the world on a site where they could start with a free hand

If you decide to take the route northwards from Bombay via Rajputana, then you will see another but equally interesting side of India Rajputana, the land of chivalry, attracts the visitor as few places do Alone at Udaipur is there, in its perfection, the fairy palace of one's childhood, just such a long cataract of marble terraces and halls falling into the waters of a mountain encircled lake, is the illustrator of an Andrew Lang fairy book delights to draw

Mount Abu, the Rajput Olympus, combines the delights of a hill station with one of the historic homes of the gods. The Dilwara Temples, the masterpiece of Jain architecture, contain some of the finest carvings in India Forests of marble columns, carved and polished till they resemble Chinese ivories, are linked by flying arches that twist and twine from pillar to pillar like exquisite creepers, softening outlines and producing the effect of a symphony of graceful movement

Northwards from Delhi is the Punjab and the North West Frontier Province whence most of the recruits for the Indian Army come Here you will find Amritsar, the home of the Sikhs, Lahore, one of the most ancient and famous cities of India, the Khyber Pass, the historic gateway into India from the North, the flourishing cities of the Canal Colonies which have risen up since British Engineers have harnessed the waters of the Punjab the Land of the Five Rivers" which formerly ran to waste and many another Through the Punjabalso you will travel to reach Kashmir, famous since the days of the Moghul Emperors

The glory of Amritsar is the Darbar Sahib Golden Temple) The pavements of the sacred tank are all of marble from Jaipur and the tank itself contains a sheet of water 510 feet square in the midst approached by a marble causeway, rises the Golden Temple, nearly cubical in form and decorated with wonderful richness

Lahore grew in importance with the dawn of Moghul supremacy when Babar, the founder of that dynasty, made it a place of Royal Residence, reminiscences of which are to be found to-day in the pleasure gardens, tombs, mosques and pavilions of Moghul architectural beauty which have won undying fame for that dvnastv here and elsewhere in India

Khyber Pass, the great natural highway into India through the almost impregnable mountain barrier of the North-West Frontier, is rich in historical association and has from time

hosts have passed into India to disturb the peace of her people and continually alter them destiny it is still the great trading route between India and the Central Asian States On Tuesdays and Fridays when the continual string of caravans of great shaggy camels laden merchandise, accompanied by stern, strong and picturesquely dressed men with their women and children from Central Asia are moving to and from Afghanistan, the pass presents a most interesting and unique sight

Kashmir, described by poets as "an emerald set in pearls" is a land of rich forests and upland pastures, of slow flowing rivers and glittering mountain torrents, ringed with an almost unbroken girdle of mountain snow capped all the year. capped all the year If you can imagine Venice set in the heart of Switzerland, that is Srinagar, Life is good as you the capital of Kashmir glide along the face of the lakes in a houseboat when the lotus flower is out and the banks are one mass of colour with the snow capped mountains in the background When days are warm on the lakes, a trip can be made up the valleys and you can live in Arcady and see the hear in his native haunts and the mountain does on the hill-tops

For those who have arrived at Delhi via Bombay an interesting return trip can be made via Benares and Calcutta Many visitors, however, enter India via Calcutta and from here also many interesting tours can be made

Calcutta, one of the first trading ports of the British East India Company in India, was founded by Job Charnock, it is now the second largest city in the Empire Its public buildings, the Indian museum, the Fort, the Jain Temple, the Hindu bathing ghats along the river front, the Hindu shrines par ticularly the 'Kali Temple' are all worthy of attention attention

Before winding your way towards Delhi, trips should be made to Darjeeling and to Puri The ambition of every visitor to Darjeeling is to see Mount Everest, the world's highest peak, and, in order to do so they must travel some 7 miles away, past Ghoom station to Tiger's Hill (8,514 ft) as from Darjeeling the mountain is not visible. The best time to see mountain is not visible. The best time to see sunrise on Mount Everest is in the early Spring or late Autumn. Then at the end you will find 2 view unequalled in any other part of the world Twelve peaks over 20,000 feet with the awe inspiring Kanchanjungha in the centre are spread out before you

Darjeeling is one of the meest hill stations in India and is unequalled for its snow view-From any where in the town you see the awe inspiring Kanchanjungha The sheer grandeur of the Kunchanjungha snows give Darjeeling a high place in the list of hill stations

Puri also is an easy run from Calcutta There in front of the gate of the temple is the famous black marble pillar, one of the most beautifully worked things in India with a tiny figure of the Incongruous as it may Dawn on its capitol Incongruous seem, in Puri all caste vanishes The signi ficance of this can be understood only by those who know India Once a year the image of immemorial been the route by which conquering | Krishna is carried in procession upon the

famous J gannath c rs to the Garden Temple These car 45 f t high standing on solid wooden wheels s en fe t in diam t r are dr gged alon by the devotees

Twenty miles north of Puri along the sea coast o 54 mil s by mot r road t ds the nique ch riot temple at Kon at the temple f Surya (The Sun God)

On the road to Delh the isitor will travel through the Gangetic plain one of the most fruitf I reas of Indi Her he will find c tles sacred to the Hindus such s Budh G y and Benares citis intimately connect d with the mutiny lik Lucknow and C wappor d other fi uri hing cities

The States should many wonderful seed it cannot I savel in India

do better than visit Mysore Elephants range throughout the southern forests and from time to time keddah operations are undertaken when wild elephants are captured in stockades Tigers, leopards and bears are numerous and bison are found in certain forests. The famous Gersoppa Falls present one of the most beautiful sights of wild untarnished nature to be found in India. Many of the temples contain examples of the finest carving, and Seringapatam famous as the capital of Tippu Sultan and about nine miles from Mysore is well worth a visit. For those who are travelling from Bombay to Colombo an interesting trip can be arranged via Mysore

At Madura and Trichinopoly will be found examples of some of the best and most interesting work in South India

Madura has been aptly described by European scholars as the "Athens of South India" and from time immemorial has been the abode of South Indian culture in all its aspects

It contains one of the finest and largest temples in South India and unlike many other temples the tourist is allowed to wander without restrictions over most of it. Near Shiva's shrine and in the hall (Mandapam as it is called in the Vernaular and Sanshrit) of a Thousand Pillars can be seen some of the finest carving in stone in all the world. The workmanship is so fine, the chiseling so delicate that one is lost in silent admiration as one looks at the representations of the Hindu Pantheon and at the graceful figures of men, women and animals

Trichinopoly is noted for its rock temple and about three miles away is Srirangam with its famous temple which is claimed as the earthly abode of Vishnu the Lord of Creation

Travancore, the most beautiful and fertile region in all southern India has many charms to offer the traveller within its domains. It has scenery ranging from a countryside of lakes, creeks and canals, to low hills, undulating land, nice fields and forests of cocoanut and arecapalms, with a heavy undergrowth of pepper vines and tapioca. The dominant note in Travancore is one of luxuriance in vegetation. It has a wonderful highland zone with mountains touching heights of from 5,000 feet to over 8,000 feet, and hills covered with the densest of virgin jungle, the home of great herds of wild elephants and bison, tiger, bear, black panther and wild boar, and where hes the lovely Perivar Lake over which one may cruise in comfort and see wild life in its natural habitat.

Irivandrum, the capital, is also accessible by well-kept roads from British India, and is connected by air with Bombay, Madras and Colombo, except during the monsoon

About seven miles south of Trivandrum Kovalam, a pleasant seaside resort with go facilities for bathing Cape Comorin, t Land's End of India, is the southernme roint of Travancore, where the sunrise and sum are magnificent sights. It is a sacred spot Hindus and a place of pilgrimage as the reput abode of Kanyakumari, the virgin Goddess whom the temple there is dedicated.

North of Trivandrum is the ancient town Quilon and to the north of this, a pleasant tr by boat along delightful backwaters or by c along a good motor road, is the busy scape of Alleppey

No one yearing Industrial mass the apports

of Alleppey No one visiting India should miss the opporti nity of seeing Burma for it is a country extraordinary charm, a country of contrast Whatever be your hobby, whatever be your u terest, be it sport, history, ethnology or botan or should you be merely fond of beautif scenery you will find a greater variety in Burn than in probably any other country can see huge snowy ranges and alps spangle with rhododendrons and flowers unknown t science You can find magnificent jungle almost impenetrable to man, bordering rushing torrents, or yet again you can see emeral green paddy fields and great winding rivers in the plains. Should you be adventurous an seek the wilder regions, you will find great gaps in the frontier unvisited by civilised means a peopled by head hunters. China Nagar. and the flerce Black Lisu Yet you will als find civilisation in the big cities like Rangoo and Maymyo Rangoon, the capital, is c special interest in that it possesses the famou Shwe Dagon Pagoda, the Sacred Golden Pagod visited by more pilgrims than any other Buddhis Temple in Indo China This short account of India is not intended t

This short account of India is not intended the comprehensive and does not even mention many of the interesting places to be visited but it is hoped that it will give some indication of the wonderful page-intry, the magnification buildings of an older age, the sport, and the many things of interest which India and Indialone can offer

December, January and February are the most pleasant months for a visit to India. The days are pleasantly cool and except on the seaboald the nights are cold. India speaking broadly has no winter except in the far north. It is a land of sunshine and colour. But the traveller arriving before. November, or staying in the country beyond the month of March must expect to find the tropical sun asserting its sway unless he wends his way to fair Kashmi or to one of the hill stations of India, Similathe summer capital of India, Darjeeling the delightful or one of the many others situated among the hills of India.

(8 000 ft)—From D rie ii g the hi_best
muchain peaks in the world can be the continued the part round that is it is the second of the pear round that is it is the received for the pear round that is it is the received for the pear round that is it is the received for the continued and round the received for the continued and round the received for the continued and round the received for the continued and round the received for the

The station has a mean annual rainfall of for renting and are willing to help visite about 65 inches, a major portion falling in the during their stay at the station months of October, November and December Pleasant showers are experienced during April, May and June, the season months and help to keep the station dust-free for parties and picnics Neither hot nor cold, Kodaikanal ever accords a warm welcome to every visitor seeking a holday, a haven of ease and comfort to recoup and rejuvenate, free from the heat of the plains Kodaikanal is the delight of the gardener Flowers bloom all the year round

Water-Supply —The town enjoys the benefit of an excellent water-supply from the Pambar stream which was dammed and converted into a reservoir in 1914 Within the last thirty years, there was not a single occasion on which the water was found to be chemically or bacteriolo-This is mainly due to the fact that the entire catchment area comprising 500 acres has been properly enclosed

Amenities - Kodaikanal affords a variety of exhilarating amusements to the tired visitor The lake is the chief attraction and is skirted by a three-mile road which provides excellent walks Overlooking the lake are the several residences The excellent golf course is popular during the season The many waterfalls make for ideal picnic resorts The "Fairy-falls" just below the Observatory, "Silver Cascades" on the Law, Ghat Road, "Bear Shola Falls" extremely pretty and a good place for picnics and "Glen Falls" on the way to Vilpatti, are some of the popular sights

Coaker's Walk (so named after a Lieutenant who was on duty in the district from 1870 to 1872) is a semi circular footpath, by the side of the English Church, which runs along the southern brink overlooking the plains. The southern brink overlooking the plains. The view from here is considered by many as unrivalled. On Coaler's Walk the visitor is alone with nature in its varied profusion Away in the hazy distance lies the ancient city of Madura and on the right the rugged face of the cliff known as the Dolphins Nose

"The Pillar Rocks" are three masses of gramte, some 400 feet high, which stand on the edge of the same side of the plateau as Coaker's walk but about three miles farther on They are reached by a fine road which runs through named because of each little Hamlet having its beautiful scenery well needed with process and beautiful scenery, well wooded with pines and eucalyptus and form a favourite rendezvous Between and below them are for picnic parties several caves and chasms into which the more adventurous can descend

Solar Observatory.—Crowning the heights of the Palpi Hills, and 850 feet higher than the lake is the Government Solar Observatory surrounded by beautiful fir plantations

Sport—The adventurous can find big game thin a few miles of Kodaikanal Riding within a few miles of Kodaikanal is not popular on the hills for lack of facilities The station is well Hiking finds many votaries equipped with the ordinary amenities of life

Kodaikanal Club is open to visitors are also the Boat Club, an Indian Club and a Hotels and travellers' bungalows Ladies Club are available. The Municipal authorities pub | Trom Pathankot to Manall, a distance of lish annually a list of bungalous available about 198 miles, the road is through well rooded

For those in quest of real rest, tonic air ar the company of serene nature there is no bett place in India than this lovely hill station

The latest addition to the roads on the hil is the Goschen Road popularly known as the "Forty-Miles-Round" leaving the municipal limits at Pillar Rocks to the Bernam lake an thence to Mannavanur and back to Kodaikana The Scenery throughout is of pleasing downs i contrast to the wooded areas in the vicinity c Kodaikanal

The South Indian Railway has opened a: Out Agency on the hills for through booking and transport of all descriptions of traffic between Kodaikanal Road station and the hills cum Road tickets to the Out Agency are issued from and to all stations in India and Ceylon A regular bus service connects all important trains at Kodaikanal Road station Pleasure cars can also be obtained on previous notice at about Rs 20 for each trip

KOTAGIRI.

It is about 14 miles from Coonoor and 18 miles from Ootacamund Motor buses run from Coonoor railway station daily in connection with the Mail trains and the road journey does not occupy more than an hour The bus fare is about ten to twelve annas per passenger for a single journey Cars are also available at about Rs 7 per trip or Rs 10 to and fro

Kotagiri stands, similar to Cooncor, on the lower ridge of the main plateau, but 500 feet higher than Coonoor and 800 feet below Ootaca mund Ooty, it thus enjoys a climate half way between that of Coonoor and Ootacamund—the mean day temperature being 62 degrees It is also visited by the north east monsoon and its rainfall is identical with that of Cooncor

There are not naturally the same facilities as at Coonoor or Ootacamund, but the natural surroundings are even more beautiful, and to those who seek rest and seclusion in a mild form it is an ideal resort

Hotel —Blue Mountain

KULU VALLEY.

own deity) is situated north of Simla and east of Kangra There is a fairly good motor road from Pathankot via Baljnath Paprola and on via Mandi through the Kulu Valley to Manali, where the road terminates and only a track is then available over the Rohtang Pass (13,500 ft) to Lahoul, thence to Leh and Ladhak

From Pathankot to Bujnath Paprola there It is a is also a small mountain railway running a long pull and a strong pull from the lake bund daily service, but the connection for passengers though only two miles in distance proceeding via Amritsar is not very satisfactory proceeding the Amritsar is not very satisfactory at the present time as the service is Inter and 3rd class only. It is cheaper and quicker to travel from Pathankot by hus—the fare Pathan lot Belianth. Paracles and lot Belianth. kot-Baijnath Paprola is less than Rs 4 per person

No other motorable roads into Kulu are available but the journey could be made by trekking from Simla and a few other centres

Trom Pathankot to Manall, a distance of

If m is.—The Valley is open the whole year and having a fairly temperate climate it can be vitted at any time. Climatically the best seasons are from April to May and from Au usto. October incl. ive. One of the main features that distinguish climate in the world and throughout the year Ootacamund from other hill stations is the it is very equable there being a variation of length of motorable roads it has The town about 10 degrees between night and day tem itself has the appearance of a vast park with its peratures. The mean rainfall approximates itself has the appearance of a vast park with its peratures. The mean rainful approximate broad well kept roads which traversed country of beautiful gardens and extensive stretches of turf studded with ornamental trees. The which is 2,100 feet above sea-level, is the ter Rotanical gardens in the contract the Paca Country of the pacaging the Botanical gardens in the centre, the Race Course. the palaces of the several noblemen, the Assembly from thence onwards the metre gauge take rooms and the Government House help to make its place, meandering to Simla through over 10

Madras for three months of the year from April to July Reached either by taking train to Mysore (40 hours from Bombay) and then changing to motor car for five hours, or by taking train to Mettupalayam Via Madras and thence by hill railway of Ootacamund

Ootacamund is a Sportsman's paradise where plenty of shooting is available. Trout fishing is a special attraction. It possesses one of the best golf courses in India and tournaments are held in May and September

The principal hotels are the Savoy and Cecil

PACHMARHI.

(3,500 ft)—Situated on a plateau in the Mahadeo Hulls of Satpura Range, is the summer quarters of the Government of the Central Provinces A delightful hot-weather health resort Reached by GIP railway to Pipariya Via Jubbulpore, and a two hours motor journey The best hotel is the Pachmarhi Hotel

SIMLA.

The summer headquarters of the Government of India (Central Government) and the Government of the Punjab, the General Headquarters and the Royal Navy, is situated on several small spurs of the lower Himalayas at a mean elevation of 7,100 feet above sea level. The Governor-General and C -in C are in residence in Simla from May to October every year.

From the beginning of October to about the as for as Narkunda middle of December, Simla enjoys the best lovely

minus for the road gauge railway system and the town attractive and cheerful The hydro-electric head works at Pykra is within 18 miles of Ootacamund and is worth a visit way and en route the scenery is superb with luxuriant follage, chiefly of confers, oak an rhododendron At Kalka motor cars are available. able for those who would prefer to travel b road and the journey is completed within 3 hours

There are several excellent hotels in Simla the Cecil, Corstorphans, Clarkes, Grand and fo orthodox Indians, Hindu, Muslim and Royal In Mashobra, 7 miles out of Simla, there are the Gables and Wild Flower Hotels Boarding houses are in the minority, the best known is Talbot House The YWCA and the YMCA hostels are open for the greater portion of the year

The climate of Simla may be divided into four seasons of about three months each quarter beginning with January, rough, snowy stormy and raw The second dry and sunny with gradually increasing dust and heat The third rainy, damp and relaxing The fourth bright, clear and bracing In May and June the average maximum temperature is about 78 In January and February the average minimum temperature is about 36 degrees

There is a very good road into the interior and hikers to Narkunda, Kotgarh and Rampur Bushahr are lodged in rest houses that line the From Simla there are 2 routes to Mus soone a distance of 145 miles and little difficulty is experienced for accommodation en route; permission to occupy Dak bungalows and Forest Rest Houses must be obtained from the officials concerned

There are also direct routes to Tibbet, Srinagat, (Kashmir) and Dalhousie, and motor vehicles are permitted to ply by the Municipality on a pass The scenery en route is

CLIMBING IN THE HIMALAYAS.

Owing to their immensity and the time and and K2, both about 28,150 ft, though which cost involved in undertaking expeditions into is the higher of the two is not certain the Himalayas a great deal of mountaineering and exploration remains to be done in the world's highest mountain range There are over fifty summits of 25,000 ft and of these only two, Kamet (25,447 ft) and Nanda Devi (25,660 ft)

Pioneer Climbers — Mountaineering in the Himalayas began some eighty years ago when surveyors crossed high passes and scaled peaking the source of the sourc in the course of their work Among these pioneers must be mentioned the Schlagmtwell have been scaled, whilst there are innumerable lesser summits of such formidable difficulty, owing to the comparatively recent geological formation of the range, that judged by modern mountaineering standards the majority are inaccessible. The highest peak is Mount Everest, which by latest measurements is 29,141 ft. Next come Kanchenjunga process must be mentioned the Schlagmand in 1855 reached a height of 22,329 ft on the Eastern Ibi Gamin, one of the subsidiary peaks of Kamet, whilst I S plane table at 22,040 ft ja the same district plane table at 22,040 ft ja the same district plane table at 22,040 ft ja the same district plane table at 22,040 ft ja the same district plane table at 29,141 ft. The pre ent century opened w the anumber of the third of third of the third of the third of the third of the third of the th

The 1933 expedition established its base in the Rongbuk Valley on April 17th and on April 21st Camp I was established Thenceforward the expedition was dogged by exceptionally bad pre monsoon weather which greatly hindered the establishment of camps and made the ascent to the North Col 23,000 ft prolonged and arduous work Camp IV, 22,800 ft was not established until the middle of May after a 40 feet ice wall on the North Col slopes had been climbed The expedition was equipped with wireless which enabled weather reports to be received from the meteorological authorities at Alipore One installation was at Darjeeling, one at the base camp and a third at Camp III, 21,000 ft Camp III was linked to the North Col by field telephone so that messages could be received up to 23,000 ft from the plains of India in a short space of time

Owing to a series of blizzards and high winds Camp V was not established until May 22nd But it was pitched at 25,500 ft several hundred feet higher than previously The party was then cut off for three days by a furious blizzard and eiventually had to retreat to Camp IV. The Camp was re established on May 28th and on May 29th Wyn Harris, L Wager and J L Longland continued the ascent and finally pitched Camp VI at 27,400 ft, 600 ft higher than in 1924, after a magnificent effort on the part of the porters Longland then brought the porters down but had a terrible time in a blizzard and only by exercising great mountaineering skill steered them down to Camp V The following morning Wyn Harris and Wager made a reconnaissance of the route to the summit and failing to discover a route along the crest of the north east ridge finally followed the same route as Norton in 1924 They were stoppedby dangerous conditions at 28,100 ft and returned to Camp VI where they met Shipton and Smythe who had come up from Camp V, after which they descended to Camp V The following morning Shipton and Smythe were unable to leave Camp VI owing to a ligh wind but on June 1st they made their attempt on the summit

An hour and a half after leaving the Camp Shipton had to return owing to some internal trouble. Smythe carried on alone and reached approximately the same point as Wyn Harris and Wager before he was forced to retreat owing to the deep powdery snow resting on the steep slabs. Shipton descended to Camp V the same day in very bad weather and Smythe spent a third night at Camp VI descending to Camp IV next day in a blizzard. Owing to frostbites, strained hearts, and high altitude deterioration the party had to retire to the base camp. A week later they returned to Camp III to make another attempt. Owing, however, to the breaking of the monsoon this had to be abandoned and the expedition returned to Darjeeling.

An extraordinary attempt to climb Everest was made in 1934 by Maurice Wilson, a young airman Having penetrated Tibet in disguise he marched to Everest and with a few porters went on in reaching 21,000 feet. He then succeeded alone and nothing more was heard of him, until his body was discovered near the site of Camp III, 21,000 feet, by Mr E. Shipton's party in 1935.

Early in 1935 the Tibetan Government granted permission for a further attempt to take place from June 1935 to June 1936 inclusive

As there was no time to organise an attempt on the summit it was decided to send out a small party under the leadership of Mr E E Shipton This had as its objects Collection of data as to monsoon snow and weather conditions, ex amination of alternative routes from the west, the trying out of new men for the summit attempt, physiological observations, a sterio photogrammetric survey, examination of ice formations on the North Col

This expedition proved that Everest cannot be ascended during the monsoon and that the only hope of an ascent is during the period immediately before the monsoon

Conditions during the monsoon are extremely dangerous and the party had a narrow escap from an enormous avalanche that fell from the slopes of the North Col

During the course of this reconnaissance two dozen peaks over 20,000 feet high were ascended

The 1936 expedition was led by Mr Hugh Ruttledge and included three of the 1933 climbers Messrs Shipton, Smythe and Wyn Harris, and one of the 1933 Signals Officers Lieut Smith It encountered exceptionally bad Windham weather and unusual conditions Before the monsoon, snowstorms rendered the mountain unclimbable and the usual pre-monsoon northwest wind was lacking to clear the snow away However, Camp IV on the North Col was established to schedule and the party were in position to attack the summit when the weather broke and two feet of snow forced them to retreat down the dangerous slopes of the North Col To cap their discomfiture the monsoon arrived on the exceptionally early date of May 24th Two attempts were made to re open the route to the North Col but on both occasions the party were in great danger and the attempt had to be abandoned when Shipton and Wyn Harris were carried down by an avalanche and nearly lost their lives Subsequently reconnais ance parties ascended the main Rongbuk glacier and examined the west side of the North Col which, in spite of Mallory's unfavourable verdict, was found to be not only practi le but less dangerous in monsoon conditions than the east

The 1938 expedition consisted of seven climbers, H W Tilman, E E Shipton, F S Smythe, N E Odell, Dr C B M Warren, P Lloyd and Capt P R Oliver and was led by Mr Tilman It was considerably smaller than previous expeditions owing to economic reasons and because experience has shown that the small light expedition has as good and perhaps better chance of achieving its object than a large cumbersome expedition rendered comparatively immobile by its transport and tied down to a fixed plan Though the expedition falled to reach the summit of Mount Everest it fully justified these beliefs and cost only £2,500 as against the £10,000 or more of previous Everest expeditions

The expedition reached Rongbul on April 6th and established Camp 3 on April 26th Wind and cold made further advance impossible

middle of May during the commencement of the before they attained success monsoon which broke on the unprecedented date of May 5th one month to six weeks earlier than usual Th route up the North Col was fo ced in dangerous snow conditions and the party had a narrow escape from an av lanche Camp 4 was established on May 24th but enowstorms drove the p rty down. It was then d cided to regain the North Col from the west vi the Main Rongbuk Glacier and Camp 4 wa re established after a difficult ice climb on June 5th On June 8th Camp 6 was established by Shipton and Smythe with seven porters and the foll wing day an attempt was made to reach the summit way an accumpt was made to reach the summit Conditions however proved impossible owing to deep monaton snow and the party was fo ced to retreat after reaching a height of 7300 ft A further attempt by Tilman and Lloyd on June 11th m t with no more success and the expedition had to be abandoned

expedition had to be abandoned

discovery of the route to the Nanda Devi basin ed by bad weather They also explored an Anglo-American party, the leader of which was Mr H W Tilman, successfully scaled Nanda Devi via its south west ridge, Messrs H W of the Survey of India In addition, Mr Smythe Devi via its south west ridge, Messrs H W Tilman and N E Odell being the climbers to reach the summit This expedition was remarkable in that owing to the sickness of the porters the climbers had to carry their own camps up the mountain This is the finest and most difficult peak yet climbed in the Himalayas

In 1939 the first Polish expedition to visit the Himalayas succeeded in making the ascent of the East Peak of Nanda Devi Unfortunately an accident led to the death of M. M. A. Karpinski and S. Bernadzikiewicz on Trisul above the Milam Glacier

Lt -Col C F Stochr, RE, and Lt D M Burn, RE, lost their lives on 12th August 1932, while climbing on Panitarni, near Pahlgam in Kashmir

In 1935 an attempt to scale Peak 3,625,400 feet, in the western Karakorams, was made by Lieut J Waller, Lieut J Hunt, Dr J S Carslaw and W R Brotherhood, R A F A series of bliz zards were experienced but the party reached a height estimated as 24,500 feet. There is no great difficulty between this point and the summit

In the Autumn of 1935 the summit of Kabru was reached by Mr C R Cooke who was accompanied to the foot of the final rocks by Mr G Schoberth who was forced to give up owing to a high altitude, cough and the risk of frostbite This ascent was made on November 18th, an unusually late date and is of great interest as proving that high Himalayan peaks can be climbed in early winter at least

The 1936 French expedition to the Karakorams, like the Everest expedition, encountered very bad weather and accomplished little

After Nanda Devi the most remarkable ascent of 1936 was that of Smiolchu, a peak once designated as the "embodiment of inaccessibi-, in the Kanchenjunga range made by a small German party under the leader ship of Herr Paul Bauer Simolchu is one of the most beautiful peaks in the Himaliyas

In 1939, a party of Munich mountaineers, consisting of Herren Grob, Paidar and Schmaderer, made the first ascent of the Tent Peak in the Kangchenjunga range and attempted the Twins Peak but were defeated by bad weather

Other ascents in Sikkim were made by Mr Marco Pallis's party who attempted Simvu unsuccessfully and by Mr C R Cooke and Mr F Spencer Chapman who ascended several peaks of over 20,000 feet including the Fluted Peak

During the summer of 1937 a number of peaks were climbed, the most notable being Chomolhari 23,997 ft by Mr F Spencer Chapman with one porter, and the Mana Peak 23,860 ft by Captain P R Oliver and Mr F S Smythe The latter completing the agent alone as Cart Oliver was insential of the second state. on Nilhanta and Dunagiri which were frustrat-lassistant Surveyor-General

with three Tibetan porters climbed seven peaks of the Zaskar Range among them the very difficult peak of Nilgiri Parbat, 21,264 ft During this expedition Mr Smythe came upor some remarkable tracks in the snow which the Tibetan porters believed were made by a Mirks or Abominable Snow Man These tracks were afterwards identified as bear tracks by the Natural History authorities in London It is believed that there is now enough evidence to explain this strange legend of the Himalayas

Garhwal was visited in 1939 by a Swiss expedition led by M. Andre Roch and two fine peaks were scaled, Dunagiri and the Wedge Peak

In 1938 Mr C S Houston led an expedition the Karakoram during the course of which a bold and determined attempt was made to climb K2, 28,150 ft After failure to obtain a footing on the N W ridge, the party, which included several veteran Sherpa porters, ascended the N E ridge to a height of 20,000 ft

A further attempt on K2 was made by an American party in 1939 but ended in disaster, Mr Dudley Wolfe, and three Sherpa porters losing their lives in stormy weather high up the mountain

Another expedition to the Karakorams was that undertaken by Capt J B Harrison, Lieut J O M Roberts, Mr R A Hodgkin, Dr T Graham Brown and Lieut J Waller together with Dr G A J Teasdale and Dr Elizabeth Teasdale The principal objective was Masherbrum, 25,660 ft After establishing Camp 7 at 24,600 ft Harrison and Hodgkin reached a height of about 25,000 ft before being forced to retreat by bad weather In descending to Camp 6 they were overtaken by a blizzard and forced to spend a night in the open as the result of which they were seriously frostbitten devotion of the Sherpa porters prevented a more serious disaster

exploration of the Badrinath, Further Kedarnath ranges at the sources of the Ganges as well as various ascents was made by a German expedition under the leadership of Dr R Schwarzgruber in the autumn of 1938

The Survey of India are now very active and much work has been accomplished during the re-survey of Garhwal and Kumaon under the direction of Major Gordon Osmaston, whilst several thousand square miles of country have been mapped by Messrs Shipton and Tilman during their expeditions to the Shaksgam in 1937 by Mr Shipton during his expedition to the Karakoram in 1939

The Himalayan Club was founded on 17th February 1928, at New Delhi with the object of Spencer Chapman with one porter, and the and Mana Peak 23,860 ft by Captain P B Oliver and Mana Peak 23,860 ft by Captain P B Oliver the ascent alone as Capt Oliver was insufficiently acclimatised Three other peaks of 21 400 ft, 121,500 ft and 22,481 ft were also climbed by Messrs Oliver and Smythe and attempts made Messrs Oliver and Smythe and attempts made India, and to Major Kenneth Mason, M C, R E, on Nilkanta and Dunagiri which were frustrat-

Freemasonry in India

In 1728 a dispensation was granted by the Gr nd Lodge of England to Geo Comfret authorising him to open a new Lodge in Ben gal Of his personag nothing further is known but under C pt. Farwinter who in the following year succeeded him as Fryincial Grand Master of India a Lodge was established in 1730 which in the Engraved Lists is distinguished by the arms of the East India Company and is describ-The next Pro inclai Grand Masters were James The next PTO Incisi Grand Masters were James Dawson and Zeeh Gee who h id office in 1740 after whom came the Hon Roger Drake appointed 10th April 1755 The last named was Governor of Calcutta at the time of the attack m de on the settlement by Surajah Dowl h in 1755 Drake missed the horror of the Black Hole by escaping and was accused of deserting his post but though present at the rotaking of Calcutta by Admiral Watson and Chive it is im probable that he resumed the duties of his settlement

The minutes of the Grand Lodge inform us that William Mackett Provi cial Grand Master of Calcutta was present at the meeting of that body November 17 1750 and we learn on the body November 17 1760 and we lear on tube same authority that at the request of the Lodges in the East Indica Culin Smith was p pointed P G M in 1762 At this period it was the cuttom in Bengal to elect the Provincial Grand Muster an ually by the majority of the Grand Master an usily by the majority of the votes of the members present from amongst shoss who passed through the different offices of the (Prov) Grand Lodge and who had served as Dep Prov Gra d Master This samu lelection bee 1700 7 oftand Acoge and who and ceveral as the per frow for disaster. of "Orion' secoded and formed the "Lodge now bears No 338 on the Register of Scotland 208 of annot to only " ago it

Here 'Orion' unrecognized at home, aided Hourished, and English Masonry declined until the in the secession of some of its members who year 1818 when a Lodge of George No 549 on the obtained a warrant, on the recommendation of the Parent Louise from the Grand Louise of England formed at Bombay, and for some years was the Iwo years later it was discovered that no noti solitary representative of English Masonry in fleation of the existence of "Orion-in-the West" the Province In 1844 Burnes established a the vistable of "Orion-in-the West" the Province In 1844 Burnes established a had reached lengland, nor had any fees been louding quarterages had been paid into the Provincial Grand Lodge, the result of which is seen at the present day. Coast of Coromandel 1t was further ascertained that in granting a warrant for a Bombay Lodge by the initiation of Umdat-ul-Umra has borne the Provincial Grand Master of Coromandel fruit resulting in the initiation of thousands of had exceeded his powers Ultimately a new Indian gentlemen of all castes and creeds, and warrant No 598 was granted as already stated in 1833 Lodge "Perseverance" was started in Bombay No 818 in 1828 Up to this time the Jurisdiction of the Grand Lodge of England in India had not been invaded, but in 1836 Dr James Burnes was appointed by the Grand Lodge of Scotland P G M of Western India and its No Provincial Grand Lodge however was formed until 1st January 1838 A ed Grand Lodge of England, the Grand Lodge of second Scottish Province of Eastern India was Ireland and the Grand Lodge of Scotland hold started which on the retirement of the Marquis of jurisdiction in India By far the largest is the Tweedale was absorbed within the jurisdiction first, the next largest is the third and the number of Dr Burnes, who in 1846 became Provincial of Lodges under Ireland is as yet small The Grand Master for all India (including Aden) but Grand Lodge of England divides its rule under with the proviso, that this appointment was not to act in restraint of any future sub-division of the Presidencies Burnes may be best described as being in 1836 in ecclesiastical phrase as a Provincial Grand Master "in partibus infidelium" for whatever Lodges then existed throughout the length and breadth of India were strangers to Scottish Masonry But the times were pro-pitious There was no English Provincial Grand Lodge in Bombay and the Chevalier Burnes, whom nature had endowed with all the qualities requisite for Masonic Administration, soon got 36 to work and presented such attractions to Scottish Freemasonry that the strange sight was witnessed of Lnblish Masons deserting their mother Lodges, to such an extent that these fell into abevance, in order to give support to Lodges 34 newly constituted under the Grand Lodge of Scotland In one case, indeed, a Lodge "Perseverance" under England went over bodlly to Scotland, with its name, jewels furniture, and belongings, and the charge was accepted by

crace of its existence in 1979 the civilian element 1 Scotland — This longe stri exists in hompay and From this period, therefore, Scottish Masonry Rolls of the Grand Lodge of England was again Thus the seed planted at Trichinopoly in 1774 which has gone far to establishing that mutual trust between West and East a distinguishing, characteristic or Speculative Freemasonry A Provincial Grand Lodge was re established in Bombay in 1860, and converted into a District Grant Lodge in 1861

The Grand Lodge of England—All three Constitutions of the United Kingdom, the United Grand Lodge of England, the Grand Lodge of Grand Lodge of England divides its rule under Five District Grand Masters independent of each other and directly subordinate to the Grand Master of England by whom they are appointed

Scientific Surveys

Zoological Survey of India—It wa ystematic collections since 1814 Organised to the din 1916 when the Zoologi al and on gir it vestig tion in India has hins been in Anthropological is at on other than 1916 when the late of

are to Investigate the fauna of India, to maintain the National Zoological collections of India and to arrange and preserve the Zoological and Anthropological galleries of the Indian Museum In addition the Survey issues two series of publications upon Zoological research, namely The Records and Memoirs of the Indian Museum and an Anthropological work entitled "Anthropological Bulletins from The Zoological Suriey of India" The headquarters of the Survey are at present temporarily located at Penergy Contt. located at Benares Cantt

Botanical Survey -The Botanical Survey department of the Government of India was under the control of a Director The Superintendent of the Royal Botanic Garden, Calcutta was ex officio Director The Director having retired since December 3, 1939, the Department The duties is awaiting some reorganisation of the Director are distributed amongst (1) Dr K P Biswas, MA, DSc (Edin), FRSE, Superintendent, Royal Botanic Garden, Calcutta, (11) S C Sen, B Sc (Cal), B A (Cantab), A M I Chem E, Superintendent, Cinchona Bengal and Principal Quinine Officer of the Government of India, and (111) S N Bal, MSC, Ph C, Curator, Industrial Section, Indian Museum There is a staff at headquarters of one officer for systematic work and at the Indian Museum a Curator who is engaged in the development and maintenance of the Industrial Section The Director held administrative charge of the Government of India's cinchona distribution in India

The existence of the Botanical Survey, like that of the Geological Survey, has both a cul tural and an economic justification On general grounds # is obvious that a progressive Government should acquaint itself with the vegetable resources of the area it administers, and although apart from the cinchona operations, the activities of the Survey cannot be said to have much immediate economic applicability—consisting as they do of investigations and researches into the systematics, limnology, distribution of plants, ecology and economic botany of plantlife -the work accomplished in pure and applied botany at the Royal Botanic Garden during the last century and a half has exercised a profound and far-reaching influence upon the develop-ment of Agricultural Science and Forestry in The irreplaceable dried plant materials obtained by botanical explorations and preserved for more than one hundred and fifty six years at the Herbarium of the Royal Botanic Garden, Calcutta, and several thousands of indigenous and exotic trees, shrubs and herbs cultivated in the open, prove to be most useful in dealing with such questions of considerable State importance as naturalisation of useful plants, introduction of new vegetable products into the country, the adaption of raw produce to the requirements of manufacturing industry, land utilisation, preservation of rural areas, provision of national parks, drainage, sanitation and public health

Survey of India —The first authoritative earth's crust, which have recently led to a remap of India was published by D'Anville in consideration of the whole theory of isostasy

been such well known members as Anderson, Wood Mason, Alcock and Annandale

The Survey is unique in that all its officers are Indians

The main functions of the Survey travellers and rough chart of the coast.

The Survey of India may be said to have been founded in 1767—ten years after the battle of Plassey-when Lord Clive formally appointed MajorJames Rennell the first Surveyor General of Bengal, at that time the most important of the East India Company's possessions, though there were earlier settlements in Madras and Bombay

Rennell's maps were originally military reconnaissances and latterly chained surveys based on astronomically fixed points, and do not pretend to the accuracy of modern maps of India based on the rigid system of triangulation commenced at Madras in 1802 and since extended over and beyond India Even now, however, the relative accuracy of these old maps makes them valuable in legal disputes, as for instance in proving that the holding of a Bengal landowner was a river area at the time of the Permanent Settlement of 1793, so that he is debarred from its benefits

From these beginnings, this department has gradually become primarily responsible for all topographical surveys, explorations and the maintenance of geographical maps of the greater part of Southern Asia, and also for geodetic work

Geodesy means the investigation of the size, shape and structure of the earth, and the geodetic work of the department consists of primary (or geodetic) triangulation, latitude, longitude and gravity determinations From these the "figure" of the earth is obtained, whereby points fixed by triangulation can be accurately located on its curved surface This system of fixed points holds together all topo graphical and revenue surveys, and the existence of such a system from the early days of the department has avoided the embarrassments caused in other countries where isolated topo graphical surveys have been started without a rigid framework, with the inevitable result that they could not be fitted together

A geodetic framework is, therefore, essential in any large survey, but there are a number of other activities, all of them ultimately utilitarian which can be suitably combined with its execu tion, and the following are some of those which are carried out in India

Precise levelling for the determination of heights.

Tidal predictions and publication of Tide Tables between Suez and for thirty-nine ports between Suez and Singapore, but due to the war, all Geodetic activities not directly related to the war have been suspended

The Magnetic survey, Observation of the direction and force of gravity,

determine Astronomical observations to latitude, longitude and time,

Seismographic and meteorological observations at Dehra Dun

Indian geodesy has disclosed widespread anomalies of gravitational attraction in the earth's crust, which have recently led to a re

Though revenue survey is primarily a record of individ al property boundari sand is u con cerned with the urface f atures gr und levels and exact geographical position es ential to a topographical survey it was on the whole found

ec nomical to carry out both surveys together By 1905 however all the Provinces had taken over the revenue surveys for which they h d alw ys p id and the Survey of India w s e abled to conce trate its energy es on a complete new a ries of modern topographical m p several colours on the 1 luch to 1 mile scale recommended by a commission which a t that time to consider the exi ting map of India

This new se les had been rend red nec ssary by the natural demand for more detailed infor mation to be shown on map especially as r gard the portray 1 of hill features by contours and proper classification of communications

While some of the unsur eyed plac s are in rem te tracts like the Naga hill of A am and th high Him lays most ar acce ibl Larg area in Easte n Bengal North Bih r South Bombay Guirat Sind and W stern Rajputans

have yet to be mapped on modern lin s The a tiviti s of the S rvey of India hav gon beyond the borde of India in the p st y pal to instan was su vey d and m ; at the request of the local authorities in 19 was su vey dand m pp d

for the prosecution and assistance of research, the propagation of knowledge and experimental measures generally in connection with the to the Scientific Advisory Board. The Board causation, mode of spread and prevention of has recently appointed a Clinical Research communicable diseases The Association can claim to be amongst the pioneers in organised medical research on a large scale and its work has been widely appreciated in other countries

The control and management of the Association are vested in a Governing Body, the President of which is the Member in charge of the Department of Education, Health and Lands of the Government of India This body is assisted by a Scientific Advisory Board of which not less than three members have seats on the Governing Body The Director-General, Indian Medical Service, is the Chairman of the Board and the Public Health Commissioner with the Government of India is the Secretary of the Board and of the Governing Body Membership of the Association is open to non-Lvery donor of Rs 5,000 is entitled to become a permanent life member, while every able from Messrs Thacker Spink & Co, 3, subscriber of Rs 100 per annum can be a Esplanade East, Calcutta, on payment become a permanent life member, while every temporary member

The original Governing Body of the Association was. until 1929, composed exclusively of officials, but in that year the Raja of Parlakimedi made a donation of Rs 1,00,000 to the Association and was appointed a life member In the same year the Government of India, after taking into consideration the question of liberalising the constitution of the Governing Body, decided to enlarge it by including three representatives of the Indian Legislature, two representatives of Medical Faculties of Universities incorporated by law in India and one eminent non medical scientist to be nominated by the Governor-General As a result of further representations from the Universities and the Legislature, this Body was again enlarged in 1933 by the addition of a third representative of the Medical Faculties of Indian Universities, whilst it was decided that the non medical scientist should in future be elected by the Indian Science Congress Association

A Recruitment and Appointments Board has been formed from amongst the members of the Governing Body of the Association to select and recommend officers for appointment in the Medical Research Department and the All-India Institute of Hygiene and Public Health, Calcutta

In order to ensure the closest co operation between workers and to prevent overlapping of efforts, an annual conference of medical research workers and administrative heads of Medical and Public Health Departments used to be convened under the auspices of the Association up to 1938 (In that year it was decided that the Conference should be held biennially in future No Conference has, however, been held since nor is one to be held in 1944 on account of the war) At this conference free discussions were held on the work ference free discussions were held on the work accomplished and on proposals for future work. The results of the discussions enabled the members of the Scientific Advisory Board to make their recommendations for the programme for the following year. The Board is assisted.

The Association maintains the Nutrition Laboratories at Cooncor, which carry out investigations which have a direct bearing on the problem of nutrition in India. The diet surveys undertaken by the laboratories have provided very valuable information as

The Indian Research Fund Association—by Advisory Committees consisting of workers This Association was constituted in 1911 with on more important items of research, eg, a sum of Rs 5,00,000 set aside as an endowment choicer, malaria, maternal mortality, nutrition and plague, who examine the proposals for research work and make recommendations Advisory Committee to draw up a plan for the development of clinical research in India The Scientific Advisory Board annually pub lishes a technical report describing the research work done on the various enquiries carried out under the auspices of the Association during This report is obtainable each calendar year from the office of the Secretary, Governing Body, Indian Research Fund Association, Secretariat, New Delhi on payment

The results of researches carried out under The Director-General, Indian is the Chairman of the Board in the "Indian Journal of Medical Research and its "Memoirs" and the "Journal of the Malaria Institute of India," all of which are not of the Governing Body he Association is open to non- and have now a firmly established position in the constitued to a constituent of the Association and have now a firmly established position in the constituent of the Association and have now a firmly established position in the constituent of the Association are obtain. scientific world These publications are obtain

> Since the inception of the Association a large number of enquiries have been carried out and from small beginnings great expansion of its activities has taken place Enquiries which have been, or are, in progress include investigations on cholera, bacteriophage, malaria, nutrition, leprosy, plague, vaccines, tuberculosis, pharmacology, indigenous drugs, maternal mortality, belighted leave and leave and leave are trained and the second drugs and the second drugs are trained and the second drugs are trained and the second drugs are trained and the second drugs are trained and the second drugs are trained and the second drugs are trained and the second drugs are trained and the second drugs are trained and the second drugs are trained as the second tality, helminthology, medical mycology, dra contiasis and filariasis, protozoal parasites cancer, epidemic dropsy, kala azar, dried blood plasma, sandfly fever, typhus, bacillary dysentery, snake venoms, fluorosis, etc

> Besides financing investigations which are conducted by workers in its direct employment, the Association gives grants in aid to institutions and also to outside workers. The ex penditure for the last few years has amounted to between seven and eight lakhs of rupees per The Association has been supporting annum the Malaria Institute of India, which now enjoys international recognition The Association also maintains the Southern India Branch of the Malaria Institute of India at Coonoor, which was previously financed by the Rockefeller Foundation As a part of the activities of this organisation and in commemoration of Sir Ronald Ross sustained association with India. Ronald Ross's intimate association with India, an experimental malaria station was opened in Karnal in January, 1927, and named the 'Ross Field Experimental Station for Malaria" This was transferred to Delhi on 1st March, Besides carrying out experiments in connection with the prevention of malaria, annual classes are held at which candidates from all over India are shown the latest methods for dealing with the malaria problem The Public Health Section of the Institute has been taken over by Government since April, 1940

Proving of Wills

Every year, before the programme of the Thus, to cater for the mineral industry field surveys is decided upon, the Provincial the Geological Survey of India publishes Governments are asked to give details of geological investigations, mineral surveys or engineering enquiries which they desire to have carried out Such definite programmes of fieldwork may also cover the Indian States, and may be carried out free of charge If, however, any special problem has to be dealt with which does not come under the regular programme of the Department (e g, a mineral survey of a particular area, an enquiry connected with a particular engineering project, or short-term investigations involving specialised geolo gical knowledge), a charge may be made for the services of the officers deputed for such work

The results of the investigations and researches of the Department are published in-

- Records of the Geological Survey of India, which includes the Annual Reports, Annual Mineral Review, and short papers One volume of 4 parts is published annually Every 5 years, a Quinquen-nial Review of the Mineral Production of India, is published as a separate volume of the Records
- Memoirs of the Geological Survey of India, each volume dealing in detail with a particular area
- (111) Palaeontologia Indica, which deals entirely with palaeontological matters

As a part of the Records, a series of Bulletins on particular minerals have been published in recent years. These Bulletins are intended to summarise the geological information available in India on commercial minerals As each edition goes out of print, these Bulletins will formed with a view to providing geological information and advice for the Allied Forces

- An Annual Remew of Mineral Production the contents are mainly productio statistics relating to the previous year
- A Quinquennial Review of the Mineral Production of India, giving a review of the trend of the industry during th (b)past 5 years
- (c) Bulletins, summarising geological know on mineral occurrences—the Bulleting are of longer term interes than (a) and (b)

During the War, publication of the Record (except Bulletins) and Memoirs has been suspended, but will, it is hoped, be resumed in the near future

The advice of the Geological Survey of India is taken by the Central Government and other on all questions of mineral policy. To encourage and assist the teaching of geology in classes and colleges, the Department presents collection of minerals, rocks and fossils and gives lecture to students and at times to the public with s view to popularising the study of geology

geological functions of the Mineral Utilisation Branch of the Department, which was established as a war measure, are being taken over by the newly created Mineral Development Circle

PROVING OF WILLS.

always advisable to prove the Will as early as possible If the Will is in a vernacular, it has to be officially translated into English A petition is then prepared praying for the grant of probate of the Will All the property left by the deceased has to be disclosed in a schedule to be appeared to the petition. Values must be to be annexed to the petition Values must be shewn as at the date of the Petition and Probate gage encumbrances Fees will be calculated on such value The Values of immoveable properties are usually assessed at 16% years' purchase on the nett Municipal assessment, in the absence of a report from a competent architect

Scale of Probate Duty -- Up to Rs 1,000--Nil For the next Rs 9,000 (10 upto Rs 10,000), 2 per cent, for the next Rs 40,000 (10 upto Rs 50,000) 3 per cent, for the next Rs 50,000 (10 upto Rs 1,00,000) 4 per cent, for the next Rs 50,000 (10 upto Rs 2,00,000) 4 per cent, for the next Rs 50,000 (10 upto Rs 2,00,000) (10 upto Rs 2,00,

In British India if a person has been appointed (or the portion over Rs 5,00,000) 7 per cent executor of the Will of a deceased person, it is In addition to this Probate Duty there is, at present, a surcharge of 25%

Exemptions from Probate Duty—In determining the amount of the value of the estate for the purposes of probate duty the following items are allowed to be deducted

Debts left by the deceased including mort

The amount of funeral expenses

3 Property held by the deceased in trust and not beneficially or with general power to confer a beneficial interest

In addition, there is general exemption for service personnel killed in action or dying on

I properly accords gly In certain cases the to accept or renounce the executorship but Court requires citations to be published and when one or more of several executors have serv do nature persons as the Court thinks reproved the Will the Court my on the death interested in the question of the grant of prob te If n objection is lodged by any person so interested within the time mentioned in the citation ested within the time mentioned in the citation to the effect in the noise should be done in the matt r of the petition for probate without the case of the petition for probate without the checkled language the ave tor and if the will is shown to have be n properly executed probate is ordered to be granted. If an objection or caveat is filed the petition for probate is converted into a suit in which the petitioner. is plaintiff and the caveator is the defendant

recorded from this region (April 1843) From the apex of the Peninsula to Madras, however, runs a region of minor shocks, probably connected with some dislocation in the earth's crust, though there is no direct evidence of this These three units, then, constitute regions of decreasing intensity of earthquakes as we travel from north to south They are indicated on the accompanying map, which is essentially the same as the one prepared by W D West of the Geological Survey of India

Causes —It will be unnecessary to go into the origin of the individual earthquakes, but a few remarks on the main causes of these phenomena will be illuminating While minor earthquakes may be due to volcanic activity, the major ones are almost invariably the result of movement along dislocations in the earth's crust or "faults" as the geologists call them, and thrust planes In the case of thrust planes certain sets of rocks override others, instead of being merely dislocated The epicentre, that is the place of maximum intensity, frequently coincides with these faults or thrust planes, which proves that a close relationship exists between earthquakes and the dislocations A number of important faults run close to the southern edge of the Himalayas and the Himalayan foot is therefore a very unstable region A similar fault runs along the foot of the Shan Plateau in Burma while the Kyaukkyan fault runs north and south in the Northern Shan States, and has probably given rise to earthquakes It may, however, be pointed out that it is only such 'faults' as are still active that give rise to earthquakes Thus the faults in the Peninsular area appear to be inert and there fore few earthquakes occur there Although the immediate cause of the shocks may be movement along a fault or faults, the ultimate cause is often the rapid denudation of steep ranges, which upsets the equilibrium of the earth (Kangra, 1905) in the readjustment of which these move There is, however, no consensus of ments occur opinion on this point for in Norway, where the steep mountain ranges are subject to rapid denudation, there are no earthquakes. The cause may be more deep seated as, for example differential cooling and contraction of the earth's interior The same result is achieved by the slip ping of large alluvial masses in deltaic areas or their uplift owing to tectonic forces (Rangoon Dec 1927) The regions where mountain ranges, take sharp bends, being highly folded, are naturally areas of pent up strains seeking relief and are therefore zones of great danger. The violent Quetta earthquake of 1935 and the earlier ones of Mach and Sharigh (1931) were of this nature, for these places he near sharp bends in the Suleiman, Bugti or Kirthar ranges

Frequently more than one cause contributes to these earthquakes and the results are then even

more disastrous

Factors Controlling Damage and Loss of Life —The intensity of the earthquake is not the only factor upon which the extent of damage and loss of life depends Much depends upon the time of shock, the nature of the buildings, the habits of the people, etc Thus the amount of habits of the people, etc damage done is often greater in India, where pucca houses are more common, than in Burma, where houses are mostly wooden, though the latter may suffer more from fire, as happen ed in the case of the Pegu earthquake (5th May, 1930)

The time at which the earthquake occurs make: a considerable difference to loss of life, for an earthquake occurring at night takes people un awares (Kangra, 20,000 lives lost, Quetta, toll of life 25,000) Had the Bihar earthquake, in which 10,000 lives were lost, occurred at night the toll of life would have been unthinkable M Heron, Director, Geological Survey, makes certain observations in the case of the Baluchistan earthquake of 1909 He remarks that certain communities suffered more heavily than others because more of their number slept indoors and, being better off, lived in two storied houses, which naturally suffered more damage The fact to be emphasised is that the loss of life, etc, does not entirely depend upon the severity of the shock, but upon the time of occurrence and various

Sources of Information—Very little is known of the Indian earthquakes previous to the year 892 AD and accounts of the earlier of the recorded earthquakes are necessarily incomplete T Oldham has recorded the different sources of information of the earlier Indian earthquakes in his catalogue Among the works in which records of Indian earthquakes later than 892 A D occur are the Tarikhul Khulafa (History of the Callphs), the Allamul-fi-l Tarkh by Ibnulathir—a historical work of the Arabians, the Mar-at ul-'Alam, an unpublished work in the library of the Royal Asiatic Society of Bengal, Badáoní (Bibl'otheca Indica), Báber's memoirs

other factors

With one or two exceptions no really severe earthquakes took place in the Indian region between January 1943 and March 1945 How ever, a number of shocks of slight to moderate intensity were felt in different parts of the continent

Two shocks of slight intensity were felt at Srinagar in Kashmir and at Drosh in Chitral, on Feb 6, 1913, at intervals of 30 Seconds On Feb 9, an earthquake of slight intensity was felt in parts of Assam Slight shocks were felt over a wide area—Rawalpındı, Muzaffarabad, I Khan Ganhati, Gulmarg and Srinagar 9th Sept 1943, at 10 36 IST The on 9th Sept epicentre of this earthquake was near the Hindu Kush Mountains An carthquake of great intensity with epicentre in Assam was felt in parts of Assam and North Bengal, on Oct 23 at 23, 54, IST Slight shocks were felt at D I Khan on Nov 27 at 15 15 IST

On Feb 29, 1944, an earthquake of great intensity, with epicentre in the Maldive islands, was felt in the Ceylon region at 22 58 IST An earthquake of moderate intensity with epicentre near the Andraan Islands, was recorded on Sept 27, 1944 During 1944 further shocks were felt in different parts of India—Krshmir, Bihar, Assam—but none of them is of much in the second statement of the second statement is a factor of the second statement is a factor of the second statement in the second statement is a factor of the second statement in the second statement is a factor of the second statement in the second statement is a factor of the second statement in the second statement is a factor of the second statement in the second statement is a factor of the second statement in the second statement is a factor of the second statement in the second statement is a factor of the second statement in the second statement is a factor of the second statement in the second statement is a second statement in the second statement in the second statement is a second statement in the second statement in the second statement is a second statement in the second statement in the second statement is a second statement in the second statement in the second statement is a second statement in the second statement in the second statement is a second statement in the second statement in the second statement in the second statement is a second statement in the second statement in the second statement is a second statement in the second statement in the second statement is a second statement in the second statement in the second statement is a second statement in the second statement in the second statement is a second statement in the second statement in the second statement is a second statement in the second statement in the second statement is a second statement in the second statement in the second statement in the second statement is a second statement in the second statement in the second statement is a second statement in the second statement in the second statement is a second statement in the second statement in the second statement is a second statement in the second statement in the second statement is them is of much importance

Between Jan 1945 and March, 1945 reported shocks are all of small intensity and occurred in Nepal and Assam

Kháfi Kháns Muntalhab ullabáb, etc Much in formation is gleaned from the Journals of the Much in Royal Assatrc Socrety of Bengal, the Philosophical Accounts of the later earth Transactions etc quakes appear in detail in the records and mem oirs of the Geological Survey of India, from which much of the information here given is drawn

Indian Ocean was se et ly shaken and about parques were plown two learnes un th river i 150 000 persons lost their lives. As noted by Oldham a record of this earthquake appear both in the Tdrikkul Khulafi (History of the Caliphs) and in Albimble 1 Tdrikk According to him both these works mention the month of Sh. wwil (Hillra 290) as the date of occurrence Finne tt e month of Shawai commenced 90 days before the 13th of March 594 A D that is the 14th December 593 the date of this e rinquake is fixed by Oldham about the close of A.D 893 o early

6 h J ly 150 —This earthquake affected Afghanistan and Northern India It is recorded Alghanhtan and Northern India It is recorded that great fisures appeared I many parts and there were exten I c land lips as log much d mane and loss of life In one day as a second is ing much d mase and loss of life in one day as tuny as thirty three shocks we relate not end used for a whole mo th Oldham mentions that this earthque is be recorded in the mentions that this earthque is be recorded in the Bursty of the Royal Asiatic Society of Hern, all in Endaten (Bibliothees Indies Avol I p 319) and the Memoirs of Bab t (Eriklars edition p 170) in Memoirs of Bab t (Eriklars edition p 170) in the Memoirs of Bab t (Eriklars edition p 183) and its date is therefore authentically recorded.

earthquake in 155 but no details are available Several earliquakes of less intensity took place between the years 1618 and 1664. On the 6th of May 1618 Bombay experi need an earliquake i which nearly two thousand il es were lost. The accompany g hurrica e resulted in the destruction of several vessel. Lakhugar in Ass. in nffered an earthqu ke on the 7th February 1663 Shocks were felt in certain parts of eastern Ben,al for a period of thirty two days during the y ar 1468

The Province of F hml was shaken by an

The next earthqu ke of great intensity which facted India occurred in 1008 between the dates 2nd—11th May its effect was so serious that Samaji or Samawani—a town of 30 000 in habitants sank into the ground A record of thi appears in the Ma asi a A lamgi i (Edit 1 ibl Indica, p 76)

Indica, p. 76)
Following this terrible catastrophe the e was a period of comparati quiescence of about 50 years Upper India was however ah ken by a cartiquate on the 14 Minharam of Arar g by a line and the standard of the second of the seco

Ben I Burm and the Arak n coast wer flected on not April 1 6 In fact it is resorted that the em recover of the Arak n coast from the se I due to this arthquake but that is n of vious exacg ratin arthquase partial elevation of the coastal strin prob bly occurred. It is at ted that oysters were found attached to rocks forty feet above ground level hear Chittagon, 60 q re miles of land sank

Geveral shocks of arving int usity occurred in different parts of India-Calcutta Kashmir Ongolo a d the upper reaches of the (use between 15th July 1 6 and mad May 1893 but they wer not of much importance

A ioi at e rthquake took place on 1st Sept 1803 affe tin., Math ra Calcutta Garhwal Kuma n and Delhi At Mathura the domes of se eral mosq es rected by Gluxi Rhan sank into the ground S ral villages were swallowed up in tarhwal

This earthy ake is noted for the f ct that the upper portion of the f mou Qutab Minar f Il as a res it of it though it L tated th t th Minar was also strn k by li hinin

16th J. 1819—This was no of the worst arthun kee experienced in India. Its effect was the secrets in Gutch the chief town of which—like jewase mplet by rulned and 000 persons perished Ahmed b. d. Broach Surat and l oona were all affected

In the western region of Cutch the town of Sind eea d then i hbo ring a ea was submerged Sind cea d then I hoo ring a cawas submerged as a result of tidal wes A trat the miles wide was raised in front of a branch of the I dus and the II r had to cut a fre h ch n el across it This ridge is known to the loc I inhabitants s Allah R nd or God a Emh ni ment

One ery se ere shock followed by minor on occurred on 9th O t ber 18 6 and re uited in s eral hou es falling in Khatmandu and P tan in Nepal

18 7 Sept (b frs 6th Sept 18 7)—The fort of holltar n near Lahore was de troyed nd but 1000 perso slost thir il es it is stated that a hill falling into the river Ravi resulted in e tensi e floods

adverted meteors with h it is reported fallin its later and line w is to find w with a later and line w is to find w should have a find the state of

20th August 1873—Ich in Khatmandu 20th December 1892—This was felt over the (Nepal) and North Biliar In Khatmandu alone greater part of Baluchistan and was connected 100 houses were levelled to the ground and a with an old fault line that runs along the foot similar fate overtook other places. There was of the kolak range in a N Y direction. The continuous agitation for full 24 hours.

An earthquake of great intensity affected Burma, more particularly Amarapura and Ava, on 23rd March 1839. It is reported that shocks continued for four or five days, every fifteen to thirty minutes 200—400 lives were lost and pagodas and other buildings in Ava, Amarapura and Sagaing suffered heavily

10th February 1842—I asted for about three minutes in Kabul and affected Peshawar, Jallalabad, etc. It was very destructive at Peshawar and one third of the town of Jallalabad was destroyed. Hot springs at Sonah became cold and the amount of water also diminished. The area affected was about 216 000 square miles. The epicentral area was probably near Jallalabad.

Numerous later earthquakes which occurred in different parts of the Indian region do not call for much attention as they were of minor importance. Two earthquakes which affected the Deccan in March and April 1843 may be here recorded, for the Deccan, being a stable landmass, is rarely affected by earthquakes of any intensity, Sholapur, Maktal, Singrurgarh, Bellary, Kurnool Belgaum were all affected and much damage was done. This is the only earthquake known in the Deccan which caused considerable damage. The epicentre was near Bellary

Severe shocks, local in their effect, occurred in Upper Sind on 24th January 1852 Fort Kahan was completely ruined and about 350 persons were killed

24th August 1858—Burma was affected, but the shocks were not of great intensity Halse Island situated south east of Cheduba Island (18° 38' N 93° 551' E) disappeared entirely under the Ocean The same earthquake affected the Punjab and Bengal, but very little damage was done

10th January 1869—Experienced in Assam (Cachar), total area where shocks were felt was 250,000 square miles

A severe earthquake occurred in the Bay of Bengal on the morning of 31st December 1881 The radius of the area affected was about 800 miles, and the total area over which the shock was felt was in the neighbourhood of 2,000,000 square miles most of it being sea. It was felt at Gaya, Hazaribagh, Agra Ootacamund and Calicut in India, and in Burma at Akyab where it was followed by the eruption of a mud volcano in Ramri. The northernmost point affected was near Monghyr

30th May 1885—This earthquake, although comparatively not so severe, resulted in heavy loss of life and about 3,000 persons perished in Kashmir The epicentre was a few miles west of Srinagar The radius of felt area was 300 450 miles, the total area affected being about 110,000 square miles

14th July 1885 — The epicentre of this earth quake was north west of Dacca It was felt violently throughout Bengal, but extended also into Chota Nagpur, Bihar, Sikkim, Bhutan and Assam The area affected was approximately 230,400 square miles

20th December 1892—This was felt over the greater part of Baluchistan and was connected with an old fault line that runs along the foot of the kojak range in a k N F direction Trifoto of the range is ark, by a depression and numerous springs which are indicative of the fault. It is interesting to note that as a result of this earthquake the area west of the fault subsided about one foot and moved southward about 21 feet! The earthquake was, however, local in its effects

The worst earthquake which has affected Assam and probably the greatest within historic times occurred on 12th June 1897 Stone buildings in Shillong, Goalpara, Gauhati, Nowgong and Sylhet were almost entirely destroyed everywhere and Calcutta was seriously affected Over 1600 lives were lost and the earth quake was felt in an area of 1,730,000 square miles. The earthquake was caused by a 'movement along a thrust-plane or thrust planes and along secondary thrust and fault planes, which had a maximum length of about 200 miles and a maximum width of about 50 miles'. This movement was due to the relief of differential strains set up in the interior of the earth

nass, heavily on 4th April 1905, more particularly because the shocks occurred early in the morning when people were still asleep. There was heavy loss of life—20 000 persons having pershed. The area affected was 1,625,000 square miles. Kangra and Dharamsala were completely destroyed. The main shock was from north to south, followed by an equally severe one from south to north. The earthquake is ascribed to movement along one of the reverse faults of the Himalayas.

21st October 1909—This carthquake affected the Kachhi plain, Baluchistan Considerable damage was done and over 200 lives were lost The radius of the felt area was about 15 is miles. The elongated epicentre was N W—S R in direction. The earthquake was presumably due to the presence of a fault, though, the area being covered with alluvium, this is more or less conjectural.

A violent earthquake occurred over the greater part of the Northern and Southern Shan States on 21st May 1912, and was felt practically over the whole of Burma, Slam and Yunnan An area of 125,000 square miles was affected Shocks continued the following day and were followed on the 23rd May by a severe shock which was felt over an area of 375 000 square miles Numerous after shocks continued in May, June, July and August, when they finally ceased The epicentre was close to the great Kyaukh yan fault in the Northern Shan States

No severe earthquake is recorded during the six years following the last earthquake in Burms, but a violent shock was felt on 8th July 1918 and affected Eastern Bengal, Assam, Burma, North west India as far as Lahore It was most strongly felt in Srimangal (Assam) where many tea estates were runed The total area over which it was felt was 800 000 square miles This earthquake was due to subsidence along a fault It was accompanied by pouring out of sand, mud and water from fissures created in the ground,

14th April 1938 -An earthquake shock was felt at Monywa in the Lower Chindwin district Burma, at 7-47 a m Cracks appeared in the walls of several buildings, but there was no loss of life

3rd May 1938—Two shoels were felt at intervals of about five seconds at Shillong in Assam at 10 21 pm. The shocks lasted for about 40 seconds There was very little damage to property and no loss of life

16th August 1938 — Shocks were experienced in the Upper Chindwin district, Burma, and were felt over a fairly wide area The shocks which lasted about 30 seconds, seem to have been severe at Kalemyo Pucca buildings Pagodas tumbled down, but there was no loss Smaller shocks were also felt at Mawlalk Paungbyin, Mingin, Indaw, Kalewa, Homalin

7th February 1939 -Two shocks were felt at Drosh in Chitral at intervals of two seconds, but there was neither material damage nor loss of life

Reports received by the Geological Survey of India from various parts of India and Burma show that 82 earthquake shocks were felt in With the exception of the rather 1937 in India severe shock of 14th November, which originated in the Hindu Kush region and affected a considerable tract of north-west India, the rest were of slight intensity unactended by any damage to buildings or persons

Regionally the shocks were distributed as follows -

Burma, 28, north eastern India, including Sikkim, Nepal and Tibet, 31, north western India, including Kashmir, Chitral and Baluchistan, 21, and Peninsular India, 2

The epicentre of the shock of 14th November 1937 has been located in the Hindu Kush mountains, north-west of Drosh, in Chitral This has been deduced from observers' reports and from seismographic records available from the Meteorological Observatories at Bombay, Agra, Calcutta and Kodaikanal This shock was felt at such distant places as Kabul, Dehra Dun, Simla, Multan, Dera Ismail Khan and Roorkee

At least sixty earthquake shocks were felt in India during the year 1939 Fortunately all these shocks, without exception, were of slight intensity and crused neither loss of life nor serious damage to property

About twenty of these shocks affected the unstable Assam region, of which four were felt at Dhubri, six at Gauhati and a like number at Shillong, Kashmir, Drosh (Chitral State) Quetta, Rawalpindi, Gilgit, Lahore, Shikarpur (Cutch), Peshawar, Begumpet (Hyderabad State)

intensity was felt on the 7th January, but there etc. Its epicentre was in the Hindu Kush range, was no dumage or loss of life being situated at 36° N 75 5° E. Its focal depth was 200 KM

The intensity of this carthquake at Srinagar and Gilgit was VII on the Mercali scale At Srinngar three shocks were felt at intervals of 10 seconds each Cracks developed in the walls of the Observatory and other buildings in the city At Gilgit, which suffered three shocks at intervals of 2 seconds each, boulders slipped down from the surrounding mountains and dust spread all over the valley

During 1940 earthquake shocks were felt at Gulmarg in Kashmir, at Barmer (Rajputana) and at Bhul and Radhanpur in the Western Indian

At Gulmarg two shocks of moderate intensity were felt on the 3rd August at 14 45 (IST) and cracked walls of Lutcha houses Shocks of mo derate inte sity were also felt on 8th August and 21st September, 1940, but apart from cracks in hutcha houses no damage was done Barmer and Bhuj experienced a slight shock on 31st October while Bhuj had another shock on 13th November, 1040

There was no loss of life or serious damage to property during any of these earthquakes

A large number of earthquake shocks occurred in India during the year 1941 It is unnecessary to give details of all these but particulars of three or four of the more important ones may be given

An carthquake of moderate intensity took place on the 21st of January 1941 at 18 16 hours (IST) with its epicentre to the north of Assam The shocks lasted for about one Assam The shocks lasted for minute but no damage was caused

Another earthquake occurred on the 26th June at 17-27 hours (IST) This earthquake whose epicentre lay in the neighbourhood of Nicobar Islands, was of very great intensity and was felt in Madras, Cluttagong, Chandwadi, Colombo, etc Extensive damage to buildings occurred in Port Blair where 4 persons were killed and 4 seriously injured The duration of the shock was less than half a minute

On the 30th of June at 23 58 hours (IST) a shock of moderate intensity was felt at Port Blair Its epicentre lay in the neighbourhood of north Andaman

Another earthquake occurred on the 29th of September at 8 5 hours (IST) at Quetta The shocks lasted for about 35 seconds and caused damage to Laccha buildings and mud houses in Quetta

Three earthquakes of slight to moderate intensity were recorded during the year 1942 An earthquake of slight intensity with its epicentre in Assam was felt at 16 17 hours (IST) on 22nd February in parts of Bengal and Assam No loss of life or damage was reported. On 22nd X-1 the reported of the state of the sta reported On 22nd March a quake of moderate intensity was felt at 738 hours at Lahore, Rawalpindi and Simla The epicentre was in the Hindukush mountains A third earth and many other towns experienced shocks during the year

It is unnecessary to give details of the large number of shocks felt during 1939 for most of these were of minor importance Mention must however, be made of the earthquake of 21st increases was no loss of life or damage to property

Posts and Telegraphs.

POST OFFICE.

The control of the Posts and Telegraphs | Bombay, Delhi and Madras General Post Offices of India is vested in an officer designated and of the larger of the other head post offices Director-General of Posts and Telegraphs whose office is attached to the Department of Posts & Air of the Government of India For the efficient working of the Department there is a Limincial Adviser, Communications The superior staff of the Direction, in addition to the Director General himself, consists on the postal side of one Senior Deputy Director General one Deputy Director General, Postal Services one Deputy Director General, War two As istant Directors General, Establishments one Assistant Director General Pestal Services sev n Assistant Dy Directors-General and one Post wil Plan ang Officer

for postal purposes, the Indian Empire is divided into eight circles, namely, Bengal and Assam, Bihar and Orissa, Bombay, Midras, Punjab and North West Baluchistan Lach of the first seven is in charge of a Postmister General and the Sind and Baluchistan Circle is controlled by a Director Posts & Leigraphs The Central Circle comprises roughly the Central Provinces and the Control India and Rajputana Agencies

The Heids of Circles are responsible to the Director General for the whole of the postal ar rangements in their respective circles including those connected with the conveyance of muls by railways, inland steamers, and air services All the Postmisters General are provided with Assistant Postmasters General while in the Sind and Baluchistan (trele the Director is assisted by Assistant Directors In the Bengal and Assam Circle, there is an Additional Postmaster General for the province of Assam with headquarters at Shillong, who works under the Postmaster General The works under the Assam with headquarters at Shillong, who works under the Postmaster General The works under the Postmaster General The land Circles are divided into Divisions. eight Postal Circles are divided into Divisions each in charge of a Superintendent of Post Offices or Rulway Mail Service as the case may be and each Superintendent is assisted by

are directly under the Postma ters-General the Presidency Postmaters have one or more Inspecting Postmaters at bordinate to them When the duties of the rosumand of a head office become so operous that he is the following of a Deputy unable to perform them fully himself a Deputy Po tmoster is appointed to relieve him of some of them, and if still further relief is required, one or more Assistant Postmasters are imploy The more important of the offices sub ordinate to the head office are designated sub offices and are usually established only in towns of some importance. Sub offices transact all clusses of postal business with the public, submit accounts to the head offices to which they are subordinate Incorporating therein the accounts of their branch offices and frequently unte direct dealings with Government local sub Uni ed Provinces and Sind and treasuries The officer in charge of such an office works it citier single handed or with the a-si-tance of one or more clerks according to

the amount of business Branch offices are small offices with limited functions ordinarily intended for villages and are placed in charge either of departmental officers on small p y or of extrucons agents, such as school masters, shop-keep rs, lad halders or cultivators who perform their postal duties in return for a small emineration

The audit and accounts work of the Po t Office is entrusted to the Accountant-General, Posts nd Telegraphs, who is an officer of the Tinance Department of the Government of India and is not sub ridirate to the Director General. The Accountant-General is assisted by Deputy Accountants General, all of whom, with the necessary st ff of clerks, perform at separate he adquarters the actual audit and a counts work of a certain number of postal circles

In accordance with an arrangement which has been in f ree since 1883 a lar e number of sab-p st offices and 1 few head offices perform telegraph work in addition to their postal work dental number of officials styled Inspectors

Generally there is a head post office at the head quarters of each revenue district and other. The follow is to increase the learning facilities post office in the same district are usually everywhere and especially in towns by official subordinate to the head office for purposes a number of cheap telegraph offices working of accounts. The Postmasters of the Calcutta, under the control of the Post Office.

in Telephone work there is one Deputy Director General (Telephones) and in Wircless matters there is one Assistant Dy Director General (Wireless) In the Circles the scheme which has been introduced follows closely on the lines of the experimental one referred to above For telegraph engineering purposes India was divided up into five Circles, each in charge of a Director These five Circles were divided into eighteen Divisions each in charge of a Divisional In 1922 Sind and Baluchistan Circle was formed with its headquarters at Karachi This Circle is under the charge of a Director of Posts and Telegraphs On the 31st March 1924 there were 7 Circles and 20 Divisions view to complete fusion of the three branches of work the engineering work of the Bombay and Central Circles was brought under the control of the respective Postmaster-General in 1925 and this unification was gradually extended to other Circles. The fusion was completed in March 1930. The telegraph traffic and the engineering brunches in the Circles are now controlled by the Postmasters General and the Director of Posts and felegraphs, Karachi Tilegraphs and Separathy Directors as the organization of Posts and Felegraphs. There is also one Deputy Director of Telegraph Traffic each at Calcutta, Bombay and Madra-to look after the speedy disposal of traffic There are now 23 Lugineering Divisions With effect from the 1-7-1939, the Superior Telegraph Engineering and Wircless Branches have been amalgam itedia to a Single Service viz,-Telegraph Engineering Service-Class I The audit and accounts work of the Telegraph Department is, like that of the Post Office, entrusted to the Accountant General, Posts and Telegraphs, assisted by a stuff of Dupty and Assistant Accountants General Inland Telegrams and Tariff —Telegrams sent to or received from places in India of Burma or Ceylon are classed as Inland telegrams The tariff for Inland telegrams is as follows -For delivery in India Private and State Express Ordinary Rs a Rs a 1 10 Minimum charge 0 13 Each additional word over 8 0 2 For delivery in Burma Private and State Express Ordinary Rs a Rs a Minimum charge 2 12 1 6 Each additional word over 8 0 For delivery in For delivery Lhasa (Tibet) in Ceylon Private and Private and State State Ex Ex-Ordi-Ordi press press nary nary Rs a Rs a Rs a Rs a Minimum charge 2 2 8 1 additional Each

The class prefix for Disly Tetter Telegrams will be DL1

MIGHT II FFER TITLER IMS

Night Letter Telegrams (NLT) are accepted for all Laupire countries except Australasia, with which the Dilly letter lelegrum Service (DLT) remains in force at the superitor and under the same conditions is prescribed for Daily Letter Telegrams except as follows -

- (i) They will be delivered on the morning of the day following the day of booking
- (ii) The special instruction and the class prefix for Night Letter Lelegrams will be NLI

EMPIRE SOCIAL TELEGRAMS

Empire Social Telegrams (GLT) conveying solely greetings family news or non-commercial personal affairs can be availed of throughout the year at special reduced rates, for all lampire countries except Sud in

Empire Social Telegrams (GLT) for the pur pose of transmission and delivery to a territory or place to which NLI service is available is deferred until the morning of the day following the day of acceptance where there is no NLT service but a DLP service is available an Lupire Social Telegram is deferred and delivered on the second day following the day of acceptance or as soon as possible thereafter Minimum charge for an Empire Social Telegram is Rs 360 for the first 12 words (excluding the Special Instruction GLT-which vill not be charged) and 41 annas for every additional word

The only Special Services admitted in Impire Social Telegrams are "Reply Paid" and De Luxe"

Telegrams —Telegrams Foreign De Luxe sent to certain foreign countries for delivery on an artistic form in an envelope of the same character. A supplementary charge of four annas per telegram in addition to the charge at the appropriate rate according to the class (i.e., Urgent, Ordinary, Code, Deferred, DLT, etc.) is charged for such telegrams. This De Luxe Service in not available with U K for the duration of the war.

Posts and Telegraphs—The capital outlay of the Indian Posts and Telegraphs Department of the Indian Posts and Telegraphs Department of the Indian Posts and Telegraphs—The capital outlay was Rs 3,98,41 431 and Rs 28,94,40,419 respectively. The receipts for the year ended 31st tively The receipts for the year ended 31st charge (including interest on capital outlay of Rs 9,02.57,000, the result being a net gain of Rs 9,02.57,000

necepted for most non empire countries from the 14th of December to the 6th January inclusive of special reduced rates subject to a minimum charge for 10 words per telegram Implie countries except Sudan such greeting may be conserved by means of Empire Soci-Telegrams

Growth of Telegraphs—At the end of 1897 93 there were 50,305 miles of line and 155 038 miles of wire and cable Compared to this there were 112 100 miles of line including cible and 1063 600 miles of vire includes conductors on the 31st March 1014. The numbers of departmental telegraph offices were 257 and 90 respectively, while the number of telegraph offices worked by the Post Office rose from 1631 to 4,031

The increase in the number of paid telegrams dealt with is shown by the following figures -

		*****	J
		1897 93	1043 44
Inland	{ Private State Press	1,107 270 860 382 35,910	17,413,066 4,318,162 31a,853
		1897 98	1943 44

CENTRAL ADVISORY BOARD.

In the field of public health administration the most important event was the second meeting of the Central Advisors Board of Health in January 1939 This Board, which consists of the representatives of the Central Government of provincial Governments and of certain Indian States, was inaugurated in June 1937 for the purpose of providing a forum for the discussion and formulation of public health policy Within the short period of its existence it has already given proof of its use fulness. Mention may be made here of some of the valuable results of the joint consultations between the different governments which the existence of the Board has rendered possible during the past three years The problems associated with the health of the mother and child are of supreme importance to every country and, in India, the high rates of child and maternal mortility place this branch of health work in the forefront of the national health programme A special committee ap pointed by the Board reviewed the whole ques tion and submitted a report, which has been approved by the Board and which should provide for many years a sound basis for the orderly development of maternity and child welfare work in this country

The important part that festivals and large gatherings of pilgrims play in the spread of cholera is a subject of great concern to health authorities in India. While an improvement of the sanitation of the villages and towns through which the pilgrims pass is the most effective means of prevention, its realisation must be slow in view of the cost involved Under the circumstances the most practical method of minimising the chance of the spread of cholera appears to be the provision of mass protection through anticholera inoculation. The possibilities of introducing a system of compulsory inoculation among pilgrims was investigated in 1939 by a special committee.

In 1940 the Central Advisory Board a plan of indirect compulsion for the inof pligrims against chotera The repo Committee on compulsory inoculation of expressed the de trability of Governmentally suitable festival centres in the for trains out a system of indirect irong plly time around cholers on the lines of the norked out by the Bombas Governmer Panilh irpar pilgrimage. It also empha need of adopting critish measures ul Committee proposed for providing the fi the trained personnel necessary for ear mass Inocul ition

Special attention was paid to ward of fever from India with the increase c communications with Africa allowed to land in India from the selle area without having been inoculated or undergoing quarintine. Aircraft arrivi rellar ferer are is note compelled to pr ecrithente that they were effectively disks at other harroum or Cairo Will at either khartoum or Cairo country measures were taken to deal w possible outbreak of the disease The authorities of the Proximial and Stafe ments were requested to report promptly Public Health Commissioner even su cases of the discase

SOCIAL LEGISLATION

Repeated stress has been laid in the Commissioner's reports on the fact that health cannot be regarded as an entity from the general social and economic ill-It is, therefore, satisfacto community the advent of provincial autonomy a conferment of extensive powers on Pro-Governments have been followed in provinces by social legislation which v doubtedly have far-reaching effects economic life and general well being of the Agricultural indebtedness, land tenul industrial problems, to cite a few examp all receiving serious attention and, in so legislative and administrative action & raise the standard of life, these measure inevitably help in improving the stand public health

In order that there may be no undue or pessimism, it should always be remer that, less than a century ago, conditi Great Britain were not much different from found in India to day and that, with res other countries, reduction of the general rate below that at present recorded in dates back to only a few years. There se reason why India should not accomplish has been achieved in other parts of the if only organised effort is continued public support is given to that effort

POPULATION PROBLEM

(w) Publication and Propaganda "I eprosy in India" a quarterly journal published by the Association is a record of the study of leprosy and of anti leprosy work in India and other countries Recently a new propaganda book entitled "Popular Lecture on Teprosy" by Dr Dharmendra has been published, which gives the main facts about leprosy in simple and non technical language

Other activities —The Association has played an important role in the Conference and Committees etc appointed in India to formulate principles of anti-leprost campaign Recently it has collaborated in the production of the "Report on Laprosy and its Control in India" and the "Report on Leprost Survey" by Committees appointed by the Central Advisory Board of Health, Govt of India, and the Indian Research Fund Association respectively. The former gives a comprehensive survey of the leprosy problem in India, and will serve as a hasis to formulate the principles of antileprosy work in India The report on leprosy surveys deals with the principles of the surveys as well as with the practical outlines of the work

The treatment of leprosy—The mainstay in the treatment of leprosy has been injections of chaulmoorga (hydnocarpus) oil or its pre-Recently encouraging results have been reported by the use of certain sulphone areas and then widely applied

the disease and in order to study the possibility | drugs such as "Promin" and "Diasone, of evolving suitable methods of isolation of It is set too early to assess the value of this infective cases for the control of the disease | group of drugs in the treatment of leproy The treatment with chaulmoorga oil is of value in individual cases. It cannot be expected to control the spread of leprosy with treatment

> Control of leprosy - Leprosy can be controlled by raising the general economic and social conditions of the population and, by preventing contact of infective patients with healthy people, specially children. The only sure mathod of preventing contact with infective eases is the isolation of these cases in leprosv hospitals, sanatoriums, or colonies, etc. Great difficults is experienced to provide institutional accommodation for all the infective cases in the country The total accommodation in all the institutions in India at present is for about 15 000 patients whereas a rough estimate of infective cases places the figure at 21 lakhs 80 some other methods of isolation are urgently needed to supplement the institutional isolation

The two alternatives are the isolation of the patient in his home, and the isolation of all the patients of a village or a group of villages in huts made in the outskirts of the village Home isolation is practicable only in families Village with sufficient financial resources isolation appears to be specially suited to India, problem and limited with its big leprosy problem and limited resources It is desirable that methods of village isolation should be developed in suitable

BLINDNESS IN INDIA

All over the East, and in fact in most tropical; and sub tropical countries, blindness is most prevalent and only recently have people come to realise the gravity of this huge problem

India is regarded as a land of blindness by many in foreign countries, whether this statement is justified or not, at present it is difficult to

It is probably correct that there are about one and a half million blind persons in India and for every one person blind there are three partially blind, out of a total population of about 360 millions whereas the census figures of 1931 show about half a million blind persons

The system of ophthalmic relief now prevailing in Egypt was started in 1903 by a gift of a sum of £43 000 by Sir Ernest Cassells Thus arose the ophthalmic section of the Public Health Department under a Director of ophthalmic hospitals and a start was given by establishing eye hospitals These hospitals became a definite branch of the Egyptian Government in 1906 The scheme subsequently developed, the cost being borne partly by Government grants and local taxation and partly by donations and subscriptions

Between 1904 and 1914, sixteen eve hospitals were opened in various parts of the country, was started the permanent hospitals being reinforced by travelling eye dispensaries which are an important part of the system

Association

method is very simple to carry out, ie, a person is considered blind when he cannot count the fingers of a hand held up in front of his eyes at a distance of one foot

This is the method followed in Egypt and this was adopted by the Government of Bengal in the census of 1931 at the suggestion of Lt Col C O'G Kirwan, CIE, IMS

The first blind relief Association in India was started in Western India in the Ratnaguri Dis trict by the late Mr C G Henderson, ICS, in 1919 In subsequent years, several branches were inaugurated This Blind Relief Associa tion carried out a special survey of the blind in some districts with the following results and wherever this has been done, the census figures have been found for too low Nasik Dist 44 per 1000. Bijopur 26, Ratnagrri 15, the corresponding census figures are 174 0 7 and 0.7 In the United Provinces a Deputy Com missioner had a count made and found no less than 9 persons blind per 1000

Unfortunately this Blind Relief Association, with its branches, practically collapsed after Mr Henderson left due to lack of funds

Mr Henderson resigned from the service in 1928 and an All-India Blind Relief Association was started in the year 1929 due to his devotion

portant part of the system

In India there has been practically no effort to count the number of blind, although the Upto the end of 1929, there was no blind relief Association in Bengal where there are about 35,000 blind persons out of a total population of 4,66,95,636 (census 1931)

In March 19 0 the As ociation for the Pre en : tion of Blindness Bengal was started in Calcutta wilh a strong Committee with Sir George Rankin the then Chief Justice of Bengal a

President

The first notable donation of 500 dollars was recei ed from Mrs Winlfred Holt Mather Founder Secretary New York Associati n for the Blind New York U.S.A. who with her hu band came to India in connection with the work of prevention of blindness Six years i ter in March 1936 the first travellin eye di pensary was started in Bengal I v this As ocia tion out of a gift of its 35 000 from Their Maje ties Silver Jubilee Fund the amount being the budgeted r curring cost of the dis pens ry for five years

By 1940 the Association posse sed four such tra elling eye dispensaries and it was in 1939 40 that the Government of Bugal's actioned a tecurring grant f Rs 15 000 for the years. In M rch 1941 this Association added one more

tra elli g eye dispensary making a total of five now operating in Beng i

These tr velling eye dispensaries have been started as a temporary measure until su h tim as there are mo e eye surgeons and sufficient as there are mo e eye surgeons and sufficient eye hospitals scattered throughout Bengul Upto March 1941 85 606 cas s have be treated and 8 071 operations have been per

and hospitals but operations are only done Where in door accommodation arranged

All operative works are a spended o e week before a dispensary is due to move on so as to enable the doctors to complet the after care of the operations they have done

In addition to preventive and curative works medical officers as a routine method c rry 116 n er ameration of the bli d by method whi h re simple and accur te They also carry ut chool 1 pection ci. systematic surv y of eye defects amonest sel ool students

MALARIA.

an occupant it is u ten that more than expenditure of the vill ges are subjet to m l is and that o er 60 per ent, of the total popul it actually suff r form it every year (houghly abo t i 600 people die from malaria every day throughout th year It is un fil fally estin ted that over India as a whole pwards of a million scape of a ferrom malaria every year. of a million people die from malaria every year

Moreover its incidence is probably three times Andrewer his incidence is proposely arrest times thingser in the rutal areas thin in the town so that it form a terrible handless to improved heat in an high standard of living mong the rural populations. The three main is the rural popul tio s. The three main is stack may be classified as (1) anti-mosquito messures (1) ge ral quinhisation and (3) improvement of the economic tandard of the measures on a scale people Anti mosquito measures on a scale

Malaria is without doubt Indias major positic passificient to influence the incidence of major in northfully and that of mortality Whilst so positive the within the broaders are within the property of the province of callent to be free from its ray gest province of callent to be free from its ray gest province of callent to be free from its ray gest provided by the trained by reduction of what is the province of the callent of the callen process to the tension of tension of the tension of the tension of the tension of the tension of the tension of the tension of the tension of the tension of the tension of the tension of the tension of the tension of tension of the tension of the tension of the tension of the tension of the tension of the tension of the tension of the tension of the tension of the tension of the tension of the tension of the by r cent importati n in lar e qu titie of two the nti malari drugs by Mep ine Hydrochlorid a d Q in crine Hydrochloride

The Malarit in-titute of India, which has for by either authority until proposed preven many very past been engaged in malaria researches, has made clear the directions in which practical anti malaria works should be tackled. The time seems ripe for a wider use of the knowledge available, but it is much to be feared that financial stringency will continue to handlcap progress Recognising the importance of the malaria problem, the Government of India some veirs ago placed a special grant of ten lakhs of rupees at the disposal of the Governing Body of the Indian Research Lund Association for miling research. On the advice of the Public Health Commissioner, the Governing Body decided that this grant should be devoted to intensive control schemes carried on for a period of years in restricted areas in order to demonstrate the practical method required for reduction of the incidence of majaria | Tollowing that decision, grants were made to four provin cial Governments on the conditions that those Governments contributed amounts equal to the IRF 1 grants and that approved schemes should be placed in charge of experienced antimalariil officers In addition, a grant was made to Delhi Province for anti-malarial work in the Najafgarh Health Unit area and for additional schemes in the villages lying round the cities of Delhi and New Delhi

In Madras, Bengal and the United Provinces suitable areas were selected on the recommenda tion of officers of the Malaria Institute of India in consultation with the provincial Directors of Public Health The grant to Assam provided additional funds to the Assam Medical Research Society which had been engaged for some years past in intensive antimalarial work it is believed that these five year schemes will not only be of great benefit to the local populations concerned, but will form a valuable guide to all Governments and malariologists in India in planning future anti mularial work

Recent malarial surveys have shown that parts of Eastern Bengil, formerly regarded as free from malaria, are subject to moderately severe outbreaks of the disease. Mularia is largely a rural problem in India and during the past few years different methods of combating the disease have been tried intensively in certain parts of the rural areas of Delhi province these measures deserve adoption in other parts of India Much of the minor sanitary work necessary for eridicating mosquito breeding can be carried out by the people themselves if they are prepared to devote a small part of their lessure to such labour Draining marshes, clearing the jungle, filling up hollows in which water collects—these are put of a village im provement scheme to which the villagers should contribute their share of work for the common

Whilst all these facts indicate that the problems associated with malaria have by no means been lost sight of, they are so important that much more requires to be done before any marked general reduction of malaria incidence will be obtained Both governments and local outhorities will require to allot much larger sums than in the past for anti-malarial works if permanent betterment is to be relieved Moreover, no expenditure should in future be sanctioned | cheap cost

schemes have been thoroughly investigated; finally approved by skilled malariologists

PLAGUE

Plague in India started in Bombay in 16 and, within a short time, the disease spre widely through the country It reached maximum in 1904 with a total mortality 1,143,993 In contrast to this the averannual mortality from plague during 1936 38 was 18,759 That a considerable reduction in its geographical distribution has also taker place is clearly indicated. The N. W. F. Province, the Punjab, Delhi Orissa, Bengal, Sind Assam and Ajmer Merwara were free from the disease during the year, while in Madras Presidents dency plague was prevalent only in a mild form After a marked decline in the number of plague dea h. from 24,560 in 1933 to 406 in Bombay Presidency in 1938, this province registered an increase to nearly 1,500 deaths in 1939. In the other provinces the position in 1939 was sub stantially the same as in 1938 However, the history of plague through the centuries is a warning against taking a complacent view of the reduced prevalence of the disease in India It is known that the disease can smoulder in its endemic homes for long periods and that, on certain occusions, it acquires an increa- d striking power and spreads far and wide in epidemic waves into distant lands, to retreat again after a while to those areas where it permanently resides While therefore it is gratifying that plague as a public he ilth problem has been of decreasing importance within the past decade, the fact that endemic foci exist makes it imperative that no slacking of effort for its complete eradication should be permitted In fact the fight against the disease both by administrative measures and by research into its epidemiology, treatment and prevention has continued uninterrupted during the whole period

A considerable diminution in the incidence of plugue has taken place in India within the last decade This satisfactory position was main tained in 1940 when the provinces of Biluchistan, Ajmer-Merwara, Sind, North West Frontier Ajmer-Merward, Delhi, Orissa and Assam reported no cases of the disease The Punjab and Bengal were also free from infection except for a few reported Bombay Presidency alone experienced a relatively extensive epidemic, the number of deaths from plague being 5,573 in 1940, as against 1,472 in 1939

In March 1941 it was announced that experiments carried on at the Haffkine Institute, Bombry with sulphathuazole in the treatment of plague had yielded results which appeared to offer an effective cure for this scourge Lt Col S Sokhey, Director of the Institute, said that by the use of this drug at Bettiah in Bihar and later at the Places Heart of Later in and later at the Plique Hospital at Latur in Hyderabad, Decean the percentage of recoveries in non septicemic cases was cent per cent while in septicemic cases the cure was 80 per cent. The drug was prepared at the Institute and was available in quantity at a chean cost.

Mesopotamia, nine lakhs on the Afghan War and | Junior Red Cross was 6,63,029 in 16,958 group Waziristan Expedition, in Mesopotamia and India combined it had spent on Red Cross

objects in all about 117 lakhs

It closed its career in June 1920 under the following circumstances In the summer of 1919, an invitation had been received to join the International League of Red Cross Societies having for its object the extension of Red Cross work in the sphere of purely civil activity Though there was then no formally constituted Red Cross Society in India, the invitation was accepted, thus giving India a distinct position in a world wide League of humanitarian societies A Bill to constitute an Indian Red Cross Society was introduced by Sir Claude Hill in the Imperial Legislative Council in March 1920, and duly passed into law as Act XV of 1920. This Act handed over the balance of the funds of the Joint War Committee to the new Society and authoris ed it not only to direct the utilisation for war purposes of the capital funds at its disposal but also to devote the interest, as far as possible, for civil purposes As contemplated in the Act of Constitution of the Society, its activities are completely decentralised, and are being carried on through 30 Provincial and State Branches under which there are 024 sub branches

The objects on which the funds of Society may be spent are

The care of the sick and wounded men of His Majesty's Forces, whether still on the active list or demobilised

The care of those suffering from Tuber culosis, having regard in the first place to soldiers and sailors, whether they have con tracted the disease on active service or not

Child welfare

Work parties to provide the necessary garments, etc., for hospitals and health institu-tions in need of them

Assistance required in all branches of nursing, health and welfare work, ancillary to any organisations which have or may come into being in India and which are recognised by the Society

Home Service Ambulance Work

Provision of comtorts and assistance to members of His Majesty's Forces whether on the active list or demobilised

The Society has five grades of subscribing members, namely, Honorary Vice Presidents, Patrons, Vice-Patrons, Members and Associate Members Their respective subscriptions are Rs 10,000, Rs 5,000, Rs 1,000, Rs 12 annually or a consolidated payment of Rs 150 and any thing between Re 1 and Rs 12 annually or consondated payment of Rs 50 The number consolidated payment of Rs 50 of adult members of all categories enrolled during 1913 was 29,348 as against 28,374 in previous year

To stimulate interest in the aims and objects of the Society amongst the future generation, the Junior Red Cross movement has been instituted which embraces the student population the 50 Provincial and State Branches, 27 have organised Junior Red Cross groups, which is a clear indication of the fact that this children's branch of Red Cross Society which seeks to develop a child's personality by encouraging his individual initiative, making him think and act, is being firmly established all over India At the end of the year the total membership of the

as against 6,17,081 in 15 976 groups in th previous years

Constitution—His Excellency the Vicero President of the Society The Managin is President of the Society Body ordinarily consists of a Chairman to h nominated by the President and 25 member of the Society of whom 12 are the Vice President nominated by Provincial or State Branches, selected by the Society at the Annual Genera Meeting from among the members of the Society and 5 nominated by the President

The pres at Chairman of the Managing Bod; is The Hon'ble Malik Sir Firoz Khan Noon k 0 S I, k 0 I E, and the Secretary, Sardar Bahadur Bahwant Singh Puri 0 B T

The Indian Red Cross Society professes itsel as an essentially Indian Society Most of its members (about 96 per cent) are Indians It is controlled in India Its headquarters are at New Delhi The Society received a gift of s lakh and a half of rupees from H H the Nawat of Junagadh to build headquarters offices in New It has branches in every Province of British India and in several Indian States These has hes are again subdivided into districts, so that there is a network of Red Cross centres all over India The provincial branches appoint representatives to the Central Com This Central mittee, called the Managing Body body, after deduction of management expenses, distributes all its income from invested funds among the branches for their activities

Like other Red Cross Societies, the Indian Society has never lost sight of its primary obligation to act as an auxiliary to the Army Medical Service in case of war It maintains a Central Supply Depot administered by head A large number of military hospitals quarters are supplied with additional equipment and comforts, and these are much appreclated The Bengal Branch has a Literature Committee, which supplies regular parcels of literature to troops, especially to those stationed in lonely outposts, and many grateful letters of thanks are received. Discharged soldiers suffering from chronic diseases, particularly tuberculosis are referred by the Army Medical Service to the Red Cross, which follows up the men on their return to their villages, and arranges, where possible, for their treatment Under this scheme many hundreds of cases have been dealt with

The greater part of the Society's income is ent upon its peacetime programme it seemed to those who directed the Society in its early years that the first and most crying need was to teach mothers how to bring up healthy children and child welfare has been placed in the forefront of its programme

The health visitors employed in the child welfare centre are trained at Health Schools where are at Delhi, Lahore, Calcutta, Poona, Lucknow and Bombay Several students from India, have been granted scholarshing by the India have been granted scholarships by the League of Red Cross Societies to follow the international courses for Public Health Nurses in The training is now arranged by the Indian National Committee of the Florence Nightingale International Foundation with the help of a scholarship given by the Indian Red Cross Society from the income of a special endowment received by the Society from the Silver Jubiles Fund Silver Jubilee Fund

Special mention must be made of the Army care but unable to receive reliaf from any other child well re-centres most of which receive public or charitable Fund convenues money from Red Gross funds. These generous support from Red Cross funds entres are run for the wives and children of B itshand Indian troop and are doing excellent work. The Central Provinces and Ber r Branch of the Society opened a Nursery School in Nazpur and tils ploneer school under Red Cross auspices has proved a great success

Popular health education is carri d on steadily by the Society by varied methods. Health lectures in many different vern culars are regul rly organised under Red Cross auspices

illustrated by films and slides A large number of civil hospitals in India

St. JOHN AMBULANCE ASSOCIATION (INDIAN COUNCIL) AND

St JOHN AMBULANCE BRIGADE OVERSEAS (EMPIRE OF INDIA).

The St John Ambulance Association was Members, founded in 1877 by the Order of the Hospital Associates of St. John of Jerusalem in Lugland, and has Rs 1,000 Rs 500, Rs 100, Rs 5 and Rs 2 for its objects -

- (a) The instruction of persons in remaching First Ald in cases of accident or sudden illness The instruction of persons in rendering and in the trusport of the sick and injured.
- (b) The instruction of persons in the ele mentary principles and practice of nursing, and also of hygiene and sanitation, especially of a
- (c) The manufacture, and distribution by sale or presentation of ambulance material, ard the formation of ambulance depots in mines factories, and other centres of industry and trame

(d) The Organisation of Ambulance Corps invalid Transport Corps, and Nursing Corps

(c) And generally the promotion of instruc tion and carrying out of works for the relief of suffering of the sick and injured in peace and war independently of class, untionality denomination

An Indian Council of the Association was constituted on a regular basis in 1910 It has since issued over 5,54 000 certificates of proficiency in First Aid, Home Nursing, Hygiene and Sanitation and Domestic Hygiene and Mothercrift and over 2,000 tokens such as Vouchers, Medallions and Pendants for special proficiency in those subjects tion over 1,01,000 certificates have been issued in the elementary course for school students known as Mackenzie School Course in First Aid, Hyglene and Sanitation

The object of the Association is not to rival but to aid the medical man and the subject matter of instruction given at the classes qualifies the pupil to adopt such measures as may be advantageous pending the doctor's arrival, or during the intervals letween his visits

During the year 1943, 73,410 persons attended courses of instruction in First Aid, Home Nursing Hygiene and Sanitation and Domestic Hygiene and Mothercraft Of these 53,173 qualified for the Association's certificates is 47,48 in First 4id, 2,80 in Home Nursing, 643 in Hygiene and Sanitation and 302 in Domestic Hygiene and Mothercraft

The St John Ambulance Association took up the question of training in ARP as early us 1998 Since then it has issued 5,015 certificates in this course, of this m ny are Brigade personnel. During 1943, 51 classes in this subject were held at various stations and 4°9 qualified for certificates—72 for Instructors, and 307 for ordinary certificates. This instruction has thus made great strides at various towns in India in connection with the local. A R P. measures for the Since then it has issued 5,015 certi ลร์ 1938 nection with the local ARP measures for the protection of civil population from air attacks In order to assist in the special dive in this subject the Government of India gave a grant of Rs 10 000 in 1941

The Association has five grades of members

Annual Memlers and Annua Their respective subscriptions ar

The income of the Indian Council at head quarters consists primarily of interest or securities a fixed annual grant from Govern ment, fees for certificates and membership subscriptions

Their Excellencies the Viceroy and Viscounte : Wasell and His Lacellency the Commander in Chief as President, Lady President and Churman, respectively, with 23 members form the Indian Council The general business of the Indian Council is conducted by an Executive Commitce of which Sir Cameron Bidenoch, R 011 OSI, IOS, Knight of Grace of the Order of St John of Jerusalem, is the Chairman and Sardar Bahadur Balwant Singh Puri, OBE, the General Secretary

The St. John Ambulance Brigade Overseas is a ut iformed disciplined body of men and women, all of whom are holders of First Ald and in the case of women also Home Nursing certificates They meet together recularly for practice, are inspected and re examined annually and under take to turn out for public duty whenever required

The Brigade in India is commanded by Su Cameron Badenoch as Chief Commissioner for the Under him are 10 Dr. rich Impire of Lulia covering almost all the provinces in British India and some of the Indian States, with the udquarters at Lahore, (alcutta, Bombay, Madras, Bangalore, Lucknow, Nagpur, Patna, Delni Kurachi, Peshawat, Shillong, Indore, Cutinek and Secunderabad, and there are three also on the North Western East Indian and G I P Railways In charge of each Di treet there as an Associate Commission of the Commissi there is an Assistant Commissioner or a Commis ioner according to the membership strength of the District and as the work of the Brigade has so much in the medical and surgical sphere, the Officers in Charge of the Districts are generally the administrative heads of the Civil Medical Departments of the respective provinces. It is their business to organise and maintain the testing are the control of the respective provinces. maintain the training and efficience of Amindance and Nursing Divisions and to see that they are available for public service on occasions when they are required

At the end of 1943 the Brigade in India con sisted of 41) Ambulance Divisions, 187 Nursing Divisions and 64 Cadet Divisions (boys and girls) with a total membership of about 18,000 These Divisions render first aid on public occasions for example festivals processions and public assemblages of all kinds. At times of special emergencies they turn out promptly and remain on their special emergencies. and remain on duty so long as they are required Some of the recent occasions when Brigade members have rendered valuable service are the Bihar Earthquake (1934), when Calcutta members established a camp hospital at Monghy, the Quetta Earthquake (1935) when Lahore members living in railway trucks at Quetta station gave a living laboration of the called penuls. namely, Patrons, Honorary Councillors Life station gave valuable help to the stricken people,

of all possible comforts and help to Indian facilities in hospitals and convalescent depot prisoners of war, and the other with the pur chase, storage and distribution of Red Cross stores and comforts for the sick and wounded

Parcels to Indian Prisoners of War-By the Central Organisation, every Indian prisoner of war in German hands is provided every week with a 10 lb food pircel, specially planned to supplement prison camp rations and each man is given a periodical 'next of kin' parcel, containing comforts and necessities, and with warm clothing and footgear These are packed and despatched through the International Red Cross Committee, Geneva, by the Indian Comforts Fund, I ondon, for the Joint War Organisation in India

The present rate of dispatch is some 15,000 Each parcel costs approxi parcels a week mately Rs 68 To Indian prisoners of wai in Japanese hands individual parcels could not, at the time of going to press, be sent all com forts and Red Cross stores have to be despatched in bulk, as opportunities for shipping them occur, being distributed to the men by Inter national Red Cross delegates in the 1 ir East

Comforts for Sick and Wounded —To the sick and wounded of the Forces in India, over 400 different kinds of Red Cross stores, including 115 items supplied by voluntary worl parties, are available through the Depots maintained by the Central and Provincial Joint War Committees

These depots supply on demand every military hospital in India, in addition to Field Ambu lances, Casualty Clearing Stations, Staging Sections, Field Hygiene Sections, Convalescent Depots, Ambulance trains, hospital ships, river steamers and other miscellaneous medical units Hospitals and all medical units in the Middle East, Iraq, Iran, Aden and other overseas areas, as well as hospitals on the Burma Front are supplied either direct from India, or through the Depots maintained by the Joint War Organi sations Oversers Commissions, in Cairo, Bagh dad Basra and Ahwaz

It is an inspiring sign of India's progress in manufacture, that the purchasing officer of the Joint War Organisation has found it possible to place with manufacturers or deilers in India orders for the great majority of articles supplied by the Indian Red Cross to the extent of many lakhs of rupees In addition to Red Cross stores for the sick and wounded, very large orders for comforts and amenities for Indian prisoners of war are also placed in India

An important and greatly appreciated addition to the Joint War Organisation's activities is the provision of occupational and diversional therapy Organisations

personnel for this valuable work being largel provided by the Women's Voluntary Service Physic therapy as paratus, specially designe for the exercise on approved lines of convalescen nounded is supplied to hospitals selected by the Medical Directorate

Aided by substantial grants in aid from the British Red Cross and St John, the India Joint War Organisation serves British sick and wounded in India and in Iraq and Iran, in addl tion to the sick and wounded, and prisoners o war of all Indian Services and the Merchan Navi

of Red Cross Services-The Growth growth of the Joint War Organisation's services cover half the world-from they Lurope in the West to Japan in the East-1: craphically portraved in the great increase, year by year in its expenditure for the relief of those dependent on it Lypenditure during 1944 is estimated at Rs three crores, nearly twice as much as was spent in 1943, this great increases being due to the vast expansion of the Forces, the increase in the cost of supplies, and the need for reserves to be built up

Public Support—The Indian Red Cross and St John is almost entirely dependent for the maintenance and expansion of its essential humanitarian services on the generosity of the That the public realise how people of India much these services mean to the sick and wounded and prisoners of war is shown by their ready response to the Joint War Organisation's appeals notably the first all India drive for tunds during Red Cross Week 1943, when over a crore of rupees were collected, and a further drive in 1944 is expected to result in a sum of over three crores

In addition to the services enumerated above, Red Cross Postal Message Bureaux are main tained in Bombay, Calcutta and Madras for communication with relatives, other than internees or prisoners of war, in over 30 enemy occupied countries

The Indian Red Cross Welfare Service is a paid, uniformed body which undertakes dutles in British and Military hospitals, such as handi crafts, Red Cross Store Keeping, librarians, letters or messages to relatives, enquiries from relatives, pastal and shapping services the relatives, postal and shopping services, the tracing of missing soldiers by interrogation of wounded comrades, and other activities. This services is not activities to replace service is not in any way intended to replace the activities of Members of the WVS The main purpose of this service is to obtain better co ordination, and to undertake work beyond the capacity and range of part-time Voluntary

INSANITY AND MENTAL HOSPITALS IN INDIA.

of persons suffering from mental disorders is still very inadequate To serve a population of over four hundred million, there are only 17 institutions with a total accommodation for about 15,000 patients Most of these institutions are little more than lunatic asylums where hardly any provision exists for modern methods.

The most modern mental disorders is exist for any kind of treatment The most modern mental hospital is probably the Mysore State Mental Hospital, Bangalore, which built at a cost of over Rs 5 lakhs, is very well equipped for the care and treatment of 300 early mental cases hardly any provision exists for modern methods of treatment

In India, facilities for the care and treatment fined in Jails where, of course, no provision persons suffering from mental disorders is exists for any kind of treatment. The most

The Bangalore Mental Hospital is not merely Many patients are even con modern in its buildings and architecture but is also yet dding facilities for treatm nt of 10000 Inti United Kin J m the proporti n patient.

NURSING

Whilst India cannot show the complete chain of efficiently nursed hospitals which exists in England there has been a great development of skilled nursing of recent years. This activity is principally centred in the Bengal, Madras and Bombay Presidencies, where the chief hospitals, in the Presidency towns are well nursed, and where large private staff are maintained, and able to the general public on payment of a pre-scribed scale of fees. These Hospitals also act as training institutions and turn out a yearly supply of fully trained nurses, both to

to the services of a Sister, and a reduction in the fees paid for those services. Thus members of the Association are enabled to obtain skilled nursing at moderate charges on a sliding scale of fees determined by the income of each patient.

The control of the Association is in the hands of two Committees, one in England and one in India

The English Committee is responsible for the recruitment of the staff in the United Kingdom, but fully trained nuises are also elimible in India and the Central Committee has the power to enlist them on the spot

In addition to this duty the Indian Committee deal with all matters of administration delegating to the Provincial Branches questions of local significance

Her Majesty Queen Mary is a Patron of the Association

Her Excellency the Viscountess Wavell is President of the Central Committee in India

Hon Secretary -Licut Col H Williamson,

Chief Lady Superintendent -Miss C Wilson, Central Committee

Lady Minto's Indian Nursing Association, Viceregal Estates, Simla, and Viceregal Estates, New Delhi

The Trained Nurses' Association of India and The Association of Nursing Superintendents of India.

The Trained Nurses' Association of India was founded in 1905 and incorporates the Association of Nursing Superintendents of India It is affiliated with the International Council of Nurses and the National Council of Women in India, and the Nurses' Auxiliary of the Christian Medical Association is an affiliated Associations tion. Its objects are—

The Trained Nurses' Association of India was Dellin, Midwives' United India, Midwives' Auxiliary of the Christian India,

- (a) to uphold in every way the dignity and honour of nursing profession
- (b) to promote a sense of esput de corps among all nurses
- (c) to enable members to take counsel together on matters affecting their protession
- (d) to elevate nursing education and to raise the standard of training
- (e) to strive to bring about a more uniform system of education, examination, certification and registration

The Association has accomplished a great deal in rusing the standard of nursing throughout India, in improving nursing legislation and in providing post graduate courses for nurse administrators, sister tutors and health visitors

It strives in every way to promote efficient and adequate nursing for the sick and to improve conditions, not only for nurses but primarily for patients The Association is self supporting and is maintained by the nurses themselves

Thus Health Visitor's League, the Midnives' 1 and the Student Nurses' Association arrayes number of qualified members 1, 3,103 student members 1,345, totalling 4,448 official organ of the Association is 'The Number Journal of India'

Patron Her Excellency Lady Wavell

When the South th ugh the wide ing of the electorate was one

borough Franchise Committee was formed to almost entirely based on property, it remained the suggestions regarding franchise in this Scheme, the women suffragists took every means to bring to the notice of the Committee all the evidence which showed the need for, and the country's support of, the inclusion of women in the new franchise

After the introduction of the Government of India Bill into Purliament in July 1919 a number of Indian deputations proceeded to London to give evidence before the Joint Select Committee of Members of both Houses of Parliament which had been appointed to place the Reforms on a workable basis Mrs Annie Besunt, Mrs Sarojini Naidu and Mrs Miss Herabai Tata were the women who were heard by the Committee in support of the extension of the franchise to women in India

The House of Commons decided that the ones tion was one for Indians to answer for themselves and while retaining the sex disqualification in the Reform Bill they framed the Electoral Rules in such terms that if any Provincial Logislative Council should approve by a resolution in favour of women's franchise, women should be put on the electoral register of that Province This was the only provision regarding franchise matters which might be changed before a 11 years' time limit Until after that period women were in ligible for election as Legislative Councillors

Reviewing the position about ten years later the Simon Commission showed the extremely limited extent to which wonten enfranchised in the manner set out above, had become qualified as electors. I keept in Buring where it was comparatively high the percentage of women electors to adult female population was less than one in Madras it was one, in Bombay 8, in Bengal 3 in the United Provinces 4 in Bihar and Olissa 5 and in Assam 2—in Burma it was 4 6 per cent

Madras led the way in the matter of women's franchise and under the operative provision of the Government of India Act, women became enfranchi ed Other provinces followed suit, and at the time of the inquiry by the Simon Commission seven out of the nine provinces had acquired the right Very con women began to adorn the benches in legiclative chambers first And they by nomination and then by election Justified the confidence placed in them by spon soring and successfully carrying through many measures of uplift and reform in regard to the status and influence of women. They had so much proved their worth that the Simon Com-The women & mi sion remark in their report movement in India holds the key of progress, and the results it may achieve are incalculably great It Is not too much to say that India cannot reach the position to which it is pires in the world until its women play their due part rs educated citizens

Buring their conclusion on these observations the Shuon Commission wished to bring about a substintial increase in the existing ratio of a new to man voters. In exerci ing the option allowed to them of enfrenchising women the trie term es min, the proximital legis latures did indeed risks a significant of ture lit to long re the qualification to rote was rote, compared to 29 million men.

geture, because India's women do not or property in their own right

The Simon Commission affirmed that a furth step in developing women's suffrage in Ind should be taken immediately and added may perhaps be found possible to add to the present qualifications two others, namely, (being the wife over 20 years of age, of a ma who has a property qualification to vote an (12) being a widow over that age, whose husban at the time of his death was so qualified I addition, the educational qualifications shoul apply to women over 21 as well as to min The Simon Commission maintained that women suffrage should be a cardinal point of the "frat thise system" and suggested "qualification for the vote which will not confine it to th few women who have property qualifications

During the last ten or fifteen years, the women of India have made enormous progress in severa direction. A great awakening has dawned of them. The raising of the age of consent for nurriage, the abolition of the prictice of didating girls to temples, the demand for legal and property rights vis a-vis men eml odied in comit of the reform measures—all have tended to raise the status of Indian women in their own eyes as well as in the eyes of the world That nave marched from reform to reform, and thell outlook is for ever widening The Gradi-movement evoked an unprecedented outburst of service and Sicrifice among Indian women who were thrown into the thick of a politica struggle from which the vemerged fully conscious of their political rights and responsibilities. The part plived by the two representatives of India womanhood at the India Round Table Conferences held in London brought them and their kind in the lime-light

Small wonder, therefore, that the Government of India Act of 1935 gave Indian women political rights far in idvance of those enjoyed by them before that date. In terms of number of sents women have been allotted a seits out of a total of 150 reserved for Briti h India in the Federal Council of State and 9 out of a total of 250 to reserved in the Luderil Assembly Provincial Assemblies, women have ro trued to them 8 cats in Madris, 6 in Bombis, 5 in Bengil, 6 in the United Provinces, 4 in the Punish in Bihar, 3 in the Central Provinces and Berst.
1 in Assam 2 in Oriser and 2 in Sind

But by far the greatest improvement in women 8 political rights occurred in the life rall sition of the frinchise qualifications affecting Women have been entranchised with have the property qualification in their Control fight, orare wives or widows of menso qualified or are wive of men with a service qualification of the peneloned widows or mothers of members of the military or police forces or who no see Women not holling il a literacy qualification. Women not holding it requisite qualification in their or a right ele required to apply to be enrolled, stating their derived qualification, but this procedure last He meter of been wrived in some province. such cufringhisement it is ostimated trees than six million women ingrine! 316 (4) unit the set of 1910) have been given the right !

awakened womanhood of India irrespective of [

the differences of caste and community, race and

class

This organisation, it may be noted, has latterly shown a tendency to transgress the requirements of sectional plea and strayed into wider political It is not, however, difficult to explain this development. The women's movement gained considerable impetus by the part played by and the status accorded to, women in the intensive political movement conducted by Mr Gandhi and the Congress since 1920 This asso ciation, while it has undoubtedly brought women to the forefront of public activity, has also served to bring their outlook in line with that of the There are doubtless members of the fair sex who hold pronounced views on women's rights and yet do not share the extreme doctrines of Mr Gandhi or the Congress but it can safely be said that they are in a minority in the All-India Women's Conference This will explain the somewhat pro Congress political views expressed at the annual sessions of this body

Kasturba Fund —The work in connection with the emancipation of Indian womanhood and the improvement of the lot of Indian women, particularly in rural areas, obtained an enormous stimulus in 1944 45, thanks to the well supported Kasturba Memorial Fund created for the commemoration of Mr. Gandhi who died under detention in February 1944 At Mr Gandhi's request the trustees of the fund decided to apply the collections to the establishment of a countrywide organisation to improve the lot of Indian women, especially in villages This is proposed to be done by providing opportunities for Indian women to secure education, acquire knowledge of basic studiary and hygienic lines and to become alive to their social and political rights. An essential part of the plan is to equip rural areas with up to date maternity hospitals and clinics In order to fulfil this ambitious project a large number of women are being trained in special camps so that after adequate equipment they can scatter themselves throughout the length and breadth of the land and carry the message of women's uplift to every nook and corner of rural India Among the subjects handled in these training camps are first aid and home nursing, child welfare, village nursing, health visits, rural sanitation, balanced diet and The object of these training cheap remedies camps seems to be the raising of an army of experts called "Gram Sevikas" (servants of the village)

Women Jurors —A notable development affect women jurors—A notable development affecting Indian worsen was the amendment of the Rules of the Bombay High Court enabling women to sit as jurors Lighty women responded, and in July 1944, for the first time in India, fifteen women were summoned to serve on the jury at the criminal sessions of the Bombay High Court Thanks to the whim of the hallet how three women were suprangled. of the ballot box three women were empanelled to try a case in which a young man was charged with stabbing a woman

Women in Mines—The keen awareness which the leaders of the women's movement in India developed in regard to practices abur developed in regard to practices should be more sensitive new than ever to be all ting worden is illustrated by the repeated care and preservation of food, avoid waste in

protests registered by them against the liting of the ban on the employment of women in These were echoed in Parliament when mines made apologetic spokesman the Cabinet references to the need for ensuring adequate supplies for coal for war purposes and promiled to secure a revision of the position at an early

Bombay Session —The annual session of the All India Women's Conference was held in Bombay in April 1944 under the presidentship of There was no se sion Shrimati Kamaladevi of the conference till the end of 1915 Women's movement," she said in her presidential address, "Is an essentially social movement and part of the process of enabling a constituent part of society to adjust itself to the con stantly changing social and economic conditions, and trying to influence those changes and conditions with a view of minimising irritations and conflicts and making for the largest measure of harmony Thus it operates as an integral part of the progressive social structure in the broadest sense, and is not a sex war so as many mechanically believe or are led to believe For the issues round which it revolves, such as right of votes, inheritance, entry into professions and the like are an intrinsic part of the bl ger issues striving to overcome the prevailing undemocratic practices that deny common rights to certain sections of society. It is therefore a comrade to the struggle of the backward castes and the long oppressed class seeking alike to regain the lost inheritance of man's inalienable rights

"The Conference would do well to concentrate on a few items and do them well First in importance I would place the training of social services, so eminently needed yet so grievously neglected Closely allied to this is the neces ity for training women in handlerafts and fostering hand industries They will provide a means of livelibrations. livelihood to many helpless women Inciderally, they will add to the industrial production of our country at a time when it is not able to meet our needs

"As essential and as scarce are the health services, particularly nursing A rough set of figures say there is one Nurse for every 56,00 people or to 250 square miles. The Health visitors are about one per 350,000 The maternity and child welfare movement is meetly maternity and child welfare movement is mostly a week end show and the entire country can boast of only 800 centres to enter to such a rest area and population. All this makes an appairing platfure. White All this makes an appair While admitting that the Women Conference is not the body which can build up a complete health service to meet the country requirements, I feel sure it can make a smill of appreciable contribution

to the number of the requirements. to the nursing profession, encourage mans frees girls to take courses in public health nursir, first aid, industrial, hygiene, etc., and also fit more of such courses introduced in our tdtet tional and social in the state of the such courses introduced in our tdtet. tional and social institutions

"Although the food problem is the mo thing! ening at the moment and tends to overslar ening at the moment and tends to overslar most others its causes are beyond the forest times power to remedy. As women harrest to be the regulators of food in the lone list should be more senting room than ever to the faily consumption as all o in taxt h hostitality i which in the present settin strikes on a pain fully I commons. manufactured and sent to the Covernment Oil) for a period of five years commencing f Factory, Calicut, for purification and blending Up to 30th June 1913, 18,612 gallons of refined oil were produced at the Government Oil Inctory and 21,933 gallons were sold. The Government sanctioned the construction of a factory in Calicut for the manufacture of shark liver oil The construction of a building for the oil factory was completed in January 1942 and agents for the sale of the oil were appointed in various provinces of India

The educational work of the Department is becoming one of its most important branches in training men in the technology of curing, canning and oil manufacture, in co operative propaganda and the supply of zoological specimens for the use of college classes and museums The last named has filled a long felt want and is contributing materially to the advancement of the study of Zoology throughout India There is now no need to obtain specimens from Europe as they can be had from the Laboratory Assistant, Fisheries Station, Lanur, Madras, at moderate prices A Technological Institute was opened at Tuticorin in January 1942 to provide for the training of techers in 1942 to provide for the training of teachers in fishery technology after their regular training in teachers training schools and to provide courses of instruction to fishermen and others interested in different branches of the fishing industry including navigation

Curing -Fish curing is practised l ish extensively everywhere on the Madras coasts its present success is due primarily to Dr Francis Day who, after an investigation during 1869-71 of the fisheries of the whole of India, pressed for the grant to fishermen of duty free salt for curing purposes within fenced enclosures He advocated much else, but the time was not ripe and the salt concession was the sole tangible result of his long and honourable efforts salt suggestions were accepted by the Madras have shown a profit on the operations To Government, and from 1882 a gradually increasing number of yards or bounded enclosures were opened at which salt is issued free of duty and often at rates below the local cost of the At present there are 105 salt to Government fish curing yards scattered along the coast During the year 1912-43, 2,516,881 mainds of fresh fish were brought to these yards for curing and 387,250 mainds of salt maunds of salt se The transactions were issued for the purpose. The transactions in these yards resulted in a surplus revenue over expenditure of Rs 15,550

Pearl and Chank Fisheries —While there is no prospect of a pearl fishery for some years to come, owing to the absence of spat fall in the banks, a distinct revival in the chank trade District was evidenced in the keen competition for the purchase of the last two sersons chanks. A total of 458,894 chanks were fished during the verr 1942 43, which will fetch a gross revenue of rand other local authorities at a nominal for introduction into mosquito hunted captivity with the implied possibility of the production of cultural pearls near Krushadai for introduction into mosquito hunted of which the implied possibility of the production of cultural pearls near Krushadai for introduction into mosquito hunted for introduction into mosquito hunted for introduction into mosquito hunted proved successful in the places where the full Another experiment in marking of chanks authorities have given proper attention the full form in 1931 to study the rate of growth and the control of Couragn in Tirel areas was actually put started in 1931 to study the rate of growth, of Gouram in rural areas was actually pu mortality and migration of the chank in its operation by stocking fine tanks selecte natural haunt, is continuing and so far 4,631 the purpose chanks have been marked and liberated Marine Aquarium—Perhap'a word is the Government constraints.

the lease of the chank fisheries off the coast ing was constructed under the auspices of Ramnad belonging to the Ramnad Estate Superintendent, Government Museum, M

1st July, 1912, and a total of 195,465 were fished in 1942 43 and they will ievenue of Re 75 425

The Inland Fisheries—The Inlan eries of Madras compare unfavourable those of Bengal Many of the rivers in the hot season and few of the many the of irrigation tanks throughout the model water for more than 6 to 9 mont a consequence, inland fisheries are organised and few men devote themse fishing as their sole or even main occu The custom is to neglect or ignore the value of these streams and tanks so they are full of water only when the s shrink to pools and the tanks to puddles owners or lessees of the fishing rights ti to catch fish. The result is a dearth throughout the greater part of the year, for a few days, and often much waste in quence The chief fresh water fishes of ec importance are the Murrel, notable virtue of living for a considerable period water, and various carps including Catla and the well known favourite of man in India the 'Mahseer," Ca and Hilsa In the Nilgirs, the Rainbow has been acclimatised and thrives well Government working in conjunction wi Nilgiri Game Association maintain a ha at Avalanche, where quantities of fry are h and reared for the replenishment of the s of the plateau Mirror carp fingerlings been introduced in a pond in the Milgins, Nuwara Eliva, Cevlon Fishing rights large irrigation tanks were transferred Government to local authorities many year these tanks are now being resequired by G ment in order that they may be stocked p cally by the Department, the results the necessary free, 3 fish farms are in ope. In these the chief fish bred are the Go obtained from Java, and Etroplus has the excellent attribute of the and breeding as well in brackish as in water, both protect their eggs while de ing, a useful habt Both the Gourani Etroplus are largely vegetarian in diet Department has been endeavouring to lish Catla, the quick growing carp of economic importance, into the Cauverys since 1922, and direct proof of the suct the efforts of the department has been obby the capture of hundreds of young ca almost all the anicuts and sluices in the To A further activity is represent the breeding of small fishes especially add to feed upon the aquatic larve of mosqu These are supplied in thousands to municip

The Government sanctioned the taking over saryabout this institution at Madras The elease of the chank fisheries of the coast

The state of the propal Cummiston I more picture that practic in received the school and the his hold state of the school and the his res at ret of the school and the his res at ret of the school and the his res at ret of the school and the his res at ret of the school and the his res at ret of the school and the his result of the school and the his result of the print at the request of the school and the school and the result of the school and the school and the result of the school and General—The value of the fisherics of this extensive deltaic region lies primarily in the enormous area occupied by inland waters—rivers, creeks, jheels, odd swamps,—to say nothing of paddy-fields and tanks. These swarm with fish and, as the Hindu computation are free to a large extent from the population are free to a large extent from the aversion to a fish diet which is widely prevalent among the better castes in the south. the demand for fish is enormous Rice and fish are indeed the principal mainstay of the population and not less than 80 per cent of the people consume fish as a regular item of It is calculated that 1 6 per cent of the population is engaged in fishing and its connected trades, a percentage that rises to 2 8 in the Presidency, Rajshahi, and Dacca Divisions 190,865 persons in Bengal subsist by fishing and 272,579 are maintained by the sale of fish freshwater fisherman, the Bengali is most in ganious, his traps and other devices exceedingly clever and effective—in many cases too effective—so eager is he for immediate profit, however meagre this may be The greatest inland fishery is that of the hilsa (Hilsa ilisha) which annually nugrates from the sea and estuaries in innumerable multitudes to seek spawning grounds in the Ganges and the other great rivers Other valued and abundant river and tank fishes are the rolm (Labeo rolata), the Latia (Catla catla) and magal (Curhina magala), prawns and shrimps abound everywhere Of important shrimps abound everywhere Of important ishes taken in the lower reaches of the rivers and in the great network of creeks spread throughout the Sunderbans, the bhekti or bhetki (Lates calcarifer) and the mullets are the most esteemed, apart from these estuarine fishes the most valuable sea-fishes are the Mangothe most valuable sea and Indian Salmon (Polymenus) and pomírets. The sea fisheries are as yet little exploited. Taking everything into consideration, it can be safely stated that the fishery wealth of Bengal is enormous and is far in access of any other province

Historical — Following the inquiry begun in 1906 by Sir K G Gupta, an investigation of the steam travl potentialities at the head of the Bay of Bengal was undertaken, the trawler Golden Crown being employed for the purpose The results showed that there are extensive areas suitable for trawling and capable of yielding large quantities of high class fish Much atten tion was devoted during these trawl cruises to the acquisition of increased knowledge of the marine fauna, the results being published in the Records and Memoirs of the Indian Museum For various reasons, the chief perhaps being the hostility of vested interests, the lack of cold storage facilities and the loss of time involv ed by the trawler having to bring her catches to Calcutta instead of sending them by a swift tender, the experiment was financially a failure and was dropped With ever-increasing demand for fish in Calcutta and the concurrent rise in prices, the prospects of remunerative steam-trawling are now much more bright The trade, however, is a difficult one to organise disheries are concerned Bengal has of necessard without a rare combination of technical a more limited scope for its activities the

successfully with a company prepared to de and utilise the local fisheries carried on by I fisherman, provided the two main difficult rapid transport and proper preservation callshare overcome Originally one Fig. Department served the needs of the two Vinces of Bengal and Bihar and Orissa tion was effected in 1920 after which fisher Bengal were administered by the Direct Agriculture The Bengal Lishery Depart was abolished under retrenchment in 1923

During a lapse of 14 years after the closu the Fisheries Department, the price of fit Calcutta has been soaring high consequent o: r spidly increasing demand and the unher monopoly exercised by the small group of ve interests The economic condition of the ac fishermen was gradually becoming worse di exploitation by the capitalists and the fish in general were getting depleted due to val causes at work With the increase of distress public naturally clamoured for the re estab ment of a Fisheries Department to protect fisheries interests and to organise and dev the fishing industry on modern lines and improve the general economic condition of fisherfolk. The Bengal Government there appointed a Fisheries Expert to survey existing condition of the Fishing Industry in Province and to suggest schemes of developr with a view to augment the fish food supply examine the ways and means of bringing abo reduction in the ruling prices of fish, an stimulate commercial enterprise in spet transport, better marketing arrangements, establishment of Cold Stores and Faction for fish by-products. The services of Dr. Paragraphy No. 12 for the Modern Fight. Ramaswami Naidu from the Madras Fishi Department were requisitioned by the Be He surveyed the industry Government submitted a report to Government as a re of which a Department of Fisheries was stai in May 1942 with Rai Bahadur Dr S L E of the Zoological Survey of India as its Direc to organise the fish trade under the War er gency conditions, to conserve the exist supplies and to conduct investigations on t fisheries with a view to increasing the food suf in the province

Fresh water mussels are used extensively Dacca in the manufacture of cheap buttons and in many cases pearls also are for in the mussels which the pearl dealers gat and sell in the various parts of India Ducca bangle factories carry on an import local industry of very uncient standing, the material is almost entirely obtained from South India and Ceylon chank fisheries alrereferred to

- The establishment of a marine aquarium in Bombay and Karachi, if they are able to pay their way as the Madras aquarium does
- The establishment of a bureau of fisheries information
- The advisability of the transfer of the fish curing yards to the control of the Local Government, and
- The encouragement by the Bombay University of marine biological research

Dr Sorley, in his report, also referred to the value of employing fast motor launches to transport fish to the consuming centres in Bombay from the catching sites

New Era Started —A move in the direction outlined by Dr Sorley was made towards the end of 1933, when the Government of Bombay launched an experiment implementing in some ways his suggestions. The experiment was formally inaugurated by Sir Frederick Sykes, the then Governor of Bombay, at Danda, and was undertaken in co-operation with the head of the fishing community at Danda For the purpose of the experiment a launch was obtained on loan from the Royal Indian Navy (then the R I M) and suitable alterations were made to adapt it to the purpose of a carrier launch. The results achieved by the working of this launch were very encouraging rapidity with which the fish was transported in a much fresher state than had till then been possible aroused the interest of the fishermen, who realised the benefit to their trade of using fast motor transport to bring the fish to Bombay from the catching fields

placed in 1934 an order for the construction of two launches the "Lidy Sykes" and the "Sir Frederick Sykes" for the use of the fishermen nt Danda has been encouraging is evident from the fact that every year since then has seen an addition to the number of vessels The following four useful to the fishing industry, as vessels have been built since then by parties information not available to them before connected with the fishing trade -

(1) The "Lady Sykes", (2) "Sir Fre derick Sykes", (3) "Lady Brabourne," (4) 'Lord Brabourne , (5) Nooremohamadi" (Old), (6) 'Nooremohamah' (New), (7) 'Chandtara'', (8) "Karamat' (9) 'Salamat', (10) Karimi'', (11) 'Khajahind', (12) Murh', (13) 'Ruparel', (14) 'Rizaki'', (15) Hydari'', (16) 'Lady Colville'' All these launches have been built either in Bomb iy or along the coast

The launches operate between Bombiy and the Kanura coast. The success which attended the introduction of the experimental launches encouraged private individuals to invest in similar vessels to transport fish. The number of privately owned launches at present is 16 @

Dr Sorley's more important recommendations on the Ratnagiri coast, and Chendia, on Karwar coast In Bombay, quick free The establishment of a marine aquarium plant employing the Z process has been inst by a Russian technician at the Kermani mi at DeLisle Road and an ice factory and a storage plant have been constructed on the Market of Crawford feature of the last plant is that it has a nui of small chambers which are hired out at s fees either to one individual or to ser collectively This plant also provides for quick freezing of fish

There is also an ice factory and a q g and storage plant at Sass (Bombay), where all the launc freezing both Government and private, land their cate This factory and cold storage plant have me long felt want and proved an undoubted b both to fishermen and owners of launches sailing craft. It has obvirted the need obtaining ice from remote centres in the c thus saving a good deal of time and expenditi The existence of the cold storage plant at Dock is a welcome facility to the fisherm who are now able to store catches at any h of the day or night when retail vendors are on the spot

A unique feature of the Bombay Governmen fisheries scheme is the provision made to tr youths of the fishing community in the runn and maintenance of motor launches with ultimate object of enabling them to take chai of their own launches whenever they decide go in for these on in extensive scale improvement of the economic condition of t fishermen is the paramount considerati kept in the forefront of the whole schen which aims at confining the entire fishi tride to the fishing community itself a eliminating the need of employing technic Encouraged by the results, the Government hands who are not fishermen by either casto vocation

Lastly, a fisheries information bureau h That the progress of this experiment couraging is evident from the fact ear since then has seen an addition ber of vessels. The following four useful to the local and other fisheries. The following four useful to the fishing industry, as it furnish

The war has led to an investigation of the possibilities of the manufacture of oil from shark livers to replace the dearth of supplies the consequence of the consequ occasioned by the stoppinge of imports of Coc Liver Oil from Norway

A simple process of oil extraction, not involvin the use of any complicated machinery, we devised and demonstrated by the department to the local fishermen and to the fishermen at Ratnagiri, Taitapur, Malwan and Shiroda The demonstrations were largely attended and the fishermen were greatly impressed by the fact that a new occupation and a fresh source of income had been opened out to them a result of the demonstrations the fishermer earnestly took up the work of oil extraction and have regularly been sending to the Fishein Department oil extracted by them. This is refined by the department of the department and later cold to chemist. Lirger supplies of fish made available by the launches have induced the flow of private capital into channels intimately bound up with the neat Shark Liver Oil were supplied to the fishing trade. Several ice factories and cold Haffkine Institute for the manufacture of storage plants have since been set up at Malwan Vitamin concentrates and Vitamin tablets.

Orissa

The first wealth of Od as a construction of the second of

Lack of harbour, cold storage facilities and capital to introduce better fishing methods make improvement of marine fisheries a very difficult problem The standard of living of the sea-fisherman is extremely poor and calls for improvement In some fishing centres the fishermen live on fish alone for days together Im provement of the financial position of the co operative societies, legislation limiting the middle men's activities, establishment of fishery schools are some of the problems that confront the attention of Government

(11) Estuarine - The Chilka lake forms a compact fishing area and vields extremely tasty fish and prawns The lake is leased out by Zamindars to merchants who have built up an organised fishing industry The export averages 75 000 mds per annum and consists of mullets. bhekti, pomfrets, mackerel, Indian salmon etc The fish is packed in ace and exported mainly to Calcutta Other estudine fishing centres are Kirtanjakhati, Kujang, Chowmuhan and Sonapur Lately, due to intensive fishing, there has been a scarcity of adult sized fish in the Chilka lake of nets after studying the life history of A scheme for the development of inland ar important fishes are under consideration of the ICAR and the Government Prohibition of indiscriminate fishing, killing of immature fish, observance of close season, etc, are post war problems to be tackled.

A scheme for the development of inland ar estuarine fisheries has been instituted in the Province in connection with the "grow monotonic fishing, killing of immature fish, observance of close season, etc, are post war problems to be tackled.

(111) Inland — The rivers and tanks form great potential source of fishing Hilsa Orissa is not as tasty as that of the Gange Rohee, catla and mrigal; are the econon species These breed only in rivers and in lar bunds which resemble rivers during rains as the Sambalpur District Collection of fry carried on every year in Balasore, Cuttack as Sambalpur An organised fry trade exists Lakhannath in the Balasore District Gover ment fry distribution centres supply fry Cuttack, Sambalpur and Lakhannath The fisheries are owned mostly by priva individuals Government fisheries are controlled

by the Revenue Department Although peor realise that pisciculture is profitable, the multip owners of water areas prevent active develoment. The activities of the Fishery Department have been confined to propaganda which without executive authority, have not led appreciable results. The prohibition of killing of fry in canals, paddy fields, etc., by legislatic and of letting of sewage into inland water construction of dams with fish ladders and placific of Government fisheries under control of the Poblems of controlling the mesh Fisheries Department are under contemplation

The Punjab.

The main duty of the district stuff in the to be adopted for improvement of trout fisheric past has been to enforce provisions of the Punjab | The action taken is as under -Fisheries Act 1914 and conserve the existing Fisheries by patrolling livers and streams, catching and prosecuting poachers and issuing fishing licenses under the Act. The staff has however, now been entrusted with Development of Fisheries in addition to their duties of policing and patrolling. The staff were given suitable training not only theoretically but also practically in this connection in March, 1943, and have established a number of fry Farms in each district under their control to stock suitable stretches of water with fish. The number of fishing licenses issued during the year was 10,057 as against 8 203 in the previous year The increase is due to strict supervision by the staff and rise in the price of the fish which induced the fishermen to take out licenses The receipt from hisheries in 1943 44 amounted to Rs 1,14,184 as against Rs 78,243 in 1942 43

The catches of fishermen were on the whole satisfactory in all the districts

Trout -160 Trout licenses for trout waters were issued in Kulu as against 174 of the last year The decrease is due to the fact that visitors to Kulu were less than last year and a majority of the European Anglers that came for decrease in the issue of monthly and sersonal licenses. As compared with the last year the fishing conditions in the Kulu Valley are improving gradually. Tarky in May, 1943, a receiving of the Anglers and other residents of May Not and the Conference of the Anglers and other residents of May 1943, a receiving of the Anglers and other residents of May 1943, a light angle of the Anglers and other residents of May 1943, a light angle of the Anglers and other residents of May 1943, a light angle of the Anglers and other residents of the Angle of the Kulu Valles was convened under the Chairman-ship of Mr Hearn Additional Financial Commissioner, at Katrain to discuss the measures. This site is fed by Sojun Nall which is no

Fishing Season in Beas and its tributarie n. Kulu Valley was changed from "1st Novembe to 1st day of March" to "10th of October t 9th of March" (both days inclusive)

Worm fishing was prohibited,

Four additional watchers were appointe 3 for putrol

The fee of netting in portion from mil 3/1 down to Bhum was raised from Rs 6 t Rs 12

Anglers Association was formed in Kuli 5 6 5,000 eyed ova of Brown Trout wer supplied free of cost to Mandi Durbar to Stoc Ubl river

Measures so far adopted to improve the from Fisheries in Kulu Valley are as under —

(1) An independent Official has been pu incharge of trout farms with his Headquarter at Mahili Sub Inspector of Fisheries previous incharge of Firm and district work has bee transferred to Kulu and put incharge of district work and the substitution of work only

(21) 20,000 eved Brown Trout ova wer imported from Kashmir for introducing fre-The ova hatched out satis blood in Kulu

TROUT TARKS -(1) Mahili Tarm -At th Trout Farm, Mahill a sluice gate has been five in the supply channel to prevent excess of floo

water to the tanks
(11) Path Kuhl Farm—In addition to the old trout farm at Mahill a new site at Pat Kuhl has been acquired for another trout farm.

White the factor of the farm of the same factor is not been acquired for another trout farm.

The prawns cought in Sind waters belong with a view to making a survey of the Fisheries to a big maine group 'Pen ieidie' which are of this province, both marine and inland, and normally inhabitants of sea but migrate into to examine the possibilities of developing them estuaries of lower salimity in quest of their food | He has completed a part of this survey and the predominantly diatom recous character

The names are naturally in the local kınds

language

"Thairo" the biggest 'Kuliri" the medium 5"-9" 1

4" 6 3 'Kıdı" 2'-4" the small

A good number of sharks (Saw fish, Hummer head, and other several ordinary sharks) are captured specially during the months of August September and October and again February and March One variety, the "Basking' shark (Rhinodon typicus) which grows as large as 60 feet is occasionally fished with harpoons Its liver yields a large quantity of oil

There are at present two private shark liver oil factories and they are manufacturing a fairly good refined oil, fit for therapeutic purposes which is being marketted both as concentrated (20,000 1 u s) and standardised oil (1,600 1 u s)

There are two distinct oyster fisheries in Sind,—both present in the creeks which constitute the mouth of the Indus and its network, specially between Karachi and Ketibunder These are (1) Edible Oyster and (2) the windowpane oyster which yields peuls. An auction held in the year 1944 45 yielded only Rs 800 under certain conditions

The most popular fish in the Indus is the Pulla or Palloh (the well known Indian Shad) This fishery is under the control of the Revenue Dept who lease out different stretches of the Indus The Dumbra and other fresh water carps and prawns are other items in the Indus fisheries

The Hub river which forms the west boundary from Sind and Baluchistan, contain the wellknown sporting fish-Mahseer (Barbustor)

Aphanius dispar (Cyprinodon dispar Day) a well-known mosquito larvivorous fish is present in fresh water pools around Karachi and is used to a certain extent to combat malaria

Two Dehvdration Factories started here to meet the requirements of the Defence Forces stationed in India were closed this year as such products were no longer in demand

Midras Fisheries Department as Fisheries Expert | centres

in report on this is now under preparation. In the meantime the following schemes for the The prawns comprise of the following three development of the fishing industry were prepared by him and submitted to Government

- Edible oyster culture and establishment of an oyster park
- Development of prawn fishery and manu facture of seini dried prawns
- The establishment of Smoke houses for smoking Hilsa and other fishes
- The establishment of five Government fish curing vaids in the Sind coast for production of good quality cured fish
- Stabilising the fishing industry and improving the socio economic conditions of the fisher folk
- 6 The establishment of Hilsa Hatchery and a fresh water fishery research station
- The establishment of a Marine Acquarium ın Karachı
- Deep sea fishing experiments with modern type of power crafts and tackle and introduction of fish carrier launches for expeditious transport of fish
- Establishment of demonstration plants for the manufacture of fish manure and fish meal by the utilisation of fish waste and non economical fish
- Establishment of a Marine Biological and Technological station at Karachi
- Establishment of an up to date whole sale fish market with cold storage and ice packing facilities close to the new fish harbour at Karachi proposed by the Port Trust
- State centrol of the production of shark liver oil and its other products
- Of the above schemes the first four lrave already been sanctioned by the Government of Sind and are being put into execution

Other schemes for the conservancy and development of fresh water fisheries of the province are under preparation

Steps have also been taken to improve road In August 1944 the Sind Government communications for expeditious transport of appointed Dr M Rimiswami Naidu of the fresh fish from fishing centres to consuming

United Provinces.

Fisheries investigations in the United Promet about the regulation of fishing in the vinces date back to the sixtes when Dr Day, as Jumna The Government decided to institute Inspector General of Fisheries made a survey of the inland fisheries of Indu His report on the lishing a Fisheries Industry in the UP A fresh water fisheries of Indus (1876) with the listing a Fisheries Industry in the UP A lishing fresh water fisheries of India (1876) includes proposal to legislate on the lines of the Punjab replies to his questionnaires to District and Taluq officers in the United Provinces which contain valuable information, most of which still holds good. One of the results of Day's proposal to legislate on the lines of the Punjab Propo investigation was the enactment of the Govern ment of India I isheries Act of 1897

UP however was for the first time considered sound by the Government of the UP in 1920 in connectional resulting from Ldye's own imperfect summary of tion with a reference from the Punjab Govern- his recommendations in the report and his

vestigation was the enactment of the Govern ent of India I isheries Act of 1897

The possibilities of developing fisheries in the Phowever was for the first time considered sound. The first time considered sound. Due to this general misunderstanding

The Hydershild I checks Department was good item of diet may be available to the culti-established in 1941. Investigations and prell systems and villagers. Airamabad and Medak minary survey of many reservoirs and tanks have been carried out, and about 100 varieties of fishes have been collected Perennial rivers are Godivirl, Kistan and Manjera, but Manjera, but most of their tributanes dry up during There arc blg reservoirs summer m mv and more than 35,000 big tanks, besides thou- inds of small annual ones Murrel the most common and popular fish, which is obtained in large numbers during the hot season and there is always a scarcity during other periods of the year. Breeding and culture of tishes is being taken in hand and fish ferm, war the City and in the Nizura bad district will be established soon where, besides indigenous fishes, Gourami and I troplus will be kept for breiding Stocking of the reservoirs and tanks will also be done on an extensive scale, and some breeding grounds of Citla and other fishes have been located. The public are taking interest in fish culture, and several high class people have started their own concern. Mahseer and other cat fishes are amongst the sporting fishes

A plan has been submitted which aims at the development of Lisheries in districts so that a successful

vators and villagers. Airamabad and Medak districts have been taken up to start with, and this work will gradually be extended to other district. A five year plan has also been formulated under the Po t-War Planning scheme for the development of Telingana districts so that fishes may be available all the year round in large quantities. It is expected that if these parts be fully developed. Haderabad may become well sufficient to a great extent so far as fish is concerned

Lour Hahrmen's Co operative Societies have already been started, whilst others are being formed in the City and districts. Fishermen will be taught the latest methods for eath ing fishes in deep water, and other facilities to improve their condition will also be afforded

Oryzias, Gambusia, Brachydenio and Leomus have been introduced into the ARP static tanks for controlling the breeding of mo-quitoes and have proved very successful. For the control of Guinerworm disease Barbus tirto and Barbus sophore have proved quite

Travancore.

is addituted to the University of Tray incore and saited fish, the greater part of which is sold is now under the control of the Professor of in the adjoining tamil districts and Ceylon Marine Biology and Pisheries who co ordinates rescarch and administration

The coast line of Fravancore is 172 miles long ind is margined by a shallow water area, within the 100 fathom line, of nearly 3000 square miles Out of this vist expense of fishable waters, only and the value of the industry to the State at present is estimated at Rs 1,20,00,000 per year. The surf swept coast is singularly deficient in harbours and during the monsoon months. fury of the breakers is a source of great hindrance to fishing From Cape Comorin to Trivandrum the unsinkable catamarans composed of logs tied side by side is the only possible by rail. Although, by this means, it was found easy going fishing craft. From Quilon to the possible to send frozen fish to all important northern most boundary of the State small inland towns in South India, the method did not country made canoes are used and from October prove a commercial proposition owing to its

The esteemed table fish of the coast consists. of pomfrets, seer fish, several species of horsemackerel, tunny, Jew fish, whiting mackerel and thread fins In economic importance, however, shorl fish and fish of inferior quality such as butter fish, sardines, white bait and ribbon fish take precedence Butter-fish, sardines and prawns are abundant in the northern half of the coast, white cat-fish, white bait and ribbon fish are predominant in the southern half. This conspicuous difference in the distribution of shoul fish has been found to be mainly due to the differences in the nature of the ser bottom During favourable seasons, butter fish, white batt, ribbon fish and cat fish are so greatly in excess of the local food requirements that large quantities are salted and dried both for inland 6,000 8,000 international units and is sold in the consumption. consumption and for

The Department of Lisherics of the State exports annually about Rs 23,00,000 worth of

As the important shoul fish are sersonal in their appearance certain months are more favourable for fishing than others During these far ourable seasons large catches are landed daily along the coast and the only method of conservation of the large unsaleable surplus is salting and drying But realizing that salted fish is devoid of some of the essential properties of fresh fish, the Government opened a refrigera ting plant in the metropolis for the preservations and storage of fresh fish

The Department also succeeded in devising a cheap and efficient method of packing frozen fish for transport over distances within 72 hours by rail Although, by this means, it was found to June, when weather conditions are favourable seme nets are extensively employed

The esteemed table fish of the coast consists

Fish Curing -The prevalent methods of fish curing being impefect and very often unhygienle the salted and dried fish produced in India are usually inferior in quality, which accounts for the low prices they fetch and the limited demand for them In order to stimulate demand by improving the quality, the Department of Fisheries has prepared a scheme of hygienic methods of curing and experiments on dehydra tion of fish are in progress

Shark Liver Oil —The Department started the manufacture of Shark liver oil in 1939, and export Travancore pure form after eliminating traces of free acids

The main object of the 11 here. Department is to effect proper conservation of the fisheries on scientific lines with a view to increasing the production of food fishe and to illeviste the economic condition of the fishermen in the

State Job am with at 14 proposed to start the divelopment work in selected areas in the Kolar Dietrict and gradually extend it to other perts of Ithe State

COCHIN STATE.

The maritime State of Cochin South India, plan for u ing smoke and heat from a common has three types of fiberic namely, marine, oven for smoking and dehydrating separate lots estuarine and are haviter. Its popule co-stline of fish in different chambers. includes 19 700 acres of buch we ter abounding in different varieties of fish brought in through the natural openings in Cochin and Grang more Thanks to the heavy moneous months bearing down rich feed from the mountain and fore t tracts of the interior the State has her best so i fishing during the rans half of the year

តម្ភាជ Marine Estuarine Fishing -- The State has over 800 sea going boats which brim In on an average 23 lakhs manned of the every very consisting of Sardine and Macherel (through gillnets) miscell meous varieties life butter if he ribbon fish, sole fish silver bellier and horse mackerel (caught by bout seine) and sharks rays, seer and other bigger varieties (by hanling)

The bulk of the monsoon citch is needed to meet the demand within the State Itself while a fraction is salt cured and exported to the markets of Iraxancore and British India. The annual export trade in cured fish amounts to about Its 5 likhs per year. Due to wir conditions, the demand for fish within the State has so mounted up of late that no surplus is now left for its export in ice

Prawn Fishing —The sea, the extensive lagoons and the piddy lands on the cost produce various types of priwns during different parts of the year. All the varieties are nourishing and tasty Before the war Burma in general and Rangoon in particular used to provide the best market for hard dried prawn pulp from the State, the unnual export amounting to Rs 15 lakhs, but with the fall of Burma new markets have been explored in India and Cevlon with partial success. The Department of Lisheries has now resources for preserving prawns in air-tight tins which keep the product well preserved for periods ranging from 8 months In the post war era it is quite to one year likely that the State's rich crop of prawns may form raw materials for a canning industry within the State

Preservation—Salt curing is the most widespread and perhaps the only preservation process which is dependent on the sun—Artificial drying or dehydration is generally resorted to during the monsoon Smoking of fish is also encouraged as there is a demand for this from The Department has devised a Department the Army

Fish Oil Industry - Shark liver oil Riv fiver oil ite now being produced by the Department. The hammer heads and saw halics are fumous for the healing qualities of their oil particularly in ophthalmic and pulmonary Sharl liver oil which has a very troubl high percentage of Vitamin A has an exceedingly good market in the State. The Cruder form of this oil is used for caulking bouts and pole hing leather the stearm is made into in echeldal onpa and lotions

Shell Fish Industry -This indu-trv confined to the collection of little heaps of shells vashed ashore. Shells are calcined in Illus to produce lime as a cottage industry Near Wellington Island in the State, owners are available, their meat bring u ed as a specific in westing di cases and also as a delicace. The Habers Department is now exploring the po sibilities of making face powder out of oyster shella

Farming-T-turrine fish farming is Lish another contribution made by the Department in the development of the fishing industry. A splendid ground for the culture of mugilis and milk fish has been discovered by transforming the unused land for paddy or coconut into a sort of nursery. Separate areas for fishes such as the Bellitt, the Indian salmon and Jew Fish which appeal to the sporting angler and the enter allke are il-o marked and planned for systematic operations

Deep Ser Fishing —The State is working up a scheme for the operation of the boat seine of Malabar with the basal platforms of net for mackerel and of drift nets and hook and line for bigger fishes like seer, chornimus, rays and sharks

The Socio Teonomic Activities of the Depart ment are directed towards the liquidation of illiteracy amongst fisherman, by establishing five fishery schools manned by teachers from the fisher community trained in fisheries technique Canals and roads for facilitating transport of fish are also being opened by the Department Co operative Societies have also been established and are being under the auspices of the

The Forests.

many Parts of India indicated the necessity for a strong forest policy, but, whether or not our carly administrators realised the importance of the forests to the economic and physical welfare of the whole country, the fact remains that little or nothing was done to check uncontrolled destruction with its inevitable results in erosion and sterilisation of the fertility of the land. The years between 1850 and 1857 witnessed the first beginnings of forest conservancy in Southern India During the preceding twenty years far-sighted individuals had repeatedly urged, both in Madras and Bombay, that scientific advice in the management of the forests had become an urgent necessity In 1847 the Bombay Government appointed Dr Gibson as Conservator of Forests for the Presidence Madras did not follow this example until nine years later, when Dr Cleghorn was appointed Conservator of Forests in 1856 It was a Memorandum of the Government of India issued in 1855, arising as it chanced out of the annexation of the Province of Pegu in Burma which first laid down the outline of a permanent policy for forest conservancy in India Progress was delayed for a time by the disturbed state of the country, but from 1860 onwards forest organisation was rapidly extended, though the earlier sears of forest administration were full of difficulties Exploration, demarcation and settlement, followed by efforts to introduce protection and some form of organised management, were long and laborious tasks, which are even yet not com-pleted Nevertheless, large tracts of forest were saved from rum and were gradually brought under increasingly efficient management was in 1862 that the Governor General in Council submitted to the Secretary of State detailed proposals for the administration of forests as a public estate for the welfare of the country is a whole "The idea that forest is a thing valunble in itself, and, in truth, just as essential to the community as fields of wheat, sugar, or cotton, took a long time to spring up, and, in fact, is not even now generally realised in that complete manner that is essential before forest management can be said to stand on a proper basis." With the appointment of Brandis (later Sir Dietrich Brandis) as the first Inspector-General of Forests in 1863 commenced the scien thic management of India's forest estate Whitever may have been the opinions held in the past in some quarters regarding restrictions imposed by forest policy, there can now no longer be any doubt regarding the very substantial benefits which have accrued to the country through the formation of an extensive forest estate and that in her forests India now possesses a property of great value, the future importance of which it is hardly possible to over estimate

Types of Forest—More than one tenth of the total area of British India is under the control of the Forest Department These areas classified as reserved, protected or unclassed State forests. In the reserved forests form an intermediate type between the wet rights of user in favour of individuals and the public are carefully recorded and limited at tensive in Burma, and are fairly widely distri

Even in the calliest days of the British settlement while the boundaries are defined and occupation the destruction of the forests in demarcated, in the protected forests the record demarcated, in the protected forests the record of rights is not so complete, the accrual of rights after settlement not being prohibited, and the boundaries are not always demarcated, while in the unclassed forests no systematic management is attempted, and as a rule the control amounts to nothing more than the collection of revenue until the areas are taken up for cultivation or are converted into reserved or protected forests The total forest area of British India under the control of the Forest Department on 31st March, 1941, was 98,258 square miles or 11 1 of the total area This was classed as follows Reserved 72,936, Protected Unclassed State 18,550

Throughout this vast forest area, scattered over the length and breadth of India, from the over the length and breadth of India, from the Himalayan snows to Cape Comorin, and from the arid Juniper tracts of Baluchistan to the Eastern limits of the Assum hills, there is an infinite variety in the types of forest vegetation, depending on climate, topography, soil and other local factors. Vegetationally, the greater part of India, including the Indo Gangetic plain, must be considered as in the tropics, but plain, must be considered as in the tropics, but wherever there are mountains, such as the Nil giris in the south and the Himalavas and Assam Burma hills in the north, subtropical, temperate and, in the north, alpine zones must be dis tinguished, each supporting its own forest types Next to the major altitudinal effects, rainfall rext to the major altitudinal effects, rainfal is the most important factor in the determination of the nature of the forests, and within each of the main zones, tropical, subtropical, temperate and alpine, there can be distinguished wet, moist and dry forest types. In addition, various edaphic and serial types occur, dependent on local conditions, such as littoral (heach), tidal, fresh-water swamp, and riverain forests.

The following is a brief description of the main forest types —

I—TROPICAL FORESTS

1 Tropical Wet Evergreen Forests—These are dense forests, with a large number of tree species all mixed together, but according there species an mixed together, but accounts to their heights forming several canopies of layers. The upper canopy trees, among which Dipterocarps are usually characteristic, are often 150 to 200 feet high, and they very often have clear stems of 100 feet before the first branch is reached. These forests are found in the press with the beavier reached. In the the areas with the heaviest rainfall. In the southern or Peninsular region, they occur along the Western Ghats from a little south of Bombay the Western Ghats from a little south of Bombry to Tinnevelly, i.e., in the western parts of Bombay, Madras, Coorg, Mysore, Cochin and Travancore In the northern or Indo Gangetic region, the type is to be found in the wetter parts of Bengal (the submontane and Chitrigong areas), extending into the damper parts of the coastal strip of Orissa, and intermingled with the next two types over almost the whole of Assam The type also occurs extensively in North Burma and the Andamans

Tropical Semi-Evergreen Forests -These

to 9,300 feet. They are typically fairly dense grove (Rhi-ophera, Brouguiera, etc.) and Sundice evergreen forests in which several species of (Herdiera) forests, typical of salt water swamps Oal's and Chestnuts predominate but many other Many of the trees have still roots for support, and species are also present, including typically deci. duous trees such as Maple, I lm and Prunus

- 2 Moist Temperate Forests Mon' the whole length of the Himal was from the North-West I router Province, throwh Kachmir, Punjab, United Provinces Nepal and the Dar jeeling district to Sikkim and Dhutan, at alti tudes from 5,000 to 11 000 feet, and with a rain fall from 10 to 100 inches per year, are to be found extensive conferous forests similar to the temperate forests of Lurope and North America The chief trees are Spruce, Silver Lie, Cedar (Deodar), Blue Pine (Pinus excelsa), and Tsuja Cypress and Lew also occur to a less extent Often these trees are mixed together, but pure crops or one or the other arealmost more frequent, depending on the altitude aspect and other con-I vergreen Oal a are also often pre ent particularly on southern aspects, while in the damper situations are often many broad leave! trees also typical of I propern forests such as Maple, Hornbeam, Horse Che tnut, Birch, Ilm,
- Dry Temperate Forests -In the inner ranges of the Himalians, where the South West monsoon is feeble and the rainfall is usually less than 10 inches a veir, and that is mostly in the form of winter snow, is to be found extending from 5,000 to 10,000 feet a drier and more open type of temperate forest. It consists chiefly of the conifers Cedar (Deodar), Pinus gerardiana and Juniper (I macropoda), with some Silver I'ir and Broad leaved Blue Pine at higher elevations trees, such as Maple, Ash and the Holm Oak, occur scattered or in pure patches, while the Ohie spreads up from the dry subtropical zone. The type occurs in Hazara, Kashmir, Chamba, Inner Garhwal and Sikkim' Among the herbs and shrubs present are many medicinal plants, such as Artemisia and Ephedra

V —ALPINE FORESTS

The uppermost forests of the Himalayas, from rhout 9,500 to 12,000 feet, consist of a dense growth of small trees and large shrubs, chiefly Birch, Rhododendron and dwarf Jumper with particles of conferous overwood of high level the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper, but there are still extensive the making of paper. Silver Fir and Blue Pine

This gives place to an alpine scrub above, consisting of dwarf Rhododendrons, Junipers and other shrubs, interspersed with patches of grass land, which form excellent grazing areas in sum mer, when they are covered with a great variety of beautiful alpine flowers

VI —SPECIAL FORFST TYPES

Among various special edaphic and seral forest types, the following may be mentioned -

- 1 Beach Forests All round the coast, wherever a fair width of sindy beach occurs, there is a fringe of forest in which Casuarina, ori ginally introduced from Australia, is now often fall and on the prevention of erosion and sudden Elsewhere, floods most characteristic species small evergreen and deciduous trees form a low but fairly dense fringe along the shore

from the swamps to provide aeration for the roots

- 3 Fresh-water Swamp Forests—These are not very extensive but are to be found above the salt water limit in the deltas of the large rivers, and also in depressions, often old river beds, in parts of Assam Bengal, the United Pro-Vinces and Madras They are subject to prolonged annual flooding and have various species according to the locality The delta type in Bengal supports the best of the Sundri forests, often over 100 feet high
- Rivernin Forests -Along all the larger rivers on the banks of new alluvium are to be found stretches of moisture loving trees, such as I agerstromia flor regina, Terminalia muriocarpa and Salix tetrasperma. On recently deposited grivels and sand, extensive stretches of which occur along many river courses both in North and South India, are often to be found forests in various stages of succession, depending on how new or old is the deposit, on the rainfall and other local factors. Perhaps the most characteristic are the Khair (Acacia catechu) Sissoo (Dalbergia green) and Tamarix forests found throughout Northern India from Assum to Punjab These forests are usually characterised by heavy grass, and with protection they slowly change to a more miscellaneous type of forest by the gradual colo nising of other species

VII —THE BAMBOOS

No account of the forests of India would be complete without a reference to the Bamboos, of which there are very many species occurring in the tropical, subtropical and temperate zones Tall bamboos, such as Bambusa arundinacea and Dendrocalamus hamiltonii, often form a verv dense undergrowth in the tropical semi evergreen and moist deciduous forests, while Dendrocala mus strictus is locally abundant and economically important in the drier parts of the tropical moist the making of paper, but there are still extensive areas of forests with a dense undergrowth of bamboos, which are not at present economically exploitable and which often greatly hinder other forest apparation forest operation

Forest Policy—The general policy of the Government of India in relation to forests was definitely laid down in 1894 by the classification of the areas under the control of the Department

into four broad classes, namely

Forests the preservation of which is essen tral on climatic or physical grounds These are usually situated in hilly country where the retention of forest growth is of vital importance on These are account of its influence on the storage of the run

(b) Forests which afford a supply of valuable timbers for commercial purposes, such, for exam 2 Tidal Forests—In the Sunderbans of ple, as the teak forests of Central and Southern the Ganges Brahmaputra delta, and along the mouths of other large rivers, such as the Mahanadi, Godaveri and Indus, are to be found Man-forests of the North-Western Himalaya \(\(\cent(c)\) Minor Fore to containing somewhat in ferior kinds of timber and mana d for the production of wood fodder grazin and other pro in the Indi n Forest Engi ceri for local consumption this fore is are of great importance in agricultural districts

KONDCHOLING.

Broadcasting -For several years, limited | Radio Clubs in Calcutta, Bombay, and Madras, and although the transmitting sets employed by them were of very low power, the broadcasts were popular The clubs were assisted financially by a Government contribution based upon the revenue from licence fees, but this did not nearly suffice to cover the cost of the transmissions, and the greatest credit is due to the members of those clubs for the sport ing manner in which they provided additional funds and undertook the entire responsibility for the programmes

After negotiations extending over several on Indian Broadcasting Company granted a licence to establish broadcasting services upon lines similar to those of the British Broadcasting Corporation, and transmitting Corporation lent India in the early months of stations were erected in Bombay and Calcutta, 1936 the services of Mr H L Kirke the services at the former being inaugurated by His Excellency the Viceroy in July 1927 and the latter by the Governor of Bengal a month later These stations had each, an aerial input of one and a half kilowatts, the same as that of the 2LO stations in London, of which they were practically duplicates The programmes were so arranged that both Indian European music were broadcast daily and the news bulletins and market and weather reports were read in two languages

All India Radio — The Indian Broadcasting Company was wound up in 1930 and its operations have since been conducted by the Government of India Government for this purpose formed an Indian State Broadcasting Service, now called All India Radio, and instituted a Central Broadcasting Advisory Committee, representative of the non-official public in association with the Departmental officials, to keep them in touch with public opinion The Committee had as its chairman the Member of the Vicercy's Executive Council in charge of the subject

Government, availing themselves of an improvement in their financial condition, in 1934 35 decided upon a large development of their broadcasting service and allocated substantial funds for the purpose inducement for the expansion of broadcasting expected to provide a first grade service at distances more than 30 to 50 miles from the Customs duties on imports of wireless material.

This showed on the one hand a widesproad dearn. This showed on the one hand a widespread desire

The first important development ordered by Government was the opening of a 20 kW medium-wave broadcasting station at Delhi This station was actually opened on 1st Janu ary 1936 Its wavelength is 3386 metres 886 kc/s) The wavelength was somewhat in conveniently close to that of Bombay, but at the time when the station was erected it terrupees per year, and cover the use of receiving at the time when the station was erected it. vas believed to be the best length of mediumwave for transmissions in India It was therefore appropriated for the first 20 kW station Province Licences for fixed stations for be built The Bombay wavelength has since been changed

The Government of India decided to appoin

Government, in announcing their determina tion to open a large broadcasting station in Delhi, intimated that they proposed to follow this by the installation of modern trans mission equipments in place of the existing plants in Bombay and Calcutta and that a similar modern station would be opened in Madras The thorough investigation of general broadcasting problems throughout India which followed the arrival of Mr Fielden led to a revision of these plans, and through his instrumentality the British Broadcasting A valuable report was presented by this official,

and a plan for wide extension of broadcasting Government engaged activities was elaborated Mr C W Goyder, one of the foremost wireless, and particularly short-wave, engineering experts in the world, to be their principal engineer for construction and research work Orders for extensive new equipment for implementing plans for expansion prepared by these experts were placed in January 1937 It included new 10 kW short-wave transmitters for Bombay and Calcutta and one 10 kW and one 5 kW short wave transmitters for broadcasting and experimental work in Delhi It also included a 10 kW short-wave transmitter for Madras, for service throughout the Madras Presidency, and a 250 watt medium wave transmitter for Madras City All this apparatus is of the most modern type
This makes for economy in working and
gives purity of rendering unexcelled in any
other country The short-wave plant is considered of great importance, as it provides a measure of service for the whole of The medium wave transmitters are an India intended to give a first-grade service on in expensive receivers in the large towns, but owing to atmospheric conditions in India A special during the greater part of the year cannot be

His Excellency the Marquess of Linlithgow, on the part of the public for further broadcasting services and on the other hand a prospect of substantial profits to Government through the increase of imports of wireless apparatus

His Excellency the Marquess of Limitage as immediately after taking the oath of office as with the profits to Government through the increase of imports of wireless apparatus

His Excellency the Marquess of Limitage as immediately after taking the oath of office as proceeded to deliver a broadcast address increase of imports of wireless apparatus

to the Princes and people of India

This immediately after taking the oath of office as proceeded to deliver a broadcast address increase of imports of wireless apparatus. remarkable innovation in procedure was regard ed as indicating His Excellency's enthusiasm for broadcasting and to portend the interest he has shown in its development

Licences -Broadcast receiver licences are sets throughout British India except Baluchistan and the tribal areas of the North West Frontier much sought after, and despite a careful

crutiny of the pplicants a con iderable wireless recent and any numb of it is mber have been I ued (Most it licence: he now been withdrawn for the form of the wireless to the considerable wireless to the considerable wireless to the considerable wireless. The considerable wireless to the considerable wire

PHOTO TELEGRAM SERVICE

by amalgamation of the three Presidency Banks of Bengal, Bombay and Madras

The idea of a Central Banking establishment for British India was mooted as early as 1836, and was the subject of a minute by Mr James Wilson, when Finance Member, in 1859 Again, in 1867 Mr Dickson, the well-known Secretary of the Bank of Bengal, submitted detailed pro posals for an amalgamation of the three Presi dency Banks On various later occasions the matter was brought forward without result and it was discussed by the Chamberlain Commission on Indian Finance and Currency in 1913 The present scheme which has come to fruition was however the result of a rapprochement on the part of the Banks themselves as a result of the experience gained during the war and the realisation of the desirability of strengthening and extending the Banking system India

The Presidency Banks—The history of the Presidency Banks in their relationship with Government falls into three well defined stages Prior to 1862 the Presidency Banks had the right of note issue, but were directly controlled by Government and the scope of their business was restricted by their charters. The second period was from 1862 to 1876. In 1862, the Banks were deprived of the right of note issue, though by their agreements of that year they were authorised to transact the paper currency business as agents of Government As com-pensation for the loss of their right of issue, they were given the use of the Government balances and the management of the treasury work at the Presidency towns and at their branches The old statutory limitations on their business were at the same time greatly relaxed, though the Government's power of control remained In 1866 the agreements were reunchanged vised and the paper currency business was removed from their control and placed under the direct management of Government third period dates from the Presidency Banks Act of 1876 by which nearly all the most importrut limitations of the earlier period were reimposed. But, very briefly, the principal restrictions imposed by this Act prohibited the conducting foreign exchange Banks from husiness, from borrowing or receiving deposits privable out of India, and from lending for a longer period than six months, or upon mortgage or on the security of immovable property or upon promissory notes bearing less than two independent names or upon goods, unless the goods of the title to them were deposited with the Bank as security At the same time Government abandoned direct interference in the management, ceasing to appoint official directors and disposing of their shares in the Banks. The Banks no longer enjoyed the full use of the Government balances Reserve Tressuries were constituted at the Presidency towns into which the surplus revenues were drawn and the bulances left at the disposal of the Banks were strictly limited

This system continued with only modifications until 1920

balances with the Headquarters of the Presidency Banks in order to assist the money market

The Imperial Bank of India -Under the Imperial Bank of India Act of 1920 as amended by the amendment Act of 1934 which came into force from 1st April 1935 the control of the Bank is entrusted to a Central Board of Directors with Local Boards at Calcutta, Bombay and Madra and such other places as the Central Board may determine The Central Board of Direc tors shall consist of -

the presidents, vice presidents and the secretaries of the Local Boards, (a)

(b) one person elected from amongst the

members by each Local Board,

Managing Director and a Deputy
Managing Director appointed by the (c) Central Board ,

(d) not more than two non officials, nomi nated by the Central Government

Representatives of any new Local Boards, which may be constituted, may be added at the discretion of the Central Board

The Deputy Managing Director and the Secretaries of the Local Boards are entitled to attend the meetings of the Central Board but not entitled to vote The Deputy Managing Director is entitled to vote in the absence of the Managing Director

The Central Government shall nominate an officer of the Crown to attend the meetings of the Central Board but he shall not be

entitled to vote Under the Imperial Bank of India Act of 1920 provision was made for the increase of the capital of the bank The capital of the three Presidency of the Dank The capital of the three Freshelds Banks consisted of 32 erores of rupees in shares of Rs 500 each, fully subscribed The additional capital authorised was 72 erores in shares of Rs 500 each, of which Rs 125 has been called up, making the present capital of the Bank Rs 112 erores, of which Rs 5,62,50,000 has been paid up. The Reserve Fund of the Bank Br. 6,00,000 con and the Balance Sheet of 18 Rs 6,00,00,000 and the Balance Sheet of 31st December 1944 showed the deposits at Rs 237,78,30,028 and Cish Rs 28,31,03,060 with a percentage of cash to Habilities of 11 90.

Agreement with Reserve Bank of India The Bank has entered into an agreement with the Reserve Bank of India which will remain in force for 15 years and thereafter until terminated after five years' notice on either side Provisions contained in the agreement between the Imperial Bank of India and the Reserve Bank of India are -

The Imperial Bank of India shall be the sole agent of the Reserve Bank of India at all places in British India where there is a branch of the Imperial Bank of India which was in existence at the commencement of the Reserve Banl of India Act, 1934, and there is no branch of the Banking Department of the Reserve Bank of

Exchange Banks' Investments.

Turning now to the question of the investment of the Banks' resources, so far as it concerns India, this to a great extent consists of the purchase of bills drawn against imports and exports to and from India

The financing of the import trade originated and is carried through however for the most part by Branches outside India, the Indian Branches' share in the business consisting principally in collecting the amount of the bills at maturity and in furnishing their other branches with information as to the means and standing of the drawees of the bills, and it is as regards the export business that the Indian Branches are more immediately concerned The Exchange Banks have practically a mono-poly of the export finance in India and in view of the dimensions of the trade which has to be dealt with the Banks would under ordinary circumstances require to utilise a very large proportion of their resources in carrying through the business They are able, however, by a system of rediscount in London to limit the employment of their own resources to a comparatively small figure in relation to the business they actually put through No definite information can be secured as to the extent to which rediscounting in London is carned on but the following figures appearing in the balance sheets latest available of the undernoted Banks will give some idea of this -

LIABILITY OF BILLS OF EXCHANGE RE-DISCOUNTED AND STILL CURRENT Chartered Bank of India, Australia and China 576,000 Eastern Bank, Ltd 3,041,000 Mercantile Bank of India, Ltd 231,000 National Bank of India, Ltd 710,000

The above figures do not of course to re-discounts of Indian bills alone, Banks operate in other parts of the worl but it may safely be inferred that bills dr India form a very large proportion of the

The bills against exports are largely dra three months' sight and may either be "cor be accompanied by the documents re to the goods in respect of which they are Most of them are drawn on well-known at home or against credits opened by or financial houses in England and bear they do an Exchange Bank endorsement are readily taken up by the discount l and Banks in London Any bills pure in India are sent home by the first pe Mail so that presuming they are redisco as soon as they reach London the Exc Banks are able to secure the return of money in about 16 or 17 days instead of h to wait for three months which would b case if they were unable to rediscount must not be assumed however that all are rediscounted as soon as they reach Lo as at times it suits the Banks to hold up bills in anticipation of a fall in the Lo discount rate while on occasions also the B prefer to hold the bills on their own acc as an investment until maturity

The Banks place themselves in funds in I for the purpose of purchasing export bill a variety of ways of which the following

the principal

(1) Proceeds of import bills as they mat (2) Sale of drafts and telegraphic tr fers payable in London and elsew.

out of India (3) Purchase of Council Bills and Tele phic Transfers payable in India to the Secretary of State

(4) Imports of bar gold and silver bull (5) Imports of sovereigns from Lond Egypt or Australia

The remaining business transacted by 4,558,000 Banks in India is of the usual nature and n not be given in detail.

The following is a statement of the position of the various Exchange Banks carrying on bush in India as it appears from the latest available Balance sheets -

INDIAN PRIVATE BANKERS AND SHROFFS.

Indian private Bankers and Shroffs flourished in India long before Joint Stock Banks were ever thought of, and it seems likely that they will continue to thrive for some very considerable time to come The use of the word "Shroff" is usually associated with a person who charges usu-ious rates of interest to im-hope to be able to get into sufficiently close

touch with the affairs of the wast trading commonity in India to enable them to grant accommonity in India to enable them to grant accommonity in India to enable them to grant accommonity in the bassar is therefore direct and it. In the especial to the provide the state of the India that the shroft proves of such great service place on the transactions and (2) the extent to that the shroft proves of such great service place on the transactions and (2) the extent to that the shroft proves of such great service place on the transactions and (2) the extent to that the shroft provide which the India transactions and (2) the extent to utder the volume of business within the scope bearing his endowment. The shroft keep in Presidency Banks to give accommond tion out by grant accommodation and past experience which without his assistance the Banks would have shown that the class of business above as an I termediary between the trading come in the provided provided the state of the shroft aposition referred to it one of the safest the Banks can as an I termediary between the trading come in the state of the shroft and the state of the shroft and the state of the shroft and the state of the shroft and the state of the shroft and the state of the shroft and the state of the shroft and the state of the shroft and the state of the shroft and the state of the shroft and the state of the shroft and the shrof

mustly and the Hanks usually arises in some thing after the following manner: A shop-keeper in the bazaar with limited means of his based on the sates at which thy in turn can be seen that the sate of the sates at which the sate of the suitably. He thereupon approaches the shron and the latter after very earth illiquities as for the sate of the sate of the sate of the sate of the sate of the sate of the sate of the modition, if he is satisfied that the business is a full paper and with the sate of the sate of modition, if he is satisfied that the business is a full paper to a first class borrower. But a safe The business as a rule is arranged through in Bombay to a first class borrower Rates a hoondee broker and in the case referred to in Callutta and Madras are on a slightly higher a monutes proker and in the case referred to in valents and sagns are on a suggitly higher the latter may probably approach about ten read one in a gre time sur. to the fact that shr is and secure accommodation from them the competition among the shrifts for business to the etten of Rs _500 cach. A hounded is not so keen in these places as it is in Bombay

to the extent of Rs _,500 each. A nonunce to the extent of Rs _,500 each A stage is reached however when the demands amount maring uner array offices not no most on the shrolls are greater than they are able to part in Biskner and Shikarpur respectively the meet out of their descriptions of the stage of the sta

meet out of their own money and it is at the ledge of the down who have point in the assistance of the B aks is called very wide powers a number of the bills they already hold to the assistance of the bills they already hold to the Bulks for discount under their endorsement and shruffs receive deposits and engage in the bulks as accept such bills freely to an change bulken throughout ladds, but there is extended the such as the standing of the standing of orbit that this is done to a very considerable of the shruff and the strength of the drawer is extent. It is not known to what extent nati e b nk re

THE BANK RATE

Formerly each Presidency Bank fixed its and advances on other securities or discount own Bank Rate and the rates were not uniform are grant das a rule at a slightly higher rate Alter the analgamation of the Pre idency Ordinarily such advances o d counts are B raths Imperi 18 nk fixed the rate for the granted a from one half to one per cent over subset of 1 of until the 4th of July 1935 when the official rate but this does not alw ys apply and the first to fix the official bank r to was ever and in the monseon much when the Bank of the contract of the state charged by the Banks of the common that the state charged by the Banks of the common that the state charged by the Banks of the common that the state charged by the state charged by the demand to make a commondation is greated to the demand to make a grant and the state charged by the state charged by the state charged by the state of the state charged by the state of the state charged by the state of the state charged by the state of the

BANKERS' CLEARING HOUSES.

The principal Clearing Houses in India are those of Calcutta, Bombay, Madras, Rangoon, Colombo and Karachi, and of these the first two Colombo and Karachi, and of these the first two drawn on him negotiated by the latter. After are by far the most important. The members and to receive in exchange all cheques are these places consist of the Imperial Bank, Resorve Bank, most of the Exchange Banks and English Banking agency firms, and a few of the better known of the local Joint Stock Banks No Bank is entitled to claim to be a member itself that the totals of the debtor balances as of right and any application for admission to a Clearing must be proposed and seconded by two members and be subject thereafter to ballot by the existing members.

BANKEKS ULEAKING HUUSES.

All cheques he may have negotiated on other members and to receive in exchange all cheques drawn on him negotiated by the latter. After the representative of each Bank advises the representative of each Bank advises the representative of the difference between his total receipts and deliveries and the settling Bank thereafter strikes a final balance to satisfy the total of the creditor balances agrees with the total of the creditor balances agrees with the total of the creditor balances agrees with the total of the creditor balances agrees with the course of the debtor balances agrees with the course of the day and the latter in turn arranges to pay on receipt of those amounts

The duties of settling Bank are undertaken by the Reserve Bank at Calcutta, Bombay, Madras, practice however all the members keep Bank Karachi and Rangoon and by the Imperial accounts with the settling Bank so that the Bank at Colombo and a representative of final balances are settled by cheques and book each member attends at the office of that Bank on each business day at the time fixed to deliver cash in any form

The figures for the Clearing Houses in India above referred to are given below -

Total amount of Cheques Cleared Annually In Lakhs of Rupees

to Eastern conditions three experimental lines verting the Sind and Punjab lines from metre were sunctioned in 1845. These were from Calcutta to Ranganj (120 miles), the East Indian Railway, Bombry to Kalyan (32 miles), Great Indian Pennsula Railway, (1882-85), since absorbed by the Great Indian And Madras to Arkonam (39 miles), Madras Railway Indian Railway building on a serious scale dates from Lord Dalhousie's great minute of 1853, wherein after dwelling upon the sunction of 1853, vantages of connecting the chief cities by rail, he suggested a great scheme of trunk lines linking the Presidencies with each other and the inland regions with the principal ports fall of the exchange value of the rupee, Gov the inland regions with the principal ports. This reasoning commended itself to the Directors of the East India Company, and it was powerfully reinforced when, during the Mutiny, the barriers imposed on free communication were severely felt. As there was no private enterprise. Four companies were Kalka, the Bengal Central, and the Bengal and North Western. The first became bankrupt, private capital in India readily available for railway construction, English Companies, the and the Tirhut Railway had to be leased and the Tirhut Railway had to be leased and the fourth. interest on whose capital was guaranteed by the State, were formed for the purpose By the end of 1859 contracts had been entered into with eight companies for the construction of 5,000 miles of line, involving a guaranteed capital of £52 millions These companies were (1) the East Indian, (2) the Great Indian Peninsula, (3) the Madras, (4) the Bombay, Baroda and Central India, (5) the Eastern Bengal, (6) the Indian Branch, later the Oudh and ilkund State Rulway and now part of East Indian Rulway, (7) the Sind, Rohilkund State

Early Disappointments

The main principle in the formation of these companies was a Government guarantee on their capital, for this was the only condition This on which investors would come forward guarantee was a five per cent return coupled with the Khojak Pass added large the free grant of all the land required in return sary, but unprofitable, outlay the companies were required to share the surplus profits with the Government, after the guaranteed interest had been met, the interest charges were calculated at 22d to the rupee, the Railways were to be sold to Gov panies were offered a rebate on with the main ernment on fixed terms at the close of twenty-lings of the traffic interchanged with the main lings of the traffic interchanged with the main lines to four five years and the Government were to exer cise close control over expenditure and workcise close control over expenditure and working. The early results were disappointing to the Early results were disappointing to the Railways greatly increased the efficiency of the civil administration, the mobility of the troops, the trade of the country, and the movement of the population, they failed to make profits sufficient to meet the guaranteed interest. Some critics attribute this to the unnecessarily high standard of construction adopted, and to the engineers' ignorance of local conditions, the result was that by 1869 the deficit on the Railway budget was Rs 166½ thanks Seeking for some more economical method of construction, the Government secured sanction to the building of lines by secured sanction to the building of lines by of surplus profits, or rebate up to the full ex-

that their construction in India was contem-plated. And then to test their applicability money available had to be diverted to con

Famine and Frontiers In 1879, embarrassed by famine and by the

to the fourth A step of even greater in portance was taken when Indian States were invited to undertake construction in their own territories, and the Nizam's Government guaranteed the internal construction in the construction of the construction ernment guaranteed the interest on 330 miles of line in the State of Hyderabad This was the first of the large system of Indian State Railways In the first period up to 1870, 4,255 miles were opened, of which all save 45 were on the broad-gauge, during the next ten years there were opened 4,239, making the total 8,494 (on the broad-gauge 6,562, the Punjab and Delhi, now merged in the NorthMestern Railway, and (8) the Great Southern
of India, now the South Indian Railway
scheme laid the foundations of the Indian
Railway system as it exists to day

The total 8,494 (on the broad-gauge 4,004, and narrow 67) Then ensued
a period of financial ease. It was broken by
the fall in exchange and the costly lines built
on the frontier. The Penjdeh incident, which
brought Great Britain and Russia to the verge
the provided of the provided and the control of our of war, necessitated the connection of our outposts at Quetta and Chaman with the main trunk lines The sections through the desolate Harnai and Bolan Passes were enormously costly, it is said that they might have been ballasted with rupees, the long tunnel under the Khojak Pass added largely to this neces Rebate Terms Established

This induced the fourth period—the system Instead of a gold subsidy, com of rebates panies were offered a rebate on the gross earn cent of the gross earnings Under these con

"s substituted an lacre so in the rate of guar [of the grant lines of the would choled as bates from 3 to 33 per cent and of rebate from with ten is certain a one of the var and 31 to 5 per cent with equal division of surplus makin a 1 rac p oft for the Vater In 1000 profits over 5 per cent in both classes. At lat the showings for the flast time how of a small way the same of the contract of the variety of t w a substituted an incre se in the rate of guar after the war a d the Acworth Committee so ar from approving of this system considered hat the aim of the Government should be to duce by amalgamation the number of existing tompa les and that it should only be in cases where the State cannot or will not pro ide adequat funds that private enterprise in this tion should be encouraged

contracts under which the guaranteed lines were constructed. The five per cent dividend guaranteed at 22d per rupee, and the half-yearly settlements made these companies sudden increase in the trade of India found the a drain on the State at a time when their stock was at a high premium. The first contract to fall in was the East Indian, the great line connecting Calcutta with Delhi and the North ern provinces. When the contract lapsed, the Government exercised their right of pur chasing the line, paying the purchase-money in the form of terminable annuities, derived from revenue, carrying with them a sinking fund for the redemption of capital. The railmay thus became a State line, but it was re leased to the Company which actually worked it. a drain on the State at a time when their stock main lines totally unprepared Costly work Indian Railway Company brought to the State struction in India was limited only by the in the ten years ended 1909 after meeting all capacity of the money market They fixed charges, including the payments on account the annual allotment at £12,000,000 a of the terminable annuity by means of year Even this reduced sum could not always charges, including the payments on account of the terminable annuity by means of which the purchase of the line was made, and interest of all capital outlay subsequent to the date on purchase, a clear profit of nearly ten millions No other railway shows results quite equal to the East Indian, because in addition to serving a rich country by an easy line, it possesses its own collieries and enjoys cheap coal But with allowance for these factors, all the other guaranteed companies which have been acquired under similar conditions as their contracts expired, have Engineers was formed, and a whole system of proportionately swelled the revenue and as sets of the State It is difficult to estimate the amount which must be added to the capital Department of the Government of India As debt of the Indian relationship of the Contracts and counterchecks established, leading the Indian relationship of the Covernment of India As Department of the Government of India As the amount which must be added to the capital Department of the Government of India As debt of the Indian railways in order to counter-traffic developed, the Indian Railways out balance the loss during the period when the grew this dry nursing, and when the original revenue did not meet the interest charges contracts expired, and the interests of Govern-According to one estimate it should be 550 mills. According to one estimate it should be £50 mil Government have a magnificent asset in their in 1901-02 Mr Thomas Robertson was deputed railway property

Improving Open Lines

Those changes induced a corresponding change in Indian Railway policy Up to 1900 the great work had been the provision of trunk lines But with the completion of the Nagda-Muttra line, providing an alter native broad-gauge route from Bombay to Delly through England Railway to the trunk

Under these new conditions the Last could be remuneratively spent on railway con be provided

Government Control and Re organisation of Railway Board

As the original contracts carried a definite Government guarantee of interest, it was necessary for Government to exercise atrong supervision and control over the expenditure during construction, and over management and expenditure after the lines were open for traffic For these purposes a staff of Consulting ment and the Companies synchronised, it became by the Secretary of State to examine the whole question of the organization and working of the Indian Railways, and he recommended that the existing system should be replaced by a Railway Board, consisting of a Charman and two mambars with a Secretary The and two members with a Secretary Board was formally constituted in March 1905 The Board was made subordinate to the Government of India in which it was represented native broad-gauge route from Bombay to Delhi through Eastern Rajputana, the trunk system was virtually complete A direct broad gauge route from Bombay to Sind is needed, but the poor commercial prospects of the line and the opposition of the Rao of Cutch to any through line in his territories, has for some time kept this scheme in the background. There does not exist any through rail connection between India and Burma, although several routes have been surveyed the mountainous character of the region to be traversed, and the easy means of communication with Burma by sea, rob this scheme of any living importance. Further survey work was undertaken between 1914 and 1920, the three routes to be surveyed being the coast route, the Manipur route, and the Hukong valley route. The Board was made substituted by the Department of India in which it was represented by the Department of Commerce and In dustry. It prepared the railway programme of of policy and economy affecting all the lines. It is administrative duties included the construction of new lines by State agency, the carrying out of new works on open lines, the improve out of new works on open lines, the improve out of new works on open lines, the control and promotion of the staff on State lines, and the promotion of the staff on State lines, and the constitution of the Railway Board. ion we introduce the control of the

Indian Railway Enquiry Committee—presided over by Sir Ralph Wedgewood—the Central Accounts organisation of railways was taken over by the Railway Board The present superior staff in the railway Board, therefore, consists of the Chief Commissioner, the Financial Commissioner, 2 Members, 6 Directors, a Secretary and 15 deputies and assistants

Railways The work of the different railways was gradually transferred to this office, the North Western Railway being taken over first on the 1st January 1927, the East Indian Railway following on the 1st April, the Eastern Bengal Railways The work of the different railways was gradually transferred to this office, the North Western Railway being taken over first on the 1st January 1927, the East Indian Railway following on the 1st April, the Eastern Bengal Railways The work of the different railways was gradually transferred to this office, the North Western Railway being taken over first on the 1st January 1928, and the Great Indian Peninsula and B B & C I

Under the Railway Board's policy of progressive standardisation, a Central Standardisation Office was established in 1930 under a Chief Controller of Standardisation to provide the means whereby such standardisation would be progressively effected in accordance with changing conditions and as the result of practical experience. The technical Officer under the Railway Board was transferred to this office as a Deputy Controller This office was made permanent in 1935

The question of transferring the supervision of railway accounts of State Railways from the Finance Department to the Railway Board was under consideration for some time and in accordance with a resolution adopted, by the Legislative Assembly in September 1925, a start was made with the transfer of the supervision of railway accounts on the East Indian Railway At the same time a separate Audit Staff was appointed reporting directly to the Auditor-General As it was found that the separation of Audit from Accounts led to greater efficiency, a similar organisation was introduced on other State managed railways during 1929 The supervision of Accounts Officers was placed under a Controller of Railway Accounts reporting to the Financial Commissioner of Railways and that of Audit Officers under a Director of Railway Audit reporting to the Auditor-General These two duties were previously combined under the Accountant-General, Railways, reporting to the Auditor-General The Chief Accounts Officers on railways are now under the Counts. on railways are now under the General Managers and the Controller of Rulway Accounts has been made a Director under the Railway Board

Management

There are two important systems of administration organisation on Indian Railwaysthe Divisional system and the Departmental system. In the divisional system the rulway system in the divisional system file inway is divided into divisions, each under a Divisional Superintendent, who in turn has officers of all departments like Civil Engineering, Transportation, Commercial, Accounts, Stores, the running and operation portion of Mechanical Medical, working under him in his division. In the departmental system the railway is divided into smaller portions called districts by each department (and districts of the various). departments need not be co terminus) and each of these districts is under a District Officer reporting direct to the head of his department in the Headquarters Office

Clearing Accounts Office

During 1927-28 demonstrations explaining the Clearing Accounts Office procedure were given to the representatives of the Press as well as to the representatives of the various railways who visited the office to study the new procedure

The Railway Conference

In order to facilitate the adjustment of domestic questions, the Railway Conference was instituted in 1876 This Conference was consolidated into a permanent body in 1903 under the title of the Indian Railway Conference Association It is under the direct con trol of the railways, it elects a President from amongst the members, and has done much useful work

The Indian Gauges

The standard gauge for India is five feet six inches When construction was started the broad-gauge school was strong, and it was six thought advisable to have a broad-gauge in order to resist the influence of cyclones in 1870, when the State system was adopted it was decided to find a more economical gauge, for the open lines had cost £17,000 a mile. After much deliberation, the metre gauge of 3 feet 3½ inches was adopted, because at that time the idea of adopting the metric system for India was in the air. The original intention was to make the metric system of the metric system of the metric system of the metric system of the metric system. was to make the mctre-gauge lines provisional, they were to be converted into broad gauge as soon as the traffic justified it, consequently they were built very light But the traffic expanded with surprising rapidity, and it was found character to reserve the correlar power found cheaper to improve the carrying power of the metre-gauge lines than to convert them to the broad-gauge So, except in the Industrial Property of the prop Valley, where the strategic situation demanded an unbroken gauge, the metre gauge lines were improved and they became a permanent feature in the railway system Now there is a great metre-gauge system north of the Ganges connecting. a great metre-gauge system north of the Ganges connecting Assam with the Rajputan lines and Kathiawar and another system in Southern India serving large tracts of the Bombay and Midras presidencies and the States of Hyderibad, Mysore and Travancore These two systems are not yet connected, but the necessary link from Khandwa by way of the Nizam's Hyderibad-Godaveri Railway, cannot be long delayed Certain feeder and hill railways have been constructed on the 2"-6" and 2"-0" gauges and since the opening of the Barsi Light Railway which showed the possible capacity of the 2-6" which showed the possible capacity of the 2-6 gauge, there has been a tendency to construct feeder lines on this rather than on the metre gauge

A Clearing Accounts Office, with a State versus Company Management — Statutory Audit Office attached thereto, was opened in December 1926 to take over work relating to the check and apportionment of owned by Government which comprise the

Assembly on 3rd March 1924 to examine the proposals for the separation of railway from general finances The final resolution agreed to by the Assembly on September 20th, 1024, and accepted by Government differed from the original resolution in that the yearly contribution had been placed at 1 per cent instead of 5/6th per cent on the capital at charge and if the surplus remaining after this payment to General Revenues should exceed 3 crores, only and of the excess over 3 crores were to be transferred to the Railway Reserve and the remaining itd was to accrue to General Revenues the same time a Standing Linance Committee for Ballways was to be constituted to examine the estimate of railways expenditure and the demand for grants, the programme revenue expenditure being shown under a depreciation fund This committee was to consist of one nominated official member of the Legislative Assembly as Chairman and 11 members elected by the Legislative Assembly from that body This would be in addition to the Central Advisory Council which will include the Members of the Standing Finance Committee and certain other official and non-official members from the Legislative Assembly and Council of State These arrangements were to be subject to periodic revision but to be provisionally tried for at least 3 years They would, however, only hold good as long as the E I Railway and the G I P Railway and existing State Managed Railways remain under State management and if any contract for the transfer of any of the above to Company management was concluded against the advice of the Assembly, the Assembly would be at liberty to terminate the arrange ments in this resolution

The Assembly in an addendum recommended that the railway services and the Railway Board should be rapidly Indianised and that the stores for the State Managed Railways should be purchased through the organisation of the Indian Stores Department

The principles of allocation of surplus laid down in the above resolution has since been amended by a subsequent resolution passed by the Legislative Assembly on 2nd March 1943 which provided, inter alia that from 1st April 1943 so much of the convention as provides for the contribution and allocation of surplus to general revenues ceases to be in force and until a new Convention is adopted by the Assembly, the allocation of the surplus on commercial lines between the railway reserve and general revenues shall be decided each year on consideration of the needs of the railways and general revenues, the loss, if any, on strategic lines being recovered from general revenues

Re organisation problems —The growing complexity of railway administration in India and the evolution of new methods of controlling traffic have given a stimulus to the efforts of various railways to revise their organisations The general direction in which this re-organisa tion is being considered is that of consolidation into one department of the operating or transportation work of the railway, including the provision of power This system is invariably in existence on those railways which have general organisation is still on the Departmental basis

The Pope Committee

When the railway finances were in a bid way, a Committee under the chairmanship of Mr F A Pope, General Executive Assistant to the President of the L M S Railway, was formed to investigate and inaugurate a detailed analysis of every important achievement of railway operation The Committee started work during 1932 33 and among other things, perfected a system of detailed investigation into individual items of railway working which came to be known as 'Job Analysis'

Mr Pope returned to India in 1933 34 and prepared a second report based upon the progress of the work and on further possibilities of economy

The most important recommendations of Mr Pope's second report related to -

- Intensive use of locomotives
- Intensive use of coaching stock 2
- Intensive use of machinery and plant
- Disposal of Uneconomical wagons 4
- Combining resources between railways 5
- Handling and transport of smalls traffic and of traffic to be transhipped at break of gauge stations
 - Ticketless travel.
- Methods of increasing earnings

As a result of the 1st report of the Pope Committee, special 'Job Analysis' Organisa tions, were set up on most of the important Indian Railways Their main purpose was to investigate in data? her main purpose was to investigate in detail by special methods in dividual aspects of rulway working and suggest means whereby economies may be achieved or the efficiency of operation increased

Having overhauled the methods of working on the railways by stages, these organisations have since been abolished

Indian Railway Enquiry Committee

As a result of the recommendation of the public Accounts Committee the Indian Railway Enquiry Committee was appointed in October 1936 This Committee was under the Chairman ship of Sir Ralph L Wedgewood, CB, CMB, Chief General Manager of the London North Eastern Railway Its terms of reference were

To examine the position of Indian State. owned railways and to suggest such measures as may, otherwise than at the expense of the general budget,

- (1) secure an improvement in net earnings due regard being paid to the question of establishing such effective co-ordination between read and real transport as will between road and rail transport as will safeguard public investment in railways while providing adequate services by both means of transport means of transport, and
- (12) at a reasonably early date, place railway finances on a sound and remunerative basis

The report was submitted in June 19 luly considered by the Lallway Loard Larly school was taken to implement such of the recom iction was taken to implement a such that I other reministion. Where special in retigation was considered necessary this was arranged for

INDIA AND CEYLON

of Rameswaram Island and the Ceylon Gov ernment Railway to Talaimannar on Mannar related two points distant from each other about 20 miles across a narrow and ah llow strait the possibility of connecting these two terminal stations by a rallway con tructed on a solld embankment raised on the sand ba k known as Adam a Bridge to supers d the ferry ste mer service which has been established between th se two points is one of the schemes that has been investigated

In 1913 a detailed survey was made by the South Indian Railway Company and the project sout mpiate the construction of a causew y from 14 f et part will first be driven into the sand These piles will then be braced together longi tudinally with light concrete arches and chains tudinary with light concrete arcnes and cusum and transversely with concrete ties struts and chains Behind the piles stab of reinforced concrete will be slipped into position the bottom slabs being sunk well into the sand of the se bottom. Latily the space enclosed by the slabs will be filled in with sand

The top of the concrete work will be carried to six feet above high water level and the rails

The possibility of connectine India and coast route appears to be the best one but Ceylon by a railway across the bank of sand star present would not be remunerative. This steading the whole way from Rameswaram is would start from Chittagong which is the Ma mar has been reported on from time to termine and there 1935 various a hemes have been items and the adquaraters of the Assam items of the Chitagon of the Chitagon district a land of fertile rice tended to Dhanushkodi the southermost point fields intersected by big tivers and titlal creeks of Rameswaram Island and the Ceylon Gov Rameswaram Island and the Ceylon Gov Rameswaram Island and the Ceylon Gov Rameswaram Island and the Ceylon Gov Rameswaram Island and the Ceylon Gov from the town of Chittagong For about 160 miles further it chiefly runs through the fertil rice lands of Arrakan and crosses all the b g tidal rivers of the Akyab delta These include the Kalidan river which drains 4,700 mil s of country and even at a distance of about 30 miles from its mouth is more than half a mile wide About 60 mile from Chittagong the rallway would run into the region of mangrov sw mps which fringe the accast north and south of the harbou of Kaukkphu stretching out into the mangrove swamps like ribs from th backbone Innumerabl spurs of the Arrakan Yoma have to be cross d Yoma is a mountain ridg which extends from C pe Negrais northwards until it loses it elf in a m es some impact the construction of accesses yiroun knazada during which extends from C per Diamunkod Point on the indian side to Tellas in counts in its which extends from C per of the per o of low banks of sand pitched with coral and pre feet before it re ches the sititude of S ndway sent no difficulty. The s ction through the s a s d further north it ri es much higher. It is wen no dimenty. These ction through the 'e also d'auther north it n' es much habert et also will be carried on a caseway which it is project formidable boths is to stallway Thumonite he pollowing way the project of t added to the £7 000 000 already referred to

The other routes examined ha e been the Hukong Valley route a d the M nipur route which were surveyed by the late Mr R A Way many years ago The Manip rroute was t many years ago The Manip r route was tracted to cost about £5 000 000 as it h to cross three main ranges of hill with summit level of 2 650 3 600 nd 8 900 fe t Altog th r there would be about four mil a of tunnelli g and the thought the concrete work will use carried to 2 680 3 600 not 8 wou it a concrete work will use carried to 2 680 3 600 not 8 wou it a concrete work will be concrete and the concrete and

Mines and Minerals.

Mineral Production in Inter-War Period

A general tone of stability was noticeable about 200,000 tons, equivalent to a fit in the mining industry considered as a whole 1929 figure, in terms of value the p during the period intervening between the two was a great deal smaller. In fact n While the output of some minerals was the mineral most seriously affecte a decrease, others showed an increase last depression but the increased for the minerals whose output was on the internal demand from iron and steel and are not the mineral demand from iron and steel and are not the mineral demand from iron and steel and are not the mineral demand from iron and steel and are not the mineral demand from iron and steel and are not the mineral demand from iron and steel and are not the mineral demand from iron and steel and are not the mineral most seriously affects. showed a decrease, others showed an increase Among the minerals whose output was on the increase, coal, iron ore, manginese, petroleum and mica stand out prominently

The annual output of coal at the outbreak of the present war exceeded 25,000,000 tons and this output has raised India to the eighth rank among the coal producing countries of the world During the present war, the production could not keep pace with the industrial activity in the

The production of iron ore which was hardly 900,000 tons in 1921 had by 1938 reached the neighbourhood of 3,000,000 tons, the bulk of

in later years had so greatly acceler recovery in prices in this case that by value of output had risen to Rs 4 cre Rs 2 crores in 1929 although the v output was the same in both the years

The history of the petroleum and India is one of continued development not keep pace with the industrial activity in the country owing to various factors, including shortage of labour

The production of iron ore which was hardly 900,000 tons in 1921 had by 1938 reached the

With the output nearly quadruple in India

India's normal annual output of manganese is slightly more than a million tons, representing roughly a third of the world production, but during the slump period production declined to

In 1938 the total production of Indian Coal to the trend of 1931, 1935 and 1936, the rose to 28,342,906 tons or 3,306,622 tons (13 2) of coal from India in 1937 have mo per cent) increase on the output of the previous year and is thus the highest figure yet recorded In the years 1931, 1932 and 1933 there was a compared with 1936, de Burma's share Since the separation of the last April, 1937, it appears in these separations of coal from the last April, 1937, it appears in these separations of coal from the last April, 1937, it appears in these separations of coal from the last April, 1937, it appears in these separations of coal from the last April, 1937, it appears in these separations of coal from the last April, 1937, it appears in the separation of coal continuous decrease in production of coal from as a foreign country, and in 9 months the peak figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in taken a little more than Ceylon did in taken a little more than Ceylon did in taken a littl 1934 the direction of change was reversed and production increased by 2,268,281 tons (or 11 4 per cent) from 19,789,163 tons in 1933 to 22,057,447 tons in 1934 In 1935 the increase con-22,057,447 tons in 1934 In 1935 the increase continued but at a less rate by 959 248 tons (or 4 3 per cent) to 23,016,695 tons In 1936 there was again a decrease by 405,874 tons (1 8 per cent) to 22,610,821 tons, followed in 1937 by an increase of 2,425,665 tons (10 7 per cent) to 25,036,386 the highest output till then, but which has now been greatly exceeded This increase was shared by all provinces except Orissa, which showed a decrease output per comployed showed a decrease from the same as the figure of 130 2 tons in 1934, which is per cent of the same as the figure for 1929, named tons, the highest figure recorded, to tons in 1938 which is less than the figure for 1937. The figures for the last ning tons in 1938 which is less than the figure of 1937. The figures are previously represented by all provinces except Orissa, which showed a decrease from the same as the figure for 1929, named tons, the highest figure recorded, to tons, in 1938 which is less than the figure for 1937. The figures are previously represented by all provinces except Orissa, which showed a decrease from the same as the figure for 1929, named tons, the highest figure recorded, to tons, in 1938 which is less than the figure for 1937. The figures are previously represented by the figure of 130 2 tons in 1934, which is per tons, the highest figure recorded, to tons, the highest figure are for 1929, named tons, the highest figure are for 1929, named tons, the highest figure are figure as the figure of 130 2 tons in 1934, which is per tons, the highest figure are for 1929, named tons, the highest figure are for 1929, named tons, the highest figure are figure as the figure for 1929, named tons, the highest figure are figure as the figure for 1929, named tons, the highest figure are for 1929, named tons, the highest figure are figure as the figure of 130 2 tons in 1934, which is per figure of 130 2 tons in 1934, which is per figure for 1929, named tons, the highest figure are figure for 1929, named tons, the figure figure for 1929, named ton ed a slight decrease

The increased output of 13 2 per cent in 1938 was accompanied by an increase of 36 2 per cent in the total value of the coal produced in India to Rs 10,04,23,835 (£7,942,077) in 1938, from Rs 7,81,02,439 (£5,872,364) in 1937

There was also an increase of 10 annas 2 pies in the pit s month value per ton of coal for India as a whole, namely from Rs 3-1-11 to Rs 3-12-1 This increase in value was recorded from all by accident from 274 in 1935, 435 in provinces without any exceptions In opposition 213 in 1937 but the number increased

The average number of persons emp the coulfields during the year showed an of 16 5 per cent The average output pe concentration of work. During recent large number of collieries have been sh and the labour absorbed in the remaind concentration permits of a proportional r of the supervising staff, resulting in tonnage per head The fall in output pe employed in 1938 is of course due to i employment

There was a decrease in the number c

due to accidents in Be g | B har and H derabad | with the sansal verge for the q inquennium in 1938 In 1935 there we etheem | for accidents | 109 bd and sat Loy bd and sat

to 92,003 tons in 1900 when the richer deposits 1900 and 1901 there had been a fol-til the Central Provinces were also attacked, of production in the Sac par district a and are now yielding a larger quantity of ore total cessution in Biandara. The than the Yisat patata mines. The most ground recovered can be jude important deposits occur in the Central President fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the production of the function of the fact that the fact that the production of the fact that the production of the fact that the production of the fact that the production of the fact that the production of the fact that the fact that the production of the fact that the fa the largest supply coming from the Central during the quinquemmum 1924 to Provincia, the use to which the ore is put producing districts are no scattering are nomerously varied. The peroxide is used in the output of Manganese ore by glass manufacturers to destroy the green. The partial recovery of the Indian colour in glass making, and it is also used in industry during 1034 and 1025 was porcelain painting and glazing for the brown in an increase of exports, including the colour which it yields. The ore is now used exported from Morangao in Portuga In the manuficture of ferro manyancie for use from the radir of 275 604 tous in 1933 in steel manufacture Since 1901 when the tons in 1935 toful output was 150,100 tons, the progres and after rising to 1,151,834 tons in 1 of the industry has been remarkable owing to 619,740 tons in 10°5. The United Kins

the high prices prevailing The cut i trophic fall in the production of manganese ore in India from the year figures of 1027 namely 1 129 13 tone valued at £2,700 06fob Indian ports to 212,604 tons y lithin value of £140 022 in 1932 has been recorded previously In 1933 the output rose elightly to 218 307 tong but the value fell to \$12, 171 There are the-mallest quantities and values reported elinec 1901 when the output was 120,891 tons valued at £192.531 In 1995 the output wis 237.427 tons valued at £223,4 %, since when the smillest production was 150,416 tons in 1917 valued at £929,516, whilet the smallest value was in 1909 when a production of 644 660 tone n is vilued at £603 904. In 1931 there wis however, i partial recovery to 106 306 tons valued at £388 210 further increased in 1935 to 641,483 tons vilued at £768,630, in 1936 to 813,112 tons valued at £1,121,122 and in 1937 to 1 951,594 tons valued at £3,229,554 but in 1938 there was a fall in output and prices to 267,920 tons valued at £2,032,415. The full magnitude of this catastrophe to the Indian manganese industra is perhaps best realised from the fact that whilet the quantity of the production in 1933 was a little over one fitth of that of the peak year of 1927, the value was less than one twenty second part of the value of the 1927 production. In fact in none of the major Indian mineral industries had the effects of the slump been so seriously telt as in the manganese industry, it is gratifying, therefore, that some measure of re covery can now be recorded, though the value of the output is still less than half the peak figure of 1927, with a much higher value

The substantial recovery in 1936 is due mainly to increases in the Balaghat, Nagpur and Bhandara districts of the Central Provinces, and to the resumption of work in Panch Mahals The output from Sandur State fell by a third The most pleasing feature of this improvement is the recovery of the Central Provinces production from the trivial figure to which it had fallen in 1933(28,789 tons) to 568,806 tons in 1936

The recovery in 1936 has been set back by dec reases in the Bala Ghat and Bhandara Districts of the Central Provinces, Keonjharm the Fastern the industry as States Agency and in North Kanara (Bombav), of relative depi the Sandur State (Madras) and in the Chitaldurg to cease work districts of Mysore State improvement in the production from the Panch decline in the activities of the iron a Mahals, Chindwara, Bellary, Tumkur and Vizaga industry of the world

In 19°6 this fell to 74. with a decrease of over 127 000 ton her position is the chief importer man aner ore The second place as vas taken by Japan with 113212 t the U S A third with 80 037 to 19 7 a close fourth with \$0,050 tons German figures show a narked decr

The fall in the Indian output of m are of recent years can be correlated will in the price of first grade ore ca kingdom ports, from an average of 2 unit in 1924 to 14 9d per unit in 1 then to 9 3d per unit in 1932 and 1933 recovery in output in 1934 accompanied the incress price to 10 5d per unit 12 10d in 1036, rising as high as 22 5d but in 1019 the price fell to 197d

This continued fall in the price of m ore from 1924 to 1932 is to be correlative fact that from 1924 to 1927 the increase of the world's production of many ore was much greater than the rate of in the world's production of pig from and although there was a full in the output of manganese ore in 1928, the very large increase in 1020, greater t Justified by the increased production and steel in that year, and it is evident world's available supplies of mang are now much in excess of normal requ The present chief sources of produ Manganese ore are Russia, India t Coast, South Africa, Brazil, Cuba, Czechoslovakia and Japan Russa to place a large quantities of ore on th at a price with which many Indian I cannot compete without a return to railway freights The Gold Coast become a serious competitor of recei The large deposits of high grade ma ore discovered near Postmasburg in Africa are also being developed. V increasing competition and falling is not surprising, therefore, that in the apparent prosperity of the Indian mindustry. In 1020 and 1020 as inde industry in 1929 and 1930, as judg figures of production and export, jet the industry as a whole had arrived at of relative depression, causing many c Added to mereased t There has been an supplies there was in 1931 and 1932 a di

SALT

The production of salt in India was almost steady during the past 25 years. In 1921, India produced 1,334,000 tons of salt, the figure dropped to 1,084,000 tons in 1935 when it reached the bottom, four years later the output was placed at 1,439,000 tons and moved in the following decade between 1,368,000 tons and moved in 1,538,000 tons. The war gave a further fillip to the production of this article of vial necessity and the figure reached new high levels as the years passed by In 1940 the salt production amounted to 1,644,000 tons, in the following year, it increased to 1,778,000 tons in 1942 it reached the record level of 1890,000 tons. Rao, Director of Statistics, Food Depart-R V Rao, Director of Statistics, Food Department, Government of India, Dr P J Gregory, Second Leonomic Botanist, Bengal, Sir Padampat Singhania R G Saraiya, OBF, JP and Roger Thomas, CII

Amongst the research schemes of the Com mittee, plant breeding schemes for the improve ment of quality naturally take pride of place The agencies employed by the Committee for its research work have varied little in character since 1923, though they have grown in number It continues to maintain a Technological I abora tory at Bombay which includes a complete yield per acre in 1943 44 was 111 lbs The ascer experimental spinning plant and a scientific tained area under improved cotton during 1943 laboratory for research on the cotton fibre and a 44 was about 52 per cent of the total. The laboratory for research on the cotton fibre and a 44 was about 52 per cent of the total. Testing House which is recognised by the BIShA The Committee also provides a large proportion of the funds for the Indore Institute of Plant Industry

tamed area under improved cotton during 1943

44 was about 52 per cent of the total. The ultimate ideal is to encourage the establishment of single variety tracts wherever agricultural conditions and the limitations of irrigation supply and soil make this possible.

For a considerable period the Committee restricted its grants to agricultural research, but in 1930 it was decided that the time had come to add its support to the efforts already being made to bridge the gap between the experiment station and the cultivator and to supplement the funds which the Agricultural Departments were devoting to the introduction of improvements into agricultural proctice Special attention from that time began to be devoted to seed distribution schemes

The Committee has not stopped at the produc tion of better cotton, but from its inception has devoted special attention to better marketing, to the prevention of adulteration and other thrudhri Ram with the cotton trade of the country Regulated Cotton Markets existed in Berir before the establishment of the Committee, and that system which had stood the test of time was commended with certain modifications for general adoption Regulated Cotton Markets have now been estab lished in Bombay, Central Provinces, Madras, Punjab Hyderabad Barod, and Indore Sim Huderabaa State —Ral Pahadur Kalidas libris on the recommendation of the Committee, where, Director, Agricultural Research the Cotton Transport Act was passed in 1923 by which Provincial Governments are empowered to exclude from any specified area cotton, Fapas or seed from outside unless required for a special purpose and covered by a licence. Prior to the pas-ing of this Act, inferior cottons used to be Resputance and Central India States—Rao imported in large quantities into the staple Bahadur V A Tamhane imported in large quantities into the staple cotton tracts for purposes of adulteration, to the detriment of the reputation of several valuable cottons. The Act is now in force in almost all the important staple cotton arers of almost all the important staple cotton arers of Bombay, Madras and the Central Provinces as well as in Buroda, Rajpipla, Chhota Udepur, Hyderahad and Indore, etc. In 1925, on the recommendation of the Committee, the Cotton Ginning and Pressing Lactories Act was passed. This provides for a certain measure of control. This provides for a certain measure of centrel of ginning and pressing factories and especially for the marking of all bales of cotton pressed with a pre-s mark and serial number which enables them to be traced to their origin Recently the Act has been used for the prevention of watering and for the mixing of non cotton articles with cotton. The Committee his also taken steps to bring to the notice of the trade both in India and abroad those improved varieties which have now reached a commercial scale

It may be stated without hesitation that, as a result of the efforts of the Committee, the last mineteen years have seen a marked change in the character of the Indian crop, particularly in the percentage of short and medium staple Equally important is the result of agricultural research and its application to the yield of cotton per acre The average yield per acre in the quinquennum 1938-43 for the whole country was 110 lbs This is 14 per cent higher than for the quinquennum 1927-32 The average yield per acre in 1943 44 was 111 lbs The ascer

India has been the home of the cotton trade | calicoes in England. The invention of the from the earliest times Its cotton, known as white wool was well known to the ancients and its cloth was familiar to the West in the days of the overland route The name Calico comes from the fine woven goods of Calicut, and the products of the Dacca handlooms are still remarkable as the finest muslins human skill can produce

Indian Cotton -The exports of Indian cotton began to assume importance with the opening of the sea route They received an immense stimulus during the American Civil War, when the close blocade of the Confederate ports produced a cotton famine in Lancashire, and threw the English spinners back on India for their supply of raw material When the war broke out the shipments of Indian cotton were 528,000 bales but during the last year of the war they averaged 973,000 bales Most of this cotton was sold at an enormously inflated price, and induced a flow of wealth into Bombay, the great centre of the trade, for which there was The consequence was an unpreceno outlet dented outburst of speculation known as the "Share Mania," and when the surrender of Lee re opened the Southern Ports widespread rule followed It is estimated that the surplus wealth brought into the country by the American Civil War aggregated £92 millions Since then the cultivation of Indian cotton, although interrupted by famine, has steadily increased For the last season for which returns are available, 1942-43, the total area in all territories reported on was computed at 18,812,000 acres and the total estimated outturn was 4,554,000 bules of 400 lbs as compared with 24,151,000 acres and 6,127,000 bales in 1941-42 Bombay, Punjab, the Central Provinces and Hyderabad are the chief producing areas

Cotton Trade -Bombay is the great centre of the cotton trade The principal varieties are Dholleras, Broach, Oomras (from the Berars), Dharwar and Coomptas Broach is the best cotton grown in Western India Hinganghat cotton, from the Central Provinces, has a good Bengals is the name given to the cotton of the Gangetic valley, and generally to the cottons of Northern India The Madras cottons are known as Westerns, Coconadas, Coimbatores and Tinnevellys The best of these 13 Tinnevelly Cambodia cotton has been grown with success in Southern India, but it shows a tendency to revert The high prices of cotton realised of recent years have given a great impetus to cultivation. Government have also been active in improving the class of cotton produced, by seed selection, hybridization and the importation of exotic cottons. Although these measures have met with a considerable measure of success, they have not proceeded far enough to leaven the whole outturn, which still consists for the most part of a short-staple early maturing variety suitable to soils where the rains season is brief

Reference has been made to the popularity of the Indian handloom cloths in the earliest days of which we have record This trade grew so large that it excited alarm in Lingland, and It was killed by a series of enactments, commencspinning Jenny and the power loom and their development in England converted India from an exporting into an importing country, and made her dependent on the United Kingdom for the bulk of her piecegoods

Cotton Mill Industry -The foundations of the Indian Cotton Mill Industry were laid in the middle of the last century Bombay saw its first mill in the year 1854 owing to the enterprise of a Parsee Merchant, Mr Cowasjee Nanabhoy Davar Other mills followed later, and the following table shows how, by successive stages, the Industry's productive

capacity i	ias grown -	je v		
Year	Number of Mills	Number of Spindles	Number of Looms	
1880 1890 1900 1905 1910 1915 1920 1925 1930 1935	56 137 193 197 263 272 253 337 348 365 388	1,461,590 3,274,196 4,945,783 5,163,486 6,195,671 6,848,744 6,763,076 8,510,633 9,124,768 9,685,175 10,005,785	13,502 23,412 40,124 50,139 82,725 108,009 119,012 154,202 179,250 198,867 200,076

It may be noted that the rate of development has not been uniform in all centres of the Industry in India, and although in the initial stages, the Industry was concentrated in Bombay owing to its advantageous geographical and climatic situation, this pre eminence of Bombay was not maintained in subsequent years. The industry s development in later years has been more rapid in other Provinces in India and particularly in the Indian States

From 1860 to 1865, progress was materially assisted by the accession of wealth which accrued to Bombay commercial interests owing to the high prices at which Indian cotton was sold during the American Civil War Another factor which contributed to the rapid growth of the Industry was the establishment of a profitable export yarn trade with China In the years 1865 to 1871, the Industry suffered a severe setback to its presperity owing to the financial crash which followed the American Civil War In the early 'seventics, after the restoration of credit, the industry made rapid progress, though in the initial stages, the development of the manufacture of the industry. development of the weaving side of the industry was comparatively slow. The profitable yarn trade with China enabled the Bombay mills to make further progress in the 'seventies and 'eighties of the last century.

Cotton Excise Duty—The growth of the industry in India during the early years was regarded with a jealous eve by the Langushire manufacturing interests whose agitation resulted in the Government of India exempting from import duty coarse yarn and cloth in 1878. This resulted in the substitution of the exempted ing in 1701, prohibiting the use or sale of Indian classes of goods for the medium and fine goods

pre lously imported from England to the th position of the industry the causes of the detriment of the groving indi nous industry | depr ssion ti | extent to which it was due to detriment of the groving individual industry in 1893 the Indian initia were closed to the free comage of sil er. Protection to Cotton Industry—The memory and the protection to Cotton Industry—The memory and the protection of the prot conclusions which rev aled th t J panese com petition w s extremely severe in c rtain classes of goods manuf ctu d in India we discuss d conference of millowners con en d by the Government of I dia towards the end of 19 9 overmment of I dia towards the end of 19 9 a d in February 1930 Government int odu ed in the Legi latt A embly the Cotton Industry (Varioaction) 19th which a fin 'lly passed product of a hange in the then ext ting re enue duty of 11 per ce t t prot city duty of 115 per cent in the ca e of B itish cotton pece goods with n alternatic e m mumum specific goods with a atternati e in immum specific duty in ither case of 31 ann s p pound n plain grey good For rev nue rease s thes at sat ern rat s were railed by 5 per nt in M ch 1971 and a ur large of 2 pe cent of the eal need dutles we imposed in October the eal need duties w s imposed in October of the same p_0 bin n h r te of duties to only the real field in the case of reigns of the case of reigns of the case of reigns of the case o of e e ue to o s anna pe po nd

the meantime the depreciation of the Japanese (exchange, consequent on Japan's going off the Gold Standard in 1932, enabled her to place her piece-goods on the Indian Market at abnormally low prices, and offset to a very great extent the protection conferred on the Indian Industry by the 1930 Act Government, therefore, directed the Board to hold a special enquiry into this question, and in accordance with the recommendations of the Board, the duties on foreign piece goods were raised from August 1932, to 50 per cent or 51 annas per pound, whichever was higher, but in view of the continued severity of the Japanese competition, Government once again found it necessary in June 1933 to raise the level of the duty on foreign piece goods to 75 per cent ad talorem or 6% annas per pound At the same time notice was also given of Government's intention to abrogate the Indo-Inpanese Trade Convention of 1904

British & Japanese Trade Delegations —

This was followed by the arrival in India of an official Delegation from Japan and an unofficial Trade Delegation from the United Kingdom United Kingdom unofficial Delegates deliberations with Indian millowners culminated in what has been termed the Mody-Lees Pact of 1933, an understanding which was to be in force until the end of 1935. Similar discussions between certain unofficial delegates from Japan and Indian millowners proved abortive, but the efforts of the Japanese official delegates resulted in a fresh Convention and Protocol being agreed to early in 1934, under which a link was established between the exports of Indian raw cotton to Japan and the imports of cotton piece goods from Japan Japan agreed to take one million bales of Indian raw cotton in return for the right to export 325 million yards of cotton piece goods to this country, with a maximum limit of 400 million yards for an aggregate offtale of 11 million bales of Indian raw cotton was also accorded most favoured-nation treat-ment in respect of her miscellaneous trade. In virtue of the terms of the Protocol, the duties on Japanese cotton piece goods were reduced, with effect from 8th January 1934, to 50 per cent ad valorem with a minimum specific duty of 51 annus per pound on plain grey goods

The protective duties on cotton yarn and The protective duties on cotton yarn and piece goods imposed by the Cotton Textile Industry (Protection) Act, 1930, were due to expire on 31st March 1933, but as Government were not able to complete their consideration of the report of the Tariff Board of 1932 (which had recommended the institution of specific duties based on weight subject to their being combined with alternative ad a gloren duties to combined with alternative ad valorem duties to prevent a loss of revenue and the imposition of a duty of one anna per pound in the case of parms below 50s count) before that date, they extended the provisions of the Act for another

Bill -- The Cotton Textile Protection Industry (Icxtile Protection) Bill of 1984 sought to give effect to the recommendations of the Tariff Boards on the cotton and sericultural industries in the light of the Indo Japanese Proto of and the unomeral agreement entered

fixed the rates of duties at 5 per cent (British) and 61 per cent (non-British) with a corresponding alternative minimum specific duty of 11 annas and 17 annas per pound on counts up to and including 50s. In the case of piece goods, the levels of the duties were fixed at 25 per cent and 50 per cent on British and non British goods respectively, with a minimum specific duty of 43 annas and 51 annas per pound on plain grey goods The Act also gua ranteed protection to the Industry for a period of five verrs ending March 1939, but recognized the need for an examination of the scale of duties on two occasions firstly on the expiry of the Mody-Lees Pact at the end of 1935, and secondly, at the end of the Indo Japanese Protocol in March 1937 Accordingly, at the end of 1935, Government directed the Tariff Board to examine the adequacy of the then existing levels of duty on British goods Accepting the recommendations of the Board, Government reduced, with effect from June 25, 1936, the duty on all United Kingdom cotton piece goods, with the exception of prints, to 20 per cent ad valorem with a minimum specific duty of 31 annus per pound on plain grey goods

So far as yarn was concerned, the Act, as passed,

Textile Trade Agreement -The Indo Japanese Trade Protocol was subsequently renewed for a further period of three years ending March 1940, without any material modification in the rates of duties applicable to Japanese cotton piece goods With the separation of Burma from India in April 1937, however, the basic quota of cotton piece goods for India was reduced to 283 million yards, rising to a maximum of 358 million yards, leaving a margin of 42 million yards for Burma The negotiations between the Government of India and His Majesty's Government in the United Kingdom for the conclusion of a new

into at Ottawa in 1932 were brought to a con clusion early in 1939, and the new Agreement specifically provided for a reduction of the basic rates of duties on United Kingdom cotton piece goods as under -Printed goods - 171% ad ialorem Grey goods

Trade Agreement in replacement of that entered

15 % ad valorem or As 271 ps per lb , whichever is higher Others 15 %

The basic rates were subject to a reduction of 21 per cent if imports from the United Kingdom in any year were less than 350 million vards and to an increase to the same extent in the event of United Kingdom imports exceeding 500 million yards. The new rates of duty came into force on April 1, 1939. In the year 1939 40 the Luropean War affected imports from the United Education was affected imports from the United States. Kingdom, and as her sendings of piece goods did not exceed 350 million yards the duties on all classes of British piece goods were reduced b April 17, with effect from 21 per cent 1940

The following table shows at a glance the progress made by the Indian Cotton Mill Industry during the last forty years -

the Indian Industry ranks second from the point India and Provincial Governments of view of the volume of cotton consumed, and fifth in point of spindles and looms installed The position of the Mill Industry in the national economy of India will be evident from the fact that, at the present time, it consumes more than 50 per cent of the total Indian cotton crop, directly gives employment to about 600,000 workers, and affords subsidiary employment to large numbers of persons who are engaged in various trades which directly depend for their existence upon the Cotton Mill Industry

Hand Weaving Industry—It has been estimated that there are about 2½ million handlooms spread throughout the whole of the country, and that the number of dependents who rely in some measure upon this industry for their support is somewhere near ten millions, a number greatly in excess of that supported by appointed a Fact finding Committee (Han any industry) except agriculture. The annual & Mills) This committee submitted its any industry except agriculture. The annual & Mills). This committee submitted its production of cotton goods on handlooms is estimated at nearly 2,000 million yards. The economic position of the cottage handloom weaver in India has, for a number of years, been to the public.

ľ

In relation to the world cotton textile industry, receiving the attention of the Government years, financial assistance has been grant Provincial Governments from central rev for the purpose of improving the cottage i try's organisation and producing and marl Despite this assistance, the ind methods is reported to be in a depressed condition various suggestions have been made from to time from various quarters to remed situation. All these proposals were can examined at a conference convened by Central Government in December 194 which it was decided to set up a Fret F. Committee for the purpose of ascertaining plete factual data concerning the han wearing industry, as a preliminary to concerning the purpose of assisting the concerning Early in 1941 the Government of we iver

or tan face so tar as minna business is concerned; tion of the yield of the crop while the latter embodies that relating to the inte export trade and manufacturing industry. Thus, the two reports will appear to give a complete picture of the jute industry and trade in India

For the last few years, the Section has been engaged in certain developmental work of a high the main are -

- (i) Dissemination of jute prices in the mofuszil With the help of the Publicity Section of the Committee, jute growers in the interior of the jute growing provinces of Bengal, Bihar, Orissa and Assam are informed of the daily prices prevailing in Calcutta so that they may be well proceed with discontinuous taking place in the prevailing in Calcutta so that they may be some important aspects posted with fluctuations taking place in the light on some important aspects terminal market. This is being done since the industry, such as the productive capacity fundam Jute Mills, the possibility of the goods manufacture.
- (ii) Marketing of fibre groun from improved seed—This scheme is intended to interest growers in improved jute seed which can give higher yield and at the same time produce Seeds of improved strains are better fibre distributed to growers at concessional prices and the results of grading and marketing of fibre produced both from the improved and local varieties are studied with a view to demonstrat ing to the growers the advantages of using from authoritative sources in different The scheme is in operation since good seed the 1942 43 season
- (111) Organisation of Grading Parties -The primary producers are instructed through peripatetic Grading Parties to assort jute themselves, according to the trade specifications and sell it on the basis of grades so that the middlemen may not under estimate the value of their fibre. They are also told about the various faults that occur in jute and the steps that should be taken to eradicate them The scheme has been operating from the 1941 42 season
- (1v) Establishment of Co operative Jute Sale Societies—With a view to forming a selling organisation of the growers, a few such Societies-have been established in 1942 43 in Bengal, as an experimental measure Three such as an experimental measure Throsocieties are also working in Orissa those in the former province do not provide for credit facilities, those in the latter have linked credit with marketing
- Study of Indian Market with a view to increasing the consumption of jute and jute goods—The war has closed many oversizes markets for jute and its manufactures, at the same time, substitutes are becoming more important Therefore, a comprehensive study of the Indian market is being undertaken with a view to explore the possibilities of increasing the internal consumption of jute The scope of the enquiry includes both mill made and cottage industry goods

Principal Officer in charge of the Section -8 M Gupta, B Ag (Bombay)

Jute Forecast -- Work on the Jute Census have long been completed The results of the random sampling survey have been considered to be satisfactor, and the method has been adopted by the Government of Bengal for forecasting the jute acreage,

Economic Research -The Lonom search Section keeps constant sigilance aspects of the economics of jute Some tant findings relating to the world consi of jute, its trend in recent years and its to the changes in the world market, s those brought about by the war, have published in the Committee's Teonomic 1 Bulletin No 1 An investigation in relationship between the demand for a supply and price of jute is now under pithe results of which may have in implearing on the question of the control jute erop Other investigations more light on some important aspects of the the market for jute goods manufactur India, etc The effect of the growth o substitutes and of new uses of jute on th trade is also being investigated on Jute substitutes is expected to be pub soon

Besides research work on the econom jute, a large volume of information on v subjects pertaining to jute is regularly col The Committee has also a s of the world correspondent in the Argentine Republ report on the conditions of the jute trade in country A close watch is maintained c developments in economic and comm policy abroad calculated to replace jute I possible substitutes, and prompt steps are t to collect all relevant information on the su to place it at the disposal of the trade and o Es . concerned

Publicity—A monthly journal, know the Indian Central Jule Committee Bul the annual subscription of which is Rs or 10s (including postage), is published mon containing figures of production, consump prices stocks, imports and exports of jute jute manufactures, and also information garding the prices and utilisation of substitutes It also includes items relative export and import restrictions imposed various countries and other information regai the economics of jute and its competitor well as general information of interest to trade. The Committee also disseminate i mation to the grower to assist him tow improved methods of growing and retting, A prelimi getting better prices for his crop investigation into the economics of jute gro has been undertaken in three representa villages of Bengal

Principal Officers of the Economic Rese Section —Director —D Ghose, MA (Can's Bar at-Law, Asst Economics Officer —K Ghose, MA (Can) Bar at-Law, Asst Basak, BA (Cantab)

Besides all general publicity work of Committee, the Publicity Section has a entrusted with the organisation of a big Cer Jute Museum in Calcutta which is soon expe to materialise

Principal Officer in charge of the Section -K I A Quaders,

vana (Permian) coal fields of the Damodar little (Commun. Tital may be regarded as the nana (Permian) coal fields of the Damodar basin

More than 1,009 million tons of strongly oking coal with less than 800 ash but high in It is likely to have far reaching effects sulphur, occur in the Tections conflictes of establishment of several new industries i Issum, but these are not at present considered such as locomotive manufacture, and the ureful for metallurenal purposes

The manufacturers of hard coke in India rely on the Juria couldelds to an overwhelming extent to meet their requirements. Mith the present wasteful means of extracting coal and the use of metallurgical coal for non-metallurgical purposes, some experts consider that the coking coll resources of the Jharla field vill not last for more than 30 years. The Indian Coal for more than 30 years. The Indian Coal Mining Committee reported in 1937 that these reserves would last for about 57 years.

If the Government and the coal industry co operate and adopt adequate measures for improved methods of mining coal and conserving and econo nising the use of metallurgical quality coal, the life of these reserves will be extended beyond the gloomy prognostications referred to above

In addition, it might become possible in the future, as the result of technical research, for the iron and steel industry to use coals not regarded as coking coals at present, by blending drawing for rifles and machine gun image them with strong coking coals

While the reserves of coking coal in India are not adequate for melting the huge quantity of iron ore available, frequent repetition of this statement has produced an impression abroad that adequate raw materials are not available in India for a large scale iron and steel industry, which is entirely a mistaken view. The metal lurgical industry has taken its own precautions to prevent the speedy exhaustion of its coking coal reserves It is unfortunate that so much of India's best coking coal is still being used for steam raising purposes but we can confidently hope that this-practice will tend to diminish in was opened when the Tatas added a W the near future

The coalfields and the fron ore deposits are situated within a short distance of one another and there are ample supplies of limestone and dolomite within a reasonable distance of other raw materials

importance of the Industry in the National Economy—The total capital invested in the iron and steel industry in India is estimated to be about Rs 25 crores Roughly 150,000 men and women are employed directly and indirectly in the Indian iron and steel industry, the re rolling mills and the auxiliary enterprises Including their dependents, the total number of people dependent on the industry in India is about 600,000 The industry is contributing to the Government and the public revenues between

in India accompanied by improvement in the The progress of the steel industry is one of various processes and the application of scientific outstanding developments of the war in India

Company Ltd, may be regarded as the important advance in steel making that the young Indian steel industry ha future of railway wheels, tyres and a which acid steel is specified. The devel and in unificture of a low alloy high tens containing copper and chronium knc liserom is another instance. The steel is The steel i. employed for the construction of the Howrah Bridge

Besides metallurgical research, fuel rechemical research and research in refra are being pursued in India

Special Steels Manufactured in In Amongst special steels now manufactured din and special bars for the manufacture of bullet proof armour plate for the fabri of armoured vehicle bodies bullet proof for howitzer shields and gun turrets, v kinds of allow steels for the manufacti steel helmets armour plercing bullets and and shear blades for shearing armour p chrome molybdenum alloy steel for air spring steels for michineguns, special nickel steel plates for gun carriage moun high curbon steels for high explosive and mint dies, high speed steel for matools and stuniess steel for surgical instrum Other minufactures by the industry in steel mill rolls, steel billets for drawing telegraph wires and barbed wire, and to Admiralty specification for ship built A process for the manufacture of acid hearth steel required for gun forgings, carriage nales and railway wheels, tyres, has also been developed

A new chapter in India's fron and steel indi Tyre and Axle plant with up to date mills finishing requirements to their plant at Jams pur and began the manufacture of acid . It is bound to go a long way tow the country's self-sufficiency so far as its requirements are concerned. This might be a prelude to a large scale manufacture locomotives in India

Munitions Output - Referring India's India's important munitions output, the I "The Amer Office recently announced Technical Mission has recently sponsored set new plants including work for machine t India has also undertaken the manufac of alloy steels which form the component manufacture special steels The silicon has been established in one Indian w and at least half of India's requirements Rs 7 to 8 crores per annum by way of excise and customs duties, income and super taxes

Development—The last decade has seen a great expansion of the iron and steel industry. India a recommended by invariant at the state and at least nail of finding source. The production aluminum in India will begin shortly concept to the interpretation of the inter

transport facilities for raw materials i

THE WOOL INDUSTRY.

Wool exported from India consists not only of wool grown in India itself, but of imports irom foreign sources, these latter coming into india both by land and by sea Imports by all come chiefly from the Commonwealth of Australia but a certain quantity from Iran also comes by land, while the main imports are from Afghanistan, Central Asia, Tibet and Aepal Quetta, Shikarpur, Arritsar, Multan, Kulu, Iazilka, Lahore and Panipat are the main collecting centres for wool received by land from Afghanistan and Iran, whence it is almost invariably railed to Karachi for subis almost invariably railed to Karachi for subsequent export overseas

Imports —There was a sharp increase in the imports of wool and woollens which were valued at Rs 4,29 lakhs in 1940 41 as compared with Rs 2,16 lakhs in the preceding year Almost whole of the increase was attributable to the heavy imports of raw wool for consumption in Indian mills the resources of which were fully mobilised to meet the growing demand for clothing India's ever increasing army Imports of raw wool shot up from Rs 75 lakhs to Rs 279 lakhs representing a gain of as much as 272 per cent over the preceding year's Australia was the main supplier of raw wool On the other hand, woollen manufactures recorded a modest gain of about six per cent from Rs 1,41 lakhs to Rs 1,50 lakhs Yarn and knitting wool recorded further drop during the year

The imports of woollen piecegoods showed an The imports of woolien piecegoods showed an increase from Rs 35 lakhs to Rs 57 lakhs in value but the quantity was from 52 8 million lbs in 1939 40 to 30 8 million lbs in 1940-41 Arrivals of shawls and lohis from abroad dropped further from Rs 4 lakhs in 1939-40 to Rs 3 lakhs in 1940 41 as compared with Rs 14 lakhs in 1938 39 and were mostly from Japan which encoyed the virtual monopoly. from Japan which enjoyed the virtual monopoly of this trade in the absence of Germany which was at one time India's main supplier of these varieties

Exports —The year 1940 41 saw a sharp etback to India's export trade in raw wool which amounted to Rs 1,64 lakhs as against Rs 3,23 lakhs in the preceding year and Rs 2,99 lakhs in 1938-39 The drop in quantity should be probably more than that in value since the prices of raw wool were on the upgrade throughof carpets of a fine quality which find t
out the year The United Kingdom was by
sale in the world market This work is
far the most important customer of Indian
entirely on handlooms and the carpets
wool Following the negotiations between the

The Indian carpet wools continue popular in the United States because c with other carpet wools, they shrink k a fairly long staple and unusually good and are, therefore, desirable for manuf better grade carpets But the deman not be fully satisfied owing to shipping di and the restrictions on trade From 1910, however, a limited quantity was to be shipped to the United States on a basis under the licensing system and a mentary quota for the year was later Shipments to the U S A were reduc 18 8 million lbs to 4 3 million lbs

Mill Manufacture -The number of India, including Indian States, in 19 latest year for which details are availal 39, with a total paid up capital of Rs 1,00 The total number of looms and spindl 1,958 and 68,107 respectively

The bulk of the wool used by the Indi is Indian wool, although it is supplement some extent by the importation of meri cross breds from Australia for the man of the finer classes of goods Their ma manufactured goods is almost entirely itself

Cottage and Small Scale Industricarried on in various parts of the notably in the Punjab and the United ces. OILS AND OIL CAKES.

The statistical publications, issued by the market for the oil cake in I urope a Commercial Intelligence Department of the oil cake, on account of want of stand Government of India show that the export of figurious, is sold at a discount. The all oil seeds from India is stradily going down except groundants on account of keen international competition

It is economically as well as industrially un sound for India to export her oil seeds instead of manufacturing oils oil cakes and other allied products in India The present practice allows the other countries to derive the manufacturing profits and at the same time deprives Indian agriculture of the great potential wealth of oil cakes as cattle feed and manure

In India there are about 500 oil mills registered under the 1 actories Act and over 1,000 medium alze power driven oil milla An immense quantity of oil is, as a matter of fact already menufac tured in this country by crude as well as up to date processes

Village Oil Mills worked by bullocks and handpresses exist in all parts of the country and supply most of the local demand for oil and oil cakes The big mills supply the re quirements of the towns and export trade These mills treat all kinds of oil seeds available in the country

The industry has made good progress in the production of mustard oil, castor oil, groundnut oil and linseed oil and as a result the export of these oils and oil cakes to foreign countries has steadily improved during the last ten years The progress in the case of groundnut and castor is very satisfactory

The development of oil milling industry in India has to face the under-mentioned difficulties There are high protective tariffs in European countries which encourage the export from India of raw materials rather than the manu- the price level and brisk trade in oils factured products Secondly there is a better freight facilities are available.

oil seeds is less than that on oils and hence it is easy and economical to oll seeds by sea than oils or oil ca development in the export traile in oil special consideration of shipping con provide tanks for bulk transport c arranged by the railway commanies

The standardisation of oils and oll help the industry in finding markets countries where a better price can be for the articles

It is necessary to educate the Ind vator in the use of oil cakes for fee manurial purposes and it should be: on him that the value of the article depend on the oil content but on of buminold content of the article oll content in the cake means a hij centage of albummous matter which essential for the cattle

Effect of War on the Oil Industry -During the War of 1914-18 the export of linseed oil, groundnut oil at oil had increased by 443%, 150% respectively over the last pre war ay 1912-13 and 1913 14, but the export had, however no marked change dur period The oil crushing industry of I have a good prospect of developmen the present war period

The prices of oils and oil cakes at t mencement of War in September were lo half the prices of these articles du pre war, war and early post-war per account of general low price levels since The present War will have effect in u

an increase in demand had the effect of the industry again in a favourable posit Children Mon W omen world market even before the outbre-Rs a Ra a p conditions In the United Kingdom, t 5(a) 7 11 6 6(a)tea trade passed under the control of the 5(6) ment to administer the emergency tea contro Owing to the suspension of re expo (a) Settled labourers (b) Laltu or Basti labourers London, the need for replenishing the Although India produces large quantities of by America and the Colonies and the tr ter its consumption of ter is comparitively their demand by some of the markets The low domestic very little consumption, however, enables India to export large quantities to other countries, the principal among which is the United Kingdom In 1941-42, 76 per cent of the total quantity of ten produced in India was exported alread. Of the total exported of 282 million has by Java to Indian tea there was a st mand for practically all kinds of tea export quota was, therefore, raised to 95 in October 1939 and was kept unchang per cent for the next season In Jun however, the International Tea Comm Of the total exports of 382 million lbs, abroad duced the quota for 1940 41 to 90 per the United Kingdom alone took 283 million lbs all participating countries An Ordinance during the year ing the Indian Tea Control Act, 19:

The year 1932 33 was one of the worst for the tea industry Ir addition to the world-wide depression, there was considerable over-production with the result that producers of tea all over the world were faced with declining prices and accumulation of stocks. The preference granted

to Empire ters did not prove sufficiently effective

to check the consumption of cheap Java teas Besides this there was only a small difference in the price of medium and common ters and there was thus no inducement to grow the former. To check over production a scheme was therefore introduced to restrict production former. and to limit exports A Bill giving legislative

available supplies and the quota was rev 921 per cent from October 1940 The quota for 1941 42 was fixed at 110 per c the Standard exports

effect to the scheme was passed at the autumn due to expire on 31st March 1943 is to session of the Legislative Assembly in 1922. session of the Legislative Assembly in 1933 The in force for the duration of the hostilities industry has consequently been able to enjoy two years thereafter

The following table explains briefly the position as regards the export of tea by sea from II

into lind store of the store of

modern refineries working with raw sugar (gur) even with the reduced duty on Khandsari of and by indigenous open pan concerns Sugar Re 0 8 0 per cwt there would be a revenue of production in India 1 few years ago amounted about Rs 6,00,000 during 1939 40 But this production in India 7 few years ago amounted approximately to half the estimated total consumption within the country Since 1931-32, the volume of factory produced sugar has increased by approximately 700 per cent During 1936-37, India produced over 1,230,000 tons of sugar, i e, slightly more than her estimated con sumption of about 1,150,000 tons in 1936 37, and after two lean years, again produced over 133 lakh tons in 1939 40 The maximum production was achieved in 1943 44, which was estimated to be 1,304 000

Along with a rapid increase in internal produc tion, there has been a sharp decline in imports For instance, from an average of approximately one million tons in the years up till 1930 31, imports fell by about 45 per cent in the following year and dropped to about 250,000 tons in 1933-34 and decreased further to 221,000 tons 1934-35 During 1935 36, imports further to 198,888 tons, and in 1936-37, the net import was only 11,960 tons As a lesult of dwindling imports Government are losing revenue from this source The import during 1937-38 was only 9,410 tons but the import in 1938 39 was over 254,000 tons, in view of the deficit in indigenous production In 1939 40, due to the greatly increased internal production and the outbreak of the European War, the imports dwindled to about 35,000 tons The yield from this source diminished from over Rs 10 crores in 1930 31, to about Rs 3 81 crores for the financial year ended March 31, 1935, to 3 24 crores for the year ended March 31, 1936, to Rs 50 lakhs in 1936 37, to Rs 25 lakhs in 1937-38, and to Rs 45 lakhs in 1938 39 In 1939-40, however, it went up to about Rs 3,96,00,000 due to increase in imports, necessitat ed by the small cane cop, diseased cane, etc., in 1938-39, in India The imposition of the excise duty at the rate of Re 1-5-0 per cwt on factory sugar, and Re 0 10 0 on khandsarı sugar, from April 1st, 1934, has yielded a revenue to the Gov ernment of Rs 97,22,000 in 1934 35, and Rs 1,58,24,000 in 1935 36, and Rs 2,52,62,000 in 1936 37 With the increase in excise duty on fac tory sugar to Rs 2 per cwt and Re 1 per cwt on Khandsari sugar the yield during 1937-38 was Rs 3,30,97,000 in 1937-38, and Rs 4,22,44 000 in 1938 39 and Rs 2,47,19,000 in 1939 40 With a further increase in the excise duty from March 1, 1940, the yield was about Rs 3,90,00,000 in 1940 41 In the year 1941-42 the amount collected was very much higher at Rs 6 72 crores In the twelve months ended March, 1943, the amount collected was Rs 4 83 crores In 1943 44, the duty amounted to Rs 6 82 erores, and in 1944 45 to Rs 6 40 crores

Since the imposition of the excise duty it is noteworthy, that this Khandsari production has gone down considerably From 1st March, 1939 the duty on Khandsan sugar was decreased to Re 080 per cwit, but the definition of 'factory' in the Saight Excise Duty Act, 1934 was amended, so has to omit the reference to the number of workers employed with a view to enable duty freing charged even in sugar on account of the loss of Java, Philippines

hope was not fulfilled The yield was only about Rs 135,000 in 1939-40 The amount of duty levied in 1940 41 was Rs 2,01,000 and in 1941-42 Rs 3,92,000

During the year 1937, there was a precipitate fall in the price of sugar and in order to avert internal unrestrained competition a Sugar Syndicate was brought into existence, comprising over 90 mills Later in the year, the industry approached the Government for legislative interference with a view to avoid over-production of sugar and to overcome internal unrestrained competition, which brought down the price of sugar to an uneconomically low level The Governments of the UP and Bihar, to whom these representations were made passed Sugar Factory Control Acts, and made it compulsory for every mill to obtain a licence for working sugar factories from the Government One of the conditions of the grant of licence to a factory has been member-ship of the Indian Sugar Syndicate The Indian Sugar Syndicate has thus been given legislative recognition by the Governments of the UP and Bihar, and all mills working in the provinces of the UP and Bihar are compelled to sell their sugar through the Syndicate The Governments of the UP and Bihar have also appointed a joint Control Board consisting of the representatives of the UP and Bihar Governments, the representatives of the industry, and of cultivators and consumers In 1940, the life of the Sugar Control Act was extended by Bihar and UP Governments up to June 30, 1944, and a Sugar Commission was also appointed by them to be "a final authority, subject to Government control, on all matters connected with the pro duction and sale of sugar, as well as other matters regarding cane-prices, etc"

There was a very large carry over of sugar, approximating over 4 lakhs tons, at the begin ning of the 1940 41 season and as a consequence the U P & Bihar Governments restricted, by means of quota, the production of sugar in fac tories in U P and Bihar There was no check, however, to the production of sugar in Provinces outside UP & Bihar and in Indian States Since 1942, the policy adopted by Government is to maximise production, and their efforts have met with considerable success, as can be seen from the increase in production in 1942 43 and 1943 44 in spite of handicaps of obtaining sulphur, coal, etc. The production of sugar fell in 1944 45 owing to shortage of cane and transport difficulties. High prices realised for Cur also diverted cape supplies to some extent Gur also diveated cane supplies to some extent from the manufacture of sugar in factories for the manufacture of Gur

During the year 1937 the Government of India imposed a ban on the export of sugar from India, by sea to any country except to Burma, for a period of five years

As a resit of the train than fill later it to 1 % as a Agreement little i ow fre in expecting it is all their fit will i possible to tak full add into the first it in the cannot be sall as the in almost a hort g of s g r with in th country ad it ere is no large surni a cit o er for export-

The Madras Department of Agriculture on th

-

The Imperial Council of Agricultural Research, New Delhi, started in 1936 a Tobacco Research sub station at Guntur for the improvement of the quality of cigarette tobacco It was found that jowar (Andropogon Sorghum) as a preceding crop to tobacco helped to improve the quality of cigarette tobacco better than Maize and Variga (Panicum Miliaceum)

The India Leaf Tobacco Development Com pany, the largest buyers of tobacco in India, have been experimenting since 1920, chiefly in the Guntur area (Madras) and also in Saharanpur (United Provinces) and Whitefield (Mysore State), on the commercial possibilities of Virginia tobacco production and have helped to build up the Virginia tobacco industry to the position it now occupies

The cultivation of Virginia tobacco in the Mysore State has increased appreciably during recent veirs due to the impetus given by the Mysore Tobacco Company

Improvement in Marketing —The marketing survey of tobacco conducted by the Agricultural Marketing Adviser to the Government of India revealed the urgent need for standardising the methods of grading and preparing tobacco before putting it on the market With a view to assisting the trade in the above direction, the Indian Tobacco Association which consists of representatives of growers, dealers and manu facturers was formed at Guntur Under the Under the Agricultural Produce (Grading and Marking) Act, rules were framed in 1937, laying down grade designations, definitions of quality, methods of marking and packing for un manufactured flue cured and sun cured Virginia and sun cured Natu (Country) tobacco In 1943 about 2 million lbs of tobacco valued at Rs 10 lakes were graded in Madras, Bengal and Bihar

With a view to controlling the quality of tobacco exported from India, the Government of India have appointed an Inspectorate staff consisting of a Chief Inspector and several Inspectors for examining the quality of tobacco and grading it on the basis of specifications laid down for Agmark grades

In 1939, the provisions of the Madras Commercial Crops Markets Act were applied to tobacco in Guntur District and Bezwada taluk of Kistna District This provides for regulating the market practices regarding weighment, trade A number of allowances and methods of sale market yards has been opened where the growers and dealers are given facilities for transacting their business in tobacco

Production -More than half the Indian production is concentrated in 5 clearly defined zones, 112 -

THE NORTH BENGAL AREA comprises the districts of Rangpur, Jalpaiguri and Dinajpur of Bengal including the Cooch Behar State About three fourths of the crop in this area is under N tabacum which includes the varieties locally known as Jati, Bhengi, Naokhol and of Gangetic alluvium, rich in lime generally and Hingli. The remaining one fourth is under in potash in isolated areas. The raising of

rustica varieties for Hoola and chewing purposes

The soils are grey ashy coloured loams rich in potash Tobacco is sown in the nurseries from August to September and transplanting of seedlings is done from October to December The crop is irrigated from temporary wells and 12 harvested from January to March The leaf is cured by air curing and sun curing methods The produce is marketed from March to October The finer qualities of Bhengi are shipped to Burma, while the poorer qualities are sold in India for cigarette manufacture Hingu and rart of Motivari are sold for making snuff

(2) THE GUNTUR AREA comprises the districts of Guntur, Kistna and adjoining portions of Hyderabad State Varieties of N tabacum are exclusively grown in this area Prior to the introduction of flue curing of Virginia tobacco in 1928, all the tobacco was The tobacco produced in this area sun cured is grouped into (1) Virginia—(a), Flue cured (b), Sun cured, (11) Country or Natu tobacco, invariably sun cured In the first group, Harrison Special and in the second group Thoka Aku, Kara Aku varieties are important, Flue-cured tobacco is being used in India and is also exported to the United Kingdom and Lgypt for manufacture of cigarette and pipe tobacco. The sun cured Virginia, and Natu tobaccos are used for making cheaper cigarettes, etc. The soils are deep, heavy black cotton soils and rich in lime. Tobacco seed is sown in August and seedlings are transplanted from The crop is grow October to November invariably without the help of irrigation an is harvested from January to March flue cured Virginia tobacco is marketed from January to April while the sun cured Country and Virginia tobaccos are marketed from March June There are nearly 6,000 flue curing barns and the Virginia tobacco is cured by means of artificial heat radiated from hot iro pipes arranged on the floor of the barn sun curing is done by stringing the leaf to juttwine and curing them on racks pitched on the open field for drying in sun To the India. open field for drying in sun To the Indian Leaf Tobacco Development Company Ltd goes the credit for establishing the industry it Virginia tobacco production and for assisting the growers in seed and seedling distribution research and propaganda in manurial require ments, proper methods of curing and ensuring t market for the tobacco by buying the major portion of the production

THE NORTH BIHAR AREA comprises the districts of Muzaffurpur, Darbhanga and Purnea In this area both the N tabacum and N rustice varieties are grown in the proportion of two thirds to one third A major portion of the production of N tabacum is utilised for chewing, while a fairly large quantity is bought by the Cigarette manufacturers in India. The production from N rustica is utilised for hooka purposes

The soils are light, ash coloured, deep, and

(4) THE CHAPOTAR (GUJERAT) ARFA compiles Anand Borsad and Nadiad taluk s of K a district and Paties and Pit a district and Petlad and Bh dran talukas cen intrigates with we water checked and seemle state of the seemle seem tobacco was successfully cultiv ted and cured over about 100 acres and serious attempts are being made to extend the area under thi type

The soils are light sandy loams to da leoloured heavy clays Sowi g i done in July and planting of seedlings in August Paliu and Klu are grown without Irrigation whil are grown vanous irrigation whill office and us grown dry or irrigated Adv and office and us grown dry or irrigated Adv and office a I tter h if of December to end of June with the

l ter h II of December 6 of the peak period in March and April,

(5) The Merant Area includes Belgaum and Start of stricts of Bombay along with hollapur Sangil and Miny States. In this area v riction of the peak period in the quality of produces stand reliation of the New York, and the period of the New York, and the period of the New York, and the period of the New York, and the period of the New York, and the New York, a

prediin a is commenced in August and trans planting in October hovember. The crop is black and deep heavy cly at though tob cot is careful to integrated. Harvestine begins in grown on a small area on the red toams. The between Market and the produce is ground unseries are sown in the middle of June and cured. It is marketed from April to middle of June (4) The Consporar (Guyerar) Afra come (4) The Consporar (Guyerar) Afra come (5) The Consporar (Guyerar) Afra come (5) The Consporar (Guyerar) Afra come (6) The Consporar (Guyerar) Afra come (6) The Consporar (Guyerar) Afra come (6) The Consporar (Guyerar) Afra come (7) The Consporar (

dual Extinction Of Exports -Loid ternal policy of other Governments the iment of India had decided to reduce to all countries in the Lar East by a roportion annually with a view ultimately ontinuing them altogether une, 1926, it was announced that extinc

these exports would take place in ten

rements at the special instance of His to arrangements (prescribed by the League of sty's Government The Conference after Nations) which confine the amount of such anastive discussion of the phenomena exports to the quantities approved by the Governments of these territories Besides these places, opium is exported to Burma and Aden Before separation, they formed an integral part of India and it has been decided to continue to allow them to draw their supplies of opium of Assam and Calcutta might correctly from India at cost price as long as they require garded as having excessive con umption it The quantities exported to Burma and that Orisis and the Ferozepore District Aden during the year 1939 were 22,443 kgs and 42 kgs respectively

The stendy decrease in the average annual net receipts (after deducting expenditure) from the opium export trade is shown by the following

table

1910 11 to 1912-13 Rs 801 62 lakhs 1920 21 to 1922-23 Rs 183 41 ,, 1922 23 to 1924-25 Rs 167 51 ,, 1932-33 to 1933 34 Rs. 55 22 ,, 1934-35 \mathbf{Rs} 19 35

In making this sacrifice, the Government of India had gone further than the requirements of the provisions of international conventions India's voluntary relinquishment of crores-in revenue has not, however, contributed to the reduction of consumption in the Far Eastern countries, which are now obtaining their supplies of opium from various other sources

Total Prohibition In Assam —The control of policy about internal consumption rests with Provincial Governments, who are adopting

Since 1919 various restrictive measures had been adopted by the Government of Assam in of their efforts to eradicate the opium habit, such because as the raising of the retail price, the rationing of shops, the issue of passes, introduction of prohibition in selected areas, and accelerated reduction of rations

The Government of Assam embarked upon a policy of total prohibition in the included areas of the Province from March 1, 1941 A system of quarterly accelerated reduction of opium rations by which rations of all consumers were reduced at the rate of one eighth of a tolaaccording to the prescribed scale—was enforced from September 1, 1939, in the partially excluded areas of the Province with a view to eradicating. this pernicious habit of opium consumption in these areas within a period of two years

Close supervision is maintained over the licensed vendors in all parts of British India. the conditions of their licenses require that the ig, as Viceroy, made the position clear shops shall always be open to inspection, that no statement in February, 1926, when he opium shall be sold to children or bad characters shops shall always be open to inspection, that no rise in attempting to sit in judgment on premises and during the prescribed hours, that only unadulterated Government oplum shall be sold, that credit shall not be allowed, that no consumption shall be permitted on the premises that full accounts shall be maintained and that the names and addresses of purchasers of more than one or two tolas shall be recorded These conditions are effectively enforced by the excise departments of the various provinces

regarded as a surplus country in respect of her resources of raw hides and shins. It is estimated that normally she produces 20 million cattle hides, 5.7 million buffalo hides, 27.5 million goat and 17 million sheep skins a year. Only a portion of the cattle and buffalo hides is obtained from slaughtered animals and the bulk, about 75 to 80 per cent is derived from animals that die a natural death. On account of this reason the output of these hides increases when famine, flood, cattle epidemics, etc., take an undue toll on livestock. Goat and sheep skins are, however, derived from animals slaughtered for meat and their production remains more or less at a steady level

Trade in raw hides and skins -Of the total output of India graw hides and skins it is estimated that from 50 to 75 per cent of cattle hides and about 45 per cent of gort and sheep skins are now locally tanned and the balance exported in the raw condition Previous to the European war of 1914-1918, about 50 per cent of the total export of cattle hides used to go to Germany and Austria and the balance to the other Turop ean countries and United States, while 80 per cent of the exported goat skins used to go to United States The Germans brought the collections, curing and grading of the Indian cattle hides and the Americans those of goat skins to a fairly high standard The war disorganised this export trade and during post-war years the Government of India levied an export duty of 15 per cent on hides and skins with a rebate of 10 per cent for those which with a rebate of 10 per cent for those which were exported to and tanned in Empire countries. The object of this measure was to foster in the first place India's leather industry and in the next encourage tanning of Indian hides within the British Empire and reduce their export to Germany and other non-empire countries. Later on, the duty was abolished. The measure did not succeed in stopping export to Germany which continued to revive until the outbreak of the present was to revive until the outbreak of the present war in 1939 The repeal of the duty helped the revival, and export to Germany rose to about 28 per cent of the total export in 1935 36 The post-war measures, however, increased tanning in India There was a change in the direction of goat skins export also during the post-war period After the war the United Kingdom developed the manufacture of glace kid and considerable quantities of Indian goat skins are being now exported to that country and the U S A share is proportionately reduced Still the U S A takes about 3 times as much as the United Kingdom and about 70 per cent of the United kingdom and about 70 per cent of the total export from India India is responsible for the supply of about one third of the total goat skins used in the world's tanning industry and some of her goat skins, especially those of Bengal and Bihar, are regarded to be the best raw materials for high class glace kid

Cattle hides are cured for the export trade by air drying and dry salting. The better Madras and these as well as cattle hide grades of the former are dried out, being stretched lengthwise on frames, and are called Framed" present annual export of half-tanned hides, and the inferior ones are dried by spread.

hides Air dried hides are treated with a solution of arsenic to ward off insect damage before export Dry salt curing is done mostly in Bengal with a saline earth known as "Khan Salt' which consists principally of sodium sulphate mixed with varying proportions of sodium chloride and earthy matter Goat skins are mostly dry salted and to a lesser extent air dried The total export of raw hides and skins amounted to Rs 3,84,66,560 in 1938 39

ing on the ground and are known as "Crumpled.

Recently the Agricultural Marketing Adviser to the Government of India has been attempting to grade slaughtered cattle hides. Hide grading stations have been started at slaughter houses at Delhi, Agra, Bandra (Bombay) Bareilly, Karachi and Rampur, and specifications for grades have been formulated. Hides and skins are included in the Schedule to the Agricultural Produce (Marketing and Grading) Act of 1937. An attempt is being made by the Central Agricultural Marketing Department, Govt of India, to improve flaying in the slaughter houses where grading stations have been started by giving a bonus to flavers. The Department has recently published a Report on the Marketing of Hides in India and Burma (Marketing Series No 36) and another Report on the Marketing of Skins in India and Burma (Marketing Series No 40) which contain valuable informations regarding Indian hides and skins

Tanning in India—The tanning industry in India has made great strides since the last European war. It may be divided into two categories, indigenous and modern

Indigenous tanning—This is carried out principally by the people of the tanning caste which is a depressed Hindu community known as the Chamar They tan according to indigenous methods and their products may be divided into a number of typical groups, viz, (1) the miscellaneous crude leather produced in the villages to meet local needs, (11) the bag tanned buffalo sole leather produced in the Punjab and Calcutta which is extensively used for making shoes, (121) tanned sheep skins of the Punjab known as "Kabuli Bheris' used as a cheap book binding leather throughout India, (121) half tanned leather of Medros and Bombay (122) half tanned leather of Medros and Bombay (ir) half tanned leather of Madras and Bombay The first three varieties are all consumed in India while the better grades of the fourth are exported chiefly to the United Kingdom and The half-tanned from there to other countries cattle hides and calf skins are known in the International trade as East India tanned Kips These are retained and finished and Calf skins in the importing countries for making shoe upper and other varieties of dressing leather. The cattle hides used to be tanned formerly with avaram or turnar bark (Cassia auriculata) which occurs in South and Western India But since the last war they are being tanned in Madras with wattle bark, large quantities of which are imported from South Africa The goat and sheep skins in Madras and these as well as cattle hides in Bom bay are still tanned with avaram bark. The present annual export of half-tanned leather is

~COIR

Coir is the inde name given to the first contained from the hull of the eccount of the color of the top to the color of the color of the color of the top top the color of the top top the color of the top top the fact that the following the product of the coord the top top the fact that the color of the top top the fact that the top top top the fact that the following the fact that the fact t

in the shade and then beaten or willowed with thin bamboo caues. The fibre is then returned ** ** * , VALUE / VANUE IN DUCK IN MILICU to the merchant who further cleans this in a revolving drum furnished with projecting spikes resembling thin saw blades made of iron The fibre is sorted out into colour grades and dis tributed among the local people who spin this The fibre is first made into 'slivers" and is then either spun by hand or on a wheel This is again returned to the merchant who again grades this for colour and splices the short lengths into a continuous length of 450 yards It is then tied into bundles and is disposed of to the factories where it is either baled up for export or is minufactured into matting, door mats, braid, ship's fenders, rope, etc

The yarn is very carefully graded, both for manufacture and for export, according to its colour, which is, in reality, a gauge of proper retting. The best quality of coir is a golden yellow colour and the lowest grade is a grey colour which shows that the husks have either bren over retted or that the condition for retting have not been satisfactory

Properly retted coir is of the highest quality-It is much more easily spun than machine made coir, because the fibres are clean and free from adhering pith and a much more even yarn is obtained It is much stronger than machine made coir because none of the long or "bristle" fibres have been removed in the process of extine through to the correct stage

cusing arrest expresent to termostaterite containions! or to salt or fresh water, and in manufacture it is found to take dyes readily

The value of the Indian trade is considerable, the imports into Great Britain alone, which represent less than 20 per cent of the Indian exports, are shown in the Board of Trade returns to amount in value to more than one million pounds per annum. It is an industry which provides a profitable occupation to the densely populated back water tracts of Western India, and it provides the raw material in the shape of yarn and fibre for a considerable industry in Europe More than 80 per cent of the manu factured coir products imported into the United Kingdom are produced in India and more than 90 per cent of the coir varn. The imports of coir, fibre from India are inconsiderable and amount to only 25 per cent of the quantity imported. The export of coir fibre from India. represents in value only 0 35 per cent of that of the total Indian exports of coir and coir

The Government of Madras are conducting a coir demonstration school at Beypore near Calicut under the control of the Director of Industries and Commerce, where students are trained in improved methods of cleaning fibre, of spinning of coir yarn on the wheel, of produc ing ropes, belts, mits, rugs, etc

It is proposed to enlarge the activities of the School and also to open fresh centres in suitable localities on the East Coast for teaching coir an indication that retting has been carried handicraft and increasing the output of coir articles

PATENTS, DESIGNS AND TRADE MARKS.

'Patents,' Designs and 'Trade Marks constitute certain forms of personal rights which are collectively referred to as rights of industrial property' In British India the rights in Patents and Designs are regulated by the Indian Patents and Designs Act, 1911, as amended from time to time, and the procedure under the Act is regulated by the Indian Patents and Designs Rules 1933 and the Indian Secret Patent Rules, 1933 The Act and the Rules are contained in the Patent Office Handbool which is available from the Manager of Publications, Civil Lines Delhi, at a cost of Re 1 per copy The Handbook contains in addition detailed instructions for those interested in Patents and Designs In the latest edition (6th) of the Hundbook is added a new chapter wherein are collected together some of the important decisions of the Courts, the Central Government and the Controller of Patents and Designs These decisions are helpful in interpreting the provisions of the Indian Patents and Designs Act of 1911 The broad features of the Patents and Designs Act may be described as follows -

PATENTS

making, selling and using the pitented inven appliances

tion and of authorising others so to do Patents granted under the Indian Patents and Designs Act are operative throughout British India. The normal term of a patent in British India is 16 years But in exceptional cases, this term can be extended by a maximum of ten years. The continuance of the right conferred by a patent after the first four vears of its term is

What may be patented—A patent may be granted for an invention, which is defined as any manner of new manufacture including an improvement or an alleged invention' other words, to be patentable an invention must be a manufacture, it must be new, it must be useful and it must not be such as may be said to be obvious to a person skilled in the art to which the invention relates and acquainted with the common knowledge in that art at the time of apply in_for the patent. The word 'manu facture includes any process apparatus, device, machine, article, or composition of matter

Illustrations of pitentable inventions are new PATENTS

With the separation of Aden from India and its constitution into a Crown Colony on the 1st of April 1937, the Indian Patents and Designs Act so far as it was applicable to Aden was repealed by the Government of Aden, but by an ordinance issued in that Colony, it is provided that all British Indian Patents and registered designs bearing dates prior to the 1st April 1937 and in force at that date, shall continue to be in force in Aden also so long as they remain in prescribed time due to delay caused by war force in British India

rules enable the Central Government to grant licences under enemy owned patents and designs For further information on this subject reference mry be made to the Patent Office, 7, Hastings Street, Calcutta

Rule 42 of the Defence of India Rules pro vides that except under the authority of the Controller, no person shall make an application for the grant of a patent or the registration of a design in any country or place not included in His Majesty's Dominions, and not being an Indian State

The Indian Patents & Designs (Extension of Time) Act, 1942 authorises the Controller of Patents & Designs to grant extensions of time for the completion of proceedings under the Indian Patents & Designs Act, 1911, when such proceedings could not be completed within the conditions

TRADE MARKS

The Trade Marks Act, 1940 (Act V of 1940), used in relation to goods for the purpose of was passed by the Indian Legislature in March 1940, to provide for the registration and more effective protection of tride marks in British India Sections 1 and 85 of the Act came into force it once, and under the latter section, intending applicants for registration were enabled to deposit their trade marks ' About 1,58,000 trade marks were so deposited, which were since classified and indexed

Before the other provisions of the Act could be brought into force the Act was amended in 1941 (Act XXVII of 1941) to establish a separate Marks Registry at Bombay under a Bombay Registrar with jurisdiction over textile marks only The Amended Act came into force on the 1st June 1942, but had again to be amended by the Trade Marks Amendment Act, The Trade Marks Register is kept at the Registry at Bombay under the control and management of the Registrar of Trade Marks Mr K S Shavaksha, BA (Ovon), Bur-at-Lin, is at present the Registrar of Trade Marks

A branch of the Trade Marks Registry is established at Calcutta, at which a copy of the Register and the Refused Textile Marks List are kept. The Branch Registry is in Charge ire kept The Branch Registry is in Charge of the Deputy Registrar who is empowered under section 4 (2A) of the Act to discharge, under the superintendence and direction of the Registrar, any function which under the Act may be discharged by the Registrar Any reference in the Act to the Registrar includes a reference to the Deputy Registrar when so dis charging any such function. Where the Registrar directs the Deputy Registrar to deal with a particular matter, he has in disposing of such matter the same powers as the Registrar At present, the Deputy Registrar of Trade Marls is Dr S Venkateswaran, DSC, I I

The following is a summary of the important provisions of the Trade Marks Act, 1940

A' mark" includes a device, brand, heading libel, ticket, name signature, word, letter or numeral or any combination thereof a 'trade mark' means a mark used or proposed to be the Registrar might think fit to impose the

indicating or so as to indicate a connection in the course of trade between the goods and some person having the right to use the mark trade mark may be registered only in respect of particular goods or classes of goods Any person who is desirous of registering a mark should apply to the Registrar in the prescribed manner The application may be made either at the Registry at Bombay of at the branch office it Calcutta

Under section 6 (1), distinctiveness is the prime requisite of a trade mark for registration A registrable trade mark must consist of or contain at least one of the following essential particulars (1) name of a company or individual represented in a special or particular manner, (2) signature of the applicant or some predecessor in business, (3) one of more invented words (4) word or words, having no direct reference to the character or quality of the goods and not being according to its ordinary meaning a geographical name or surname or the name of a sect, caste or tribe in India and (5) any other distinctive mark A mark consisting of a name, signature, or any word other than such as fall within the above description is not registrable except upon evidence of distinctiveness determining whether a trade mark is distinctive the extent of the inherent distinctiveness of the mark, as well as its acquired distinctiveness by use or otherwise, will be considered. The commonly accepted name of any single chemical element or chemical compound is not registrable in respect of a chemical substance or preparation, Trade marks which are contrary to law or mora lity, or disentifled to protection in a Court of Law by being likely to deceive or cause confusion, or which are likely to hurt religious susceptibilities, are not registrable. The Act containalso special provisions for the registration of certification trade marks and for defensive registration

LIFE FUNDS AND EXPENSE RATIO

The life insurance funds increased by Rs 8 29 crores (Rs 715 clores in 1942) and amounted to Rs 8423 crores at the end of the veir Rs 75 94 crores in 1942

The rate of interest carned on the life funds during the year after deduction of Income tax at source was 3.88 per cent (3.94 per cent in

The net rates of interest realized by the Indian Life Offices in each of the five years 1939 to 1943 are as follows -

Year 1939 1940 1941 1942 1943 o f Rate Interest per 4 68 annum 4 37 4 17 3 94

The total expenses of management expressed as a percentage of the Premium income during each of the five years 1939 to 1945 are as follows ---

Year 1939 1940 1941 1942 1943 33 2 28 9 27 4 26 7 27 9 Expense Ratio

If the figures of half a dozen insurers having the largest premium income are excluded, the expense ratio in the case of remaining insurers is jound to be as under -

Year 1939 1940 1941 1942 1943 Expense Ratio 41 8 36 0 34 3 31 3 31 4

HEAVY EARLY LAPSES

One reason for high renewal expense ratios of many insurers is the very heavy lapses, particularly during the early years of a policy sexistence. The following table compares the lapse experience of five old established insurers with that of Azfi recently established іваштегь

respressed is percentage of the business done in

that ve	ir (1938)	Net Laps	e per cent
	Year	Old insurers	Young insurers
1938 1939 1940		2 05 18 32 8 79	10 49 33 61 9 83
		29 16	53 93

The table shows that about 29 per cent of the business transacted by old established insurers lapsed in slightly less than 2½ years and in the case of young insurers the percentage is as high as 54 The bulk of the lapses in the year 1939 must relate to policies under which not even one full year's premiums had been paid. It is well known that the expenses of many insurers exceed the first year's premiums received and the important fact therefore emerges that nearly 20 per cent of the business done by old esta blished insurers and slightly more than double this percentage of the business done by voung insurers generally result in a loss to the insurers

NON-LIFE BUSINESS

The net Indian premium income of all insurers under insurance business other than life insurance during 1943—was Rs 7,63, lakhs (Rs 7,38 lakhs in 1942), of which the Indian insurers share was Rs 2,89 lakhs (Rs 2,06 lakhs in 1942) and that of the non-Indian insurers Rs 4,74 lakhs (Rs 5,32 lakhs in 1942) The total amount was composed of Rs 3,46 lakhs from Fire, Rs 2,80 lakhs from Marine, and Rs 1,37 lakhs from Miscellaneous Insurance business

The Indian insurers received Rs 1,66 laklis from Fire, Rs 73 lakhs from Marine, and Rs 50 likhis from Miscellaneous Insurance business

The non Indian insurers received Rs 1,81 Net lapses in each of the years 1938, 30 and 40 lakhs from Fire, Rs 2,07 likhs from Marine and Rs 86 lakhs from Miscellaneous Insurance of the new business done in the year 1938

The di trib tion of this inc ne mo et insurers constituted in diffe nt countries is shown in the following + hi -

After the middle of the conference of the reviewed as part of the work of the Round authority sitting in I ondon. After the middle of the conference of the reviewed as part of the work of the Round authority sitting in I ondon. After the middle of the conference of the reviewed as part of the work of the Round authority sitting in I ondon. After the middle of the reviewed as part of the work of the Round authority sitting in I ondon. After the middle of the reviewed as part of the work of the Round authority sitting in I ondon authority sittin centralisation reached its highest point during endorsed by the parent Committee as z suitable the long Vicerovalty of Lord Curzon, who was basis A Federal Finance Committee with so jealous of his supreme authority that he Lord Lustace Percy 15 Chairman was appointed so jealous of his supreme authority that he sought to deprive the Presidency Governors of their right to correspond direct with the Secretary of State for India This system was found top-heavy in the days of his successors, and a continuous process of devolution set in In the matter of finance the measures took the form of long-term "contracts" with the Provincial Governments, and later in the Provinces of taxes on income though the proposed of the Provinces of taxes on income though the contracts of definite heads of revenue to the proposed set of their report the provincial Governments, and later in the course of taxes on income though the contract of definite heads of revenue to the provinces of taxes on income though the contract of the provinces of taxes on income though the contract of the provinces of taxes on income though the contract of the provinces of taxes on income though the provinces of taxes on income though the provinces of taxes on income though the provinces of taxes on the provinces of taxes on income though the provinces of taxes on the provinces of taxes of taxes on the provinces of taxes on the provinces of taxes on the provinces of taxes on the provinces of taxes of taxes of taxes of taxes on the provinces of taxes on the provinces of taxes of taxes on taxes of ta the Provincial Governments, and later in the assignment of definite heads of revenue to the Provincial Governments, thus removing the defensible in principle would leave the Centre and authority and responsibility which had clogged progress A much clearer cut was made when the great reform scheme embodied in the Government of India Act of 1919 was passed Here, for all practical reasons, Provincial finance was entirely separated from the finances of the Government of India, and with one reservation the Local Governments were made masters in their own fluancial houses the committee suggested and to the provinces of taxes on income though defensible in principle would leave the Centre in deficit Therefore the Peel Committee to each Province a percentage of the share of income tax estimated to be attributable to it. But in view of the incomplete data on which the finances of the Governments were made a special review was held to be necessary at the time federation is established in order to fix the initial percentages of the share of income tax estimated to be attributable to it. But in the committee were finded a special review was held to be necessary at the time federation is established in order to fix the initial percentages of the share of income tax estimated to be necessary at the time federation is established in order to fix the initial percentages of the share of income tax estimated to be attributable to it. But in the committee were finded in order to fix the initial percentages are the committee of the share of income tax estimated to be attributable to it. But in the finances were finded as percentage of the share of income tax estimated to be attributable to it. But in the finances were finded as percentage of the share of income tax estimated to be attributable to it. But in the finance were finded as percentage of the share of income tax estimated to be attributable to it. But in the finance were finded as percentage of the share of income tax estimated to be attributable to it. But in the finance made masters in their own fluancial houses that the funds of the Government of India did not then permit them to do entirely without by giving them back less in income tax than

of these contributions was a little less than ten stantial revenue may be expected from a system of these contributions was a little less than ten crores of rupees. This was admittedly a temporary expedient, to last only so long as was duty imposed in the near future could not be relied on to yield a substantial revenue its post-war expenditure and develop its revenue to the point when they would balance without drawing from the Provinces. They were an open sore, each Province claiming that it paid an undue proportion of the total contribution, and that it was starved in consequence. There is general agreement that such a duty could not be imposed on the cultivator, and it is doubtful whether a duty on the manufactured product could be successful while manufactured continues to be so largely carried on in small establishments and even as a domestic industry an undue proportion of the total contribution, and that it was starved in consequence There was no possibility of adjusting these differences, so the contributions were reduced as fast as the finances of the Government of India permitted They finally disappeared from the Provincial Government is now being encouraged by the Government of India permitted They finally disappeared from the contributions were reduced as fast as the finances of the Government of India permitted They finally disappeared from the contribution by the Government is now being encouraged by the Government of India of India

Excise on Matches — The imposition of an excise duty on matches is already under active consideration, and we feel justified in contemplat ing the existence of such a duty from the outset of federation We are advised that the probable come and customs The Provinces were left with net yield of the tax for ill-India at a reasonable resources either almost static, like land rate, with due allowance for reduced consump resources either almost static, like land rate, with due allowance for reduced consump revenue, or actually declining, as with excise where steps are being taken to reduce the consumption of alcoholic liquor in response to the strong Indian sentiment towards prohibition At the same time the Provinces were con in the 1934-35 Budget and has continued since.) Oth r E — It is possible that other as that de clopment takes place an excise c cise dutic may occupy an import at ple colleviel at the facel policy of india in the futer but wild be a far on consumers in other ultimates to duct to a few in a result wild be a far on consumers in other ultimates of the duction of the major of the duction of the major of the first of the form out l ter proposals in the cise duty on sugar it and in linit was first first of tobacco ex le would not preclude the ne cise duty on sugar it and in linit was first federal floor eme tifema significant proceeds imported in the first of the first first of the first first of the first of the first first of the first

Niemever Report

A necessary prelude to the introduction of the Constitutional Reforms was an investigation of their safety in the light of the financial situa tion and prospects of India. The investigation was carried out by Sir Otto Niemever whose report was published in April 1936. The Report proposed immediate financial assistance from the beginning of provincial autonomy to certain provinces partly in the form of eash subventions, partly in the form of cancella-tion of the net debt incurred previous to April 1, 1936, and partly in the form of distribution to the jute growing provinces of a further 121 per cent of the jute tax

Annual cash subventions are as follows To the U P Rs 25 lakhs for 5 years only, to Assam Rs 30 lakhs, to Orissa Rs 40 lakhs, to the N-W F Province Rs 1,00 lakhs (subacet to reconsideration after 5 years), and to Sind Rs 1,05 lakhs to be reduced by stages after 10 years

The total approximate annual relief in laklis aimed at by Sir Otto Niemeyer is as follows Bengal Rs 75, Bihar Rs 25, C P Rs 15, Assam Rs 45, N-W I Province Rs 110, Orissa Rs 50, Sind Rs 105, and U P Rs 25, extra recurrent cost to the centre Rs 192 lakhs

portion of the distributable sum remaining with aware of no reliable data for estimating the yield the Centre, together with any contribution of such taxation from the Railways, aggregates 13 crores

> As regards the provincial share of the proceeds from income-tax. Sir Otto Michel er recom mended that half of the proceeds should remain with the Centre, while the other half should be distributed among the provinces on the following percentage division -Madras 15, Bombat 20, Bengal 20, U P 15, Punjab 8, Blhar 10, C P 5, Assum 2, A -W 1 Province 1, Orissa 2 Province 1, Oriesa 2 and Sind 2

Sir Otto Niemever suggested that the Centre would not be in a position to distribute any part of income tax proceeds for the first five years from the beginning of provincial autonomy but that it might be in a position to distribute some of the proceeds, though not necessarily the percentage allocated, within the first ten vears of provincial autonomy But this, he said, largely depended on the financial condition of the railways and their ability once again to contribute to general revenues on this point were — His remarks

"The position of the railways is frankly disquieting It is not enough to contemplate that in five years' time the railways may merely

' I believe that both the early establishment Orissa is to get a further non-recurrent grant of effective co ordination between the various, of Rs 19 lakhs and Sind of Rs 5 lakhs by six modes of transport and the thorough going equal steps beginning from the sixth year from overhaul of railway expenditure in itself are the introduction of provincial autonomy, but vital elements in the whole provincial problem "

RECENT INDIAN FINANCE

India, in common with other countries of the world, felt the full force of the economic blizzard which began in 1930 and attained its maxi-The net result from mum the following year Government of India's point of view was the introduction during 1931 of two Budgets, the ordinary Budget in the spring of the year and a supplementary Budget containing fresh taxation proposals in September

The 1932 33 Budget -Presenting the 1932 33 budget on March 7, 1932, the Finance Member explained that the circumstances were somewhat The supplementary budget had been imposing an excise duty on matches introduced only six months earlier He did not, therefore, propose to ask the House at the present stage to approve any extensions or modifications of the plan for raising revenue put forward in September 1931

The 1933-34 Budget —In introducing the budget, the Finance Member summarised the results for the two previous years He results for the two previous years He estimated the general position for 1933-34 to be the same as for the current year, neither one third, the cost was Rs 1,36 lakhs, leaving a better nor worse and in particular that India would be able to maintain the same purchasing power for commodities imported from abroad

The 1934-35 Budget -In order to provide an even balance for 1934-35 it was necessary to find means of improving the position to the extent of Rs 1,53 lakhs. The Finance Member announced the imposition of an excise duty on sugar, a reduction in the silver import duty by 24 annas to 5 annas per ounce and the abolition of the export duty on raw hides Announcing that the Government intended to hand over half the jute export duty to the jute producing Provinces, the Finance Member said that the Govern ment of India would recoup their losses by

The 1935-36 Budget —This Budget was expected to show a surplus of Rs 1,50 lakhs available for tax reduction The Silver duty was reduced to 2 annas an ounce The export duty on raw skins was abolished The remaining surplus of Rs 1,42 lakhs was disposed of, first, in restoring the emergency cuts in pay, and second, in taking off some of the surcharge on This surcharge was reduced by income tax nominal surplus of Rs 6 lakhs

The 1936-37 Budget -- The surplus for 1936-37 was estimated at Rs 2,05 lakhs, and this was di posed of in two ways. First the rem ining surcharge on income-tax and super tax v s cut the perions financi i yere (120-04) of The 30 in ya half a vingit it a one twelfit of the original tax half a vingit is an one twelfit of the original tax half a vingit is an original to the vince tax on incomes better in the proposed of the p

remainder from Delence Loans for the pre vious ver 1940 11, instead of the deficit being Rs 13 cross as estimated in November, the deficit was expected to be no more than Rs 9 crores this was due to an increased contribution from the raily and a surplus over from the vear before

The additional taxation intended to raise a further Its 6,61 Inl hs in order to meet a share of the cost of India s war measures took the follow from 50 per cent to 065 per cent to vield Rs 250
The 1943-44 Budget —Presenting the Budget lakis and the Central surcharge on Income tax

for 1943-44, Sir Jeremy Raisman stated that the and Super tax from 25 per cent to 331 per cent to produce a further Rs 190 lakhs Other pro Other pro posils were to double the match duty, to raise the import duty on irtificial silk yarn and thread current year. The total expenditure was extrom 3 annus to 5 annus per pound, and to levy an excise duty on pneumatic tyres and tubes, to precise deficit of Rs. 60.29 crores. The defici yild together Rs 221 lakhs

imposts was to strengthen all arms of India's Defence Services and for this a total expenditure of Rs 34 crores was envisaged in 1941 42 crores of this was for India's own war measures, while His Majesty s Government in Britain were paying separately for all supplies and services rendered to them by India and were also providing tree of charge much of the equipment needed for the modernisation of the Army in India The strength of India's armed forces already well civil expenditure had increased by Rs 2.61 lakbornaminy on account of schemes connected with the war. The Supply Department's expenditure on placing orders for Indian products for allied Governments the value of which had already exceeded Rs 82 erores, was expected to be Rs 50. exceeded Rs 82 crores, was expected to be Rs 58 be made upon them

the prevailing basis of taxation of Rs 47 crores for the next year. The revised estimate on for the next year. The revised estimate on defence in 1941-42 was placed at Rs 102 crores, in 1942-43 it was estimated at Rs 133 crores The amount of expenditure on defence services and supplies which the Government of India expect to recover from His Majestv's Government under the operation of the financial settlement would exceed Rs 400 crores in 1942 43

Sir Jeremy Rusman proposed to meet the deficit by raising loans to the tune of Rs 35 crores and leaving treation to cover the balance of Rs 12 crores The new treation proposals included (1) the surcharge on income tax and super fax to be increased from 33½% to roughly 50%, (2) an all round customs surcharge of 20% to be levied on existing import failff except on raw cotton, petrol and salt, (3) petrol tax increased surcharge on tobacco and spirits under to be increased by 25% and post and telegraph customs duties, Rs 10 crores from the increased lates also to be increased. The share of the excise duty on tobacco and Rs 4 croies by the contract of the excise duty of the contract of the excise duty of the contract of the contract of the excise duty of the contract of the contract of the excise duty of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contr provinces in the income tax was placed at bringing betelnuts, coffee and ter under the Rs 7,39 lakhs in the current year and Rs 8,37 lekhs in the following year Sir Jeremy estimated the total additional revenue from fresh would approximate to Rs 100 crores

defence likely to be brought to account in India's books during 1942 43, Sir Teremy revealed that nearly three quarters, totalling Rs 400 crores, would be met by Whitehall In addition His Mijesty's Government undertook to supply India with large quantities of aeroplanes, vehicles, guns and other equipment without charge, these free supplies already made or expected to be received by the end of the following financial year total roughly an additional Rs 60 crores

total revenue estimates for the coming veir amounted to Rs 199 3 crores, as compared with Rs 178 76 crores in the revised estimates for the ency was to be made good by Rs 20 1 crores of Defence—The main purpose of these fresh Rs 40 19 crores by borrowing He estimated that increases in income tax, super tax and corporation tax would yield Rs 7 crores of new As a result of the budget proposals i revenue 66 per cent income tax surcharge would b applied uniformly over all levels of income

Defence Expenditure -Reviewing defence expenditure Sir Jeremy Raisman pointed out that the revised estimates for the current ver had risen from Rs 133 crores mentioned in the budget last very to Rs 189 75 crores For the

The 1942-43 Budget —Presenting the Budget on Lebuary 29 1944 the Hon Sir Jeremy for 1912 43 Sir Jeremy Raisman, the Linance Lusman Linance Wember, placed the total Member, disclosed a revenue deficit of Rs 17 revenue estimates at Rs 284 97 crores as compared to the vear and a prospective deficit of Rs 17 revenue estimates at Rs 284 97 crores as compared to the vear and a prospective deficit of Rs 1944 to the Hon Sir Jeremy Roisman Linance Wember, placed the total revenue estimates at Rs 284 97 crores as compared to the vear and a prospective deficit of Rs 1944 to the Hon Sir Jeremy Roisman Linance Wember, placed the total revenue estimates at Rs 284 97 crores as compared to the vear and a prospective deficit of Rs 1944 to the Hon Sir Jeremy Roisman Linance Wember, placed the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores as compared to the total revenue estimates at Rs 284 97 crores at Rs 284 97 crores estimates for 1943 44. The estimates for expenditure amounted to Rs 363 18 erore-comprising of Rs 86 57 erores under civil estimates and Rs 276 61 crores under Defence Thus a revenue deficit of Rs 78 21 Services crores was foreshadowed. He proposed to meet this defleit by measures of ordinary taxation and compulsors deposit The most important of the latter was a provision for advance payments of t in on income from which the was not deducted The compulsory deposit of one fifth at source of the excess profits the was increased to 19/64 of the tax with the object of immobilising the whole of the excess profits. He hoped to reduce the prospective revenue deficit by Rs. 23½ crores by inising the scale of income tix which was expected to bring in an additional revenue of Rs 81 croies and by getting Rs 1 crore from the increased surcharge on tobacco and spirits under

Whill it will be no say in the post vary is to impose t xation f a magnitude mparall with that exiting t the present

for the minisation of sterning in 1944 to with [533 lines. Bank Deposits and Provident Lunds] the exception of £15 millions for the capitali sition of a portion of India's non effective charges and of £10 millions for acquiring the M (S M Railway, the S I Railway, and the B N Railway The outstanding sterling habilities of Government stood on Lebruary 28, 1945 at about £11 millions

The process of repatriation started in 1937-38 with the introduction of open market purchases and creation of the rupee counterparts in India The first compulsory scheme was introduced on Lebruity 8, 1941 following the growing accumulation of India's sterling baliness in Lingland is the result of the Allied demands indee on India for war supplies. The second compulsory scheme was decided upon on 24 December 1941 and was followed up by the redemption of 31 per cent sterling stock, funding of rulway annuities and repatriation of rulway Debenture Stock during 1942 43 debt repatriated between April 1 The total debt repatriated between April 1 1937 and March 31, 1943 was of the face value of £307 26 million at a cost of £305 29 million (Rs 408 08 crores) and was putrilly financed by creating rupee counterparts of the value of Rs 234 97 crores Stray parcels of the Government of India Sterling Stock, both dated and undated and of Realizary Delections is beautiful of Realizary Delections and of Railway Debentures bought and can celled during 1943 44 amounted to ±3 milhons, rupce finance being provided by Government Mahiatta Railway, the South Indian Railway and the B N Railway Those operations Those operations expenditure absorbed a sum of approximately £10 millions

Problem of Transferring Sterling March 31 1946, the cumulative revenue deficits Balances.

Sterling continued to accrue and £248 millions were added during the 11 months ended Feb mary 28, 1945 to the Reserve Bank's holdings and the total holdings on March 31, 1945 were estimated by the Finance Member to be £1,030 He, however, hoped that the rate of accrual would be slowed down in future both by diversion of some of the demands made on India to other sources of supply and by an increase in compensatory imports In May, the retiring Finance Member was appointed officer on special duty to negotiate the question with Britain

In regard to the dollar balances, the Finance Member stated that in addition to current requirements, India had agreed to accept an amount of £20 millions for the calendar year 1944 and a similar amount for 1945 in order to build the dollar resources The position would be reviewed later on in the light of the relevent statistics

Public Debt

Rs 229 crores It is estimated that by the end of 1944 45 this would have risen to Rs 1,588 crores comprising Sterling loans and Rulway Annuities Rs 43 crores, Rupee loans and Treasury bills Rs 1,278 crores and Unfunded debt Rs 267 crores The corresponding figures on March 31, 1946 are expected to be Rs 1,930 crores, Rs 39 crores, Rs 1,571 crores and

Rs 320 crores respectively The capital portion of the Railway Annuities now appears under public debt only for account ing purposes and is offset by a corresponding deposit with His Majesty's Government. The net regular debt will, therefore, be Rs 1,559 crores on March 31, 1945 and Rs 1,904 crores on March 31, 1946 In addition, however, Government are liable to repay the balances of Depreciation and Reserve Funds of Railways, Posts and Telegraphs, etc., and certain other deposits which, it is expected, will have grown from Rs 27 crores on March 31, 1939 to Rs 240 crores on March 31, 1945 and to Rs 255 crores on March 31, 1946 In other words, is compared with the last pre-war figure of Rs 1,185 crores, the total interest-bearing obligations will have increased by Rs 614 crores by the end of the current year and by Rs 974 crores by the end of the next yeu

A large part of this increase is represented in, Governments' cish balances and investments from their balances. As a further measure of which are expected to mount to Rs 547 crores on March 31 1946 as compared with Rs 30 during the current financial year (1944 45) for the acquisition of the Madras and Southern Rs 457 crores will have been utilised towards. meeting the revenue deficits and the capital Actually the amounts required on these accounts total Rs 864 crores, as it is expected that during the seven years ending excluding the provision for debt redemption (Rs 21 crores) will have amounted to Rs 611 crores and the capital outlay to Rs 253 crores The balance 112 Rs 407 crores, will be covered by the net balance resulting from the other debt he id transactions such as repayment of loans by provinces, issue of rupee coins to the Reserve Bank small coin profits, war risks insurance funds, etc

By far the greater portion of this debt of Rs 2,159 crores is what may be compendiously termed as productive Thus, the capital outlay on Railways upto the 31st March 1946 accounts for no less than Rs 797 crores on Posts and Telegraphs and other Commercial Departments Rs 42 crores, Loans and Advances (including the debt due from Burma) Rs 144 crores, and cash and investments Rs 547 This crores, making a total of Rs 1,530 crores leaves an uncovered debt of Rs 629 crores against the pre war figure of Rs 208 crores Even this may not be called wholly unproductive debt for the large Defence Capital outlay of Rs 167 crores cannot be deemed entirely un remunerative, and, similarly, the large capital Excluding the liability for the British Wir Loan, which remains suspended, the total regular interest bearing debt on March 31, (such as the Delhi Capital Outlay) is not without 1939 amounted to Rs 1,158 crores, comprising

the Government is the supreme landlord and the levenue derived from the land is equivalent to rent. On strict theoretical grounds, exception may be taken to this statement of the case. It serves, however, as a substantially correct description of the relation between the Government and the cultivator. The former gives protection and legal security. The later pays for it according to the value of his ladding. The official term for the method by which the Land Revenue is determined is "Settlement." There are two kinds of settlements in India—Permanent and Temporary Settlement. ments in India-Permanent and Temporary Under the former the amount of revenue has tenures fall into two classes—peasant-hole been fixed in perpetuity, and is payable by the landlord as distinguished from the actual cultivator. The Permanent Settlement was introduced into India by Lord Cornwallis at the close of the eighteenth century. It had the effect intended of converting a number of large revenue farmers in Bengal into landlords occupying a similar status to that of landowners in Europe The actual cultivators became the tenants of the landlords While the latter became solely responsible for the payment of the revenue, the former lost the advantage of holding from the State This system has prevailed in Bengal since 1795 and in the greater part of Oudh since 1859 It also obtains in certain districts of Madras Incidentally, the Bengal system was the subject of an exhaustive examination by a Commission under the chair-manship of Sir Francis Floud in 1939 40, which produced a radical report—a minority dissenting—in favour of State purchase of land, thus chal lenging the Bengal system of land tenure based on the Permanent Settlement

Elsewhere the system of Temporary Settle ments is in operation. At intervals of thirty years, more or less, the land in a given district is subjected to a thorough economic survey, on the basis of the trigonometrical and topographic surveys carried out by the Survey Department of the Government of India Each village area, wherever the Temporary Settle ment is in vogue, has been carefully mapped, property-boundaries accurately delineated and records of rights made and preserved. Under the Permanent Settlement in Bengal the occu-pant does not enjoy these advantages. The duty of assessing the revenue of a district is the Permanent Settlement in Bengal the occupant does not enjoy these advantages. The dutt of assessing the revenue of a district is entrusted to Settlement Officers, members of the Indian Civil Service specially delegated for this work. The duties of a Settlement Officer ire thus described in Stracher's India (revised edition, 1911)—"He has to determine the amount of the Government demand and to make a record of all existing rights and responsibilities in the land lite has a staff of experienced subordinates, almost all of whom are natives of the country, and the settlement of the district assigned to him is a work which formerly riquired several years of constant work. The catablishment of agricultural departments and other reforms have, however if d to much simplification of the extilement of the rental exceeded. In regard to Rygging of the rental exceeded in regard to Rygging in the principle that improvements of the principle that improvements of the principle that improvements of the principle that improvements effected the principle that improvements of the principle that improvements of the principle that improvements of the principle that improvements of the principle that improvements of the principle that improvements of the principle that improvements of the principle that improvements of the principle that improvements effected the principle that improvements of the principle that improvements of the principle that improvements effected the principle that improvements of the principle that improvements of the principle that improvements of the principle that improvements of the principle that improvements of the principle that improvements of the principle that improvements of the principle that improvements of the principle and to value for in definite rules.

Incidence of the Revenue

The incidence of the revenue charges of tenure, and the claracter and circulary of the helding to the nature of the settlement, according to the nature of the settlement of the tenure, and the claracter and circulary

the Temporary Under and landlord-holdings, or Ryotivari and Ze Broadly speaking, the differ dari tenures between the two in a fiscal sense is that in I wari tracts the ryot or cultivator pays revenue direct in Zemindari tracts the 1 lord pays on a rental assessment. In the of the former, however, there are two bot Ryotwari holdings—those in which individual occupant holds directly from ernment, and those in which the land is by village communities, the heads of the lage being responsible for the payment revenue on the whole village area. This is system prevails in the North Bombay, Burma and Assam, Ryotwari ters on an individual basis, and the Governm enters into a separate agreement with everingle occupant. The basis of assessment all classes of holdings is now more favour to the cultivator than it used to be Form what was believed to be a fair average; was levied on the anticipated yield of the l during the ensuing period of settlement. I the actual yield at the time of assessmalone is considered, so that the cultivator; the whole of the benefit of improvements his holding subsequently brought about eit by his own enterprise or by "uncarned in ment" The Government, however, may a new settlement re classify a holding so as secure for itself a fair share in an increm that may have resulted from public works the vicinity, such as canals and railways, from a general enhancement of values the principle that improvements effected

EXCISE.

The Excise revenue in British India can be l classified into two divisions—one derived from the Central Excise Duties and belonging to the Central Government's finance and the other derived from the manufacture and sale of intoxicating liquors, hemp drugs, toddy and The latter is a provincial revenue The revenue from the Central Excise Duties has increased by over 125 per cent during the pist three years. As against a comparatively small revenue of Rs. 7,66 lakhs in 1937 38 and Rs 12.75 lakhs in 1942.43 the budget for 1945.46 forecasts a revenue of Rs 44,99 lakhs. These duties are at present levied on motor spirit, kerosene, sugai, matches, steel ingots, tyres tobacco, vegetable product betel nut, coffee, tea and coal cess

The Budget of the Government of India for 1944 45 brought in force important changes in It rused the rates the field of Central Excises of duty on unmanufactured tobacco and on eights and cheroots and included in the central Excise Tariff betel-nuts, coffee and tea

A further change in respect of tobacco was proposed in the following year Accordingly, the highest class of flue cured tobacco in the excise tariff was sub-divided into three and subjected to a duty of Rs 78, Rs 5 or Rs 38 per lb, according as it was intended for use in manufacturing eighrettes containing more than 60 per cent more than 40 but not more than 60 per cent, or more than 20 but not more than 40 per cent by weight of imported In order to avoid double incidence, some of the provincial governments reached an agreement with the Centre by which they withdrew the provincial excise duty on tobacco in lieu of a share in the proceeds from the Centre's tobacco excise

The provincial excise revenue in British India is derived from the manufacture and sale of intoxicating liquors hemp drugs, toddy and It is a common place amongst certain sections of temperance reformers to represent the traffic in intolicating liquors as one result of So the order of development from the British rule. There is, however, abundant forms of systems to the higher has not evidence to show that in pre-British days the always everywhere identical in details drinking of spirituous liquors was commonly in its essence and main features the 1 practised and was a source of revenue Administration in most provinces of E

The forms of intoxicating liquor chie sumed are country spirit, fermented pal beer made from grain, country brands brandy, etc, locally manufactured mait 1 imported wine, beer and spirits Country the main source of revenue, except in the Presidency, and yields about two-third total receipts from liquors It is usually ed by distillation from the Mhowra Molasses and other forms of unrefined fermented paim juice and rice. In Madra large revenue is derived from fresh The British inherited from the Native nistration either an uncontrolled System or in some cases a crude Farming and the first steps to bring these system control were the limitation of the nur shops in the area farmed, and the establi of an improved Out-Still System under the combined right of manufacture and a special shop was annually granted course was a kind of control, but it only Government to impose haphazard to on the liquor traffic as a whole by met vend fees It did not enable Governm graduate the taxation accurately on th head duty principle nor to insist upon i dard of purity or a fixed strength of Moreover for political and other reaso extent of control could not at first be con

what as follows. Governors and their advisers i.e. in India. The drug is commonly twhile not committed to prohibition in principle in the form of pills, but in some places, of and while reserving the right to make such fur on social and ceremonal occasions, it is d thei changes as might seem fit, refrained from disolved in viter. Opium smoving also pre-teversing the policy of their former ministries in the City of Bombas and other large to On the other hand, they did not extend the policy. The general practice is to sell opium from even in its modified form, to new areas, but left Government Pressure, or a Central V the whole future or prohibition open, to be settled bouse, to licensed vendors. The right of the control of the by whatever popular regime might later assume to the public for sold by annual auction to from the moral issue the fluorical implication tion against opinim smoking in clubs and de of prohibition was far reaching. In some now under contemplation provinces it involved a sacrifice of anything up to a quarter of the total provincial income and the imposition of new and burdensome taxation A further complication was caused by the existence of Indian States whose territories are inextricably mixed with British India, and which have not yet adopted a prohibitionist policy any more than the Government of India has done Thus the whole ruture of the prohibition ca periment is problematical

Drugs - The narcotle products of the hemp plant consermed in India full under three main outegories, namely, ganja or the dry flowering top- of the cultivated female hemp plant charas, or the resinous matter which forms an active drug when collected separately, and blings or the dried leaves of the bemp plant whether male or temple cultivated or incultivated. The main features of the existing sys tem are restricted cultivation under supervision, storage in Bonded Warehouses, payment of a quantitative duty before issue, retail sale under licenses and restriction on private possess on Licenses to retail all forms of hemp drugs are usually sold by auction. The sale of charahas been prohibited in the Bombas Presidency from the 1st April 1922

And here it is pertinent to note that apart or several sine loned Shops Further les now under contemplation

The resenue from opium is derived m from exports of what is called provision of to foreign countries and from the sale to vinclal Governments of excise oplum for inte consumption in India The entire quantit now exported under the system of direct to Torcign and Colonial governments, the sy: of auction siles in Cilcutta to traders for ex to foreign countries having been stopped effect from 7th April 1926. In no case exports permitted without an import certif by the Government of the country of impoprescribed by the League of Nations

It was decided to reduce the total of oplum exported since the calendar year 192 10 per cent annually in each subsequent until exports were totally extinguished at end of 1935

Lycise opium is sold to Provincial Governm for internal consumption in India at a fixe l bised on the cost of production is retailed to licensed vendors at rates five the Provincial Governments and varying Province to Province

Opum has ceased to be a source of rev and in the current budget the expenditu expected to exceed the receipts by Rs 36 lak

SALT

The salt revenue was inherited by the British from the Gauges and the Brahmaputra Covernment from Native rule, together with a the Bay of Bengal render the manufactu nuscellaneous transit dues. These transit dues been salt difficult and the bulk of the sur were abolished and the salt duty consolidated both for Bengal and Burma, is imported to and rused. There are four great sources of Liverpool, Germany, Aden, Bombay and Mac supply, rock salt from the Salt range and Konat Mines in the Punjab, brine salt from Broadly, one-half of the indigenous salt. andensed on the borders of the lesser Rann of remainder under license and excise systematically and excise systematical sy Cutch, and sea salt factories in Bombay Madrais und at the mouth of the Indus

The Salt Range mines contain an inexhaustable supply. They are worked in chambers excreted in salt strata, some of which are 250 feet long, 45 feet wide and 200 feet long. The Rajputana supply chiefly comes and evaporated by solar heat Ir the Ranr of Cutch the brine is also evaporated by solar heat and the product is also evaporated by solar prevent the smurgling of solt into Bettich To heat and the product is known as Baragara salt Important works for the manufacture of that salt were opened in Dhrangadhra State in 1923 In Bombay and Madras sea water is let into shallow pans on the sea coast and eva porated by solar heat and the product sold reductions in duty have led to a largely incre-

Sambhar Lake in Rajputana, salt brine immunactured by Government Agency, and In the Punjab and Rajputana the sait m fictories are under the control of the Nort India Salt Department, a branch of the Comm Madras In and Industry Department Bombay the ma infactories are under the su vision of Local Governments Special trea with Native States permit of the free moven of salt throughout India, except from the Po prevent the smuggling of salt into British In

From 1888-1903 the duty on sait was Rs In 1903, it was reduce per maund of 82 lbs In 1903, it was reduce Rs 2 in 1905 to Rs 1-8-0, in 1907 to Re 1 in 1916 it was raised to Rs 1-4-0 throughout India In Bengal the damp climate consumption, the figures rising by 25 per c together with the large volume of fresh water between 1903-1908 In 1923 the duty was c

India Budget for 1939 After the outbreak of super tix on the slabs of income between the War in September 1939, the I mance Member Rs 35 000 and Rs 2 lakes (e) Increase in the made no changes in the basic rates of income tax Corporation tax by one anna to as 3 in the in his Budget for 1940 41, but he introduced an rupce but a rebate of one anni in the rupce Licess Profits Tax which was further increased on so much of a company stotal income as in the 1941-42 Budget to 665 per cent. In the is not distributed in dividends other than same Budget, the surcharge on basic rates of dividends payable at a fixed rate and (f) Celling

The budget for 1013-14 laid down a 66 per cent income tax surcharge applied uniformly over all levels of income It was anticipated that the increases in income tax, super tax and corpora tion tax would yield an additional Re 7 crores

The budget for 1944 45 foreshidowed an of income tix and not super tix. The cost additional revenue of Rs 8) crores by making of this earned income relief is estimated it the following changes—(a) The taxable minimum income raised from Rs 1 500 to Rs 2,000, the I maner act raised by three pies the surcharge (b) no change in taxation on incomes upto on income tax on slabs of income above Rs 15,000

step" system, and this was duly done in the of half an anna in the Central surcharge on income tax and super tax, which had been 25 of the combined rate of income tax and super tax, which had been 25 of the combined rate of income tax and super per cent since November 1940, was increased to tax at 64 pics in the rupee which was in forcing 1942 to with retro parties of the combined rate of in 1942 to with retro parties of the combined rate of in 1942 to with retro parties of the combined rate of income tax and super per cent in 1942 to with retro parties of the combined rate of income tax and super per cent in 1942 to with retro parties of the combined rate of income tax and super tax. in 1942 43, with retro pective effect for 1943 44

By an ordinance, an exemption of 1/10th of carned income subject to a miximum (it terms of income) of Its 2,000 from income tas granted for 1945 to The exemption would be in respect of income derived from personal exertion only, and is only in respect of income tax and not super tax. The cost of this earned income relief is estimated it Rs 10,000, (c) Increase in Central surcharge and on incomes taxable at the maximum rate

An assessee will have the option to pay tax missioner of Income Tix, relief to be grant- quarterly either on the basis of his last assessed income or on the basis of his own estimate of fund contributions and superannuation current earnings. Government will pay 2 per વી interest. on sums advance under the scheme but if the assessees own estimate, which can be revised during the verr, fulls short of 80 per cent of the tax deter mined on regular assessment, penal interest at 6 per cent on the difference will be payable. No penal interest will be privable when the assessed chooses to prival on the basis of his last assessed To secure compliance with the scheme, , and finally, a most important change, certain provisions of the penalties section of the ision of the liability to pay income-tax Income tax Act are imported and failure to make

HISTORY OF INDIAN COINAGE

e Indian mints were closed to the un cted coinage of silver for the public from oth June 1893, and Act VIII of 1893, passed at date, repealed Sections 19 to 26 of the n Comage Act of 1870, which provided for oinage at the mints for the public of gold silver coins of the Government of India 1893 no Government rupee- were coined 1897, when, under arrangements a ade with lative States of Bhopil and Kashmir, the ncy of those States was replaced by Gov The re-coinage of these ent rupees s proceeded through the two years 1897 1998 In 1899 there was no comage of but in the following year it seeme I that ge was necessary, and it was begun in iary 1900, the Government purcha ing the required and paying for mainly with gold accumulated in the Paper Currency In that and the following month a of rupees was comed and over 17 crores of a in the year ending the 31st March 1910 ling the rupers issaed in connection with conversion of the currencies of Native From the profit accruing to Govern on the comage it was decided to constitute arate fund called the Gold Reserve Fund e most effective guaranter against tempofluctuations of exchange The was invested in sterling securities, the ist from which was added to the fund exchange had been practically ant a for years, and it was decided that of the ge profits devoted to this fund, six crore d be kept in rupees in India, instead of invested in gold recurities The Cold ve Fund was then named the Gold Stan-It was ordered in 1907 that only Reserve alf of the comage profits should be paid the reserve the remainder being used for il expenditure on railways

Gold

Since 1870 there had been no comage of double mohurs in India and the last coinage of single mohurs before 1918 in which year comage was resumed, was in the year 1891 92

Royal proclamation was issued in 1918 establishing a branch of the Royal Mint at Bombay Pending the completion of the arrange ments at the Branch, Royal Mint, power was taken by legislation to coin in India gold mohurs of the same weight and fineness as the sovereign Altogether 2,109,703 pieces of these new coins of the nominal value of Rs 3,16,45,545, were struck at the Bombay Mint The actual comage of sovereigns was begun in August, 1918, and 1,295,372 sovereigns were coined during the year. This branch of the Royal Mint was closed in April, 1919, owing to difficulties in supplying the necessary staff

The Indian Currency Act of 1927 established a new ratio of the rupee to gold It established this ratio at one shilling and six pence by enact ing that Government would purchase gold at a price of twenty-one rupees three annas ten pies per tola of fine gold in the form of bars containing not less than forty tolas and would sell gold or, at the option of Government sterling, for immediate delivery in London at the same price after allowing for the normal cost of transport from Bombay to London rate of one shilling and five pence forty-nine sixty-fourths was notified as Government s selling rate for sterling to meet these obligations Great Britain and India left the gold standarp in September 1931 but the buying and selling rates for sterling are still maintained

With the receipt of large, consignments of gold, the Bombay Mint made special arrange ments for the refining of gold by the chlorine dally amount of 6 000 on ers of raw sold

The Currency System.

I. THE SILVER STANDARD.

Prior to 1893 the Indian currency system was a mono metallic system, with silver as the standard of value and a circulation of silver rupees But with the opening and notes based thereon of new and very productive silver mines in the United States of America the supply of silver exceeded the demand and it steadily receded in The result was that the gold value of the rupee, which was nominally two shillings, fell continuously until it reached the neighbourhood of a shilling These disturbances were prejudicial coul to trade, but they were still more prejudicial The Govern-The Governto the finances of the Government ment of India has to meet every year in London a substantial sum in the form of payment of interest on the debt, the salaries of officials on leave, the pensions of retired officials, as well as large payment for stores required for State enterprises As the rupee fell in its gold value the number of rupees required to satisfy these payments rose. The total reached a pitch which spriously alarmed the Government, which felt that it might be called upon to raise a sum in rupees which would necessitate a considerable mcrease in taxation, which should be avoided if possible. It was therefore decided to take measures to raise and fix the gold value of the rupee for the purposes of exchange

Closing the Mints -The whole question was examined by a strong committee under the presidency of Lord Herschell, whose report is commonly called the Herschell Report decided in 1893 to close the mints to the un restricted coinage of silver This step led, as was intended, to a gradual divergence between the exchange value of the rupee and the gold value of its silver content Government ceased to add rupees to the circulation Rupees remain ed unlimited legal stender and formed the standard of value for all internal transactions Since Government refused, and no one else had the power to coin rupees, as soon as circumstan ces led to an increased demand for rupees, the exchange value of the rupee began to rise 1898 it had approached the figure of one shilling and four pence Meantime, in response to the undertaking of Government to give notes or rupees for gold at the rate of fifteen rupees to the pound sterling, gold began to accumulate in the Paper Currency Reserve These purposes having been attained, a second committee was appointed under the chairmanship of Sir Henry Fowler to consider what further steps should be adopted in the light of these conditions The report of the Fowler Committee as it was called marked the second stage in Indian currency policy

II THE NEW STANDARD.

The Fowler Committee rejected the proposil to re open the Mints to the free coinage of silver They proposed that the exchange value of the rupee should be fixed at one shilling and fourpence or fifteen rupees to the sovereign further suggested that the British sovereign should be made a legal tender and a current coin that the Indian mints should be thrown open to the unrestricted coinage of gold. so that the rupee and the sovereign should freely c reulate side by side in India The goal which the Committee had in view was a gold standard supported by a gold currency Now under the condition which compelled the Government of India to give either rupees or rupee notes for gold tendered in India, at the rate of fifteen rapees to the sovereign it was impossible for the rate of exchange to rise above one shilling and four rence, save by the fraction which covered the cost of shipping gold to India But if the balance of trade turned against India, it was still possible for the rate of exchange to fall meet this the Fowler Committee recommended that the profits on coming rupees should not be absorbed in the general revenues, but should be set aside in a special reserve to be called the Gold Standard Reserve Inasmuch as the cost of coming rupers was approximately eleven pence halfpenny, and they were sold to the public at one and four pence, the profits were considerable, they were to have been kept in gold, so as to be freely available when required for the support of exchange

A 16 pence Rupes—The Government of India professed to accept all the recommenda tions of the Fowler Committee, actually only a portion of them was put in practice. The official rate of exchange was fixed at one and four The sovereign and the half sovereign were declared unlimited legal tender in India But after a first attempt, when sovereigns soon came back to the treasuries, no effort was made to support the gold standard by an active gold currency The gold mint was not set up The Gold Standard Reserve was established, but, instead of holding the Receive in gold, it was invested in British securities These practices gave rise to conditions which were never contemplated by the Fowler Committee Reference has been made to the Home Charges of the Govern ment of India, which at the time amounted to about seventeen millions sterling a year are met by the sale of what are called Council That is to say, the Secretary of State, acting on behalf of the Government of India, sold Bills against gold deposited in the Bank of England in London These Bills when presented in India were cashed at the Government Trea Now if the Secretary of State sold Council Bills only to meet his actual require ments, it follows that the balance of trade in favour of India over and above this figure would be liquidated, as it is in other countries, by the importation of bullion or by the creation of It is a fact that owing to the failure credits of the policy of encouraging an active gold

tate decla d li intention of selling Council tate decia d il intention of acting council illison findia without limit at the price of on hilli gfourpenconcelighth—thatistosay gold import pel t. The effect of this policy was to limit the import of gold to India for it was gener ily more conv ni at to deposit the gold in London and to obtain Cou cil Alli again tit in Loncon and to obtain Cou cli allil again it in than to all plus gold to india. Nevertheless as the hexpitane e tton er pus very largely anasted into eterms it was sometimes ch per and more e ne lent to all psovereigns from the statist than to buy Council Bill Con Ider ble quantili of sovereign from dh it raw into Inija and irculated freely prificul ri in the Bomb President the la jub a d part of the

New Measures —The co clusion of this Commissio were that it was unnecessary to support the Gold St ndard by a gold currency that it was not to the advantage of India to en courage the int rnal use of gold as currency ; by a th roughly adequate reserve of gold and sterling that no limit should be fixed to the

branch of the Gold *tandard Reserve should be balled , that Reverse Councils should be rold on demand, that the Papir Currency should be made more clastic, and that there should be two Indian representatives out of three on the H nance Committee of the India Office. The Committee dealt in conclusively with the accumulation of excessive balances in London, the general tenor of their recommendations, being "not guilty, but do not do it again." They take

Bank Sir James Begbie, the only Indian binker on the Committee appended a vigorous minute of dissent, in which he urged that the true line of advance was to discourage the extension of the token currency by providing further facilities for the distribution of gold when in creases to the currency became necessary, including the issue of an Indian gold coin of a more convenient denomination than the sovereign or the half sovereign

IV. CURRENCY AND THE WAR OF 1914-18

The report was in the hands of the Govern ment of India before the outbreak of the list war Some immediate stops were taken, like the aboli-tion of the silver branch of the Gold Standard Leserve, but before the Government could deal entirely with the temporising recommendations of the Commission, the warbroke out The carly effects of the war were precisely those anticipated. There was a demand for sterling remittance which was met by the sile of Reverse Councils, 68,707,000 being sold up to the end of Innuary 1915 There were withdrawals from the Post Other Savings Banks, and a net sum of Rs 8 crores was taken away There was some lack of confidence in the Note issue, and a demand for gold, Notes to the extent of Rs 10 crores were presented for encashment and the Govern ment were obliged to suspend the issue of gold But these were transient features and did not demand a moratorium, confidence was soon revived and Exchange and the Note Issue con tinued strong The difficulties which afterwards arose were from causes completely unanti cipated by all students of the Indian currency They arose from an immense balance of trade in favour of India, caused by the demand for Indian produce for the United Kingdom and the Allies and the decline in the export trade from these countries, a heavy expenditure in India on behalf of the British Government, and a phenomenal rise in the price of silver If we take the three years 1916-17 to 1918-19 the balance of trade in favour of India was £6 millions a year above the corresponding years of the previous quinquennium. The disbursements in India on behalf of the Government of the United Kingdom and the Allies were in December 1919 £240,000,000 This balance of trade and expenditure for Imperial purposes could not be financed either by the import of the precious metals, owing to the universal embargo on the movement of gold and silver nor by credits in India It could be financed only by the expansion of the Note issue, against sterling securities in the United Kingdom chiefly Treasury Bills, and the issue of comed

rupees Butsimultaneously there was a reduction in the output of the silver mines of the world coinciding with an increased deman for the metal. The price of silver in 1915 was 27½ pence per standard ounce. In Max 1919 it was 58 pence, on the 17th December of that year it was 78 pence. The main difficulties in India were not therefore the prevention of the rupee from falling below the ratio of 15 to one, but to keep it within an limits and to provide a sufficiency to meet the demand

Rise in Exchange—The measurer adopted by the Government of India in these emergen cles were to bring exchange under rigid control confining remittance to the finance of articles of national importance. The next step was to raise the rate for the sale of Council B its so that silver might be purchased at a price which would allow rupees to be coined without loss. The following table shows how rates were raised from one shilling fourpence to two shillings fourpence.

Date of Introduction	Minmum Rate for Immediate Telegraphic Transfers
3rd January 1917	1 41
28th August 1917	1 5
12th April 1918	1 6
13th May 1919	1 8
12th August 1919	1 10
15th September 1919	2 0
22nd November 1919	2 2
12th December 1919	2 4

V. THE 1919 COMMITTEE.

The effect of these me sures however was to jettison the currency policy pursued from 1893 to 1915, the main object of which was to stanilise the rupee at one and fourpence. The war being over, a Committee was appointed to idvise in regard to the future of Indian exchange and

currency It sat in 1919 and reported toward the end of the year—Its main recommendation are summarised below—

(i) It is desirable to restore stability to the rupee and to re establish the automatic working of the Indian currency system

(15) Th reduction of the fineners or weight of (the rupes the issue of or 3 rupes coins of lower proportion I silver co tent th n the present rupes or the last e of a nickel rupee are e p dients that cannot be recomme ded

(ii) Il maintena ce of the convettility of the not issue i e se ti i and p pea i ti do not adequately protect the l dian paper c renew from the risk of becomi zi convertible cannot be entertal d

Ti rise in xchange in so fa a it has checked and mitigat d th rise in Ind an prices has been to the ad anta e of the c u t y whole and it is desirable to secure the o tinu ance of thi benefit

subject to this condition accepted the Gold Bullion Standard recommended by his col-lengues. As for the proposed Reserve Bank, Sir Purchotomides, whilst recombine that the rehemo proposed might be the ideal to be attained in process of time, thought that the best immediate course was to develop the Imperial Bank into a central bank for India, was done in an article contributed to The Chief point of difference with his collesgues Bankers' Megazine by Sir Stanley Reed, which was however the ratio

Dealing with the ratio of the rupee to gold Sir Purshotamdas said that in September 1924 of the path laid out in the introductory section, the rate was approximately one and fourpence but this is unavoidable, if the full bearing gold. At that time the Government was pressed of the measures proposed by the Commission to stabilise at the then ratio, and thus legally are to be appreciated. After describing the to restore the long current legal standard of standard in force Sir Stanley Reed asked — money payments. This it declined to do, and by limiting the supply of currency, the "What was the standard thus established? ratio was raised to one and sixpence gold by It is generally described in London as the Gold April 1925 He declined therefore to attach | 1 xchange Standard any importance to a ratio reached by such measures Proceeding to analyse the course late Sir Lionel Abrahams, who described it of prices and wages, he combated the conclusions a limping standard. The Royal Com sion of his colleagues that prices had adjusted mission declares that 'in truth in so far as it themselves in a preponderant degree to one shilling and sixpence. For these reasons he recommended that the rupee should be stabi lised at the rate which was current for nearly twenty years, namely one and fourpence Wenty years, namely one and fourpence His conclusions were summarised in the following terms -

this Report as being no less important than the has been, automatic . question of the standard to be adopted for the Indian Currency System I am convinced that if the absolute necessity of the free inflow of gold, which I have emphysised, is recognised, and steps taken to ensure it, the gold bullion standard proposed will be the correct one, and the likelihood of its breaking down under will be as remote as it can reasonably be But I have very grave apprehensions that if the recommendation of my colleagues to stabilise the rupee at 1s 6d is accepted and acted upon. India will be faced during the next few years with a disturbance in her economic organisation, the magnitude of which is difficult to estimate, but the consequences of which may not only hamper her economic development but may even prove disastrous Such a disturbance and its consequences my colleagues do not foresee to-day But the possibility of their occurring cannot be ignored. adjustment is complete, agriculture threatens to become unattractive and less remunerative than it is to day, and industries will have to undergo a painful process of adjustment, unmarranted and avoidable—an adjustment which will be a supposed to the comment which will be a supposed to the comment when allowance has been made for all misunderstandings and misapprehen signs that a large measure of distrust in the present system is justified by its imperfections.

A Survey -The official summary of the Report, and the summary of the minute of dissent, given above, do not however conversal idea of the far-reaching proposals embodied therein. These can be appreciated only if they are examined in close relation to the currency sys tem of India in its various place usince 1899. This was recognised to be a fair presentation of the position The main features thereof are reproduced below. There is here some re-treading

That status was never claimed for it by its principal protagonist, the amounted to a definite standard at all, it was a standard of sterling exchange. Later they show that 'the automatic working of the exchange standard is thus not adequately provided for in India, and never has been The fundamental basis of such a standard is provision for the expansion and contraction of the volume of currency Under the "I look upon the question of the ratio in Indian system, contraction is not, and never

> "However, the standard limped along until the third year of the war The exchange value of the rupee was stable, prices adjusted themselves to the ratio, Indian trade and industry developed. From the narrow stand point of profit and loss, the investment of the

natural, unwarranted and avoluable—an adjust—an direct not only their stability and their cost, and affect not only their stability and their progress, but in certain cases, their very existence And should Nature have in store for India a couple of lean years after the four good harvests that we have had, during the period of forced silver market was revealed. Faced by the adjustment to a rate of 1s. 6d, the steps that the Currency Authority will have to take to maintain exchange at this rate may deplete.

"There is, I think, an inadequate appreciation of the influence on the Indian currency and exchange of the war, and the action taken there are in the permanent ratio of one shilling and fourpence did not occur until 1917, when the full effect of dependence on the dijustment to a rate of 1s. 6d, the steps that the Currency Authority will have to take to price of Council Drafts or clee abandon the maintain exchange at this rate may deplete price of Council Drafts or class abandon the

onvertibility of th Note Issue took the former alternative the price of Counc l Drafts followed the price of sliver The effect f this would have been tra sitory b t for I this would have been tra sitory b t for the att mpt in 19 0 on the advice of the Babing ton Smith Committee to stabilis the rup at a new ratio of two shillings gold when Il gold prices wer crashing It is easy to be wise after tie event but If the Go erament had followed silver down as it foll wed silver up ther is no room to doubt that the runes up ther is no room to doubt that the rupes would he returned t its perm nent ratio with no more disturb in than w s le itable under w r conditions. However, this was not consider the resulting the return the resulting the return the resulting repeats a line beautiful and the two shilling r peths a line bean also gladient Left free from administratil e action the repeated the low one shilling a de three-pence terling and on shilling is distributed in the resulting and the return the return the return the return that the return the ret d has been in the n ighbour limb dunward hood of one shill g and sixpenc gold for the p st twel mo the B t it is not alw ys alised i London that u der these vicissitudes the Indian stand rd h s legally pe ished In the w rds f the report The tability of the gold val e of the upe is thus baled upon nothi g more substantial than a policy of the Governme t and t pe t th t policy can be found defi ed i no notification or u de taking by th Governme t It h s to be implied from the acts of the Governm at i relation to the c renew and the eacts resubject to no stat t ry regulation or control

The reano sibility remitted to the Commisal n was not therefore the mere tabilisation of the ruper but the stablishme t of standard the raper but the stabissime of standard which we id common of reaso et confidence in India to ii the rape to that standard a dto provide for its tautus ye or bol autom tie we ling d stability to bring the control of cere y a d feredit under a legi authority d to i the l d neurency ndex. rity d to f th l d n currency nd ex hange sy tem from the d min ce of th silve ma ket In short it was to est blish the rul of I w in pla of the p ctl of dmini trative disc tio

A Gold Bullion Standard - The currency A Gold Bullion Standard — The currency system r comme ded by the Comms ion is a gold buill in standa d. They propose that it is no bligatin a phain b imposed by tart in the crency a the left by d. ell gold without limits at mats dt rmind with ref ce to a faced gold by the other control of the control of t thouse this 400 sin out on limitation by ing impost as to the purpose for which the gold is equired. The esse co of this p posat is that the odd ny medium for could the in India hold real sature the creny not not such that the litty recombined the contraction of the contraction \$ Go e me t to by and sell g ld bull n f by the sell g ld bull n f by of th urrency in terms of gold lould b c ed

"This reasoning is eminently sound, and the scheme in its broad outlines should command the unhesitating support not only of India, but of all interested in Indian trade will have nothing to do with any exchange standard, its experience has been too painful Proposals to that end would be rejected by the legislature and prolong the currency controversies it is desired to close. The gold bullion standard satisfies all the country's real needs True, it will not give it the gold mint and the gold currency which have long been demanded, it involves the demonetization of the sovereign to which a sentimental influence attaches But whilst it does not do these things, it keeps No one contends that a gold one door open standard and a gold currency are immediately practicable. The most rapid progress thereto is embodied in Sir Basil Blackett's scheme, which is full of uncertainties and risks. But when the gold reserves are strengthened to the requisite point, the proposals leave India perfectly free to decide, through her legislature, where a gold currency is worth the expense

"We must, however, face the obligation which a gold bullion standard imposes on the currency authority in India; indeed the Commission do not attempt to burke it. The obligation is to convert the currency, not merely into foreign exchange, but into metallic gold, and it is an obligation that is not, as formerly, conditional and circumscribed, but absolute and unlimited. Nevertheless—it has been undertaken by every other country that has adopted an effective gold standard, and we have satisfied ourselves that the present resources in the form of reserves at the disposal of the Government of India are adequate to enable the currency authority safely to undertake the obligation, with the measures of fortification, and at the time, which we specify. It is import ant, therefore, to examine the reserves and the procedure thereat

"The reserves held for the purpose of muntaining the value of the token currency are two-fold—the Paper Currency Reserve and the Gold Standard Reserve Their constitution on April 30, 1926 (the date taken by the Commission), was as follows—

Paper Currency Reserve

	Rs	Cro	ore	
silver com		77	0	
Silver bullion		7	7	
Gold com and bullion		22	3	
Rupec securities		57	1	
Sterling securities		21	0	
		185	1	

(The gold coin and bullion and the sterling securities are converted at the legal fiction actio of two shillings per rupee)

Reserve is the backing for the Note Issue Th Gold Standard Reserve, accumulated from th profits on coining, is designed to maintain th external value of the rupee In practice the action is closely interlocked, and the first line of defence in the event of a demand for remit tance from India is the gold in the paper currency reserve This invisible line of demarcation will disappear if the Commission's proposal are adopted. The Commission are justified in are adopted recommending that the two shall be amalgamat Their further proposals are that the proportions and composition of the combined Reserve should be fixed by statute, that gold and gold securities should form not less than 40 per cent of the whole, with 50 to 60 per cent as the ideal, and that the holding of gold, which now stands at about 12 8 per cent. should be raised to 20 per cent as soon as possible, and to 25 per cent in ten years Generally, they are of opinion that during this period no favour able opportunity of fortifying the gold holding in the Reserve should be allowed to escape

"The proposal to bring the combined Reserve under statutory control is wise, an arguable case could be made out for the thesis that the currency difficulties of India have arisen in the main from the decision of Lord Curzon's Government not to invest the official acceptance of the Fowler Report with legislative authority. The strengthening of the gold reserves is in entire accord with Indian needs

The Ratio — The majority of the Commission, Sir Purshotamdas Thakurdas being the only dissentient, recommend that the rupee be stabilised in relation to gold at a rate corresponding to an exchange rate of one shilling and sixpence to the rupee Round this point controversy in India will be concentrated, it is worth while to refresh our memories of the history of the ratio. The Fowler Committee recommended that the rupee should be permanently stabilised at one shilling and fourpence, the Secretary of State for India accepted their recommendations without qualification. The ruper was substantially steady at this point until August 1917.

"One principle advanced in Sir Dadiba Dalal's prophetic minority report in 1919, that the legal standard of money payments should be and usually is, regarded as less open to repeal or modification than any other legislative Act, But when will command general acceptance Sir Dadiba went on to suggest that the Govern ment of India might have avoided this mea sure by larger borrowings in India and encour aging investment abroad he was on ground where no one in touch with Indian conditions can follow him In the circumstances of the day the Government had no alternative to rusing the rate of exchange save in declaring the rupee inconvertible, which during the wa would have been disistrous. I must reiterate the belief that the real mischief was done no when the rate of exchange was raised to meet the rise in silver, but when it vas not lowered as silver fell, the attempt to stabilise the ruper

the conclusion of the Commission that the best | a notification to the following effect way to foster the use of currency notes is to establish confidence in their practical converti bility, 'and this confidence has been secured not so much by a legal obligation to encash them at currency offices as by making rupees readily available to the public at centres where there is a demand for them

"The Commission therefore propose that whilst the legal obligation to convert into rupees all the notes in circulation shall remain obligation should not attach to the new notes to be issued by the Central Bank, and coincidentally the one-supee note, which had acquired great popularity before it was discontinued on the ground of economy, shall be reissued. The legal obligation on the Central Bank will be to give legal tender money, either notes of smaller denominations or silver rupers, at its option, but it will be the duty or the Bank to supply rupees freely in such quantities as may be required for circulation, and of the Government to furnish the Bank with such coin The currency position is such that the change in the legal status of the note will be unfelt suffering from a surfeit of rupees, the total volume of which is estimated at approximately Rs 400 crores There are Rs 85 crores of sliver coin and bullion in ieserve The whole tendency will be in the direction of a return of rupees to the reserve rather than to an appetite therefor Not only will there exist the fullest capacity to supply rupees on demand, but there will be a positive inducement to the currency authority to encourage a demand for rupers in order to get rid of its redundant stock. It is clear that the present opportunity of freeing the currency authority from the dependence on the silver market which has hampered India for so many years is exceptionally favourable, and should be seized without hesitation"

The reception of the Report followed very closely the lines indicated as probable in the article in The Bankers' Magazine which we have quoted extensively above There was a considerable protest, strongest in Western India but shared in other parts of the country, against the proposal to stabilise the rupee at one shilling and sixpence and a demand for a reversion to one and fourpence There was, particularly in Bombay, a reluctance to agree to the estab lishment of the Reserve Bank, coupled with the desire that the Imperial Bank of India should be re moulded in order to make it the Central Bank, with the functions proposed to be remitted to the Reserve Bank. These voices were so loud that they overbore the consideration of the basic recommendations of the Report, a true gold standard and the establishment of an organi sation which would link currency with credit

In August 1926 the Government published the text of a Bill designed to fix the ratio at one and six and to support it by the sale of bullion on the lines laid down in the Report At the request of a large body of opinion in the Legislative Assembly, which urged that there had not been time to study the Report and that the papers re- not available, the discussion of this men-

"After considering the report of the Royal Com mission on Indian Currency and Finance, the Secretary of State for India in Council in agree ment with the Government of India, is prepared to accept as a whole the recommendations of the Commission, subject to such further consideration of details as may prove to be necessary The necessary legislation to give effect to these recom mendations will be introduced in the Indian Legislature during the forthcoming session "

The New Ratio -So far from closing the discussion, this notification intensified Feeling ran high on the subject of the ratio, considerable interests in the country being convinced that one shilling and sixpence was a higher rate than the manufacturing and agricultural industries could bear without prolonged and disastrous readjustment. These found strong expression when the Bill to give effect to the new rate was brought before the Legislative Assembly in February-March 1927 The Indian Currency Bill was, however, accepted by the Assembly by a small majority, and adopted by the Council of State It established the ratio of one shilling and sixpence by enacting that the Government would purchase gold at a price of twenty-one rupees three annas ten pies per tola of fine gold in the form of bars con taining not less than forty tolas and would sell gold or, at the option of Government, sterling for immediate delivery in London at the same price after allowing for the normal cost or transport from Bombay to London A rate of one shilling five pence forty-nine sixty-fourths was notified as Government's selling rate for sterling to meet these obligations

Exchange has since remained stable at the one and supenny rate World trade depression in the slump of 1930 made it increasingly difficult for the Government of India to maintain the statutory ratio, but their difficulties were solved when Great Britain went off the Gold standard in September 1931, and the rupee was linked to sterling Since then, large exports of commer cial and hoarded gold from India have served to keep the exchange ratio stable, despite much agitation for a reversion to the 1s 4d ratio by interested parties Generally speaking, the ten dency in the last ten years has been for the rupee to be worth more than 1s 6d, and thus Govern ment have found no difficulty in maintaining a stable exchange Since the outbreak of the war in September 1939 official restrictions on ex change operations have perforce increased and caused some inconvenience to businessmen the rupce continues to maintain its strength and there is little doubt that, left to itself, it would appreciate in terms of foreign currencies rather than depreciate

Developments During 1943 44 -The year under review witnessed a further large expansion in note circulation, although at a more moderate rate than in 1942 43. The annual rate of increase during the year 1943 44 declined to 37 per cent as compared with 69 per cent. in 1942 43, which was the highest recorded figure either in this war or the last, and 50 per cent in 1941-42. The total amount of notestigal tender in India stood at Rs 894 84.

TOTAL LIABILITIES

THE RESERVE BANK

The following Act of the Indian Legislature or a scheduled bank, or a corporation received the assent of the Governor-General on March 6, 1934, and is known as the Reserve ment or any law for the time being in any part of His Majesty's Domini

Whereas it is expedient to constitute a Reserve Bank for India to regulate the issue of bank notes and the keeping of reserves with a view to securing monetary stability in British India and generally to operate the currency and credit system of the country to its advantage,

And whereas in the present disorganisation of the monetary systems of the world it is not possible to determine what will be suitable as a permanent basis for the Indian monetary system.

But whereas it is expedient to make temporary provision on the basis of the existing monetary system, and to leave the question of the monetary standard best suited to India to be considered when the international monetary position has become sufficiently clear and stable to make it possible to frame permanent measures,

It is hereby enacted as follows -

- (1) A Bank to be called the Reserve Bank of India shall be constituted for the purposes of taking over the management of the currency from the Governor-General in Council and of carrying on the business of banking in accordance with the provisions of this Act
- (2) The Bank shall be a body corporate by the name of the Reserve Bank of India, having perpetual succession and a common seal, and shall by the said name sue and be sued

Share Capital —(1) The original share capital of the Bank shall be five crores of rupees divided into shares of one hundred rupees each, which shall be fully paid up

- (2) Separate registers of shareholders shall be maintained at Bombay, Calcutta, Delhi, Madras and Rangoon, and a separate issue of shares shall be made in each of the areas served by those registers, as defined in the First Schedule, and shares shall be transferable from one in two equal portions to the Bombay an register to another
- (3) A shareholder shall be qualified to be regis tered as such in any area in which he is ordinarily resident or has his principal place of business of the Council of State to be elected by in India, but no person shall be registered as a shareholder in more than one register, and no person who is not-
- domiciled in India and either an Indian subject of His Majesty, or a subject of a State in India, or
- (b) a British subject ordinarily resident in India and domiciled in the United Kingdom or in any part of His Majesty's Dominions the government of which does not discriminate in any way against Indian subjects of His Majesty,
- (c) a company registered under the Indian Companies Act, 1913, or a society registered (7) If the number of such applicants is under the Co operative Societies Act, 1912, than one-fifth of the number of shares ass or any other law for the time being in force in to the register, the Central Board shall allo

pany incorporated by or under an Act of government of which does not discrimi any way against Indian subjects of His I having a branch in shall be registered as a shareholder entitled to payment of any dividend share, and no person, who, having bee registered as a shareholder, ceases to be fled to be so registered, shall be able to e any of the rights of a shareholder ot than for the purpose of the sale of his sh

- The Governor-General in Council sl notification in the Gazette of India, spec parts of His Majesty's Dominions which be deemed for the purposes of clauses (b) of sub section (3) to be the Parts of His Me Dominions in which no discrimination a Indian subjects of His Majesty exists
- The nominal value of the shares ori assigned to the various registers shall follows, namely
- (a) to the Bombay register—one ht and forty lakhs of rupees,
- to the Calcutta register—one hu and forty-five lakhs of rupees,
- (c) to the Delhi register—one hundre fifteen lakhs of rupees,
- to the Madras register-seventy of rupees,
- (e) to the Rangoon register—thirty Inl. rupees

Provided that if at the first allotmen total nominal value of the shares on the register for which applications are receit less than one hundred and fifteen lak rupees, the Central Board shall, before ceeding to any allotment, transfer any s not applied for up to a maximum nominal of thirty-five lakhs of rupees from that re Calcutta register

A Committee consisting of two elected 1 bers of the Assembly and one elected me official members of the respective Houses be associated with the Central Board for purpose of making public issue of shares looking after the first allotment of shares

- In allotting the shares assigned to a 1 ter, the Central Board shall, in the first inst allot five shares to each qualified appl who has applied for five or more shares, if the number of such applicants is gre than one fifth of the total number of sl assigned to the register, shall determine b the applicants to whom the shares sha allotted
- (7) If the number of such applicants is I ritish India relating to co operative societies remaining shares firstly, up to the limit of

- half of such remaining shares to those appli may exercise all powers and do all acts and cants who have applied for less than five shares things which may be exercised or done by the and thereafter as to the balance to the various Bank can dere not by this act expressly directed applicants in such manner s it may deem fair or required to be done by the Bank in general and equitable having regard to the de inability meeting. of distributing the shares and the voting rights attached to them as widely as possible
- (8) Notwithstanding anything contained in sub-ections (6) and (7) the Central Board shall reserve for and allot to Government shares of the nominal value of two lakhs and twenty thousand rupees to be h ld by Government for disposal at par to Directors s eking to obtain the minimum share qualification required under sub section () of section 11
- (9) If after all applications have been met in accordance with the p ovisions of sub-sections (6) (7) and (8) any shares remain unallotted, they shall, notwithstanding nything contained in this section be allotted to nd t k n up by Governme t and shall be sold by the Governor General in Council as soon as may be at not less than par to residents of the areas served by the register concerned
- (10) The Governor General in Council shall ha e no right to exercise any v to under this Act by re son of any sha es allotted to him u der sub-section (8) or under sub-section (9)
- (11) A Director sh il not dispose of any shares obtailed from Goy rument under the plovi ions of sub-section (8) otherwise than by res le to tovernment at par and Government shall be entitled to re purchas at par il such hares held by my Directo on his ceasing from any cause to hold offic as Director
- I cr e nd rdu u n of har p tal —(1) Th share capit i of the Bank m y be in r ased or reduced on the recommend tion of the C ntral Board with the p vious sanction of the Governor Gen ral in Council and with the pproval of th Central Legisl ture to such a ext at a din such m nner as may be determined by the B nk in gene al m eting
- The additional shares so cre ted shall be of the nominal value of one hundred rupees each and shall be assigned to the various regis ters in the same proportions the shar s con ters in the same proportions the stituting the original share capit L
- (3) Such additional hares shall be fully paid up and the price at which they may be i sued hall be fixed by the Central Board with the p evious s nction of th Governor General in Council.

In the Indian Coinage Act, 1906, for section 11 the following section shall be substituted,

namely Gold coins, coined at His Majesty's Royal Mint in England or at any mint established in pursuance of a proclamation of His Majesty as a branch of His Majesty's Royal Mint, shall not be legal tender in British India in payment or on account, but such coins shall be received by the Reserve Bank of India at its offices, branches and agencies in India at the bullion value of such coins calculated at the rate of 8 47512 grains troy of fine gold per rupee "

The Indian Paper Currency Act, 1923, the Indian Paper Currency (Amendment) Act, 1923, the Indian Paper Currency (Amendment) Act, 1925, and the Currency Act, 1927 are hereby repealed

In sub section (3) of section 11 of the Indian Companies Act, 1913, after the word "Royal" the words "Reserve Bank' shall be inserted

The Reserve Bank began work with the opening of the fin incial year 1935 36 The Bank made a net profit of Rs 53,42,100 for the year ended December 31, 1936

REPORT FOR THE YEAR ENDED JUNE 30th, 1944

The report of the Central Board of Directors of the Reserve Bank of India for the year ended June 30, 1944 states that after payment of expense of administration and provision for sundry liabilities and contingencies, the net profit amounts to Rs 10,26 57 810 7 11 Of this amount, a sum of Rs 20,00,000 will be utilised for payment to shareholders of a dividend at the rate of four per cent, the maximum dividend permissible under the Ordinance issued by the Government of India on June 30, 1943, leaving a surplus of Rs 10,06,57,810 7 11 for payment to the Central Government The net profit is higher than in the previous year by Rs 2 57 crores owing to a marked increase in the interestbearing assets of the Bank, and constitutes 1963 65 for Rs 15 erores was made on July a fresh record

The total number of shareholders declined further during the year from 49,402 to 48,292 The number of shares on the register of the Calcutta area remained practically unchanged while those on that of the Bombay area con tinued to increase

Notes and Coins

It was announced on November 22, 1943 that Bank Notes bearing the signature of Mr (now Sir) Chintaman D Deshmukh would be issued shortly, and the notes actually issued during the year were of the denomination of Rs 2, Rs 5, Rs 10 and Rs 100 No alterations were made in respect of the pattern, size or

ichtureless and the sellers, dnotation for tell graphic transfers for merchant business remaine unaffected at 1sh 5 31-32d The net purchase of sterling by the Bank, during the year ende June 30, amounted to £101,193,921 4-10 a compared with £97,739,341-80 in the precedin year Repayments made by the Secretar, of State on account of recoverable war expen difure and purchases made on behalf of Hi Majesty s and Allied Governments, after deduct ing the sterling requirements of the Centra Government and the Government of Burma, lef a new credit in favour of India of £162,685,000 at the end of the year as against £235,975,000 at the end of the previous year

Exchange Control

Remittances of foreign exchange continued to be restricted. With the ensing of the U.S. dollar position, American firms were allowed to remit their profits in full and amounts blocked on account of the infringements of the import control regulations mere. Restrictions on remittances in certain other currencies were also relaxed to a limited extent To prevent unauthorised travelling, the Government of India on July 17, 1943 issued a notification prohibiting any person from proceeding outside India without a written permit issued by the Reserve Bank, but the restriction did not apply to persons proceeding to countries adjoining India or to Irag, Arabia, British East Africa and the United Kingdom

Government Loans

A number of new loans, in addition to ruper counterparts of 31 per cent undated paper and special issues of some of the existing loans, were floated during the year under review The Post Office Ten year Defence Savings Certificates were replaced from October 1 1943 by the more attractive Twelve Year National Savings Certificates, particularly to appeal to the small investor

A further issue of the three per cent Loui 3 1943 From the same date the Fourth Defence Loan, 3 per cent 1953-55, was issued This loan was eventually closed on March 31, Larly in August, Government innounced that to assist in the funding of the liabilities connected with the acquisition of the 21 per cent and 3 per cent undated sterling stocks, rupee counterparts of the 31 per cent undated paper would be created upto the aggregate value of these two loans and would be sold Bank through the Reserve In October. Government floated the 3 per cent Loan 1966-68 for Rs 25 crores and in January 1944 they created a special issue of Rs 50 crores of this loan Later in the year, the 3 per cent Victory Loan repayable at par on September 1 1957 was assued from April 1 In June year As a measure of additional protection against counterfeiting, the Central Government directed that the design of the quaternary four anna coin struck at the Mints with effect in the previous 12 months, and Rs 932 49 crores since the beginning of the war. The total holdings as on June 30, 1944 amounted to Rg 1.002 07 crores

likely to be as catestrophic as in such years as 1896 97 and 1899 1900 It is a well known fact that 6,000,000 acres of additional lands have come under irrigation in the last 20 years Twenty-five years ago in this countrythe second largest producer of raw cotton in the world—long staple varieties of cotton were ilmost unknown The position at the outbreak of the present war was that the Indian textile industry was meeting a considerable portion of its long staple requirements from indigenous production The improvement in the quality of the crop was accompanied by an increase in the average yield per acie of the order of 30 per cent during the same period The record of jute his not, however, been one of uninterrup ted progress. The steeper fall in the prices of raw jute during the world depression, accompanied by a cut in acreage, was estimated to have reduced the income of the average jute grower by about two thirds. The plight of the cultivator no doubt improved later but the difficulties of the jute manufacturing industry resulted in a fall in the consumption of raw jute and this necessitated a large measure of State control in regard to the area under this crop The progress of sugarcane cultivation was limited solely by the capacity of the internal consumption of sugar to increase The estimated production of cone in 1924-25 was less than 30 million tons, but by 1936 37 it had exceeded 67 million tons This turned out to be far in excess of the effective demand and the manu facturing industry was in a state of over-production. As a result, the production of cane came down to the low level of 36 million tons in 1938 39, but it improved to 48 million tons in the next year. A large proportion of the total area under sugarcane in India is devoted to the improved Coimbatore varieties with a yield per acre higher than that of other varieties by more than 30 per cent The one agricultural commodity fortunes were not appreciably affected by the world depression was groundnut. A quadrup ling of the area and a proportionate increase in output in the course of two decides is a record which is not shired by any other crop This phenomenal increase in acreage is explained as due to the highly remunerative nature of the The greater part of the increased production was exported, in the result groundhut had steadily displaced the other oilseeds from the export trade of India and moreover by 1939 India had become first among the groundnut exporting countries of the world

This story of continued progress has to be exporting countries of the world

This story of continued progress has to be sprung up to utilize the products of the blat varied somewhat in relation to the production furnaces and mills. The real growth of the

India is pre eminently an agricultural country

If we look back on the course of agriculture

over a long period of years, we shall note a striking development towards stability. In the

days that are past, the outturn of the soil was

subjected to periodic shocks from famines

arising from the failure of the rains, when the export trade in these staples dwindled to small

though a silent and steady progress towards industrialisation has been going on during the

last quarter of a century

proportions

as between 1920 21 and 1940 41 The tendence to substitute other crops for rice was greatly accentuated by the availability of an abund in supply of cheaper varieties of imported rice. The results of research have been applied with much greater success in the case of wheat About a third of the total area under whea has been brought under improved crop and if the course of 20 years the total output of when has increased from 6,000,000 tons in 1920 2 to 8,000,000 tons in 1940 41 The cost of production in India, however, remained very high in comparison with the other wheat producing countries of the world and the India wheat grower was hit so hard by the fill in the world prices of wheat during the depression that in his interest a protective duty had to be imposed on imports of wheat The experience of the other cereals, puti cularly millets, was more or less similar to that The millet crops are concentrated in areas of very poor rainfall and it is in such areas that any improvement in cultivation is of peculing difficulty Thus while India's economy is essentially agricultural, she ranks as one of the eight greatest industrial countries of the world pace of industrial development since the early twenties of this century has been greatly accele rated by the policy of active assistance pursued by the State both by way of granting tariff protection and of giving preference to the products of Indian industry in purchasing Government requirements. The prospect of continued Government help and the anticipation of handsome profits encouraged a rapid flow of private capital into industry New capital invest ed in joint stock enterprise alone in the inter war period was something like Rs 150 clores Among the major industries, the largest is the cotton textile industry which has its home in Bombry City, with important subsidiary centres at Ahmedabad, Sholapur and Nagpur period intervening between the two wars san such a good progress that the share of imports in the cloth requirements of the country decreased from about four-fifths to much less than a fifth In the same period, the number of mills increased from 227 to 355, the number of spindles from 6 2 millions to 8 4 millions and the number of looms from 109,000 to 168,000 The output of varn more than doubled in weight and the output of piecegoods nearly trebled in length Raw jute is a virtual monopoly of Bengal and the jute mills are concentrated in and near Calcutta The industry had to face numerous

operations of the Allied forces against Japan, particularly following the establishment of the South East Asia Command in 1943, has led to this country being called upon increasingly to draw on her resources of manpower and materials for war purposes. The progressively mounting defence expenditure and the steady increase in disbursements on behalf of the Allied countries on account of supplies and services are indications of the magnitude of India's war effort and the stiam on her financial and physical resources. These disbursements include both

on account of supplies and services are indications of the magnitude of India's war effort and the stiam on her financial and physical resources. These disbursements include both the war expenditure recoverable from His Majesty's Government and the cost of supplies to the forces of the United States under reverse lease lend. Government outlay both on revenue and capital accounts in the four years 1940-41 to 1913-44 amounted to Rs. 1,712 crores of which the amount recoverable from His Majesty's Government totalled Rs. 966 crores. Under the stimulus of the war, employment and wages, both industrial and agricultural, continued to increase. The year under review witnessed a further large expansion in note circulation, although at a

The annual

moderate rate than in 1942 43

rate of increase during the 1943 44 declined to 37 per cent as compared with 69 per cent in 1942 43, which was the highest recorded figure either in this war or the last. The total amount of notes legal tender in India stood at 894 84 crores at the end of 1943 44 ns compared with Rs 655 11 crores at the end of the previous year, and the average circulation for the year was Rs 777 17 crores as against 513 44 crores in 1942 43 The active circulation increased from Rs 643 58 crores it the end of 1942 43 to Rs 882 49 crores at Of the total absorption the close of 1943-44 of Rs 710 13 crores of notes since September 1, 1939, when the active circulation of notes in India stood at Rs 172 36 croies, the year under review accounted for Rs 238 91 crores or 34 per cent Cheque clearings recorded in unprecedented increase of 56 8 per cent compared with a lise of 49 1 per cent in demand deposits and as a result the ratio of cheque cleuings to demand deposits, which had been progressively declin ing from 16 7 in 1939 40 to 9 1 in 1942 43, showed a slight rise to 9 5 in 1943 44

was threatened by runaway prices was countered by resolute measures of physical and financial controls with the object of restoring the price level to a wartime norm. The Leonomic Adviser's index number of wholesale prices rose to the record level of 241.7 in June 1943 and tended to move downward and fluctuated narrowly between 240.8 and 235.7 during the rest of this year. Bombay's working class cost of laying index number advanced from 208 to 247, it the end of December 1943 and stood it 226 in March 1944. The price of gold touched

and reached Rs 141 8 on March 29, 1944 following the news of the Japanese movements on the borders of Assam

The most serious problem affecting the

country during the year was that of food Series of measures including the institution of statutory price control over the major food grains and the introduction of lationing in all towns with a population of over 75,000 were taken to counteract the food situation which was particularly acute in Bengal, Bihar, Travan core, Cochin and Malabar In Bengal famine core, Cochin and Malabar conditions prevailed for some Simulteneously, measures were taken to regulate the distribution and prices of essential goods, to increase production and check speculation. The two notable measures taken in this connec tion were the Cotton Cloth and Yarn (Control) and the Hoarding and Profiteering Prevention Ordinance It is claimed that the former order has been successful in reducing

cloth prices by 30 to 40 per cent and in increasing supplies to consumers, while the latter has helped to check the rise in the general price level which has remained stabilised since June 1943.

With a view to reducing the purchasing power of the masses, sustained efforts were made during the year to attract idle money into Government loans. Further measures were taken to speed up the assessment and collection of taxes, and in 1944 45 budget, measures were introduced for the payment of income and excess profits tax at quarterly, instead of yearly, intervals In addition, from August 1943 onwards, the

Reserve Bank commenced selling gold in order

Trade —The

between India and the United States on the other hand rose by 25 per cent, the increase being entirely due to a rise in exports, the level of imports remaining approximately the same While this increase in exports without a corres ponding rise in imports must in part be accounted for by the rise in rupee prices at a time when the prices of imported goods remained compara tively stable, it is probably also due to the fact that a considerable portion of cargoes arriving in India from the United States consist of war materials and goods supplied on lend-lease terms for which no payment is made and which are, therefore, excluded from the balance of There is thus more freight space available for commercial exports than for commercial, constituent categories -

and adore auriou aim? Rives one terms or umbo on private account for which payment is actual made by India The noticeable increase India's imports from Iran and Egypt is due larger purchases of petroleum products a raw cotton respectively

Composition of Trade—The following ta shows the changes in the composition of Indi imports and exports according to the me commodity groups during the last three ye and compares them with the pre-war ye 1938 39 Although the exclusion of tra on Government account detracts from t value of these figures, they serve as a compative guide to the distribution of trade of

In the year under review, the value of imports of raw materials continued to increase while manufactured articles decreased Exports of both raw materials and manufactured articles registered increases The category 'Food registered increases The category 'Food includes 'drink and tobacco', and both imports and exports under this head remained at I

practically the same level as in the previous The large imports of wheat made to meet the food shortage in the country were on Government account and are not shown regard to exports under 'Food' the increase in the value of tea shipments more than compen sated for the reduction in grains and pulses

II—IMPORTS OF MERCHANDISE

A further cut in quantity, but a slight improve ment in value was the feature of the import trade of British India in 1943-44 The course of trade was influenced by the need for conserving the shipping space and using the dollar balances for buying the absolutely necessary goods and by the ability of the overseas suppliers to meet the demands The import trade control was consequently tightened further in the year | cent of the value of total imports

Out of Rs 119 crores of imported under review material in 1943 44, imports of oils amounted to Rs 36 crores, cotton and cotton goods Rs 19 crores, machinery Rs 11 crores, dyes Rs 8 crores, chemicals Rs 5 crores, wool, raw and manufactured, Rs 4 crores and metals and ores Rs 4 crores These seven items accounted for importance Rs 20 crores. for imports of Rs 87 crores representing 73 per

of p tection to the Ind n tertile! dustry and
hast n d du m the war period was reflected
in the trade returns for 1913 44 duri g which

vards valued at R9 9 lakhs The decline in imports of cotton piecegoods; was share I by all the three principal entegories of pices, only Imports of preventth vert reduced to a nominal figure of Rs 4,674 in 1913 14 as against Rs 1,27,014 in 1912 13 and R9 1,05 lokhs in 1941 42 Arrivals of white goods amounted to a little over Rs 7 lallis as compared with Rs 2 laths in 1912 13 and Re 1,12 lakhe in 1941 42 Coloured, printed or dyed goods declined from Re 16 laths in 1912 13 to Re 17 lally in the following year. while their value for 1011-12 amounted to Rs 2 28 Dkh3 Among greys, dhoties, saries, and scarves, jaconets and mulls, and long cloth shirting and sheetings practically ceased to come from abroad following the stoppings of trade with Japan . In the case of white goods dhoties, saries, nainsooks and checks could not be had from abroad. The declines were wide sprend, but there was neutescarcity of dhoties The willable supply of cloth for and saries home consumption declined substantially during the year and had its adverse effect on the per

at 13 75 yards for 1042 43 as compared with 17 47 yards in 1038 39

Imports of hosters, including knitted fabrics were reduced to Rs 19,253 as against Rs 84 596 in 1942 43 and Rs 10 lakhs in 1941 42. The United Kingdom was the main supplier

capita consumption of cloth which was estimated

Raw Cotton (Rs 17,53 lakhs)—Imports of foreign cotton in 1943 41 totalled 420,100 bales valued at Rs 17,53 lakhs as compared with 490,600 bales valued at Rs 15,42 lakhs in 1942 43 and 770,100 bales valued at Rs 15,34 lakhs in 1941-42 The decline in quantity was more than counterbalanced by the rise in the prices

With a view to avoiding scramble between buyers for foreign cotton and to ensure a steady flow of supply, the Government of India introduced, in consultation with the Egyptian Government, a system of controlled buying The scheme regulated not only the purchases, but also provided for illocations to the various mills on the basis of their actual requirements and quantities available in Egypt Purchases of high quality types were made by the Co ordinating Committee in a pool from which allocations were made to India from time to Though no quantitative figures were available about imports owing to black out for security reasons, the trade estimates for the cotton year ended August 31, 1944 placed imports of Egyptian cotton at 235,000 bales representing a cut of 27 per cent over the preceding year, while those of Soudanese and East African varieties were estimated at 80,000 bales and 120,000 bales being 120 per cent and 40 per cent higher than the previous season

Wool, Raw and Manufactured (Rs 4,47 Lakhs)—The combined imports of raw and manufactured wool were vilued at Rs 4,47 lakhs in 1943 44 is compared with Rs 3,78 lakhs in the preceding year and Rs 4,70 lakhs in 1941-42. The recovery was entirely attributible to the sharp increase in imports of raw wool which were valued at Rs 4,02 lakhs as against Rs 2,96 lakhs in the previous year and Rs 2,77 lakhs in 1941 42. On the other hand,

laths in 1911 it. The ewere valued at Pa 62 laths in 1911 it. Woollen shaws and Johls which used to occupy an important place in the trade disappeared from the list with the exit of Japan from the field. As usual, Australia was the main supplier of ray wool and was able to maintain the quantity almost at the previous cuts level of 194 million 1b, while the import trade in Goollen precessed was shared between New Yealand and the United

Silk, Raw and Manufactured (Rs 62,041)—The trade in this line, like the artificial silk, was virtually paralysed by the extension of the war to the far fast, the main source of supply of these goods. The total value of silk, raw and manufactured, amounted to Rs 62,041 as compared with Rs 3 lakhs in 1942 43 and Rs 149 lakhs in 1941 42 Imports of raw sill which had declined sharply from 16 million lbs to 20,000 lb in quantity and from Rs 81 lakhs to Rs 2 takhs in value in 1942 43, were reduced further to Rs 25 427 in the year under review. The whole supply was received from China Import of sill various repretedly nil as compared with Ps 59,000 in 1942-43 and Rs 17 lakhs in 1941-12. On the other hand, imports of sill piecegoods were able to register a small recovery in value from Rs 13,540 in 1942 43 to Rs 29,420 in 1943 44 after the last year s fall from Rs 33,34,430 in 1941-42.

The outbreak of the wir ignist Japan brought to the forefront the importance of the Indigenous silk industry for the Allied war effort with the result that the output of India silk 10se from 15 lakhs lbs to 25 lakhs lbs

Iron and Steel (Rs 2,03 lakks)—Imports of iron and steel dropped further during the veri under review. Their value in 1941 was Rs 6,30 lakks. Imports shrank to Rs 2,81 lakks in the following veri and were reduced still further to Rs 2,03 lakks in 1943 44. In terms of quantity, the imports were 128,600 tons in 1941 42, 48 600 tons in 1942 43 and 46,800 tons in 1943 44. Of these, protected iron and steel accounted for 58,100 tons, 22,900 tons and 8,600 tons respectively. The highest imports for the past 25 years were recorded in 1928 29 when they amounted to 1,170 000 tons valued at Rs 20,24 lakks.

Imports of bars and beams, channels, pillars, girders and bridgework steel were the worst to be affected Steel bars were valued at Rs 3,13,211 in 1943 44 as against Rs 7,85,555 in 1942 43 and Rs 22,88,594 in 1941 42 Beams and allied steel imported in the year under review were valued at only Rs 3,259 as compared with Rs 1,33,118 in the preceding year and Rs 2,21,526 in 1941 42 Pipes and fittings, however, behaved better Their imports were valued at Rs 5,75,044 as against Rs 5,75,613 in 1942 43 and Rs 7,31,081 in 1941-42 The value of imported sheets and plates was sharply reduced by 94 per cent from Rs 64 lakhs in 1942-43 to Rs 4 lakhs in 1943 44 compared with as much as Rs 1,04 lakhs in 1941-42

The continuous decline could be traced to the stricter control over imports instituted towards the end of December 1940 in order to ensure that unreasonable demand for steel on states continued during the version of the output was ab orb d one ain 1; lefence req irement. The prices of pig from oundry to 1 and to 4 were raised i November 1943 from Ps. 94 and Ps. 88 to 1t. 194 and R. 08 per ton r spe tively Tie di trib iti n of iron a date I was completely nd the of Go ernment during the Je r und r re lew

vards welching 918 000 tons representing an approximate cut of 31 per cent. In the previous season's production level. The decline was mainly in respect of hissians and the manufacturing activity was hit all round by coal shortage which forced the Indian Jute Mills', association to enforce measures for reducing the output.

Exports of jute manufactures were smaller than last year but considering the output, the clearances were satisfactory. Sulpments of lussians declined from 1528 million yards to 1,095 million yards while those of sackings shrank from 68 million yards to 102 million yards. India's big overseas customers during the year were the USA. Argentine and the

United Kingdom

The output of raw jute during the year was 69 5 lakhs bales being about 20 5 lakhs bales less than the preceding season. The decline was attributable to the better return from food A notable feather of the serson was that the flow of raw jute from the mofussil centres to Calcutta did not show the bulge that normally appears in the last quarter of the calender year owing to transport difficulties The total supply available for the season was 114.8 laklis bales including the above figures for the current output and 44 3 lally bules being the carry over from the preceding season Out of this, inte mills consumed 51 I likhs bales though their purchases totalled 58 likhs biles or 83 per of the new crop. Exports totalled 9.7 Likhs bales, while the miscellaneous consumption was placed at 10 lakhs bules so as to bring the total absorption for the season to 71 1 lakhs Thus the serson came to an end with an estimated carryover of 42 7 laklis bales

Prices of both raw jute and jute manufactures were influenced by the fixation of collings first by the Indian Jute Mills Association and later on by Government On the whole, they were higher than in the previous year Manufactured jute prices had small variations than the raw jute prices with the result that the average ratio between the two was higher in the season The average index number for under review raw jute prices rose from 122 in March 1943 to 129 in July and then declined to 108 by October, and closed at 129, the highest level for the year, in March 1944 The index number for jute manufactures moved within a narrow range re gistering an advance of 10 points during the vear

which was wound up at 200

Cotton, Raw, (Rs 6,36 lakhs)—A further decline in the export trade in raw cotton was registered during the veir 1943 44 for which the shipments totalled only 281,500 biles as compared with 301,000 bales in the preceding veri and as much as 1,437,500 biles in 1941-42. The value, however, showed substantial improvement, for it amounted to Rs.636 lakhs in the year under review compared with Rs 3,64 lakhs in 1942-43 and Rs 15,94 lakhs in 1941-42 62 per cent of the output was of staple length of 7/8 inch and above as against 60 per cent in 1942 43 and only 36 per cent in 1940 41

The net under cotton crop in 1943 44 season was officially estimated at 20,398,000 acres compared with 19,203,000 acres in the preceding

Hydraibad State brought substantially area under cotton cultivation but the was partially nullified by the heary corta of area under cotton in the rest of the growing areas owing to the grow more campaign

The genson's supply of Indian cotton ing the carry over from the preceding sea 3 709,000 bales, amounted to 8,802,000. Out of this, the Indian cotton textile in consumed 4 125 000 bales, exports to frountries totalled 300,000 bales, and the collineous consumption in the country placed at the now proverbial figure of 3 bales, leaving an estimated carry of 4,027,000 bales at the end of the season cording to the Indian Central Cotton Complowed at 1,711,000 bales.

Lorward trading in Indian cotton came standstill on May 17, 1943. On that day July contract touched Rs 673 per cane brisk speculative buying and as inflation with the result that the decision of the La Member to give a few days for squarm the transactions brought down the contra Rs 568 Triding wis resumed on Octob with several safeguards including the rig Government to buy it the floor prices in t of Rs 400 for the Indian cotton contract to regulation cotton at the ceiling prices Rs 550 as the ceiling for the same con-The January contract opened at Rs 471, aded to Rs 480, sigged to Rs 436 in the week of November and then made a succe bid for Rs 485 in January The March and contract started downward journey there and the end of the serson saw the market s gling around the floor prices following the int crop movement

Cotton Manufactures (Rs 42,48 lakh Exports of cotton varn and manufactures which had improved from Rs 35,96 lakh 1941-42 to Rs 46,19 lakhs in the follower, shrank in 1943 44 to Rs 42,48 lakhs terms of quantity, exports in the year in review totalled 461 9 million vards as 3819 1 million yards in 1942 43 and 772 5 mill vards in 1941-42 Shipments of cotton, twife yarn, were valued at Rs 3,15, lakhs in the under review compared with Rs 3,82 lakh the preceding year and Rs 7,30 lakhs in 1941 Shipments of cotton piecegoods, which advanced from Rs 26,48 lakhs to Rs 38 lakhs, settled down to Rs 36,49 lakhs in very under review

The Indian cotton textile industry wor during the year under Government cont. The year was one of the downward trend prices and was notable for record produce in spite of the occasional interruption of activation of the control on June 17, 1943, the control prices were reduced by nearly 40 per country but the consumer did not get much benefit of reduction and the good portion of the industrial output was passed on to the black market

Towa ds the end of the y ar the Covernment of India were engaged in working out a detailed s heme for regulating e port trade in cotton p ecegoods Th propo d ch m aim d at limiting the shipments to 00 mill on ya d to be e rmarked to the var o s overs as mark t on the basis f their re pective offt ke in the p ceding two y rs

Motor Vehicles in British India and The Indian States.

The number of motor vehicles on Indian; roads, which had increased steadily until on January 1 1939, there were 177,188 vehicles in British India and the Indian States, has since The actual figure of motor vehicles in operation throughout the country on March 31, 29,760 1940, was 174,077

This decline is undoubtedly the result of wir time conditions Since the outbreak of war the motor import trade has been seriously affected shipments from the United Kingdom being held up, while deliveries of vehicles from the United States of America are affected by dollar exchange difficulties Furthermore, the price of petrol has risen appreciably since the outbreak of war and this has doubtless driven a number of older vehicles off the roads

The total number of vehicles in British India on March 31, 1940 was 141,577 out of which 89,253 were private curs, 5535 taxis, 23,851 buses 14,336 lorries and 8,602 motor cycles

The general decline in the number of me vehicles in operation was not, however, dis buted evenly throughout the provinces while in Bomb ty the number declined from 31,736 to 27,880, in Bengal it rose from 28,375 This province had the largest num! Madris, which had of vehicles in operation third largest number, remained practical stationary with a total of 21,585. The Unit Provinces fell sharply from 17,110 to 14,6 while the Punjab rose from 12,950 to 13,372

Motor Vehicles in Indian States

Complete figures showing the number of m vehicles in Indian States are not available States vary in size from 19 sq miles, to Sta like Hyderabad with an area of 82,698 sq m (as large as Italy) Hyderabad State still her the list of motor vehicles but its total dropp sharply from 8,232 to 5,739 Travancore, the other hand rose from 3,000 to 5,307 must be emphasised that these figures are official and not necessarily complete

The following tables show the number of motor vehicles of all classes in operation in the different norices of British India and in the Indian States as on March 31 1940—

at the end of the same despaper was started in Callishman in January 1780, and a third has elapsed ng period certainly, a period y the life of a single newspremacy is not much longer, i at Plassey, only twenty r Bombay followed Cal-Madras did not lag much he first Bombay newspaper nbay Herald, followed next bay Courier, a paper now he Times of India with imated in 1861 In Bombay press may be said to have sh occupation of the Island as the case in Calcutta In sh were on sufferance before combay they were absolute, and it is somewhat strange an should have thought of er during all those hundred ars before the actual advent

aper was called The Bengal etter known from the name Hicky's Gazette or Journal ioneers had to suffer for his though the fault was entirely ade his paper a medium of andal, and he and his journal public view in 1782 Several public view in 1782 Several llowed Hicky's, though they copy its bad example id a career of over half a 1833 it was merged into the which came into existence and both are now represented ally News with which they i in 1866 No fewer than ed in as many years, the 1780, and one of these, The arted in February 1784, under age of Government, flourishes al gazette of the Bengal

cate of European merchants menced the publication of last, a dally paper which was Tory opinion in India and the Press generally in the ration and restraint The

Press in India is an essentitution and was introduced sh of organising the adminusly taken in hand by the In 1773 was passed the ating the Governor-General-reme Court in Bengal and at the end of the same decimal the control of the same decimal that the end of the out trial and on short notice, whilst several more were censured and had to apologise At the commencement of the rule of Wellesley Government promulgated stringent rules for the public press and instituted an official censor to whom everything was to be submitted before publication, the penalty for offending against which came into existence these rules to be immediate deportation ter in 1785, but then the regulations continued in force till the regulations continued in force till the time of the Marquis of Hastings who in 1818 abolished the censorship and substituted mi'der rules.

> This change proved beneficial to the status of the press, for henceforward self-respecting and able men began slowly but steadily to join the ranks of journalism, which had till then been considered a low profession Buckingham, one of the ablest and best known of Anglo-Indian journalists of those days availed himself of this comparative freedom to criticise the authorities, and under the short administration of Adam, a civilian who tem-porarily occupied Hastings' place, he was deported ' ported under rules specially passed But Lord Amherst and still more Lord William Bentinck were persons of broad and liberal views, and under them the press was left prac tically free, though there existed certain regulations which were not enforced, though Lord lations which were not enforced, though Lord Clare, who was Governor of Bombay from 1831 to 1835, once strongly but in vain urged the latter to enforce them Metcalfe, who succeeded for a brief period Bentinck, removed even these regulations, and brought about what is called the emancipation of the press in India in 1835, which was the beginning of a new era in the history of the Indian press Among papers that came into being, was the Bombay Times which was started towards the close of 1838 by the leading merchants of Bombay, and which in 1861 changed its name to the Times of India The Bombay Gazette founded in 1791, ceased publication in 1914 founded in 1791, ceased publication in 1914

The liberal spirit in which Lord Hastings the interact spirit in which Lord Hastings had begun to deal with the press led not only to the improvement in the tone and status of the Anglo Indian press, but also to the rise of the Native or Indian Press The first newspaper in any Indian language was the Samachar Durban started by the famous Serampore Missionaries Ward, Carey and Marshman in 1818 in Bengali, and it received encourage ment from Hastings who allowed it to circulate through the post office at one-fourth the usual rates. This was followed in 1822 by a narrow parties properly nature paper. o the Press generally in the ration and restraint. The al was altered to The Englishs Stocqueler in 1836.

mencement the press was by the authorities who was laid the foundation of the Native Indian Press which at the present day is by far the largest part of the press in India, numbering over 650 papers

rated in June 1857 on account of the licen e of a very f w papers and owing still m re to paper the first issue b ing lated June and the fears of its circulating int illgence with h 18 Prior to and in the lays of the Mutiny might be regionaled to oublic interests. The the most famous paper in a ortical region in the lays of the Mutiny of the most famous paper in a ortical region. might be prejudicial to public interests. The the most famous paper in Act was p seed only for a year at the end of which the press was once more free
On Indi passing to the Crown in 1858 an

From 1835 to the Muliny the press spread The number of the form r did not show a great to other cities like Delth Agra Gwallor and ri o in the nat generation but the tise in confined to the Presidency towns During Fanous journalite like Robert kall ht J m r the Muliny list freedom had to be temporarily Maclean and Hurris Mook ril d uri had in controlled by the G gring Act which Canoling this generation. The Cit Hand Muliny lowers w s originally publi hed in Fimi as a weekly was the Mofuseride originally published at Secret but afterwards at Agra and then at On Indi passing to the Crown in 1855 and Ambals after a lively exit one to a few ra of prosperity and pr gre opened for the years in Simi the Civil at Milliary Gart is wise country in which the press participated control and incorporated the Milliary Gart is beginning of the processing papers at the and in 18 other control and incorporated the Milliary Gart is beginning of this product in 18 and 5 half efrom Simila to Labor and the Carte began papers and the circulation of all was very small to be published daily

INDIAN PRESS LAW

in Conneil and the licences were issued or other specified classes of published matter refuled at the discretion of Government. Act including any words or signs tending to seduce XI of 1835 repealed the old Regulations and soldiers or sailors from their all giance or duty merely required registration of the printer and to bring into latred or contempt the British made a f w minor requirements Registration of Books Act and except for an intimidate publicaer ants or private individual Act which was in force for one year during the Mutiny there was no further legislation directly flecting the Press until 18 8 when the Verna cular Press Act was passed That Act was repealed during the Vicerovalty of Lord Ripon From th t date until 1907 Government made no attempt to lat riere lirectly with the liberty of the Press the growth of sedition being dealt with in other ways by the passing in 1898 of section 1 4A of the Penal Code in its present form which had been origi ally enacted in 18 0 and by the introduction into the Penal Code of section 153A and into the Criminal Procedure Code of section 108 There were a certain number of prosecutions under those sections up to 1907 but the dissemin tion of sedition through the Pre s conti ued In 1908 th hewspaper (Incitement to Offences) Act w s passed which dealt with papers inciting to murder or to acts of viole ce This A t falled to have the desir d effect

be kept within the limits of legitimate discus ion likabilities as the printer and publisher

Refore 1835 all printing of books and p peri. The Act deals not only with incitements was sut ject to licence by the Governor General to murder and acts of violence but also with That Act Governm nt any Native Prince or any sec was replaced in 1807 by the present Press and tion of His M jesty a subjects in Indi or to

> Repeal of Press Legislation -By th autumn of 1917 the Government of India had begun to consider the desirability of modifying at least one section of the Press Act to which great exception had been taken on account of the wide powers that it gave Finally after more than once consulting Local Governments a Committee was appointed in February 19 1 after a debate in the Legi lative issembly to e amine the Press and Registration f Books Act 1867 and the Indian Press Act 1910 and r port wh t modifications were required in the existing law That Committee made an un animous report in July 19 1 recommending -

- (1) The Press Act should be repeal d
- (2) The Newspapers Incitements to Offences Act should be repealed
- (3) The Press and Registrati n of Books Act nd the Post Office Act should be amended where necessary to meet the conclusion noted The indian Press Act 1910 was measure below () The none of the editor should of wider scope the main object of which was be inscribed on every issue of a newspaper and to ens r th t the Indian pres generally sh uld the editor sh uld be subject to the a me

responsibilities, and views. (h) To do all such other things as d civil ring under the Press and may be conducive or incidental to the attain-Act should be a major! i Majority Act, (c) local retain the power of conious leasiets, subject to ess or any other person to protest before a con t ure of such document, in Government ordering the called upon to prove the the documents Sections 13 to 15 of the retained Customs be eing empowered to seize within the meaning of P C subject to review on Jovernment and challenge sted in the courts, (r) any ie orders of Government local High Court, (f) the prescribed in Sections 12, tion of both Government and the President of Press and Registration of reduced to six months, (g) the Editors' Conference

ment of the aforesaid objects Editors' Conference - During 1940 a Con ference of Lilitors was called by Mr K Srink vasan of The Hindu to consider the Government of India's restrictions on the Press under the Defence of India Act in connection with the Con', gress satyagraha movement The Conference was held at Delhi and formed itself into a body representing the I ditors of Indian newspapers is a result of its representations the Government of India decided to withdraw the restrictions on the Press under the Defence of India Act and to set up in each province a Press Advisory Com mittee which Provincial Press Advisers should consult in connection with articles about which there was doubt A Committee was also set up at Delhi to act in conjunction with the Chief Press Adviser These Committees are intended to act as a sort of liaison between the Press and Government and are appointed with the sanc-

subsequently adopted a constitution with the following aims and objects —(a) To preserve the high traditions and standards of journalism (b) To serve and safeguard the interests of the press in regard to the publication of news and fair comment (c) To secure all facilities and privileges to the press for the due discharge of its res ponsibilities (d) To represent the press in India in its relations with the public and public institutions and particularly in its relations to Government to set up Committees who would act as liaison between the Government and the (e) To establish and develop press as a whole contacts with Association with similar objects in other countries

The All India Newspaper Editors' Conference

Early in July, 1943, Sir Sultan Ahmed announced his plans for the reorganisation of the Infor mation and Broadcasting Department general idea behind the reorganisation was to make the Information Burcau, the National War Front, the Counter-Propaganda Directorate, the Broadcasting Office and the Press Advisory Branch an integral part of the Information and Broadcasting Department, instead of attached offices as they formerly were Public men and publicists were to be associated in an advisory

The Newspaper Editors' Conference had its sessions in Madras and Calcutta, rests of members and should presided over by Mr S A Brelvi, in 1944

r 1941 the satyagrahi prisoners the Congress to consider a new proposal framed. Government whereupon the by Lord Waxell, the Microx, in consultation spended. Early in the summer with His Majesty's Government.

The Wavell Plan sought to set up an interin Government at the centre composed of the people's representatives on the basis of parity between caste Hindus and Muslims but providing for representation to minorities such as the Sikhs and the scheduled castes. The projected central machinery was to function within the framework of the present constitution for the duration of the war without prejudicing the duration of the war without prejudicing the claims of any party in regard to the shape of the future Indian constitution. A conference called by the Viceroy to consider the scheme ended in failure

Meanwhile Britain went to the poles and the war time national coalition Cabinet was replaced by a full fledged labour Government with an overwhelming unjority in Parliament The new Labour Government lifted the ban on the Congress in the various Indian provinces, ordered general elections in India and sum moned I ord Wayell to I ondon for fresh consultations

CONGRESS DURING WAR

Shortly after the declaration of war Mr. Gandhi made a public statement, in his individual capacity, immediately after an interview with the Vicerov Therein he reverled that he had told Vicerov His Excellence that his sympathies were with England and brance from the purely humanita-rian standpoint and that he could not could not rian contemplate the destruction of London not just now thinking of India's deliverance," he said, "it will come, but what will it be worth if England and France fall or if they come out victorious over Germany ruined and humbled?"

This statement created quite a favourable impression in India as well as in Britain, but the Congress Working Committee which met about a week later chose to make India's support to Britain in war conditional on a declaration by Britain that the latter's policy towards this country involved the recognition of Indian independence The resolution said inter alia

"As a first step to dissociate themselves from the policy of the British Government, the Committee called upon the Congress members of the Central Legislative Assembly to refrain from attending the next session. Since then from attending the next session. Since then the British Government have declared India as a beligerent country, promulgated ordinances, passed the Government of India Act Amending Bill and taken other far reaching measures which affect the Indian people vitally and circumscribe and limit the powers and activities of the Provincial Governments

"This has been done without the consent of the Indian people, whose declared wishes in such matters have been deliberately ignored by the British Government The Working Committee must take the gravest view of these

"The Congress has repeatedly declared its entire disapproval of the ideology and practice ongressmen outside juls to of Fascism and Nazism and their glorification of constructive work in the war and violence and the suppression of the ill members of the Congress human spirit. It has condemned the aggression eet were set free to enable in which they have repeatedly indulged and their sweeping away of well established principles and recognised standards of civ lised b haviour [It has een in Fascism and Nazism th I tensification of the principle of Imperalim as a state of the principle of Imperalim as a state of the principle of the properties of the properties of the principle of the p

The Congress in 1940-41 - The with a that followed the Bamgarh session of the Congress were occupied in intensive preparation for a were occupied in intensive preparation for a direct action movement under the published of Mr. Gardill side has side with capressions of hope has Mr. Gardill and other Congress haders that such a struggle might be avoided. Mr. Gardill a notion of "preparation" was no usual on the constructive plan, that is, hand spinning removal of untouchability and promotion of Hindu-Muslim unity.

As for communal units, Mr. Gandhi stoutly resisted the Muslim League demand for Paki tan but declared that, although, as a man of non violence, he could not resist the proposed partition with force he could never be a willing party to the proposed viviscetion of the country. He wrote that whole soil rebels against the iden that Hinduism and Islam represent two iden that Hinduism and Islam represent two antagonistic cultures and doctrines. In assent to such a doctrine is for me dealed of God of the Quran is also the God of the Gita, and that we are all, no matter by what name designated children of the same God. I must rebel against the idea that millions of Indians who were Hindus the other day changed their nationality on adopting Islam as their religion."

A Big Jump - 1 few weeks later took a sudden turn for the worse. The invasion of the Low Countries, the capitulation of Belgium and the collapse of I rance produced in India a new feeling in favour of Britain There was clear evidence of a desire on the part of the collapse of the collapse of the part of the collapse of the collaps of many Congress lenders actively to help in the war in spite of Mr Gandhi's known convictions on the subject

By now the feeling had grown among Indians that the war had come closer to this country and that the danger of external aggression and internal disorder were not remote possibilities. This realisation crused a revolution in the minds of most Congressmen who had not the courage to adhere steadfastly to Mr Gandhi and his non violence in any eventuality. The Congress Working Committee virtually abandoned Mr Gandhi and offered to co operate in the war effort provided a fully representative National Government was formed at the centre Apart from the ideological separation from Mr Gandhi, this offer constituted a big jump for the Congress—from non participation in any war to active help in the prosecution of this war

Poona Offer -The resolution said, among 1 other things

The Working Committee are more than ever convinced that the acknowledgment by Gr at Dritain of U complete independence of india is the only of the problematic of the complete independence of opinion that such an unequivocal declaration should be immediately made and that as an immediate step in giving effect to it a provisi as a immediate step in giving effect to it a provisi as it is not to the control of t

Another resolution relieved Mr Gandhi of the responsibility land upon him by the AICC in September 1940, whil reiter ting that the policy of non-violence adopted under his guidance for the attainment of 'swaraj,' and which had proved so successful in leading to miss awakening and otherwise would be adhered to by the Congress, (For details see 'past issues of the Indian Year Bool)

Japan's Entry into War—If Japan's entry into the war brought the war nearer to India and engendered a more realistic approach on the part of Indian leaders to the defence of their country and to political affairs, the early gains of Japan in Malaya, the Netherlands, Last Indies and Burma impelled the British authorities to consider whether the time had not arrived for settling the political problems in India If only to promote unity of purpose and co-ordinated endeavour in this country in order effectively to meet Japanese invasion of India It is also widely believed in India that Russia, China and the United States of America brought their influence to bear upon the British authorities in this behalf

Cripps Visit—Shortly thereafter the Prime Minister made a statement in Parliament announcing that Sir Stafford Cripps, the Socialist leader who had recently returned to England from his diplomatic successes at Moscow and had been made the Lord Pirvy Scal in a reconstituted War Cabinet, would go to India immediately on a special mission Mr Churchill (see last year's issue) and

"The War Cabinet have agreed unitedly upon conclusions for the present and future action, which, if accepted by India as a whole, would avoid alternative dangers, either that the resistance of a powerful minority might impose an indefinite veto upon the wishes of the majority or that a majority decision might be taken which would be resisted to a point destructive of internal harmony and fatal to the setting up of a new constitution

War Cabinet's Offer—Sir Stafford Cripps flew to India in a few days and held consultations with representatives of the Congress, the Muslim League, the Hindu Mahasabha, the Princes' Chamber, and a number of other political and sectional organisations. Here is the text of the offer which he brought to India in the name of the British Cabinet.

"His Majesty's Government having considered the analeties expressed in this country and in India as to the fulfilment of promises made in regard to the future of India, have decided to lay down in precise and clear terms the steps which they propose shall be taken for the earliest possible realisation of self-government in India. The object is the creation of a new Indian Union which shall constitute a Dominion associated with the United Kingdom and other Dominions by a common allegiance to the Crown but equal to them in every respect, in no way subordinate in any aspect of its domestic or external affairs

"His Majestv's Government, therefore, make the following Declaration —

"(a) Immediately upon cessation of hostilities steps shall be taken to set up in India in manner described hereafter an elected body charged with the task of framing a new Constitution for India

- Constitution making body
- (c) His Majesty s Government undertake to acc pt and implem nt forthwith the C nstitution so fr med subject only to -

ever larger federations, would be injurious to all concerned and exceedingly painful to contemplate

"Nevertheless the Committee cannot think in terms of compelling the people in any territo rial unit to remain in an Indian Union against their declared and established will recognising this principle, the Committee feel that every effort should be made to create conditions which would help the different units in developing a common and co operative national life

"The acceptance of the principle inevitably involves that no changes should be made which result in fresh problems being created and compulsion being exercised on other substantial groups within that area Each territorial unit groups within that area Each territorial unit should have the fullest possible autonomy within the Umon, consistently with a strong national state. The proposal now made on the part of the British War Cabinet encourages and will lead to attempts at separation at the very inception of a union and thus create triction just when the utmost co operation and goodwill are most needed. This proposal has been presumably made to meet a communal demand, but it will have other consequences also and lead politically reactionary and obs curantist groups among different communities to create trouble and divert public attention from the vital issues before the country

"Any proposal concerning the future of India must demand attention and scrutiny, but in to day's grave crisis, it is the present that counts, and even proposals for the future are important in so far as they affect the present Committee have necessarily ittached ittached greatest importance to this aspect of the question, and on this ultimately depends what advice they should give to those who look to them for guidance For this present the British War Cabinet's proposals are vague and altogether incomplete, and it would appear that no vital changes in the present structure are contemplated

"It has been made clear that the defence of India will in any event remain under British control At any time defence is a vital subject during war time it is all important and covers almost every sphere of life and administration To take away defence from the sphere of responsibility at this stage is to reduce that responsibility to a farce and a nullity and to make it perfectly clear that India is not going to be free in any way and her Government is not going to function as a free and independent Government during the pendency of the war

"The Committee would repeat that an essen tial and fundamental prerequisite for the issumption of responsibility by the Indian people in the present is their realisation as a fac that they are free and are in charge of maintaining and defending their freedom. What is most wanted is the enthusiastic response of the people which cannot be evoked without the fullest trust in them and the devolution of responsibility on by 92 votes to 17 The latter resolution ran

that unity, especially in the modern world when them in the matter of defence. It is only people's minds inevitably think in terms of thus that even at this grave eleventh hour it may be possible to galvanise the people of India to rise to the height of the occasion

> "It is manifest that the present Government of India, as well as its provincial agencies are lacking in competence, and are incapable of shouldering the burden of India's defence. It is only the people of India through their popular representatives who may shoulder this burden worthily But that can only be done by present freedom, and full responsibility being cast upon

> "The Committee, therefore, is unable to ac cept the proposals put forward on behalf of the British War Cabinet"

> Sir Stafford Cripps then announced that the draft declaration of the British Government had been withdrawn and that the position reverted to what it was before he came out to India, "though not quite perhaps to that position"

> In spite of the failure of the effort of Sir Staf ford Cripps and the bitter tone of the final remarks in the controversy, responsible Indian leaders resterated their determination to defend the country against aggression

> Madras Surprise — Just at this time, on the eve of the meeting of the All-India Congress Committee, called at Allahabad at the end of April 1942, the Madras Congress Legislature Party, under the guidance of Mr Rajagopalachari presed a resolution recommending to the A I C C to "acknowledge the Muslim League's claim for separation should the same be persisted in when the time comes for framing the future constitution of India "and to " invite the Muslim League for consultation for the purpose of arriving at an agreement and securing the installation of a National Government to meet the present emergency "

> The meeting also passed a resolution voicing "the general feeling in this part of the country that there should be at this critical juncture a popular Government in this province doing its utmost to secure the requisite conditions for the people to play their part. The party is of the people to play their part. The party is of the opinion further that to facilitate united and ef fective action in this regard by such a popular Government, the Muslim League should be invited to participate in it."

> The party requested the A I C C to permit the party to take steps to this end, notwithstanding the general all India policy followed by the Congress

> These resolutions met with a storm of protest from Congress leaders outside Madras, but were welcomed by some moderate leaders and by Muslim League circles

> The Madras resolution acknowledging the Muslim League's claim to separation came up for consideration before a meeting of the A I C C at Allahabad in April 1942, but was defeated by 120 votes against 15, while a counter resolution, moved by Pandit Jagat Narain, opposing

1 nm convinced th t we are living today in a state convinced th it we are living today in a state of ordered a archy 1k i a missome to call such r le as is established in India a rule in h promotes the elfare of In lia Therefore this ordered disciplined anarchy should go and if there is completel wise sea in India a a re ult I vo ld risk it for I believe th t 2 years of continuous effort at edu atinc India alon the lines of non violence will not have go e in rada and people vill e olve real popul r order out of chaos

Mr Gandhi took care to avoid givin the of Britain was the out ome of pro Japanese entiment He we to Of our th peopl mu that on any account a onth Jap nese to get rid of the B lit h power That were a remedy worse than the di ease But in this strug le wome than the diesse But in this strig le e ery risk has to be rin in order to cure our selves of the biggest die e a die e tich a sapped our minhood and almost made us feel as if we mu t for ever be sta es. It is an fferable thing The cost of the cure in flerable thing. The cost of the cure I know will be heavy. No price i too heavy to pay f r the dell rane. It is true it it the olt in I I ave p escuted is a heroic solution beyo d the ken of E glishmen. But being a true fri nd of Brit in and China and Ru is a true fri nd of Brit in and China and Ru is a limit not suppres the solution which I believe to be eminently pa til al nd probably the only one in order to save the itu tion and in der to convert the war into a power for good in te d of be g what it is a pe I to hum nit;

I am more interested than the B it i h in keepi g the Jap nese out For Britain d feat in I dian wate s m y mean only the los of Indi but if Japan wins India lose

eve ything It is an unwarranted claim Britain and Am rica are making the

with the Unit a Nations 1 of ferrity opera ti ns ag inst a gress! powers it being common cause that India will hav n thing to do with y of the Fascist powers and India would b morally bound to help the U ited Nations.

If I h v a y hand in gu ding the imagined nation i Governm at ther ould be no furth assi ta ce s the toleration of th Unit d A tions on the Indian soil und well-define i dill ns Asturally th will be no prohibi will be no prohibi an tiere be a yr al unity becaus all parties it a against any Indian givi g hi own personal help by way of being a recruit or/and of giving "All this may not come to pass" he confinancial at It should be understood that tinued "I do not mind It is worth fighting the Indian army has been disbanded with the for, it is worth staking all that the nation has withdrawal of British power Again if I have any say in the councils of the national Govern ment, all its power, prestige and resources would be used towards bringing about world peace But of course after the formation of the national and passed a lengthy resolution embodying Government my voice may be a voice in the Mr Gandhi's ideas. The resolution ran wilderness and nationalist India may go war-

Answering the criticism that the withdrawal of Britain might lead to Japanese occupation of India Mr Gandhi wrote "Abrupt with drawal of the Allied troops might result in Japan's occupation of India and China's sure fall I had not the remotest idea of any such catastrophe resulting from my action fore I feel that if in spite of the acceptance of my proposal, it is deemed necessary by the India is thus necessary not only in the interest Allies to remain in India to prevent Japanese of India but also for the safety of the world and occupation, they should do so subject to such for the ending of Nazism, Fascism, militarism conditions as may be prescribed by the national and other forms of Imperialism, and the aggressary not only in the interest of India but also for the safety of the world and other forms of Imperialism, and the aggressary not only in the interest of the safety of the safety of the world and other forms of Imperialism. Government that may be set up after the British sion of one nation over another I am unable to state that the withdrawal non violent effort will make India proof against Japanese or any other aggression I am not able even to claim that the whole of India is non-violent in the sense required circumstances it would be hypocritical on my part to insist on the immediate withdrawal of the Allied troops as an indispensable part of my proposal. It is sufficient for me to declare that so far as India is concerned, she does not need troops to defend herself, having But India must not by no quarrel with Japan any act of hers short of national suicide let China down or put the Alhed powers in jeop irdy So long therefore as India lacks faith in the capacity of non-violence to protect her against aggression from without, the demand for the withdrawal of the Alhed troops during the pendency of the war would itself be an act of violence, if the controllers of the troops hold it to be necessary for their defence to keep them in India for that purpose and that alone

Summarising the implications of his pro posals Mr Gandhi wrote early in July -

India becomes free of all financial obliga 1 tion to Britain,

2 The annual drain to Great Britain stops automatically.

All taxation ceases except what the replacing Government imposes retains,

The deadweight of an all powerful autho rity keeping under subjection the tallest in the land is lifted at once,

In short, India begins a new chapter in her national life, as I shall hope will affect the fortunes of the war with nonviolence as her predominant sanction This non-violence will no longer take the shape of non-co-operation and the like It will express itself in her am-bassadors going to the Axis powers not to beg for peace but to show them the futility of war for achieving an honour-This can only be done if and able end when Britain sheds the gains of perhaps the most organized and successful violence the world has seen

July Resolution —With the country thus prepared, the Working Committee of the Congress met at Wardha in the middle of July

"Events happening from day to day, and the experience that the people of India are passing through, confirm the opinion of Congressmen that British rule in India must end immediately, not merely because foreign domination, even at its best, is an evil in itself and a continuing injury to the subject people, but because India in bondage can play no effective part in defending herself and in affecting the fortunes of the war that is desolating humanity The freedom of

"Ever since the outbreak of the world war, the Congress has studiously pursued a policy, of non embarrassment Even at the risk of making its satyagraha ineffective, it deliberately gave it a symbolic character, in the hope that policy of non-embarrassment, carried to its logical extreme, would be duly appreciated and that real power would be transferred to popular representatives, so as to enable the nation to make its fullest contribution towards the realisation of human freedom throughout the world, which is in danger of being crushed It had also hoped that negatively nothing would be done which was calculated to fighten Britain's strangle hold on India

"These hopes, have, however, been dashed to eces The abortive Cripps proposals showed in the clearest possible manner that there was no change in the British Government's attitude towards India and that the British hold on India was in no way to be relaxed In the negotiations with Sir Stafford Cripps, Congress representatives tried their utmost to achieve a minimum, consistent with the national demand, This frustration has resulted but to no avail in a rapid and widespread increase of ill-will against Britain and a growing satisfaction at the of Japanese arms The Working Committee view this development with grave apprehension as this, unless checked, will inevitably lead to a passive acceptance of aggres-The Committee hold that all aggression must be resisted, for any submission to it must mean the degradation of the Indian people and the continuation of their subjection The Congress is auxious to avoid the experience of Malaya, Singapore, and Burma and desires to build up resistance to any aggression on, or invasion of, India by the Japanese or any foreign power

"The Congress would change the present illwill against Britain into good-will and make India a willing partner in a joint enterprise of securing freedom for the nations and peoples of the world and in the trials and tribulations which accompany it This is only possible if India feels the glow of freedom

While the fre the Co-reses is timp tile sed e till of that great and and til nd to hil the n ti nal purpos. It wishes to W re i th uniq positi f h ving to take no i a ty tee pand would like to wo din resist an impersial mintant wo detects no less than yours and Nazism Our resistance to it does not mean harm to the British people We seek to convert them Ours is an unarmed revolt against British rule An important Our resistance to it does ! party in the country is engaged in a deadly but friendly quarrel with the foreign rulers But in this they need no aid from foreign Powers You have been gravely misinformed, as I know you are, that we have chosen this particular moment to embrass the Allies when your attack against India is imminent. If we wanted to turn Britain's difficulty into our opportunity we should have done it as soon as the War broke against India is imminent out nearly three years ago

"Our movement demanding the withdrawal of the British Power from India should in no way be misunderstood. In fact, if we are to believe your reported anxiety for the Indepen dence of India, a recognition of that Independence by Britain, should leave you no excuse for any attack on India Moreover the reported profession sorts ill with your ruthless aggression I would ask you to make no agrinst China mistake about the fact that you will be sadly disillusioned if you believe that you will receive a willing welcome from India The end and aim of the movement for British withdrawal is to prepare India, by making her free for resisting all militarist and imperialist ambition, whether or your pattern Our appeal to Britain is coupled with the offer of Free India's willingness to let the Allies retain their troops in India. The offer is made in order to prove that we do not in any way mean to harm the Allied retains the province of the Allied retains the province of t misled into feeling that you have but to step into the country that Britain has vacated Needless to repeat that if you cherish any such idea and will carry it out, we will not fail in resisting you with all the might that our country can muster

In the period between the adoption by the Working Committee of its July resolution and the meeting of the A -I C C in August Mr Gandhi indicated that he was prepared to meet the Viceroy and discuss his demand with him and that he would call off the movement if he were British Government could not declare India
British Government could not declare India
"My convinced by anyone that in the midst of war the free without jeopardising the war effort "My complaint is that critics talk at me, swear at me but never condescend to talk to me", he said He wished to guard against "a sudden outburst of anarchy or a state of things which may be calculated to invite Japanese aggression. He intended to handle the movement gently, but he would not hesitate to go to the extremist limit if he found that no impression was pro duced on the British Government or the Allied DOWERS

Hostile Foreign Comment —Publication of the Working Committee s July resolution much hostile comment abroad which in reply to Mr Gandhi Indian public men should be forgiven if they doubt the sincerity of the fleree opposition which is being organised with ominous unantmoment chosen for enforcing it is the target It is clear as crystal in the Working Committee resolution why this moment is chosen Let me paraphrase it India is not playing any effective part in the war us feel ashamed that it is so and, what is more, we feel that if we were free from the foreign yoke, we should play a worthy, nay, a decisive part in the world war which has yet to reach its chmax We know, that if India does not become free now, the hidden discontent will burst forth into a welcome to the Japanese, should they effect a landing. We feel that such an event would be a calamity of the first We can avoid it if India gains her magnitude To distrust this simple, natural and freedom honest declaration is to court disaster

"But the critics say, 'To whom are the British rulers to hand the keys on their withdrawal?' It is a good question Here is what Maulana Abul Kalam Azad, the Congress President, has said 'The Congress always stands, firstly for sympathy towards democratic countries, secondly, never desires to embarrass Britain and her war effort, and, thirdly it stands for opposition to the Japanese aggression The Congress does not desire to take power for tiself but for all If real power is handed over to the Congress, surely it will approach other parties and will persuade them to join' The Congress President added that he 'had no Congress President added that he objection to Britain handing over power to the Muslim League or any other party provided it was real independence. That party will have to approach other parties as no single party can function properly without the co operation of other parties' The only thing needful is to hand over complete control without reservation save that during the war period the Allied troops will operate to stem Japanese or Asis attack But they will have no power of interference with the affairs of India which will be as free as Great Britain herself

Indo British Apart Mr Gandhi made an important change in his policy in the summer of 1942 when he gave up his old belief that internal unity must precede political emancipation and declared instead that communal unity could only follow the removal of the third party Writing in Harijan in June, he said "Time is a merciless enemy, if it is also a merciful friend and healer I claim to be amongst the oldest lovers of Hindu-Mushm unity, and I remain one even today I have been asking myself why every whole hearted attempt, made by all including myself to reach actumpts has fulled and failed so completely that unity has failed, and failed so completely that I have entirely fallen from grace and am described by some Muslim papers as the greatest enemy of Islam in India. It is a phenomenon I can only account for by the fact that the third power, even without deliberately wishing it, will not allow real unity to take place. There fore, I have come to the reluctant conclusion that the two communities will come together almost immediately after the British Power comes to a final end in India. If independence is the immediate goal of the Congress and the Iergue, then, without needing to come to any terms, all will fight together to be free from hondage. When the hondage is the landage of the landage is the landage of the mity The latter can only stiffen India's terms, all will fight together to be free from suspicion and resistance. He continued bondage When the bondage is done with, not the Justice of the demand for the ending of British Power has never been questioned, the will find it to their interest to come together

Throughout this ontroversy over the propo I of Mr G ndhi P ndit Jawaharl I Neh u ate dia tly ad ocated that nothing should be said or done which would rende India vuln rabl to Japane e attack During the July m ting of the Congress Working Committee the question was put to him whether any politi al movement in India would n t in the ultimate an lysis amount to an invitation to J pan to in ade nswered that whe eas India had H no wish to injur the cause of China or the defence of Ind it has become highly impor tant to r ise the spirit of resi tance in de ultimately to be able to resi t the Japanese by passively submitting to thine's in I dia today that spirit of resi tance will be shed He recognised that any st p that the Con ress might take gainst the British Government might take gainst the British Government might be full of perils but on the other hand not taking any step i till m e pe ilous—we

adjusted by representatives of all these free coun- 1 to Great Britain and the United Nations are so tries conferring together for their mutual advantage and for their co operation in the common task of resisting aggression Freedom will enable India to resist aggression effectively with the people's united will and strength behind it

"The freedom of India must be the symbol of and prelude to this freedom of all other Asiatic nations under foreign domination Burm v. Malaya, Indo China, the Dutch Indies, Iran and Iraq must also attain their complete freedom It must be clearly understood that such of these countries as are under Japanese control now must not subsequently be placed under the rule or control of any other colonial Power

While the A-ICC must primarily be con cerned with the independence and defence of India in this hour of danger, the Committee is of opinion that the future peace, security and ordered progress of the world demand a World Federation of free nations, and on no other basis can the problems of the modern world be solved Such a World Federation would ensure the freedom of its constituent nations, the prevention of aggression and exploitation by one nation over another, the protection of national minorities, the advancement of all backward areas, and peoples, and the pooling of the world's resources for the common good of all On the establish-ment of such a World Federation, disarmament would be practicable in all countries, national armies, navies and air forces would no longer be necessary, and a World Federal Defence Force would keep the world peace and prevent aggres

" An independent India would gladly join such a World Federation and co operate on an equal basis with other countries in the solution of international problems

"Such a Federation should be open to all nations who agree with its fundamental principles In view of the war, however, the Federation must inevitably, to begin with, be confined Such a step taken now to the United Nations will have a most powerful effect on the war, on the peoples of the Alls countries, and on the peace to come

" The Committee regretfully realises, however, that despite the tragic and overwhelming lessons of the war and the perils that overhang the world, the Governments of few countries are yet prepared to take this inevitable step towards World The reactions of the Brtish Govern ment and the misguided criticism of the foreign press also make it clear that even the obvious demand for India's independence is resisted, though this has been made essentially to meet the present peril and to enable India to defend herself and help China and Russia in their hour of need The Committee is anxious not to embarrass in any way the defence of China or Russia, whose freedom is precious and must be preserved, or to jeopardise the defensive capacity of the Umted Nations' But the peril grows both to India and these nations, and maction and sub mission to a foreign administration at this stage is not only degrading India and reducing her capacity to defend herself and resist aggression, but is no answer to that growing peril and is no service to the peoples of the United Nations The earnest appeal of the Working Committee!

far met with no response, and the criticisms made in many foreign quarters have shown an ignor ance of India's and the world's need and some times even hostility to India's freedom significant of a mentality of domination and racial superiority which cannot be tolerated by a proud people conscious of their strength and of the justice of their cause

"The A ICC would yet again, at this last moment, in the interest of world freedom, renew this appeal to Britain and the United Nations But the Committee feels that it is no longer justified in holding the nation back from endea-vouring to assert its will against an imperialist and authoritarian Government which dominates over it and prevents it from functioning in itsown interests and in the interests of humanity The Committee resolves, therefore, to sanction for the vindication of India's inalienable right to freedom and independence, the starting of a mass struggle on non violent lines on the widest possible scale, so that the country might utilise all the non violent strength it has gathered during the last twenty-two years of peaceful struggle Such a struggle must inevitably be under the leadership of Gandhiji and the Committee requests him to take the lead and guide the nation in the steps to be taken

"The Committee appeals to the people of India to face the dangers and hardships that will fall to their lot with courage and endurance, and to hold together under the leadership of Gandhiji, and carry out his instructions as disciplined soldiers of Indian freedom. They must remember that non-violence is the basis of this movement. A time may come when it may not be possible to issue instructions or for instructions to reach our people, and when no Congress Committees can function When this happens, every man and woman, who is participating in this move ment must function for himself or herself within the four corners of the general instructions issued. Every Indian who desires freedom and strives for it must be his own guide urging him on along the hard road where there is no resting place and which leads ultimately to the indepen dence and deliverance of India

"Lastly, while the A-ICC has stated its own view of the future governance under free India, the A-ICC wishes to make it quite clear to all concerned that by embarking on mass struggle it has no intention of gaining power for the Congress The power, when it comes, will belong to the whole people of India"

The A-ICC met in Bombay on the 7th August in a tense atmosphere Maulana Abul Kalum Azad, opening the proceedings, refuted the suggestion that once India was given freedom she would ally herself with Japan 'Events," he observed, 'have reached such a pass that this is not the time for promises. The Congress does not want to make any promises, nor does it want the British Government to make The need of the hour is action and action any right now Let us, therefore, simultaneously sign India's freedom here and now and our agree ment to the United Nations to fight along with them " Mr Gandhi, who followed the President maintained that he had no hatred for the British "In fact," he remarked, "I am the greatest friend of theirs new they are in the 11 with the Blowler Lea no

Strict measures were taken to apply that the reconstructed in their sizes present the movement from spreading or taking that that chain has no solid foundations and roof. In a resolution of the Covernor Conerch that acceptance of the protestial now put root. In a resolution of the Governor General in Council published on the morrow of the A ICC meeting Government expressed restet it the Congress resolution and affirmed their determination to meet the chillengs contained in it The resolution ran -

"The A-ICC have ratified the resolution presed by the norking Committee of the Indian National Congress on August 5. That re of o tion demands the immediate withdrawal of British Power from India and sanctions the starting of a miss struggle on non-violent lines on the widest possible scale

"The Governor General in Council has been aware, too, for some days past of dengerous preparations by the Congress Parts for unlawful and in some cases violent activities, directed among other things to the interruption of communications and public utility services, the organisation of strikes, tampering with the loyalty of Government servants and interference with defence mensures, including recrultment

"The Government of India have waited patiently in the hope that wiser counsels might prevail. They have been disappointed in that hope To a challenge such as the present there | participate in the Government of their country can only be one answer

"The Government of India would regard it as wholly incompatible with their responsibilities to the people of India, and their obligations to the Allies, that a demand should be discussed the acceptance of which would plunge India into confusion and unarchy internally, and would paralyse her effort in the common cause of human freedom

"For the demand of the Congress leaders there is no warrant. In the view of the Government of India that demand is difficult, if not impossible to reconcile with a full sense of responsibility on the part of the leaders of the Congress Party, or a full appreciation by them of the realities of the present situation. The Congress Working Committee admit that 'there may be risks involved' They are right. Acceptance of the resolution must mean the exposure of India to Axis attack from without Internally, the withdrawal of British rule invited civil war, the collapse of law and order the outbreak of communal feud, the dislocation of economic life with its inevitable hardships

"Nor can the Government of India accept the claim of the Congress Parts to speak for India as a whole The Congress Parts has for long occupied a position of great prominence and great importance in Indian political life this day its importance is substantial

"But it is the duty of the Government of India to take a balanced view of the interests of all sections of Indian thought and Indian opinion,

that acceptance of the proposals now put forward by the Congress Parcy must mean the abandonnum of all those for a and poverful elements in the population which have condemned the course of action proposed by the Congress Party and which resent and reset the wide prend dislocation which its acceptance would involve of India s wir effort and of the general life of the community

"Nor can the Congressiculers claim that only thus can India a future be assured. The Con-cress Party is not India a monthplice. Let in the interests of securing their own dominance and in pursuit of their totalitarian policy, its leaders have consistently impeded the efforts made to bring India to full nationhood

"But for the resistance of the Congress Parts to all constructive endersours, India might even now be enjoying self government

" British police for India 6 future stands clear It is that once hostilities ccase, India shall devise for herself with full freedom of decision and on a basis embracing all and not only a single parts, the form of Government which she regards as most suited to her conditions, and that in the mountime Indian leaders shall fully and in the counsels of the Commonwealth and of the United Nations The fullest oppor-tunity for the attainment of self-government by the people of India has been guaranteed by His Majesty's Government

"It is on the basis, fully accepted by His Majesty's Government and by the people of Great Britain that the fullest opportunity shall be open for the attainment of self government. ment by the Indian people, that when the div of victory comes the final structures of India s constitution will be erected by Indians them selve. That those guarantees given by the British Parliament and the British people are accepted by the people of India we firmly believe

"The suggestion put forward by the Congress Party that the millions of India uncertain as to the future are ready, despite the sad lessons of so many martyr countries, to throw them selves into the irms of the invader is one that the Government of India cannot accept as a true representation of the feeling of the people of this great country

"The leaders of the Congress Party have claimed that the withdrawal of British rule with good will will result in establishing a stable provisional government in India, and co operation between this government and the United Nations in resisting aggression and helping China There is no justification for those claims. Nor can the Government of India accept the suggestion that a stable provisional government, could be formed in a moment of time within a did or two of the withdrawal of British Power

Otter I ments in the political life of the control

Mr G ndhi in his letter to the Vicer y has towa dath A sought to f t n re ponsibility on the Gov rn f his oftenment of I dia Th G verm nt of India f lis san ti emphatically repudiate this a gge tion. It is disobedience

clearly preposterous to contend that it 1 they who are re possible for the violence of the last few months which so gravely diso ganised the normal life of the country—and incidentally aggravated the difficulties of the food situation—t a time when the united energies of the people might have been devoted to the vital task, of repellin the enemy and of strikin's ablow for it freedom of India the Commonwealth and the World

A couple of days later an All parties con frame and that held at Delhi to vote a joined of mand that lead to be a located of mand that lead to be a located of mand that lead to be a located

In this connection it is noteworthy in the Hindu Maha able expressed anxiety ove Mr Gandhi life and said the in the vent of the stata of the fast notang ring his he is seriously Gove sme t mu t rel ase him t a ve hit precious life. At his an time th a vent of the control of the state of a poilti it can be also as a poilti of the state of the

Similarly Mr Jinnah refused to be associated with the confe nee on the ground that it elvice of Gandhi c rrespondence how d no chag on the part of Mr G ndhi in the attit de town dath Muslim Leag, e xc pth reit raff n f his oft-repeated political demand having f lis san tion threat to resort to ma s civil disobedience. Now he has undertaken this

dangerous fast with a view to enforcing that demand which, if conceded or agreed to under such coercive method, it is obvious, will destroy the Muslim demand and involve complete sacrifice of the vital and paramount interests of India Moreover, Muslim mere political issues and the complex political problems of this sub-continent, involving the destinies of millions, cannot be settled or solved by means and methods of fasting adopted by Mr Gandhi I do, however, hope that your efforts may lead to the path of reason and peace and then there would come an opportunity for friendly negotiations which might, I trust, result in a settlement satisfactory not only to the two major nations—Hindus and Muslims—but to all other interests and minorities concerned "

During the controversy over Mr Gradhi's fast a mild sensation was caused by the resignation of three members of the Viceroy's expanded Executive Council, namely, Sir H P Mody, Mr M S Aney and Mr N R Sarker Explaining the reasons for their resignations they said that "certain differences arose on what we regarded as a fundamental issue (the action to be taken on Mahatmaji's fast) and we felt we could no longer retain our offices."

Meanwhile, Mr Gandh successfully survived the 21-day foodless ordeal, although on two occasions his condition caused anxiety. On the conclusion of the fast the commotion which had prevailed between February 10 and March 4 gradually subsided

Nevertheless, the situation created by the fast was further considered by the non-party leaders who again met, this time in Bombay, and issued the following resolution —

"We are of the opinion that the deplorable events of the last few months require a reconsideration of their policy both by Government and the Congress The recent talks which some of us have had with Mr Gandhi lead us to believe that a move for reconcliation at the present juncture will bear fruit

"It is our conviction that if Mr Gandhi is set at liberty he would do his best to give guidance and assistance in the solution of the internal deadlock and that there need be no fear that there would be any danger to the successful prosecution of the war

"The Viceroy may be approached on our behalf to permit a few representatives to meet Mr Gandin authoritatively to ascertain his reactions to recent events and to explore with him avenues for a reconciliation"

In pursuance of this resolution representations were made to the Viceroy to let some of the non-party leaders meet Mr Gandhi Declining to give the facilities sought, the Viceroy said that if Mr Gandhi was prepared fully to repudiate the Congress resolution of August 1912, to condemn the incitements to violence represented by his reference to "open rebellion," ctc., and if he and the Congress party were prepared to give assurances for the future, acceptable to the Government, then the matter could be considered further

Silence and Inactivity —The months that followed the termination of Mr Gandhi's fast were marked by comparative silence and inactivity The disturbances, which broke out in August 1942 and continued with varying intensity for six months, virtually cersed in the spring of 1943 This was undoubtedly due to the stern measures taken by Government, but it was also due to the atmosphere of anxiety and sorrow created by Mr Gandhi's fast in February In particular, the disapproval of violence in any form voiced by Mr Gandhi in his letters to the Viceroy, published in the first half of February 1943, served to damp the ardour of those Indians who had imagined that either the Congress or Mr Gandhi had sanctioned acts of . The cumulative effect of these factors was the virtual cessation of sabotage, arson and other acts of mob violence and mischief which had marked the latter half of 1942

The apparent determination of Government to face the situation in the country should Mr Gandhi's fast prove fatal rather than give an "unrepentent rebel" facilities for normal political life, coupled with their refusal to encourage non Gandhite Congressmen and non Congress leaders to explore possibilities of an internal settlement in consultation with Mr Gandhi, produced a stilling stillness in the political atmosphere

Congress activity in 1943 44 therefore was next to nothing Such political life as prevailed in the country was confined to Liberals and non party leaders (see chipter on Liberal Federation) and the Muslim League (see chapter on Muslim League) The only activity directly concerning the Congress or emanating from Congressmen was Mr Gandhi's letter to Mr Jinnah in the summer of 1943 and an occasional move by released Congressmen to meet together and evolve an agreed policy in the absence of official Congress leadership

In response to an appeal made by Mr Jinnah in the Delhi session of the Muslim League inviting Mr Gandhi to write to him, the latter addressed a letter to the League leader offering to meet him Not only were the contents of the letter not published, but Government refused to forward it to Mr Jinnah

The twelve-month period from the summer of 1943 to that of 1944 was one of depression and inactivity. A feable attempt made by right wing Congressmen released from just to whip up some kind of political activity in the country was effectively scotched by Mrs. Sarojini Naidu

Throughout this period there was no authoritative and comprehensive statement of Government's policy towards the Congress, although there were occasional announcements on specific issues. Lord Linkthgow, in his farewell address to the Central Legislature in the autumn of 1943, idopted an attitude of studied silence in respect of the Congress. People thought that it was done in order not to anticipate any new policy which his successor might unfold. This belief was reinforced by broad hints thrown by the Vicerox designate, Lord Wavell, on the eye of his assumption of office

Much was, therefore, expected from Lord Wavell who assumed office in the autumn of 1913 Within a few days of his being sworn in, howe er he turned hi attention to the famine resolution. As you have very poperly said situation in Bengal and naturally devoted all lit is innducous. You my differ about the his energies to the problem in preference to the jeanciton. It is the breath of life for me pol tical question

Thi period vitne-sed a sad event namely the passing avay of Mrs Gandhi bbe died it detention in the Aga Khans Palace a vi tim of heart attack. There were repeated lemands from the public fo her release but (overnment seemed to be of the view that she would be more I ppy where she w s especi lly when adequate medical h lp was m de a allable to her This was the second be 'ment of Mr Gandhi Ince his arrest and detention the Air Gandhi ince his arrest and detention the first being the de th of Mr Mahadev Desai his secret ry and could nte in August 1942. As during the fit in the spring of 1943 friends and relating of the Gandhi family were sllowed to enter the Aga Khan a Palace to visit Mrs Gandhi duri the latt r part of her prolonged illne s and later to attend her funeral

Lett r t Mr i nah—One of the first acts of Mr Ga dhi fter his release in May 1914 (which was briefly mentioned in the last years issue of The Indian 1 or Book) was to release the text of his letter to Mr Jingah release the text on his fetter of hir Jinnail with was written from detention about a year previously in which was withheld by Goermment (see earlie) Here is the text of the letter Dear Qualde-Azam Whose concline art my incarceration Govern in a tasked me it a list of newspares I would like to have I included Darw him with the have been receiving it with more or less regularity when wer it comes to me I read it carefully I have followed the proceeding f the League as reported in the Bann columns I noted your invit tion to me to write to you Hence this lette I welcome your invitation I augge to our meetin face to face I they than talki g through correspondence B t I am in your hands I hope this letter will be sent in your names I nope this rever win be sent Government will let you vis t me One thing I had bette mention There eems to be an If about your invitation Do you say I hould write only if I h ve changed mv he tt? God lone knows men hearts I would like Jou to take me as I m Why hould not you we take me as 1 m why hould not both you and I approach the gre tquestion of commu. I unity a men defermined on finding, a common solution and work together to make our solution and work together to make our solution and work together to make our solution and work together to make our solution acceptable to all who as concerned with it or re interested in it? The publication of this letter had no effect on her limb of the control of the limb of the control of the limb of the control of the limb of the control of the limb of

ll Ga dhe C rresponde this time the correspondence which passed between Mr Gandhi while as a detenu in the Aga Khan s Palace and Lord Wavell the Viceroy saw the light of day The starting point of these letters was a notice served on Mr Gandhi on behalf of the Government of India giving on benait of the dovernment of india group reasons fo his detention and extending to him the right of making a represe tation ag in t it He suggested that Lord Wavell should descend upon Ahmedn gar and the Aga Kh ns Palace in order to probe the heart of your captives adding that if as His Excel ency belie ed the Co gress leaders were hi h minded persons they should be tre ted as such and their inter they should be see the das such and shear mean pret tion of their formula should be acc pted Mr Gandhi also assured Lord Wavell that he and the other Co gress leaders were all friends of the British hower r much they might or the British hower r much they mi it criticise the British Government and system in India II they could but be trusted they would b found to be the greatest helpers in the fight ag inst varism and the like

Lord Wavell writing to Mr Gandhi urged that the greatest contribution that the Congress Party could make towards India a welfare Party could make towards Indias welfare was to abandon the policy of non co-operation and Join vholeheartedly with other parties and the British in h jung Indias economic and political po ress H assured Mr G ndhi that he was only seeking the best means to implement the Crippo Off r without delivering India to contain and turmoil Wisdom and a spirit of goodwill and comprome would be required to arrive t the rint solution but with good leadership he was sure a solutio could be found

In the I tters which Mr Gandhi exchanged with Lo d Wavell he argu d in effect th t the Qui India demand had no sinister significance but nly g ve vivid xpr salon to the peoples desir for real political freedom it only to r nder I dia a ar effort real and whol hearted, that civil disobedience was not actually hearted that civil disobedience was not actually annuched by the August resolution but was ambodied in it as a co tingent sanction that are the second of th wer sought in earnest LO d WAY II coun nace that the esolution was III timed and unfriendly and II at the Congress could not e cape respons to the tragic event which followed alth u h he evue ated the Congress and T Gandhol of sy wish delibe at ly to aid

withdrawal, that violence was never contemplated by him or any Congress leader that Gorhe had declared that, if Congressmen indulged I so in an orgy of violence they might not find him alive in their midst, that the mass move ment was never started by him, that he had contemplated negotiations with Government, and that he was to start the movement only on the failure of negotiations Therefore, he contended that, but for the arrests, no disturbances would have taken place and that he would have strained every nerve first to make the negotiations successful and secondly, if he failed to award disturbances. According if he failed, to avoid disturbances to him, whatever violence was committed by the people, whether Congressmen or others, was committed in spite of the leaders' wishes "Government action in enforcing India wide arrest was so violent that the populace which was in sympathy with the Congress lost self-control The loss of self control cannot imply Congress complicity, but it does imply that the power of endurance of human nature has limitations If the Government action was limitations in excess of the endurance of human nature, it, and therefore its authors, were responsible for the explosions that followed "

What could be the cause of the extraordinary resentment against the Congress into which the Government had betrayed themselves, ed Did the cause lie in the "Quit formula? There was nothing novel he asked India" formula? There was nothing novel in the resolution of August 8 save the "Quit India" formula Mass movements had been India'' formula known to be on the Congress programme even since 1920 but freedom seemed clusive. "Now since 1920, but freedom seemed elusive Hindu-Muslim disunity, now the pledges to the Princes, now the interests of the scheduled classes, now the vested interests of Europeans barred the gateway to freedom Divide and rule was an inexhaustible well The sands of Europeans time were running out Rivers of blood were flowing fast among the warring nations, and politically minded India was looking on helpless ly—the masses were mert Hence the cry of Quit India' It gave body to the freedom movement The cry was unanswerable Those who were annous to play their part in the world crisis found vent in that cry of anguish Its root is in the will to save democracy from Nazism as well as Imperialism

Mr Gandhi contended that the resentment over what he held to be a just and honourable desire confirmed the popular suspicion about the bona fides of Government's professions about democracy and freedom after the war If the Government were sincere they would have welcomed the offer of help made by the Congress Congressmen who had been fighting for India's liberty for over a century would have flocked to the Allied banner as one man for the defence of India's freedom, newly won But the Government did not wish to treat India as an equal partner and ally. They had put out of action those who made that demand

Concluding his reply Mr Gandhi affirmed

foreign propaganda "Therefore the Government should withdraw the indictment I see from the prefice to the indictment that the Government have in their possession 'valuable evidence,' presumably incriminating the detenus. I submit that if the Government cannot safely divulge the evidence, they should discharge the determine and bright to be of these discharge the detenus and bring to book those who after discharge may be caught in the act of committing or promoting crimes '

The Government issued a rejoinder pointing out that the document "Congress Responsibility for the Disturbances in 1942-43" was published for the information of the public and not for the purpose of convicting Mr Gandhi or eliciting by defence The description of the purpose of The document was supplied to his defence him only at his own request and Government nim only at his own request and Government neither invited nor desired his comments upon it. It was, however, one of the purposes of the book to find an explanation of his actions in his "own defeatist outlook towards the threat from Japan, and your fear that unless the Allied forces withdrew in time, India would become a battle field in which the Japanese would ultimately win." The authorities pointed out that both in the "Quit India" campaign and the Congress resolution which was intended and the Congress resolution which was intended to enforce it, Mr Gandhi's object was to be left in a position in which he and the Congress would be free to make terms with Japan The point which was clearly established by the book "Congress Responsibility" was that those disturbances were the natural and predictable consequences of his declaration of an "open rebellion" and the propaganda which had preceded it, and if he contended that the consequences were unintended and unioreseen, that itself was an admission of his own inability to judge the reactions of his followers Government spokesman complained that Mr Gandhi s letter did not contain one word of explanation of his own message "Do or Die"

Mr Gandhi, however, maintained that he had "unequivocally answered all the charges," adding that he had "no regret for what he had done or said in the course of the struggle for India's freedom." As to the Congress resolution of August 8, 1942, Mr Gandhi said that, apart from his belief that it was not only harmless but good all round he had no legal power from his belief that it was not only harmless but good all round, he had no legal power to alter it in any way. That could only be done by the body that passed that resolution, namely, the All India Congress Committee, which was no doubt guided by the Working Committee. Although his offer to meet the members of the Working Committee in order to discuss the situation and to know their mind was rejected, he repeated his offer as he thought that his talk with them might have some value from the Government stand point, but, if his offer had no chance of being accepted so long as he retained his present accepted so long as he retained his present views and if the Government thought that it was only his evil influence that corrupted the people, Mr Gandhi suggested that the members of the Working Committee and other detenus should be discharged He added that, since that the chief purpose was to carry conviction he had only denied the charges in toto but, to Government that the indictment contained on the contrary, had ventured to bring counterno proof of the allegations against him and the Congress. The Government knew that the public in India seemed to have distrusted the indictment and had regarded it as designed not a mere individual was involved in the

of any of the members of the Working Committee diffe ed from his a reeting between them would appear to serve no useful purpose

"The following is the scheme terms of settlement between the Indian National If Gandhi even now sends me direct his Congress and the All-India Muslim League, proposal I am willing to place it before Muslim to which Mr Gandhi and Mr Jinnah agree and which they will endeavour respectively to get the Congress and the I cague to approve Telegram from Mr Rajagopalachari to IM.

- (1) Subject to the terms set out below as regards the constitution for a free India, the Muslim Teague endor-es the Indian demand for independence and will co operate with the if, as your telegram suggests, you did not reject Congress in the formation of a provisional it Gandhili, though not vested with represent interim Government for the transitional period
- (2) After the termination of the war a commission shall be appointed for demarcating contiguous districts in the north west and east of India wherein the Muslim population is in absolute majority. In the areas thus demarcated a plebiscite of all the inhabitants, held on the basis of adult franchise or other practicable franchise, shall ultimately decide the issue of separation from Hindusthan II the majorits decides in favour of the formation of a sovereign state separate from Hindusthan, such a decision shall be given effect to, without prejudice to the right of the districts on the border to choose to join either state
- (3) It will be open to all parties to advocate public into confidence now I am accordingly their points of view before the pichiscite is releasing entire correspondence ending your held
- (1) In the event of separation, a mutual agreement shall be entered into for safeguarding defence, commerce and communications and other essential purposes
- (5) Any transfer of population shall only be on an absolutely voluntary basis
- (6) These terms shall be binding only in case of transfer by Britain of full power and responsibility for the governance of India."

A week later Mr Rajagopalachari again addressed Mr Jinnah in which he said "The proposal I gave you in writing when we last met in Delhi must be still with you, and perhaps you have read it over again and given further thought to it I was much disappointed, as you are aware, at your mability to approve of the terms, but I hope you may perhaps reconsider your position I sincerely believe that the proposals form a fair and satisfactory basis of settlement I shall be grateful to hear from you as to whether you have reconsidered the matter"

As there was no reply from Mr Jinnah, Mr Rajagopalacharı sent ı telegram reminding him of his earlier letters. He said that Mr Gandhi still stood by the formula "I would like now to publish the formula and your rejection. This telegram is sent with Gandhiji's approval I would like you even at this juncture [to reconsider your rejection '

To this Mr Jinnah replied "Your request to publish your formula Your wrong version " Your request our talk that I rejected your formula is unfair and surprising True facts are I was willing to place your formula before Working Committee, Muslim League, although it was not open to any modification but you did not agree to let me do so Hence no further steps were taken My reaction was that I could not personally take responsibility for accepting or

Basis for rejecting it, and my position remains same today proposal I am willing to place it before Muslim

> Telegram from Mr Rajagopalachari to Mr Jinnah dated 4 7 1944 "Thanks telegram My letter of 17,111 shows how I felt over what if thought was rejection of formula so far as you are personally concerned. Shall be glad, indeed titise or special authority in this matter definitely approves my proposal and authorises my to approach you on that basis. Now again he reaffirms his assent. Weight of his opinion would most probably secure Congress acceptance You were unwilling to accept my formula, but were willing to place it before League Council I think no purpose served by such procedure as long as it does not have your own support "

> Mr Jinnah replied the next day unable go beyond my telegram July 2 '

> Telegram from Mr Rajagopalachari dated 87-11 addressed to Mr Jinnah "Your telegram of July 5 received today With it private negotiation ends It is necessary to take public into confidence now I am accordingly wire July 5

Mr Gandhi's Gesture - Close on the heels Mr Gandhi's Gesture—Close on the hecis of the publication of the Gandhi cum CR offer to Mr Jinnah, Mr Gandhi made another gesture this time to British authority According to a British journalist (Mr Stuart Gelder), who had had a series of interviews with Mr Gandhi, the latter "is prepared to accept and to advise the Congress to participate in a war time National Government in full control of the civil administration leaving the Mercay the civil administration, leaving the Vicerov and the Commander-in Chief in full control of the British and Indian armies It would be expected that the establishment of such a Government would be accompanied now by a guarantee of Indian independence after the of the British and Indian armies war Mr Gandhi has also approved the proposal submitted to Mr Jinnah by Mr C Rajagopala Mr Gandhi pointed out that he had no authority to speak in the name of the Congress without consulting the Working Committee, but there is no doubt whatever that his views and the Hindu-Muslim proposals as endorsed by him would be accepted by them without hesitation

"I asked Mr Gandhi whether he would start civil disobedience if the Working Committee were released from jail and the Government felt unable to give India what they wanted He replied 'I have no intention of offering civil disobedience today I cannot take the country back to 1942 History can never be repeated Even without the authority of the Congress, if I wanted to do it I could start civil disobedience today on the strength of

India would be sail fied with a hational Govern ment in full control of the civil administration port and other communication facilities they t quired although these would be under the Kational Government's control The ordinance Sational Government a centrol. The ordinance would be nothing by such account of the relation of the state of that both the Provincial and Central Go ern, ments would be responsible to it e people of India The National Government would be in the position of off ring advice and criticism on military affairs and it e portfolio of Defence would be in the I and of it e National Go ern would be in the lands of the National Go orn As I have said to the Irres they were meant ment which would be graunisely intere ted primarily to be slown to you. Mr Gelder in the definer of the coultry and would be in doubt will time best. I mothles gave the help in hapting polities Mr Gandli resiliers. The publicatin will not ritides be a Detaing that the Allies cannot def t Japan will out in diguise if it inter lew enables you to grant carryl go no portail as on the Indian soil and at least of only request contained in my therefore they would comit use do so but its expenses of these operations should not be vitted to the proper so of these operations should not be vitted to the proper so of these operations should not be vitted to the proper so of these operations should not be vitted to the proper so of these operations should not be vitted to the proper so of the proper so be ne by India

Aft r independence had been as ured by the statements you made to Mr Gelder and the form tion of a provisional Government of the statements you made to Mr Gelder and the detaration of Indian Independence after the wr l would no biby ease to function as advier to the Congres As a tast in you will submit to 1 a definite and teacher and exponent of non violenc le would have to stand and hat have would created.

food situation cannot be improved and suffering, reviewed anew he said the point therefore ameliorated, and as power and responsibility for me to discuss with the Working, Committee for civil administration are transferred from Britt he Indian hands

I told Mr Gandli that with things as they are I could not belie e that the Government in 194 I was first to negotiate would transfr authority now or concede in the contract of the

Mr Rajagopalachari told me that it was quite possible for the British Government to make a friend of Mr Gandhi Those who ment in full control of the criva sourcessons. Such a lio make a friend of Vir Usangni Linous and This was not the position in 194 Such a lio make a friend of Vir Usangni Linous and Government would be formed of people chosen have within the formed as the control Assembly It might not be a first wave to bettend him. Government would be formed of people enotes here then thin the sety would contain the interpretation of the set of the se which was not unimportant such befriending was necessary and tie present was the psyclo-logical moment for it. A victorious Britain would lose nothig by such a gesture but gain a great d. 1 of permanent value. His mind today le nt towards aceing a National Government in tailed in Indi before tie end

Mr Gandlia letter to Viceroy 15th July 1944 You ha e no doubt seen the authent copies now published in the Indian Ires of the stat ments given by me to Mr Gelder As I have said to the I rest they were meant primarily to be slown to you Mr Gelder

Viceroy a Reply - nd July 1944 Thank you for your I tter of I th July I lave e n the statements you made to Mr Gelder and

continue to knock so long as there is the least Government on the one hand and the Govern hope of an honourable settlement. After the foregoing was written, I saw Lord Munster's speech in the House of Lords. The summary given by him in the House of Lords fairly represents my proposal. This summary may serve as a basis for mutual friendly discussion."

Government on the one hand and the Government on the one hand and the Government on the one hand and the Government on the one hand and the Government on the one hand and the Government on the one hand and the Government on the one hand and the Government on the one hand and the Government on the one hand and the Government on the one hand and the Government on the one hand and the Government on the one hand and the Government on the one hand and the Government on the other, and existing financial arrangements can only be reopened at the instance of one or the other. hope of an honourable settlement

Viceroy's reply —15th August, 1944 "Thank you for your letter of 27th July Your proposals

"That you should undertake to advise the Working Committee (a) that in view of the Working Committee (a) that in view of changed conditions mass Civil Disobedience envisaged by the resolution of August, 1942 cannot be offered and (b) that full cooperation in the war effort should be given by Congress, provided that His Majesty's Government (a) declare immediate Indian independence, and (b) form a 'National Government' responsible to the Central Assembly subject to the roots of the derivative. Assembly, subject to the proviso that, during the pendency of the wir, the military operations should continue as at present but without they are real and can be solved only by mutual involving any financial burden on India"

"His Majesty's Government remain most anxious that a settlement of the Indian problem anyous that a settlement of the Indian problem should be reached But proposals such as those put forward by you are quite unacceptable to His Majesty's Government as a basis for discussion, and you must realise this if you have read Mr Amery's statement in the House of Commons on July 28th last They are indeed very similar to the proposals made by Maulana Abul Kalam Azad to Sir Stafford Cripps in April 1942 and His Majesty's Government's reasons for rejecting them are the same as they were then as they were then

"Without recapitulating all these reasons in detail, I should remind you that His Majestys Government at that time made it clear (a) That their offer of unqualified freedom after the cessation of hostilities was made conditional upon the framing of a constitution agreed by the main elements of India a national life and the negotiation of the necessary treaty arrangements with His Majesty's Govern national life and the negotiation of the necessary treaty arrangements with His Majesty's Government, (b) That it is impossible during the period of lostilities to bring about any change in the constitution, by which means alone a National Government," such as you suggest, could be made responsible to the Central Assembly. The object of these conditions was to ensure the fulfilment to their duty to safeguard the interests of the recent and relations.

safeguard the interests of the racial and religious minorities and of the Depressed Classes, and their trenty obligations to the Indian States

It was upon the above conditions that Majesty's Government invited leaders to take part in an interim government means which would operate under the existing con-stitution. I must make it quite clear that

"It is clear, in these circumstances, that no purpose would be served by discussion on the basis which you suggest. If, however, the leaders of the Hindus, the Muslims and the important minorities were willing to co operate in a transitional Government established and working within the present constitution, I believe good progress might be made For such a transitional government to succeed there must, before it is formed, be agreement in principle between Hindus and Muslims and all important elements as to the method by which the new constitution should be framed This agreement is a matter for Indians them-National selves Until Indian leaders have come closer Central together than they are now I doubt if I during myself can do anything to help Let me remind

"The period after the termination of hostilities for which the transitional Government would last would depend on the speed with which the new constitution could be framed. I see no reason why preliminary work on that constitu-tion should not begin as soon as the Indian leaders are prepared to co operate to that end If they can arrive at a genuine agreement as to the method of framing the constitution no unnecessary time need be spent after the war in reaching final conclusions and in agreeing on treaty arrangements with His Majesty's Government There again, the primary responsibility rests on the Indian leaders"

Mr Gandhi's reaction—Commenting on the Viceroy's reply, Mr Gandhi said "the Viceroy's proposition means that unless all the main parties agree as to the constitution of the future, and there is agreement between the British Government and the main parties there is to be no change in the constitutional position, and the Government of India as at present is to be carried on The names of the parties given in the Government reply are illustrative only. I have no doubt that, on due occasions, more will be exhibited as from a conjurer's bag and who knows how and when the British Government will agree to surrender control. It is clear as crystal that the British Government do not propose to give up the power they possess over the 400 millions, unless the latter develop strength enough to wrest it from them. I shall never lose hope that India will do so by purely moral the British Government and the main parties lose hope that India will do so by purely moral

stitution I must make it quite clear that until the war is over, responsibility for defence and military operations cannot be divided and Mr Jinnah although some Liberal leaders from the other responsibilities of Government and that until hostilities cease and the new constitution is in operation, His Majesty's spokesman derisively referred to it as "from Government and the Governor General must 'Quit India' to 'Split India' A flerce consecution their responsibility over the entire field So far as the question of India's share of the cost of the war is concerned, this is essentially does not block the way, but the British Government a matter for settlement between His Majesty's Political circles in India generally welcomed

M Gandh alo seemed to cnt mpl t a n w driv amo t I dt 00000 vill g vid ntly ut to bl to tt m n, jo t war re onstruction pl ns be ng ad mbrated by Government and non official agencie

his followers felt that what oppressed Mr based on the support of the main political Gandhi was "the propaganda of hes, the black markets, the criminal tendency to hoard while others starve, and, above all, the people's own such a National Government during the war, starve, and, above all, the people's own such a National Government during the war, starve, and sta complacency in regard to these crying evils and to the question of India's freedom 'A measure of heart-searching on the part of Congressmen followed, but resulted in nothing spectacular Eventually, the contemplated food fast gave place to a "work fast" for a few weeks

Viceroy's Appeal—Addressing, the Associated Chambers of Commerce in December 1944, the Viceroy wished India could solve her political problems and present a united front to what would be, for at least some years to come, a stern, difficult, troubled world "If she is still tossing with the fever of political faction, or if her political doctors decide that she must undergo a major surgical operation such as Pakistan, she may miss the opportunity that is hers to take, but can be taken only by a nation at health within itself and fit for a struggle that will test every nerve and sinew that struggle for greater well being and greater happiness in this great land If I may be permitted to assume for the moment the role of medical adviser to political India, my advice would be something like this

'I do not believe that your condition calls for a serious operation, I should certainly try all other possible remedies first But I do not think that that "Quit India" mixture or those Cathardes has been also been al Satyagraha pills have done you much good I should suggest your leaving off medicines altogether, and you may find that you are not as ill as you think Perhaps some fresh air and work in the fields would do you good'

"In other words, I do not believe that there are now real differences in principle between India and Britain, or that the communal problem, difficult though it is, is insoluble. But also I do not believe that we can solve our problems by mutual recriminations and by harping on past grievances and mistakes. Our best hope lies in working together, without trying to lay down detailed conditions or to Our best hope lies in working conditions or to trying to lay down detailed conditions or to decide everything before we begin work return to the medical metaphor for a moment, I think the first requirement for a return to health is a faith cure, a belief in the good intentions of the British people and in their genuine desire for a settlement and for the welfare and self-government of the Indian people I can certainly assure you that I should not be here if I did not believe in those

It is commonly said that our current and post-war problems can only be solved by a National Government, but the precise meaning of the term is seldom or never defined afraid that to some a National Government may mean a government in which their own particular party is in power I think of a versation, asked me about the attitude of the National Government as one formed to meet Muslim League with regard to some interim a national crisis in which 'none are for a party but all are for the State' I contend that we

it would quite clearly and quite definitely have to function under the existing Constitution, no material change of which is possible during the war And its primary task would have to be support of the war effort, not by mere lip service which is useless, but sincerely and whole-heartedly

"It is now once more fishionable to demand a move by His Majesty's Government 'to solve the deadlock' The previous rejections of their offers must initially make His Majesty's Government chary of a further advance until they feel that the spirit of compromise and ' co operation is real But their desire for a solution remains perfectly genuine, and I have tried to indicate lines on which progress might be attempted, if the Indian leaders desire it "

Desar-Liagat Talks—In the winter of 1944-45 an interesting development occurred which at least provided an opening for big political changes in the summer of 1945 Mr. Bhulabhai J Desai, Leader of the Congress Party in the Assembly, initiated negotiations with Nawabzada Liagat Ali Khan, Deputv Leader of the Muslim League Party in the Assembly These led up to a proposal by the former which met with a measure of encouragement from the latter At one time it was believed to have resulted in a pact between the two in their individual capacity, it being assumed that neither would have continued in their efforts without the tacit approval of their respective principals, namely, Mr Gandhi and Mr Jinnah The facts, (as revealed by Nawalzada Liaqat Ali Khan in September 1945) showed that Mr Desai had suggested a formula for an interim agreement between the Congress and the League It is known that Mr Desai discussed this formula with Lord Wavell and that, although its main provisions were varied, it provided the basis for the proposal made by the Viceroy in June 1945 and in a sense for the Simla Conference (see later) Here is the Nawabzada's version, (see later) Here is the Nawabzada's version, which is the only authoritative statement on the subject

'Mr Desai met me after the last autumn session of the Central Legislative Assembly and we informally discussed the prevailing distressing conditions in the country, economic and otherwise It was recognised all round that the Government of India, with its present composition, was incapable of dealing effectively with the various problems which had arisen and were bound to arise in the future

"Mr Desa, during the course of the con-versation, asked me about the attitude of the arrangement at the Centre and a temporary reconstitution of the Governor-General's Indian government, which in spite of all the criticism and abuse heaped on it is doing an essential job of work for India, and is doing it on the whole extremely well. This does not mean to say that some other National covernment—national by my definition, but the confidence of all the peoples so that it may be able to help them in their present plight and deal more effectively than what had been done in the past with the serious situation that was bound to arise in the future covernment—national by my definition, but I explained to blat the position in the (b) Lepter values of mi rities (in par il it of the resolution that were pused from it that it Second (a ter and it b) () time to lim by the Auton Least in life () The Command of in Cl of connection, and tail him that my personal () The Command of in Cl of time to tim by the Aurin and the first personal constraints and tail limit that my personal transmission and tail limit that my personal transmission and tail limit proper to the state of

with me with a view to the formation of a new Executive Council more representative of organised political opinion

"The proposed new Council would repreent the main communities and would include equal proportions of caste Hindus and Muslims It would work, if formed under the existing constitution But it would be an entirely Indian council, except for the Viceroy and the Commander-in Chief, who would retain his position as War Member

"It is also proposed that the portfolio of External Affairs which has hitherto been held by the Viceros should be placed in charge of an Indian member of the Council, so far as the interests of British India are concerned

"A further step proposed by His Majesty's Government is the appointment of a British High Commissioner in India, as in the Dominions, to represent Great Britain s commercial and in this fresh attempt to make progress towards other such interests in India

"Such a new Laccutive Council will, you realise, represent a definite advance on the road to self-government. It will be almost entirely Indian, and the Linance and Home Members will, for the first time, be Indians, while an Indian will also be charged with the management of India's foreign affairs, moreover the members will now be selected by the Governor General after consultation with political leaders though though their appointment will of course be subject to the approval of His Majesty the King-Emperor

"The Council wil work within the framework of the present constitution and there can be no question of the Governor-General agreeing not to exercise his constitutional power of control, but it will of course not be exercised unreasonably

'I should make it clear that the formation of this interim Government will in no way prejudice the final constitutional settlement

The main tasks for this new Executive Council

- (1) to prosecute the war against Japan with the utmost energy till Japan is utterly defeated,
- (2) to carry on the Government of British India, with all the manifold tasks of post-war development in front of it, until a new permanent constitution can be agreed upon and comes into force, and
- (3) to consider when the members of the Government think it possible, the means by which such agreement can be achieved. The third task is the most important. I want to make it quite clear that neither I nor His Majesty's Government have lost sight of the need for a long-term solution, and that the present proposals are intended to make a longterm solution easier
- I have considered the best means of forming such a Council, and have decided to invite the following to Viceregal Lodge to advise

Those now holding office as Premier in a provincial Government, or, for provinces now under Section 93 Government, those who last held the office of Premier,

The leader of the Congress Party and the Deputy Leader of the Muslim League in the Central Assembly the leaders of the Congress Parts and the Muslim League in the Council of State, also the leaders of the Nationalist Party and the I propern Group in the Assembly

Mr. Gandhi and Mr. Jinnah as the recognised leaders of the two main political parties,

Rao Bahadur N Siva Raj to represent the Scheduled (Insees, and

Master Jara Singh to represent the Sikhs

"Invitations to these gentlemen are being handed to them today, and it is proposed to assemble the conference on June 25 at Simla, where we shall be cooler than at Delhi

"I trust that all those invited will attend the confirmee and give me their help. On me and on them will lie a heavy responsibility a final settlement of India s future

"If the meeting is successful I hope that we shall be able to agree on the formation of the new Executive Council at the Centre

"I also hope that it will be possible for ministries to reassume office and again undertake the tasks of Government in the provinces administered under Section 93 of the Constitution Act and that these ministries will be coalitions

"If the meeting should unfortunately fail, we must carry on as at present until the parties are ready to come together. The existing Executive Council which has done such valuable work for India will continue if other arrangements cannot be agreed to

"But I have every hope that the meeting will succeed, if the party leaders will approach the problem with the sincere intention of working with me and with each other

"I can assure them that there is behind the proposal a most genuine desire on the part of all responsible leaders in the United Kingdom and of the British people as a whole to help India towards the goal I believe that this is more than a step towards the goal, it is a considerable stride forward, and a stride on the right path

"I should make it clear that these proposals affect British India only and do not make any alteration in the relations of the Princes with the Crown Representative

"With the approval of His Majesty's Government, and after consultation with my Council, orders have been given for the immediate release of the members of the Working Committee of the Congress who are still in detention, I propose to leave the final decision about the others still under detention as the result of the 1942 disturbances to the new Central Government, if formed, and to the provincial Governments

The appropriate time for fresh elections for the central and provincial legislatures will be discussed at the conference

"Finally, I would ask you all to help in creating the atmosphere of goodwill and mutual confidence that is essential if we are to make

India's military reput if n ne er stood hi ler in the world than it does at present th nks of the exploit of her sons drawn from all jarts of the country lier represent thes at international conferences lave won high reval for thier statesmanlike attitude Sympathy for Indi s aspirations and progress tow rd prosperity was never greater or more

wide pread We have thus great as ets if we can use them wisely. But it will not be easy it will not be quick there I very me ch to do there are many ritfalls and dang as Tr e is on Il sides something to forgi e and forget

I belie e in the future of In iia and as f as in m lies I will furtler I r greatness ask you ill for your co-operation and goodwill 1

will represent them at your table? Not the and that the Congress Premiers had been held Congress which seeks to represent without up pending the Working Committees decision distinction all Indians who desire and work He therefore requested His lacellency to clarify for independence. Hence the existence of the the issue raised by him (Mr. Gindhi) and to Hindu Mahasabha claiming to represent Hindus send an invitation direct to the Congress as such I apprehend that even that body will declaim representing easte Hindus More over your broadenst seems rigorously to exclude the use of the world independence Accordingly that he had sent an invitation to the Congress it seems to me to demand a revision to bring it in line with modern Indian thought."

that he had sent an invitation to the Congress President As for the other points raised by Mr Gandhi, His Lecellency said that he it in line with modern Indian thought"

The Viceroy denied that the term "caste Hindus" was used with offensive intention, adding that what was meant was that there should be equality between Muslims and Hindus other than the members of the scheduled eastes Subject to this, the exact composition of the Executive Council would have to be decided after discussion at the Simla Conference On the question of independence, His Excellency sud, on the authority of the Secretary of State for India, that "the offer of Murch 1942 stands in its entirety. The offer is based on two in its entirety The offer is based on two main principles first, no limit is set to India's freedom to decide her own destiny whether as a free partner in the Commonwealth or even without it, secondly, that this can only be achieved under a constitution or constitutions framed by Indians to which the main elements are consenting parties" His Excellency added that it would not be practicable to modify the terms of his broadcast, but that he intended to deal at the Conference itself with any points requiring clarification

Replying, Mr Gandhi said "If flyity of parity between caste Hindus and Muslims is unchangeable, religious division will become officially stereotyped on the eve of independence Personally, I can never subscribe to it, nor the Congress, if I know its mind In spite of having overwhelmingly Hindu membership, the Congress has striven to be purely political I am quite capable of advising the Congress to nominate all non-Hindus and most decidedly non-caste Hindus. You will authe unconscious. non-caste Hindus You will quite unconscious-ly, but equally surely, defeat the purpose of the Conference if parity between caste Hindus and Muslims is unalterable Parity between Congress and the League is understandable I am eager to help you and the British people, but not at the sacrifice of fundamental and universal principles, for it will be no help"

In a letter supporting his telegrams, Mr Gandhi affirmed that he could not officially represent the Congress but offered to place himself at the Viceroy's services if he could help without being a member of the conference Mr Gandhi suggested that the President of the Congress be invited to the Conference

The Viceroy wired in reply that he understood Mr Gandhi's position, but that he hoped means might be found for him (Mr Gandhi) to take part in the proceedings of the Conference His Excellency requested Mr Gandhi to invite the Congress President to the Conference on behalf of the Vicerov

communication was tardy, the Working Comproceed to Simla The emittee of the Congress had not been called were asked to do likewise

President in order to save time

The Viceroy responded with an intimation could not change his broadcast which constituted the terms of reference to the Conference, but added that "none of the persons or parties concerned is expected or required to accept or reject the proposals now The only immediate question is whether the proposals are worth discussing at the Conference"

Mr Gandhi answered that the fact that the members were free at the conference to accept or reject the proposals cleared the ground for the invitees to attend the Conference Although his objection to parity between Muslims and Caste Hindus continued, he agreed to meet the Although Viceroy on the day preceeding the Conference

Barring the Congress and the League, which wanted certain points cleared, and the Hindu Mahasabha, which was resentful not only of the element of parity contained in the scheme but also of the exclusion of Hindus from representation on the Conference the general opinion in India was favourable to the Wavell Plan In Britain, the opinion was enthusiastically in support of it Mr Amery declared that the Viceroy's veto would be exercised in the interests not of Britain but of India

On receipt of the Viceroy's invitation the Congress President informed His Lycelleney that the question would be placed before the Congress Working Committee and that the latter's decision would be communicated to the Viceroy

Mr Gandhi gave a lead to the Working Committee by observing that the composition of the Simla Conference was "a very great advance upon all similar bodies" Whereas in all the previous conferences convened by the British Government the members had been nominated by the Government principally, on the present occasion the invitees were underon the present occasion the invitees were underno obligation to the Government for their
nomination, so that they need not vote orspeak merely to placate the Government
This was echoed by the Congress President
who observed that "we are very near our goal
of complete independence There remain only
one or two hurdles but with determination,
unity and strength we will cross them"

The Congress Working Committee met in might be found for him (Mr Gandhi) to take part in the proceedings of the Conference of the Congress President to the Conference on behalf of the Vicerov

Without the acceptance of the amendments suggested by him, Mr Gandhi declined to invite the Congress President on behalf of the Viceroy, and pointed out that private telegraphic communication was tardy, the Working Committee of the Congress had not been called were asked to do likewise
